2006 NOV 27 P 1:06
OFFICE OF INTERNATIONAL
CORPORATE FINANCE

[1] Federal Law No. 208-FZ, dated December 26, 1995, "On Stock Companies."

[2] Federal Law No. 39-FZ, dated April 22, 1996, "On the Securities Market."

[3] Regulation "On Disclosure of Information by Issuers of Securities," approved by the Resolution of the Federal Service for the Financial Markets of Russia ("**FSFM**") No. 05-5/pz-n, dated March 16, 2005.

[4] Under Article 1.4 of Regulation No. 05-5/pz-n, the information must be published in the on-line news bulletins maintained by one of the information agencies and/or other organizations with the status of mass media authorized by the FSFM to act as a conduit for the public disclosure of information to the securities markets. If the Issuer's securities are traded on Russian stock exchanges, such publication must occur before 10 a.m. on the last day, and prior to such publication the Issuer must notify such stock exchanges of the information and the issuer's intent to disclose it.

[5] Under Article 1.7 of Regulation No. 05-5/pz-n, where the information is to be published in a periodical such information must be also published in the Supplement to the Journal of FSFM (the "**FSFM Supplement**") within: (i) 5 days, if the FSFM Supplement is the only periodical where the issuer publishes information; and (ii) 30 days, in other cases.

	Document or Information	When/Where Required to be Made Public or Distributed	Source(s) of Requirement
4.	Registered amendments to the registered Prospectus and/or decision on issuance of the Issuer's securities	Must be made available to any interested persons at any time upon request	Regulation No. 05-5/pz-n, Sections 1.8 and 1.9
5.	Registered report[6] on the results of the issuance of the Issuer's securities	Must be published on an Authorized Website within 3 days after receipt of written notification from the competent regulatory authority regarding registration of the report Must be made available to any interested persons at any time upon request	Company Law, Article 92(1) Regulation No. 05-5/pz-n, Sections 1.8, 1.9 and 2.6.2
6.	Notice concerning the termination of a securities issuance registration, and the procedure for withdrawing such securities from circulation and returning funds to subscribers	Must be sent to the owners and nominal holders of the Issuer's securities not later than 2 months after receipt of the written notification regarding termination of registration of the securities issue Must be published in mass media available to the majority of the securities' owners, and in the FSFM Supplement	Regulation No. 36,[7] Sections 5.1 and 5.3
	B. Reporting During a Securities Issuance that Requires Registration of a Prospectus		
7.	Information regarding the adoption by the Issuer of a decision to place (*reshenie o razmeshenii*) securities	Must be published in each of the following within the specified time after preparation of the minutes of the meeting of the Issuer's governing body which adopted such decision: (i) an Agency Website within one day, (ii) an Authorized Website within 3 days and (iii) a Periodical within 5 days Must be made available to any interested persons at any time upon request If the Issuer is also required to disclose information in the form of "key-events," such information should be disclosed as a "key-event" as set forth in item 27	Company Law, Article 92(1) Securities Law, Article 19(2) Regulation No. 05-5/pz-n, Sections 1.7, 1.8, 1.9, 2.1.1, 2.2.1 and 2.2.2
8.	Information regarding approval of the decision on issuance (*reshenie o vipuske*) of the Issuer's securities	Must be published in each of the following within the specified time after preparation of the minutes of the meeting of the Issuer's governing body which adopted such decision: (i) an Agency Website within one day, (ii) an Authorized Website within 3 days and (iii) a Periodical within 5 days Must be made available to any interested	Company Law, Article 92(1) Securities Law, Article 19(2) Regulation 05-5/pz-n, Sections 1.7, 1.8, 1.9, 2.1.1 and 2.3.1

[6] Under amendments to Securities Law introduced by Federal Law No. 194-FZ, dated December 27, 2005, which came into effect on December 30, 2005, under certain circumstances the Issuer may file with a competent regulatory authority a notification on the results of issuance in lieu of registration of a report. No amendments to Regulation 05-5/pz-n governing the need and procedure for disclosure by the Issuer of such notification have yet been made.

[7] Regulation "On the Procedure for Return to the Securities' Owners of Funds (Other Property) Received by the Issuer as Payment for the Securities the Issue of which has been Declared Invalid or Uncompleted," approved by the Resolution of the Federal Commission on the Securities Market, No. 36, dated September 8, 1998.

	Document or Information	When/Where Required to be Made Public or Distributed	Source(s) of Requirement
		persons at any time upon request If the Issuer is also required to disclose information in the form of "key-events," such information should be disclosed as a "key-event" as set forth in item 27	
9.	Information regarding the registration of the issue of the Issuer's securities and regarding the procedure for disclosure of the contents of the Prospectus	Must be published in each of the following within the specified time after receipt of written notification from the competent regulatory authority regarding registration of the securities issue: (i) an Agency Website within one day, (ii) an Authorized Website within 3 days and (iii) a Periodical within 5 days Must be made available to any interested persons at any time upon request If the Issuer is also required to disclose information in the form of "key-events," such information should be disclosed as a "key-event" as set forth in item 27	Company Law, Article 92(1) Securities Law, Articles 19(2) and 23 Regulation No. 05-5/pz-n, Sections 1.7, 1.8, 1.9, 2.1.1, 2.3, 2.4.1, 2.4.2 and 4.2
10.	Date of commencement of the securities' placement, if such date was not disclosed as set forth in item 9	Must be published in each of the following: (i) an Agency Website within 5 days before the placement commencement date and (ii) an Authorized Website within 4 days before the placement commencement date Must be made available to any interested persons at any time upon request	Company Law, Article 92(1) Securities Law, Article 19(2) Regulation No. 05-5/pz-n, Sections 1.8, 1.9, 2.1.1, 2.5.1 and 2.5.2
11.	Change of the date of commencement of the securities' placement	Must be published within one day before the new placement commencement date on an Agency Website and on an Authorized Website Must be made available to any interested persons at any time upon request	Company Law, Article 92(1) Securities Law, Article 19(2) Regulation No. 05-5/pz-n, Sections 1.8, 1.9, 2.1.1, 2.5.1 and 2.5.3
12.	Securities' placement price (procedure for its determination), if such information was not disclosed as set forth in items 9 or 10	Must be published on an Agency Website and on an Authorized Website before placement of securities Must be made available to any interested persons at any time upon request	Company Law, Article 92(1) Securities Law, Article 19(2) Regulation No. 05-5/pz-n, Sections 1.8, 1.9, 2.1.1, 2.5.1 and 2.5.4
13.	Information about suspension of placement of securities	Must be published in each of the following within the specified time after (a) preparation of the minutes of the meeting of the Issuer's governing body which adopted the decision on amending the decision on issuance and/or the Prospectus (b) preparation of the minutes of the Issuer's governing body on amending the terms of the corporate resolution on placement of securities and (c) receipt by the Issuer of a written request (order) from the competent regulatory authority to suspend the placement: (i) an Agency Website within one day, (ii) an	Company Law, Article 92(1) Securities Law, Article 19(2) Regulation No. 05-5/pz-n, Sections 1.7, 1.8, 1.9, 2.1.1, 2.5.1 and 2.5.5

	Document or Information	When/Where Required to be Made Public or Distributed	Source(s) of Requirement
		Authorized Website within 3 days and (iii) a Periodical within 5 days Must be made available to any interested persons at any time upon request	
14.	Information about recommencement of placement of securities, which was suspended	Must be published in each of the following within the specified time after receipt of written notification from the competent regulatory authority regarding (a) registration of amendments to the decision on issuance and/or the Prospectus or (b) refusal to register amendments to the decision on issuance and/or the Prospectus by the authorities or (c) termination of the suspension of the securities placement: (i) an Agency Website within one day, (ii) an Authorized Website within 3 days and (iii) a Periodical within 5 days Must be made available to any interested persons at any time upon request	Company Law, Article 92(1) Securities Law, Article 19(2) Regulation No. 05-5/pz-n, Sections 1.7, 1.8, 1.9, 2.1.1, 2.5.1 and 2.5.6
15.	Information about completion of placement of securities	Must be published in each of the following within the specified time before (a) expiration of the placement period set forth by the registered decision on issuance of the securities or (b) placement of the last security: (i) an Agency Website within one day, (ii) an Authorized Website within 3 days and (iii) a Periodical within 5 days Must be made available to any interested persons at any time upon request	Company Law, Article 92(1) Securities Law, Article 19(2) Regulation No. 05-5/pz-n, Sections 1.7, 1.8, 1.9, 2.1.1, 2.5.1 and 2.5.7
16.	Information about registration of the report[8] on the results of issuance of the Issuer's securities	Must be published as described in item 27 Must be made available to any interested persons at any time upon request	Company Law, Article 92(1) Securities Law, Article 19(2) Regulation No. 05-5/pz-n, Sections 1.8, 1.9, 2.1.1 and 2.6.1
	C. Periodic and Current Reporting		
17.	Annual Report (if the Issuer's securities were (are being) publicly placed)	Must be published on an Authorized Website within 3 days after preparation of the minutes of a General Meeting of Shareholders ("GMS") which approved the Annual Report Must be published annually in mass media available for general information Must be made available to any interested persons at any time upon request	Civil Code, Article 97(1) Company Law, Article 92(1) Regulation No. 05-5/pz-n, Sections 1.8, 1.9, 8.1.1 and 8.2.4

[8] Under amendments to Securities Law introduced by Federal Law No. 194-FZ, dated December 27, 2005, which came into effect on December 30, 2005, under certain circumstances the Issuer may file with a competent regulatory authority a notification on the results of issuance in lieu of registration of a report. No amendments to Regulation 05-5/pz-n governing the need and procedure for disclosure by the Issuer of information on making of such notification have yet been made.

	Document or Information	When/Where Required to be Made Public or Distributed	Source(s) of Requirement
18.	Audited annual financial statements prepared in accordance with Russian statutory accounting principles (if the Issuer's securities were (are being) publicly placed and if the Issuer prepares quarterly reports (see item 26) and discloses "key-events" (see item 27))	Must be included in the quarterly report for the 1st quarter, which must be published as described in item 27 Must be published not later than June 1 of each year in mass media available to all shareholders Must be made available to any interested persons at any time upon request	Civil Code, Article 97(1) Law on Accounting,[9] Article 16 Company Law, Article 92(1) Order of Ministry of Finance No. 101, dated November 28, 1996 Regulation No. 05-5/pz-n, Sections 1.8, 1.9, 8.1.1, 8.3.1, and 8.3.4
19.	Audited annual financial statements prepared in accordance with Russian statutory accounting principles (if the Issuer's securities were (are being) publicly placed and if the issuer does not prepare quarterly reports and does not disclose "key-events")	Must be published on an Authorized Website within 45 days after the deadline for filing such statements with the authorities Must be published not later than June 1 of each year in mass media available to all shareholders Must be made available to any interested persons at any time upon request	Civil Code, Article 97(1) Law on Accounting, Article 16 Company Law, Article 92(1) Order of Ministry of Finance No. 101, dated November 28, 1996 Regulation No. 05-5/pz-n, Sections 1.8, 1.9, 8.1.1, 8.3.1, 8.3.4 and 8.3.5
20.	Information on approval or failure to approve (with explanation of the reasons) of the annual financial statements prepared in accordance with Russian statutory accounting principles (if the Issuer's securities were (are being) publicly placed and if the issuer does not prepare quarterly reports and does not disclose "key-events")	Must be published on an Authorized Website within 3 days after preparation of the minutes of the annual GMS which approved (or did not approve) the annual financial statements Must be made available to any interested persons at any time upon request	Company Law, Article 92(1) Regulation No. 05-5/pz-n, Sections 1.8, 1.9, 8.1.1 and 8.3.5

Internal regulations of the Issuer's governing bodies and any amendments thereto or new versions thereof (if the Issuer's securities were (are being) publicly placed and if the Issuer prepares quarterly reports and discloses "key–events")	Must be published on an Authorized Website within 3 days after (i) preparation of the minutes of the meeting of the Issuer's governing body which approved the internal regulations; or (ii) the requirement to prepare quarterly reports and disclose "key–events" came into force	Regulation No. 05-5/pz-n, Section 8.4.3
	E. Issuer's Registrar; Shareholders Register Information		
32.	Notice concerning termination of the Issuer's agreement with the Issuer's shareholders register (the "**Registrar**") for maintenance of the Issuer's shareholders register, and commencement of the procedure to change the Registrar	Must be published in mass media with a circulation of at least 50,000 copies, and/or must be given in writing to registered shareholders, not later than 25 days prior to termination of the agreement	Company Law, Article 92(1) Regulation No. 21,[11] Sections 9 and 10
33.	Information on change of the Registrar	Must be published in mass media or given in writing to all owners of the Issuer's securities	Securities Law, Article 8(3)
	F. Issuer's Shareholders and Affiliates		
34.	Information on the acquisition of all of the Issuer's shares by one person	Must be published[12]	Civil Code, Article 98(6)
35.	Lists of the Issuer's affiliated persons and changes thereto (if the Issuer's securities were (are being) publicly placed)	Must be filed quarterly with the competent regulatory authority within 45 days after the end of the quarter	Company Law, Articles 92(1) and 93(4) Regulation No. 05-5/pz-n, Section 8.5.3
36.	Lists of the Issuer's affiliated persons and changes thereto (if the Issuer's securities were (are being) publicly placed and if the Issuer prepares quarterly reports and discloses "key–events")	Must be filed quarterly with the competent regulatory authority within 45 days after the end of the quarter Must be published within 3 days on an Authorized Website after (i) the end of the quarter or (ii) the date when the changes to the list of affiliated persons were made	Company Law, Articles 92(1) and 93(4) Regulation No. 05-5/pz-n, Sections 8.5.3 and 8.5.4
37.	Notice concerning the (i) acquisition by the Issuer of twenty percent (20%) or	Must be filed with the FSFM (or an agency designated by the FSFM) within 5 days after each such acquisition or qualifying increase or	Securities Law, Article 30 Company Law, Articles 6(4)

[11] Regulation "On the Procedure for Transfer of Information and Documents that Constitute the Register of Owners of Registered Securities," approved by Resolution of the Federal Commission on the Securities Market, No. 21, dated June 24, 1997.

[12] The Civil Code does not contain any guidance as to when or where this information must be published

	Document or Information	When/Where Required to be Made Public or Distributed	Source(s) of Requirement
	more of any class of securities of any issuer; or (ii) increase or decrease in the Issuer's holding of such securities by an increment of five percent (5%) to a level that is greater than twenty percent (20%)	decrease	and 92(1)
38.	Information on acquisition of more than 20% of the voting shares of another stock company (other than in connection with the formation of a stock company) (if the Issuer's securities were (are being) publicly placed and if the Issuer does not prepare quarterly reports and does not disclose "key-events")	Must be published on an Agency Website within one day	Company Law, Articles 6(4) and 92(1) Regulation No. 05-5/pz-n, Sections 8.7.1 and 8.7.2
	G. General Meetings of Shareholders		
39.	List of persons entitled to participate in the GMS	Must be provided upon request to persons included in such list and holding at least one percent (1%) of the shares entitled to vote in the GMS	Company Law, Article 51(4)
40.	Extract from the list of persons entitled to participate in the GMS containing information about a particular person, or a confirmation that such person is not included in the list	Must be provided to any interested person within 3 days after request	Company Law, Article 51(4)
41.	Notice of an upcoming GMS	Must be sent not later than 20 days (or in certain cases provided by the Company Law not later than 30 or 50 days) prior to the date of the meeting to each person included in the list of persons entitled to participate in the GMS, or, if provided by the Charter, published in mass media available to all shareholders and as specified in the Issuer's charter	Company Law, Article 52 (sections 1, 2 and 4)

	Document or Information	When/Where Required to be Made Public or Distributed	Source(s) of Requirement
42.	Information in connection with preparation for an upcoming GMS	Must be made available to the shareholders at least 20 days (or 30 days if the agenda contemplates a vote on the Issuer's reorganization) prior to the GMS	Company Law, Article 52(3) Regulation No. 17/ps, Sections 3.2, 3.3, 3.4 and 3.5[13] Charter, Article 12.13 specifies the kinds of information that must be made available to the shareholders prior to the GMS
43.	Voting ballots for an upcoming GMS	Must be sent not later than 20 days prior to the date of the GMS to each person indicated in the list of persons entitled to participate in the GMS; if the Issuer has more than 500,000 shareholders, the Issuer's Charter may provide that the forms of the voting ballots should be published in mass media available to all shareholders that is specified in the Charter	Company Law, Article 60
44.	Decisions adopted at the GMS and voting results	Must be announced at the GMS or a report on voting results must be communicated not later than 10 days after compilation of such report to persons entitled to participate in the GMS	Company Law, Article 62(4)
	H. Other Corporate Actions and Events		
45.	Information regarding the adoption of a decision to decrease the Issuer's charter capital and the new amount of the decreased charter capital	Must be published in a periodical for the publication of information on the state registration of legal entities not later than 30 days after adoption of the decision	Company Law, Article 30(1)
46.	Information regarding the adoption of a decision on the Issuer's reorganization	Must be published in a periodical for the publication of information on the state registration of legal entities not later than 30 days after adoption of the decision by the Issuer (or, in case of merger or consolidation, by the last entity participating in such merger or consolidation)	Company Law, Article 15(6)
47.	Information regarding the Issuer's liquidation and the procedure and period for the filing of claims by the Issuer's creditors	Must be published by the Issuer's liquidation commission in a periodical for the publication of information on the state registration of legal entities	Civil Code, Article 63(1) Company Law, Article 21(1)
	I. Repurchase and Redemption of the Issuer's Shares; Shareholders' Pre-Emptive Rights		
48.	Notice of repurchase by the Issuer of its shares	Must notify shareholders who own such shares of the adoption of a decision to repurchase them, at least 30 days prior to the beginning of the repurchase period	Company Law, Article 72(5)

[13] Regulation "On Additional Requirements for the Preparation, Convocation and Holding of a Shareholders' Meeting," approved by the Resolution of the Federal Commission on the Securities Market No. 17/ps, dated May 31, 2002.

	Document or Information	When/Where Required to be Made Public or Distributed	Source(s) of Requirement
49.	Notice to shareholders of their right to require the Issuer to redeem their shares	Must include information concerning redemption rights in the notice of an upcoming GMS if a vote at the GMS may give rise to them	Company Law, Article 76 (Sections 1 and 2)
50.	Notice concerning the exercise of preemptive rights in connection with a new issuance of shares (or securities convertible into shares) to be placed by subscription	Must be sent to persons having preemptive rights, after the new issuance of shares (or securities convertible into shares) has been registered but prior to commencement of the placement	Company Law, Article 41(1) Regulation No. 05-4/pz-n,[14] Section 6.4.7
51.	Results of the exercise of preemptive rights in connection with a new issuance of shares (or securities convertible into shares) to be placed by subscription	Must be disclosed in accordance with the procedure set forth by the registered decision on issuance of the securities	Regulation No. 05-4/pz-n, Sections 6.2.6 and 6.4.7
	J. Stock Exchange Requirements		
52.	Information that is required to be submitted to RTS Stock Exchange ("**RTS**") to maintain the Issuer's securities admittance to trading	RTS must disclose information received from the Issuer to third parties by posting information on the RTS website and provide information to interested persons upon request	RTS Listing Regulation,[15] Sections 11.2, 13.2, 13.3, 14.2 and Exhibit 2 **Section 1.1 of Exhibit 2 lists information that must be submitted to RTS to maintain the Issuer's securities listing**
53.	Information regarding the Issuer's corporate actions that is required to be submitted to MICEX Stock Exchange ("**MICEX**")	As a matter of practice, MICEX discloses information received from the Issuer by posting such information on the MICEX website	MICEX Listing Regulation,[16] Section 17
	K. Other Information		
54.	Information that the Issuer has the practice of publicly disclosing	On its website, via press release or otherwise in accordance with the Issuer's Regulation on Information Policy, dated October 29, 2004 and the Issuer's Corporate Governance Code[17]	Issuer's Regulation on Information Policy, dated October 29, 2004

[14] "Standards of Emission of Securities and Registration of Prospectuses of Securities," approved by the Resolution of the Federal Commission on the Securities Market No. 05-4/pz-n, dated March 16, 2005.

[15] Approved by RTS BOD Resolution No. 05-7-2306, dated June 23, 2005.

[16] Approved by MICEX BOD Resolution No. 4, dated May 30, 2005.

[17] Approved by the Issuer's Board of Directors (Minutes No. 33-04, dated September 22, 2004).

Documents that Must be Kept by the Issuer and Made Available to the Shareholders at any Time upon Request

The Regulation "On the Procedure and Terms of Keeping of a Stock Company's Documents," approved by the Resolution of the Federal Commission on the Securities Market No. 03-33/ps, dated July 16, 2003, refers to a list, approved by the Federal Archive Service of Russia on October 6, 2000, identifying standard management documents generated in the ordinary course of an issuer's operations, and specifying the period for which they are to be kept on file.

1. Charter, including all changes, amendments and new versions thereof
2. Agreement on establishment of the Issuer
3. Decision on the Issuer's establishment
4. Document on the Issuer's state registration
5. Documents confirming the Issuer's rights to its assets
6. The Issuer's internal documents
7. Regulations of the Issuer's branches or representative offices
8. Minutes of the GMS, and of meetings of the board of directors, the internal audit commission (internal auditor) and the management board[18]
9. Annual report, audited annual financial statements and quarterly financial statements
10. Accounting books and records[19]
11. Executed voting ballots filed in connection with participation in the GMS and powers of attorney (or copies thereof) for participation in the GMS
12. Independent appraisers' reports
13. Lists of the Issuer's affiliated persons
14. Lists of persons entitled to participate in a GMS or to receive dividends, and other lists compiled by the Issuer to facilitate the exercise of shareholder rights
15. Reports made by the internal audit commission (internal auditor), external auditors and state and municipal agencies of financial control
16. Registered Prospectuses, Issuer's quarterly reports and other documents containing information required to be published or otherwise disclosed under Russian law
17. Documents that must be kept by the Issuer pursuant to the Issuer's Charter, internal documents, decisions of the GMS, governing bodies of the Issuer and legal acts of the Russian Federation

---

[18] Minutes of the meetings of the issuer's management board must be made available to any shareholder(s) having at least twenty-five percent (25%) of the issuer's voting shares.

[19] Must be made available to any shareholder(s) having at least twenty-five percent (25%) of the issuer's voting shares. Under Civil Code Article 67(1), information on the Company's activities, accounting books and records and other documents must be made available to all of the issuer's shareholders in accordance with the procedure set forth in the issuer's foundation documents.

Information Required to be Made Public or Distributed to the Issuer's Security Holders Pursuant to the laws of the Russian Federation as of November 1, 2006

	Document or Information	When/Where Required to be Made Public or Distributed	Source(s) of Requirement
	A. Securities Issuance Documents		
1.	Registered securities prospectus ("**Prospectus**") (if the securities are placed through an open subscription or a closed subscription to more than 500 purchasers)	Must be published on the Issuer's website or any other website accessible to the general public ("**Authorized Website**") within 3 days after receipt of written notification from the competent regulatory authority regarding the state registration of the securities issuance, and upon request the Issuer must provide any interested party the address(es) of the website(s) where the information is published. Must be made available to any interested persons at any time upon request	Company Law,[1] Article 92(1) Securities Law,[2] Articles 19(2) and 23 Regulation No. 05-5/pz-n,[3] Sections 1.6, 1.8, 1.9 and 2.4.3
2.	Information about registration of the Prospectus, if the Prospectus is registered after the report on the results of the Issuer's securities issuance has been registered	Must be published in each of the following within the specified time after receipt of the written notification from the competent regulatory authority regarding registration of the Prospectus: (i) the websites of authorized information agencies and/or other organizations with the status of mass media[4] ("**Agency Websites**") within one day, (ii) an Authorized Website within 3 days and (iii) a periodical[5] distributed in Russia with circulation of at least (x) 10,000 copies if the Prospectus is signed by the financial consultant, and (y) 1,000 copies in other cases (each, a "**Periodical**"), within 5 days Must be made available to any interested persons at any time upon request	Regulation No. 05-5/pz-n, Sections 1.6, 1.8, 1.9, 2.4.3, 4.1, 4.2 and 4.3
3.	Registered decision on issuance of the Issuer's securities	Must be made available to any interested persons at any time upon request	Regulation No. 05-5/pz-n, Sections 1.8 and 1.9

e-mail: ***hrdgph@pwcglobal.com***

Information on the licence of the auditor:
License No.***: E 000376 to render audit services***
Date of issue: ***20.05.2002***
Expire date: ***20th of May, 2007***
Issuing body: **Ministry of Finance of Russian Federation**

ZAO "PricewaterhouseCoopers Audit" does not spend any works within the limits of special auditor's checks under the contract with the JSC "Kuzbassenergo" except audit of accounting (financial) reports. There are no any close business or allied relations between the Auditor and the Company.
The Company did not grant any loans to the Auditor. Auditor (authorities of the auditor) has no market share in the chartered capital of the company. The company has no information on the officials of the issuer being the officials of the auditor at the same time.

Auditor is independent of the Issuer.

Factors of the Auditor's independency: According to the art. 12 of the Federal Law "On auditing" #119 -FL dd. 07.02.2001 audit may not be fulfilled by:

1) the auditors being the incorporators (participants) of the auditing persons , also their managers,

accountants or other persons responsible for book-keeping organization as keeping and drawing up a financial (accounting) report;

2) ***the auditors being with the incorporators (participants) of the auditing persons, their officials, accountants and other persons responsible for book-keeping organization and keeping also for drawing up a financial (accounting) report in immediate relationship (parents, wife, brothers, sisters, children, also the husband of wife's brothers, sisters, parents and children);***

3) ***audit institutions, whose managers and officials are the incorporators (participants) of the auditing persons, their officials, accountants and other persons responsible for book-keeping making and keeping, as for drawing up a financial (accounting) report;***

4) ***audit institutions, whose managers and other officials are in immediate relationship (parents, husband or wife, brothers and sisters, also husband and wife's parents, sisters and brothers, children) with the incorporators (participants) of the auditing persons, also their officials, accountants and other persons responsible for book-keeping making and keeping, as drawing up a financial (accounting) report;***

5) ***audit institutions acting as the incorporators (participants) of the auditing persons to whom these institutions are the incorporators (participants), in relation to affiliated companies, subsidiaries and representative offices of the aforementioned auditing persons, also in relation to the companies having common incorporators (participants) with this audit institution;***

6) ***audit institutions and individual auditors rendered services on book-keeping renewal and making, also on financial (accounting) report drawing up to the natural persons and legal entities, or in respect of these persons during 3 years before the current auditor's checking.***

There are no essential interests tied an auditor (officials of the auditor) with the Issuer (officials of the Issuer).
Auditor (authorities of the auditor) has no market share in the chartered capital of the company.
The Company did not grant any loans to the Auditor.
There is no immediate business relations , no family relations.
The officials of the Issuer are not the officials of the auditor.

Procedure of the Issuer's auditor elections

FL "On Joint Stock Companies" does not determine terms and order for nomination of a candidate for auditor to inscribe him in the lists for voting over the question on approval of auditor of the Company, also this law does not grant to the shareholders the right to nominate of candidate for auditor. Thus the candidate for auditor subject to approval at the annual general meeting of shareholders of the Company is determined by the Board of Directors. The General meeting of shareholders approves auditors of the company every year in accordance with the Charter of the Company .
Amount of remuneration for the auditor services shall to be determined by the Board of Directors of the company."
Auditor of the Company controls financial and economic activity of the Company in accordance with terms of legislation of Russian Federation and in accordance with the signed contract.
There are no deferred and past-due payments for rendered auditor's services.

including the past-due, RUR	8 170 000	0

Accounts payable (including the credits and loans) of the JSC "Kuzbassenergo" for the II quarter of the year 2006 as compare with the previous period reduced by RUR 2 393 thousands, including:

- ***long-term liabilities reduced by RUR 130 044 thousands (Agreement on the order of liabilities extinction № 70001/1349 dd. 02.03.2006 was concluded between the JSC "Kuzbassenergo" and Ltd. "Trade House", in accordance with this agreement a schedule of extinction and a sum of debt were revised);***
- ***credits and loans increased as compare with the previous period by RUR 227 139 thousands,***
- ***short-term accounts payable as compare with the previous period reduced by RUR 102 527 thousands, including:***

- to the suppliers and contractors by 214 137 thousands roubles ;

increased as compare with the previous period by RUR 160 428 thousands, including:

- on the bills of credit rendered to discharge - by 116 850 thousands roubles,

- to the budget on the dues and fees - by 21 892 thousands roubles,

- on the advances received from the consumers - by 21 686 thousands.

The past-due accounts payable reduced by RUR 2 393 thousands, but low as before , and amounted RUR 8 070 thousands (0,14% of the total sum of liabilities) to attest the Company's ability to pay off his liabilities without heavy delay.

Creditors whose share amounts no less than 10% of the total sum of accounts payable

Full firm name of the creditor	Russian joint stock company of energetics and electrification "UES of Russia"

Abbreviation of the creditor	JSC RAO "UES of Russia"
Location:	№101, building 3, Vernadskogo prospect, Moscow, 119526
Sum of accounts payable, RUR	1 150 372 000
Size and conditions of the past-due accounts payable (percent rate, penalty provisions, fines)	0
Affiliation	Affiliated person
Market share of the Issuer in the chartered capital of the affiliated person	0 %
Share of ordinary stocks of the affiliated person owned by the Issuer	0 %
Market share of the affiliated person in the chartered capital of the Issuer	49,0 %
Share of ordinary stocks of the Issuer owned by the affiliated person	49,0 %

2.3.2. Credit history of the issuer

Figure	2001	2002	2003	2004	2005	II quarter, 2006
Value of the net assets by the end of the reporting period, RUR	16 666 809 000	20 847 542 000	24 851 878 000	24 389 890 000	27 343 343 000	28 171 144 000
Borrowed assets, total, RUR.	995 022 000	1 531 056 000	2 112 851 000	2 445 505 000	1 605 127 000	1 610 918 000
Share of the borrowed assets in the value of the net assets, %	5,97	7,34	8,50	10,03	5,87	5,72

As for situation by the 30.06.2006 the share of the borrowed assets in the value of the net assets increased up to 5,72 % (by 0,89 percent points) as compare with the 31.03.2006.

For the last five finished fiscal years (2001-2005) the Company did not make credit contracts and loan contracts, the sum of the principal debt under which amounts 5 and more percents of the net assets value.

Credit policy of the JSC "Kuzbassenergo" aims at an attraction of credit resources on more gainful terms of crediting, at a reducing of an interest rate for credit resources using. Borrowed current assets are attracted by the Company at the rate that is lower than the refinancing rate fixed by the Central Bank of RF.

Provisions on the credit policy of the Company were approved by the Board of Directors at the general meeting spent the 28 of December 2004. These Provisions determine the order of fixation of Limits of a debt position and the Limit on cost parameters of loan, the order of the control over their observance, and also measures on reduction of the Debt position according to the fixed Limits in case of their excess aimed at the financial stability and minimization of a risk of insolvency of the Company guarantying.

By the Decision of the Board of Directors dd. 05.04.2006 was decided to: "Approve an attraction by the JSC "Kuzbassenergo" in the 2st quarter of the year 2006 of the credit assets at the rate not exceeding that in 1,1 time more the rate of refinancing of the Central Bank RF against the security provided by the credit policy of the Company subject to observance of the maximum sized of a one-time loan debt over the attracted credits by the company by the 01.07.2006 in a volume no more than RUR 1 600 000 000 (One milliard and six hundred million).

There was not the bound's issue during the reporting quarter.

2.3.3. The issuer's liabilities against the third parties guarantee

There were not any liabilities of the issuer against the guarantee given to the third parties, including a pledge or a guarantee amounted not less then 5 per cent of the issuer's assets balance price during the reporting period.

2.3.4. Other liabilities of the Issuer

There are no any agreements including the bargains on term not reflected in the accounting balance and may affect essentially the Issuer's financial situation, also his liquidity, source of finance and their using conditions, activity results and expenses.

2.4. The purpose of the issue and direction of the assets using resulted to the securities floatation

The Issuer did not spent the issue aimed to the assets attraction by the way of the distribution of securities during the reporting period.

Since the moment of the State registration of the Company the Issuer carried out two issues of the securities, asking the following condition:
Report on the issue's outcome was registered.

2.5. Risks concerned to the acquisition of the distributing (distributed) issuing securities

2.5.1. Branch risks

Electroenergetics was always a branch of high level of technological risks caused by the specific character of the output production and transfer to the consumer.

In spite of the good figures of a stable work of the JSC 'Kuzbassenergo" it is impossible to exclude equipment failures possibility. Thus, the task of reliable and safe supply of a solvent demand and work on the risks reducing concerned the production activity is one of the priority tasks in the power company's activity.

The Issuer did not carried out a foreign trade activity, all volume of electric and heat power realization concerned the home market. Thus there were not the risks concerned the possible change of price to the Issuer's production at the foreign markets.

The risk of nonfulfilment by the issuer of his liabilities before the owners of the issuing securities due to the branch conjuncture change is not subject of this present report because of absence of any liabilities on the dividend payment by the issuer before the owners of the preference stocks and the percents payment off and retirement of bonds The issuer had floated only the ordinary stocks.

Fuel risks proper to the power industry (fuel price and possibility of purchasing in the due volume and in time) also have vital importance. To reduce the fuel risks and to maintain a safety of power system activity the total level of fuel reserve is higher than the tasks of the JSC RAO "UES of Russia".

By the 1st of July, the total stock of coal kept at the electric plants of the JSC "Kuzbassenergo" exceeded the goal of the RAO "UES of Russia" task. The task given by the RAO "UES of Russia" on the mazhut stock was overfulfilled by 106%.

The risks of the tariff adjustment are more serious and unhandy. The tariff adjustment defines fully a profit base of business.

The policy of tariff fixing in the year 2006 is the same: there is a tariff-corridor with the strictly defined extremely maximum and extremely minimum tariff levels.

Energetics shall to keep within these limits. Due to such limitation the growth rate of tariffs as an earlier remains lower the level of inflation that may led to the dropping profit of the power company.

The tariffs don's provide the investor's interests, thus the company is of little attractive in the investing as usual.

The present tariffs are not transparent thus, an investor don't see the terms for the invested money pay back.

To reduce the risks of tariff adjustment it needs to refuse adjustment in the "Inflation minus" method and to aim to more adequacy and detailed legal and methodological base of adjustment.

The following factors may be related to the other branch risks:

- Change of structure of energy consumption at the groups of consumers from the planned at the expense of production volume reduction of a range of industrial enterprises, may lead to reduction of energy output volume in money terms.

- Bankruptcy of enterprises may lead to the impossibility to recover a debt for consummated energy.

- Decreasing of living standard of some groups of population of Kemerovo region will led inevitably to reduction of payment's level of this type of population.

Expectations of the Stock market's participants concerned to the reforming course of energy market.

2.5.2. Country and regional risks

JSC "Kuzbassenergo" is a registered in Russian Federation company carrying out its activity in Kemerovo region, thus some common changes in the State and other regional developments affect on its activity importantly.

Kemerovo region is one of the most attractive regions of the Western Siberia of Russian Federation. The rating agency "Expert RA' annually spends a rating of investment attractiveness of regions. During the last five years the Kemerovo region was assigned the rating 2B (average potential – medium risk).

In the "Researching in the relative creditworthiness of the RF subjects" made by the Rating Agency "AK&M" the Kemerovo region takes the 47th place (from the 79 researched RF Subjects) at the integrated level of relative creditworthiness of the RF subjects.

As a whole an economic and political situation in the country and in the region is stable, and any possibility of military conflicts, extraordinary situation, walkouts, change of the State and regional leaders is improbable.

As acknowledgement of a stable economic and political situation in the country was increasing of a credit rating by one step by the rating agency Moody's took place in the October 2005.

The experts accepted into consideration " very fast and important growth" of the gold and exchange currency reserves and of the stabilizing fund.

Rating of RF in the liabilities expressed in the exchange and national currency grew to the level "Baa2" from the level "Baa3". A forecast of the rating rests the same. The Mood's also increased the rating of the bonds of the national currency loan (BNCL) of the 5st, 6th and 7th trenches till the level "Baa2", the rating of the bank deposits in exchange currency till the level "Baa2". Rating of the short-term liabilities in exchange currency, short-term bank deposits, rating of the RF as the Issuer at the short term liabilities in exchange currency was increased to "P2" from "NP".

Overwhelming majority of economic factors are out of control of the Issuer.

It's impossible to guarantee that some recent tendencies of Russian economic including increasing of Gross National Product, relative stability of RUR and decreasing of the inflation rates will be kept in future. Besides global fluctuations of oil and gas prices, RUR fortification in the real term concerning USD Dollar, also some consequences of liberalization of a monetary and credit policy and other factors may affect negatively Russian economics and business of the issuer.

Russian economics is not protected against market recessions and delay in economic development in different countries of the world. As it was in the past, financial problems or sensitive perception of the risks related to the investments in the countries with developing economy may reduce a volume of foreign investments to Russia and affect negatively Russian economics.

Ecological factors inseparably linked with general activity of the issuer as a production process, transfer and distribution of heat and electric power demands large quantity of natural sources that call environmental pollution. As significant capital investments are necessary to purchase nature-conservative equipment to

remove ecological factors of risk , and payments for natural sources consumption.

There are regional risks related with reforming of JSC "Kuzbassenergo". The management of JSC "Kuzbassenergo" spend active consultations with the government of regional and city Administration over the questions of the Company's reforming to reduce such risks.

To prevent the under financing of the budget consumers the Agreements on payments for the consumed power between the Kemerovo regional Administration, Main Financial Administration of Kemerovo region, Heads of the cities and districts and JSC "Kuzbassenergo" are subscribed every month. Also the meeting in the Kemerovo regional Administration on fulfillment of the aforementioned Agreements in the presence of the Heads of the cities and districts, managers of the territorial financial authorities, managers of the housing and communal services enterprises and the city power networks are spend .

The Kemerovo regional Administration at the interdepartmental commission on power energetics reforming under the RF Government backed a project on the JSC "Kuzbassenergo" reforming in the 05.12.2005.

Risks depending on the regional geographical peculiarity, i.e.:

- *Damnification risks because of emergency situations of natural factors: periodical floods, earthquake on the territory of Kemerovo region.*
- *According to the long-term forecast made by the Ministry on Emergency Situations of Russia for the period 2006, there will be most possible such man-caused emergency situations on the territory of Kemerovo region as:*
- *man-caused conflagration (fire in buildings and constructions of social and cultural purpose). Conflagration peak in the housing sector and at the economic object is traditionally registered in winter-spring period when the total quantity of fires increases as compared with warm period by 5%, and the quantity of conflagrations increases by 40%:*
- *motor transport;*
- *mining industry.*
  - *Continuance of high probability of the accidents and emergency situation in mines is forecasted. Besides the cases of earth quaking equal to 1-2 force on the territory of region is possible because of industrial explosions in mining industry;*
  - *high probability of man-caused emergency situations due to accidents in railway transport during transporting of dangerous cargo. The reason of such emergency situation is improper conditions of approach lines to potentially dangerous enterprises, i.e. ltd. "Kemerovokhimmach", JSC "Novokuznetsk Aluminum plant", etc.*

According to the forecast of the Ministry on Emergency Situations for the winter-spring period the most probable emergency situations of man-caused nature resulting from the complex of dangerous meteorological phenomena (heavy atmospheric precipitation, force wing, sleet adhering) are forecasted in Kemerovo region.

Increasing of household fires in the private sector is forecasted because of temperature decreasing and using of electric heaters, and also wiring inflammation. Accidents in the networks of heat and water supply, outage of heating systems of buildings and constructions are possible.

The prediction of the risk of open military conflict also the risk of national emergency are minimal possible on a national level as ethnic and social tension in the region does not bear critical nature. However there is a risk of terrorist acts to fight with the security measures at the strategic objects of JSC "Kuzbassenergo" were considerably toughened.

Under the special control were took electric plants, large electric substations, pump houses, combustive-lubricating production's storages and other category objects.

Admission regime for motor transport and employees was toughened including using of manual and fixed metal detectors at the enterprises.

Artificial barriers were mounted that stop unofficial passage of motor transport on the territory of enterprises.

Car parks were transferred at the safe distance from energy object guards, also active interaction between security of JSC 'Kuzbassenergo" and Motor licensing and inspection department, duty departments of MIA and MES was organized.

Around-the-clock work for vide control and patrol were organized at the most important and the farthest object of energy system.

2.5.3. Financial risks

Variation of interest rates may affect financial and economic activity of the issuer as the enterprise uses borrowed current assets in its activity but its will not have significant effect on the financial showings of the company.

Credit policy of the issuer aimed to attraction of credit resources on more favorable credit conditions.

The company attracted borrowed current assets lower then the rate of refinancing fixed by the Central Bank RF (12%).

For the year 2005 the average percent rate of the credit resources attraction reduced from 11,9% to 9,0% of annual.

The average percent rate for the credit funds using by the Company amounted 9,92% by the 30.06.2006. Share of credits without loan guarantee was equal to 87,5% of the total amount of loan debt under the short-term credits by the 30.06.2006.

Inflation effect:

High and insufficiently forecasted inflation level not only affects negative to the gross domestic product growth rate, but also depresses an activity at the securities market: if the inflation is high the income from the securities don't compensate inflationary losses, and a suddenness of the inflation restricts sufficiently an opportunity of forecasting of the yield from investment.

Decreasing of the growth rate of prices incites the long-term investments in production, the normal functioning of economics is under restoring that in turn leads to the raising at the stock market.

Thus the moving of inflation and of the stock market is of different courses in Russia.

After the year 2001 the level of inflation in Russia become decreased. If in the year 2001 the consumer prices increased by 18,6%, then in the year 2005 this figure amounted 10,9%.

Besides, a stabilization of Russian economics has reduced his risk of the inflation level suddenness.

Common for this period decreasing trend became one of the growth factors of the stock market: in the years 2001-2005 the index RTS increased by 786% from 131 to 1126 points.

It's already the third consecutive year the growth rates of power tariffs are retarded the inflation.

Fuel, building materials and equipment become lot quickly cheaper than it stipulated by the business plans of the company. The State defines the growth rate of electric power price depending on the forecasted figures of the inflation. But the problem is in the non fulfillment of the forecasted inflation. In the year 2005 the growth rates of energy tariff were fixed by the Federal Tariff Service (FTS) in the amount equal to 9,2% under the actual inflation 10, 9%. In the year 2006 by the decision of FTS the electric power tariffs grew by 7,5%, against the forecasted 8,5% (according to the forecast of the Ministry of Finance of RF the growth of the inflation in RF at the outcome of the year 2006 will be 10-11%) According to the First deputy chairman of the central Bank of Russian Federation Mr. Alexey Uliukaev the base inflation at the fist half year 2006 amounted 3,9%, that is lower by 0,4% as compare with the same period of the previous year.

The issuer does not bear any exchange rate risks as he is carrying out his activity only at the internal market.

2.5.4. Legal risks

There are no the legal risks concerned the change of exchange regulation, modification of tax legislation, change of regulations of the customs supervision and fees, modification of requirements on licensing, court practice that may affect negatively on the activity's results of the issuer also results of the current legal trials subject of participation of the issuer.

2.5.5. Risks concerned the Issuer's activity.

Risks related with the issuer's activity, i.e. the current legal trial subject to participation of the issuer (actions of the company liquidation, alienation of the company's assets, contestation of rights arisen from the licenses or patents etc.), possible liability of the issuer against the third person's debts are absent.

The Issuer has no the risk concerned the lack of possibility to prolong the period of validity of the Issuer's license to the specified activity.

Other essential risks proper to the issuer are absent.

III. Detailed information about the issuer

3.1. Information about the issuer's establishment and development

3.1.1. Information about the issuer's company name

full company name and abbreviation:

Kuzbass Joint stock Company of energetics and electrification
(JSC «Kuzbassenergo»).
Before the privatization – Kuzbass industrial institution of energetics and electrification ("IIEE "Kuzbassenergo")
Kuzbass Open Joint Stock Company of energetics and electrification (OJSC "Kuzbassenergo")
Introduced: 30.12.1993
Kuzbass open joint stock company of energetics and electrification (JSC "Kuzbassenergo")
Introduced: 15.05.1996

3.1.2. . Information about state registration of the issuer

Date of state registration of the issuer: 30.12.1993
Number of state registration's certificate (other document ratified the state registration of the issuer): 1901
Name of registration authority: Kemerovo Administration
In accordance with Federal Law "On State registration of legal entities" the corresponding record under the state registration number 1024200678260 was made in the Uniform State Register of Legal Entities the 23rd of July 2002 (certificate: series 42 №001926135 issued by Administration of the Russian Ministry of Taxation in Kemerovo, Kemerovo region).

3.1.3. Information about the issuer's establishment and development.

The issuer was established in accordance with a privatization schedule of the Kuzbass industrial institution of energy and electrification (IIEE "Kuzbassenergo").

In pursuance of the Decrees issued by the President of the Russian Federation, i.e. № 923 dd. August, 15, 1992 « About the organization of management system of the electric-power complex of the Russian Federation during privatization », № 1334 dd. November, 3, 1992 « About realization in the electric- power industry of the Decree issued by the President of the Russian Federation dd. August, 14, 1992, № 922 « About features of transfer of the state enterprises, institutions, organizations of fuel and energy complex into the joint-stock companies », № 721 dd. July, 1, 1992 « About organizational measures in the transfer of the state enterprises, voluntary associations of the state enterprises into the joint-stock companies », the Committee on administration of the state property of Kemerovo region has made the Decision № 330 « On privatization and transfer of IIEE "Kuzbassenergo" into the Kuzbass open joint-stock company of energy and electrification » dd. 21.09.1993.

The Order № 345 « About registration of open joint-stock company "Kuzbassenergo" was approved by Kemerovo Administration the 30th. 12.1993.

The common purpose of the privatized companies was increasing of the efficiency of energy system of the country and transfer from the planned economic to the market relations.

JSC "Kuzbassenergo" was established for and indefinite period of time.

The main purpose of the JSC "Kuzbassenergo" activity is the profit earning.
Activities of the JSC "Kuzbassenergo" are as follows:

- *electricity and heat energy production;*

- *electricity and heat energy transmission;*
- *electricity and heat energy supply (trade) according to the fixed tariffs in accordance with the dispatcher's schedules of electric and heat demands;*

It renders the following services:

- *energy supply to energy saving enterprises;*
- *communication facilities, including telecommunications;*

It carries out:

- *capital repairs;*
- *technical reequipment;*
- *reconstruction and development of regional energy system;*
- *mounting, arrangement and repair of energy objects; electric and heat energy equipment;*
- *operability assurance of electric and heat energy networks;*
- *maintenance, mounting, repairing of boilers and buckets under pressure, steam and hot water pipelines;*
- *providing for maintenance of energy equipment in accordance with the standard requirements in force;*
- *timely and qualitative repairing of energy equipment;*
- *technical reequipment and reconstruction of energy objects;*
- *operability assurance of electric and heat energy networks;*
- *activities on maintenance of electric an heat energy networks.*

JSC "Kuzbassenergo" is one of the largest energy systems in the body of the Holding company JSC RAO "UES of Russia". Energy complex of the company is the sixth in the installed capacity and the fifth in the volume of energy output to the consumers. Quantity of power output by electric plants of JSC "Kuzbassenergo" exceeded 30% in the balance of UES of Siberia.

Mission of the company is the regular and reliable supply our consumers with heat and electric power providing production efficiency and investment appeal of the company.

3.1.4. Contact information:

Issuer's location: **№ 30, Kuznetsky prospect, GSP-2, Kemerovo, Russia**
Telephone: ***(384-2)29-33-59***
Fax: ***(384-2)29-37-77*** e-mail:***adm@kuzbe.elektra.ru***
Web-site :***www.kuzbassenergo.ru***

Organizational structure of the executive body of JSC "Kuzbassenergo" was approved by the Order of JSC "Kuzbassenergo" №709 dd. 31.12.2003. Department on corporate management including department on corporate policy which duties include work with shareholders and investors was established due to this Order. Chief of the Department is Ms. Burdina Elena Yakovlevna, date of birth 1964., education – higher.

Location: **№ 30, Kuznetsky prospect, GSP-2, Kemerovo, Russia**

Telephone: ***(384-2) 77-70-51***
Fax: ***(384-2)77-70-51***
e-mail: ***beya @kuzbe.elektra.ru***

Internet webpage: ***no***

3.1.5. Taxpayer identification number

INN: *4200000333*

3.1.6. Branches and representative offices of the issuer

There were not the changes in the structure of the branches and representative offices of the Issuer.

3.2. Principal economic activities of the issuer

3.2.1. Industrial affiliation of the issuer

OKVED (All-Russia classifier of types of economic activity) codes :

40.10.11 –Production of electric power by heat plants
40.10.2 – Energy transmission
40.30.2 – Steam and hot water transmission (heat energy)
51.56.4 – Wholesales of electric and heat power (without its transmission and distribution)
74.60 –Investigations and protection
74.14 – Consulting over the questions on commerce and management.

3.2.2. Principal economic activities of the issuer

The principal activities of the JSC "Kuzbassenergo" are • production, transfer and distribution of electric and heat energy

JSC "Kuzbassenergo" is a subject of natural monopoly working in the sphere of services on transmission of electric and heat energy on the territory of Kemerovo region.

Share of profit of the main activity in the total volume of profit of the JSC "Kuzbassenergo" for the II quarter 2006.

Period	**II quarter 2005**	**I quarter 2006**	**II quarter 2006**
Total profit, RUR thousands	4 825 352	6 686 584	5 203 308
Profit of the main activity, RUR thousands	4 141 062	6 311 076	4 798 457
Share of profit of the main activity in the total profit %	85,82	94,38	92,22

As the total profit of the Issuer it means the sum of sales proceeds, operational and extraordinary profits – according to the data of the form №2 "Profit and losses report"

Share of profit of the JSC "Kuzbassenergo" of the main activity in the II quarter 2006.

Production	Share of profit, %		
	II quarter 2005	I quarter 2006	II quarter 2006
Electric power	73,24	66,90	78,38
Heat power	12,58	27,48	13,84
Total:	85,82	94,38	92,22

In the II quarter of the year 2006 as compare with the same period of the previous year the share of profit of the electric power output increased by 5,14%, and of the heat power output by 1,26%. Main activity of the Issuer, i.e. electric and heat power production, transmission and distribution have a season nature. It should mark that the decreasing of electric and heat power output in the summer months take place.

3.2.3. **Principal types of products (operations, services)**

Principal types of products of the JSC "Kuzbassenergo» " are of electric and heat energy. Electric and heat power tariffs are subject to approval by the Regional energy committee 1 time a year in accordance with the Federal Law №41-FL dd. 14.04.1995

In the II quarter 2006 an average electric power rate amounted 0,71175 roubles/kwh; as an average heat power rate amounted341,222 roubles/Gcal.

Figure's name	II quarter 2005	I quarter 2006	II quarter 2006
Proceeds from the production sale (work, services), RUR			
- electric power	3 534 293 000	4 473 657 000	4 078 343 000
- heat power	606 769 000	1 837 419 000	720 114 000
Share of the aggregate proceeds volume, %			
- electric power	81,2	67,97	79,69
- heat power	13,9	27,92	14,07

Structure of the net cost of the Issuer

Representative needs outlay, %	
other, %	23,3
Total: outlay on production and sale of products (work, services), (net cost) ,%	100,00
Proceeds of the products sale (works, services) ,%	115,88

Record keeping of the net cost is in accordance with the Tax Code of Russian Federation, part II dd. 05.08.2000 №117-FL and with the Accounting policy of the JSC "Kuzbassenergo" not stipulated a separate accounting at the products(work, services) types.

3.2.4. Raw materials and suppliers of the issuer.

Principal raw material used by the JSC "Kuzbassenergo" is a fuel. Kuznetsky coal and its cleaning rejects are used as the principal fuel at the power plants of JSC "Kuzbassenergo".
Fuel oil is used as starting fuel and meant for maintenance of burning during low quality coal firing, and as the principal type of fuel at the Zaiskitimskaya water-heating boiler plant.

Analysis of fuel price change

Fuel	Supplier	II quarter 2005		II quarter 2006	
		Purchase volume in natural terms, thousands ton	Price of the product unit including VAT and quality, millions RUR	Purchase volume in natural terms, thousands ton	Price of the product unit including VAT and quality, millions RUR
	JSC UC "Kuzbassrazrezugol"	1 548,68	854,01	1 732,92	1 038,77
	JSC "SUEC"	1 026,82	550,44	1 319,25	798,15
	JSC "UC "Yuzhkuzbassugol"	317,93	133,55	120,34	61,92
	ZAO "Chernigovets"	93,14	57,90	199,84	139,15
	Ltd. "OUC" (Moscow)	79,35	35,35	0,00	0,00
	Other suppliers	349,72	148,63	243,27	95,89
	TOTAL:	**3 415,64**	**1 780,48**	**3 615,62**	**2 133,88**

At the outcome of the II quarter of the year 2006 an average price per 1 ton of coal amounted 590,18 roubles. As compare with the II quarter of the year 2005 it increased by 13.2%.

Major coal suppliers are the following companies: Joint stock company "Coal company "Kuzbassrazrezugol" (Kemerovo); Open Joint stock company "Siberian coal power company" ("SUEC") (Moscow); Open Joint Stock Company "Coal company 'Yuzhkuzbassugol" (Novokuznetsk).

3.2.5. Markets for products (work, services) of the issuer

Power industry is practically the unique industry whose products and services consumers are all industries and private sector. There are two markets for energy distribution in Russia: wholesales and retail trade. Heat energy distribution is only at the retail market.

Kemerovo region is the principal market where the JSC "Kuzbassenergo" carries out his activity.

Kemerovo region is located in the south-east of the West Siberia at the joint of the West-Siberian plain and the mountains of the South Siberia. It is located at almost equal distance from western and eastern borders of the Russian Federation. It is in the 6^{th} time zone.

Output of electric power to the consumers is according to the contracted "Agreements about output and using of electric power".
Composition of electric and heat power consumers at the retail market is in the table 13 stated above by an example of a scheme showing electric and heat power output.

Structure of electric and heat power output in the II st quarter 2006.

JSC "Kuzbassenergo"	Electric power			Heat power			Electric power +heat power	
	Output to the ow consumers (thousands kwh)	Accrued, thousands roubles including VAT	Sale, thousand roubles including VAT	Output to the ow consumers (Gcal)	Accrued, thousands roubles including VAT	JSC "Kuzbass energo"	Output to the ow consumers (thousands kwh)	Accrued, thousands roubles including VAT

Specific weight (%)	20,7%	11,2%	11,9%	14,9%	13,6%	13,9%	9,5%	9,6%

According to this table, the largest consumers of electricity and heat energy at the retail market are industrial enterprises, i.e. 68,0%.

In the industrial sector the leaders on electric power consumption are the enterprises of ferrous metallurgy, their share amounts 34,9%

In the structure of heat power output also industrial enterprises (more 71,9%) are prevail.

Enterprises of ferrous metallurgy are the leaders on heat power consumption in section of industry , their share amounts 30,5%.

Factors which may adversely affect the distribution of the Issuer's products (operations, services) and possible measures of the Issuer to reduce such impact.

1. Purchasing by the consumers of electric power at the free-trade market (hereinafter called FTM) of the wholesales energy market working on the territory of Siberia since 01.05.2005

In the II quarter of the year 2006 the following companies purchased electric power at the FTM of the wholesales energy market: Ltd. PO "Khimprom (volume of purchase – 8 639 thousands kwh) , Ltd. "Topky Cement" (volume of purchase – 13 868 thousand kwh), JSC "KOKC" (volume of purchase – 3 732 thousand kwh), JSC "SUEC" (volume of purchase – 9 668 thousand kwh),JSC "Mechel-energo" (volume of purchase – 7 186 thousand kwh), Ltd. "Power sale company "Energoservice" (volume of purchase –1 685 thousand kwh).

Entrance of consumers to FTM of wholesales energy market meet the strategy of energy industry reforming and JSC "Kuzbassenergo" can not affect this tendency change.

2. Development of small generation on the territory of Kemerovo region :

Since the November of the year 2005 the JSC "Yuzhkuzbassugol" acquires a part of volume of the own consumption under the sales contract from the TETs of the Ltd. "PO Machzavod" (in the II quarter 2006 reducing of the output was 23 484 thousands kwh).

Also in the year 2006 a reconstruction of this TETs is expected that will let to the block-station to produce electric power not only in winter, but in summer also together with increasing of production volume by 20%. This fact also affects negatively to the sales volume of electric power belonging to the JSC "Kuzbassenergo".

3. Reducing of heat energy output by the JSC "Kuzbassenergo" is related with the launch of own boliler plants (water-heat boilers) at the chemical enterprises , i.e. KOAO "AZOT" Ltd. , besides the "PO TOKEM", Ltd. PO "Khimprom" are going to launch the own boiler houses in the September of the year 2006.

At the KOAO "AZOT" 3 steam boilers BEM-25/3, 9 with nominal steam capacity 25 t/h (18,75 Gcal) each were launched in august 2005, that affected heat power consumption reducing AO "AZOT" in the 2nd quarter of the year 2006 as compare with the same period of the year 2005 by 21% (75 997 Gcal).

JSC "Kuzbassenergo" has not possibility to affect this situation.

4. Insufficiency of limits and delay in financing of charges on payment of heat and electric energy for budget consumers.

To prevent such a course of events JSC "Kuzbassenergo" subscribes every month Agreements on payment s for consummated energy with Kemerovo regional Administration, General Financial Department of region, Heads of the cities and districts, included the volumes of the future charging to the budget depending consumers, and also the sums planned to be transferred for the consumed electric power to the JSC "Kuzbassenergo" by the budget of all levels.

With a view to monitor the aforementioned agreements fulfillment the meetings are spent in the Kemerovo regional Administration with an obligatory presence of the Heads of the cities and districts, managers of the territorial financial authorities, managers of the housing and communal services institutions and the city

electric main lines.

Ratio of capital turnover	F. №2 p. 010 / (F. №1 p.300 - F.№1 p.690)x 100	0,22	0,17
Sum of the uncovered loss as for a reporting date, RUR	F. №1 p. 465 + F. №1 p. 475	0	0
Ratio of the uncovered loss at the reporting date and the balance currency	F. №1 p. 475 / F. №1 p. 300	0,00	0,00

During the reporting quarter the proceeds from sales of the commodity output, also works and services amounted RUR 5 117 964 thousands, i.e. lower by 1 463 473 thousands roubles as compare with the 1st quarter of the year 2006 due to the seasonal decreasing of power consumption.

As a result of financial and economic activity in the 2dn quarter of the year 2006 the Company got a gross profit amounted RUR 122 935 thousands against RUR 1 480 116 thousands of the previous quarter.

At the outcome of the 2nd quarter of the year 2006 the Company got a net loss amounted RUR 297 475 thousands.

As a whole during the first half year 2006 the JSC "Kuzbassenergo" got the net profit amounted RUR 618 045 thousands.

The management bodies of the Issuer regarding to the given analysis of a profitability and unprofitableness agree in their opinion.

4.1.2. Factors affecting the change of the gain amount from the sales by the issuer of goods, products, services and profit (loss) of the major activity of the issuer

Factors affecting the change of the gain amount are not presented due to its small changing during the reporting period, according to the opinion of the management bodies of the issuer.

4.2. Issuer's liquidity, adequacy of the capital and circulating assets

Figures characterizing the Issuer's liquidity in the II quarter of the year 2006.

Figure's name	Calculation's methodic	31.03. 2006.	30.06. 2006.
Own circulating assets, RUR	F. №1 L. 490 + F №1 L. 640 + F.№1 L. 650 - F. №1 L. 450 - F. №1 L. 190 - F. №1 L. 230	-980 761 000	-1 071 121 000
Ratio of the owned assets autonomy	(F. №1 L. 490 + F. №1 L. 640 +F. №1 L. 650 - F. №1 L. 450) / F. №1 L. 300	0,85	0,84
Index of the fixed asset	(F. №1 L. 190 + F. №1 L. 230) / (F. №1 L. 490 + F. №1 L. 640 + F. №1 L. 650 - F. №1 L. 450)	1,03	1,04
Ratio of the current liquidity	(F. №1 L. 290 - F. №1 L. 230) / (F. №1 L. 690 - F. №1 L. 640 - F. №1 L. 650)	1,24	1,19
Ratio of the quick liquidity	(F. №1 L. 290 - F. №1 L. 210 - F. №1 L. 220 - F. №1 L. 230) / (F. №1 L. 690 - F. №1 L. 640 - F. №1 L. 650)	0,89	0,77

At the outcome of the II quarter of the year 2006 the following changes in the ratio of liquidity took place as compare with the previous period:

- ***ratio of the current liquidity characterizing the paying capacity of the Company under the complete mobilization of the circulating assets (sale of all reserves, total settle up with the debtors having a debt with a pay off term less than 1 year) amounted 1,24 by the 30.06.2006, i.e. having mobilized all circulating assets the Company will be able to pay off 100% of his short-term liabilities and 19% of the long-term;***
- ***ratio of the quick (term) liquidity characterizes a paying capacity of the Company on timely payments of the debtors. Analysis of the quick liquidity ratio shows that as for a date of the 30.06.2006 the Company may pay off once 72% of his short-term liabilities provided the 100% liquidity of the short-term accounts receivable (term for paying off less than one year);***
- ***ratio of the own assets autonomy defines the property share formed due to own sources (chartered, additional capital; not distributed profit etc.). A defining of a figure more than 50% the risk of creditors reduces to the minimum, i.e. having sold a half of his property formed at the cost of the owned assets the Company may pay off all his debt liabilities if even the second half containing the borrowed assets will be depreciated by any reasons. as for a date of 30.06.2006 this index was equal to 84%.***

By the 30.06.2006 a deficit of the own sources of the circulating asset's forming amounted RUR 1 071 121thousands against RUR 980 761 of the previous quarter (31.03.2006) (by 30.06.2005 a deficit of the own sources of the circulating asset's forming amounted RUR 3 206 979 thousands.).

The management bodies of the Issuer regarding the aforementioned information agree in their opinion.

4.3. Amount and structure of the issuer's capital and circulating assets

4.3.1. Amount and structure of the issuer's capital and circulating assets

a) in accordance with the Articles of Association the chartered capital amounts RUR 606 163 800 (six hundred six millions one hundred sixty three thousands and eight hundred roubles);

b) Information on forming and using of the reserve fund is shown in the paragraph 8.1.3. of this present report.

Index	**II quarter 2006**
a) Amount of the chartered capital, RUR	606 163 800
b) Total cost of the issuer's stock bought out by the issuer for the further resale	did not redeem
c) Amount of the capital reserves of the issuer, RUR	30 308 000
d) Amount of the additional capital, RUR	25 225 053 000
e) Amount of the unappropriated balance net proceeds, RUR – - unappropriated balance of the previous years - unappropriated balance (uncovered loss)	1 900 927 000 1 482 906 000 418 021 000
f) amount of the Issue's target investment assets, RUR	0
g) total amount of the Issuer's capital, RUR	27 762 452 000

By the 30.06.2006 the sum of the additional capital amounted RUR 25 225 052 thousands.

Additional capital may be spent by the Company to the following purposes:
-write-off the cost decreasing of the fixed assets due to their revaluation
-increase of the chartered capital
-writ-off the loss revealed at the outcome of the reporting period
- distribution between the Company's members.
Unappropriated balance of the last years consists of :
- accumulation fund (proceeds aimed to the capital investments financing; прибыль
- funds of the additional valuation wrote-off from the additional capital under the fixed asset's object retirement;
- fund of a social sphere (objects of the fixed assets of the municipal property subject to transfer);
- profit earlier aimed to replenish the own circulating assets .

The Structure of the owned capital is not changed in the II quarter of the year 2006: i.e. chartered capital, additional capital, capital reserves. The major share of the own assets falls at the additional capital(90,86%). The chartered capital is equal to 2,18%, capital reserves – 0,11% and unappropriated balance of the previous years – 5,34%.

The structure and rate of circulating assets (thous.of rub.)

CIRCULATING CAPITAL	**Line's code**	**by 01.01.2006**	**by 30.06.2006**

Cash resources	260	476 439	382 279
Other circulating capital	270	1 437	507
Total:	290	4 666 566	4 702 823

The own funds of the Company are the source of the circulating assets financing. The Company owned capital is enough for basic company recourse demand and current commitment covering. The demand provides production steadiness and sales of products.

The Company politics concerning circulating capital consists in the supply with acceptable structure and rate of the circulating assets of the Company to enhance assets liquidity. To cut down accounts receivable the work with buyers and customers is kept, bills payable and the overdue accounts receivable collection are handled.

The factors resulting in the changing of the circulating assets financing politics; assessment of chances of their forthcoming:

The following factors may influence the changing of the circulating assets financing politics:

1. ***The conventional, payment and account discipline violation by customers will lead to the Society earning decrease and debts increase to creditors. In this case the issuer has to repay the bill payable due to charged borrowing costs attraction, substituting credit debts to suppliers and contractors for loan debts to banks and credit companies. According to the issuer's opinion the possibility of this factor is average.***
2. ***The producing costs increasing leads to efficiency and the Company benefit volume reduce. According to the issuer's opinion the possibility of this factor is not high.***

4.3.2. The issuer's investments

The investments in accordance with PBU 4/99 "Company book-keeping" are considered to be:

- ***Investments in associated companies;***
- ***Investments in limited companies;***
- ***Investments in the other companies;***
- ***Borrowing for more than 12 months;***
- ***Borrowing for not more than 12 months;***

Charges on research and development shall to be at the expense of the own assets.

The Charges on research and development as for a date of the 30.06.2006 amounted _____ thousands roubles.

4.3. Анализ тенденций развития в сфере основной деятельности эмитента

Overview of the new trends in the sector of the issuer's core business

Electroenergetics is one of the leading industries of Russian economic.

Russian energy is at the fourth place in the world over the installed capacities and production volumes.

All existing in the Russian electroenergetics somehow or other relates practically all industries of national economy. Together the energy power is one of the most "problem" industries.

Structural reorganization of power branch through liberalization and decontrol of potentially competitive sectors were the main tendencies for the last ten years of world power industry development.

Due to these principles, the Concept of Strategy of reforming of the Joint Stock Company "RAO UES of Russia " "5+5" was developed and created. Nowadays this Concept is realized successfully by the management body "RAO UES of Russia " also by management of regional power companies.

On July, 11, 2001 the Decision № 526 « On reforming of power industry of Russian Federation » was approved by the Government. It directs to:

1. Divide business into monopolistic and competitive components. Generation and supply should be allocated as competitive business. Thus the Federal networks (FSK), Distributive network companies (DNC), and dispatching activity (System operator) will be under supervision of the State.

2. Create a competitive energy market implied a transition of existing sales process at the directive price (FOREM - Federal Wholesale Electric Power Market) to the market pricing mechanism (creation of AMT Administrator of market trade).

Decree of the Government of RF №1040-p approved the Schedule of activities for the primary stage of reforming was adopted as development of this present Decision.

In August, 2001 the Committee on reforming has been established at Board of directors of RAO " UES of Russia ". Its composition included representatives of minority shareholders, potential investors, the State and RAO " UES of Russia ". On December, 21 the Government of Russian Federation has approved the Decision № 881 " On the criteria of transfer of the main transmission lines and objects of the power network economy to the Unique (all-Russian) power network ".

Principal facts of the year 2002 in the sphere of reforming were the following:

- adoption by the State Duma of RF in its first regarding a pack of the bills devoted to energy power reforming;

- spending of auctions of electric power in the imitation mode by the NP "ATS" together with JSC "SO-TsDU UES" ;

- creation of infrastructural institutions in the branch, i.e. the Federal Network Company and the Sysop;

- preparation of a strategy for reforming of RAO "UES of Russia";

- termination of a preparatory stage of reforming of RAO "UES of Russia";

- development and adoption of the basic variant of reforming of JS-energo;

- preparation to implementation of the pilot projects of reforming of JS-energo;

- spending of the first stages of reforming of the scientific and designing complex of RAO "UES of Russia", also of energyreparing and service activities.

By the Resolution of the Government of Russian federation №226 dd. 2 of April 2002 "On the pricing regarding to electric and heat power" the new "Pricing principles" and "Regulations of the State regulation and application of the tariffs on electric and heat power in Russian Federation" were implemented. The Corporate Policy Code was approved by RAO "UES of Russia".

In September 2002 the non commercial partnership "Administrator of trade system"(NP "ATS" began auctions of electric power in imitation mode. One of the positive tendencies of the year 2002 was approaching of the tariffs to the economic valid, otherwise the level of the cross financing between the groups of consumers reduced.

The Board of Directors of RAO "UES of Russia" approved the base variant for reforming of regional energy systems, i.e. the RAO "UES of Russia" subsidiaries, also the exit of enterprises belonging to the Holding Company RAO "UES of Russia" from the non profile assets aimed to the expenses minimization relate to the ownership. The Board of Directors of RAO "UES of Russia" has approved the decision on termination of participation of RAO "UES pf Russia" in ZAO "TsDR FOREM" by way of selling of 75% holding of stock belonging to ZAO "TsDR FOREM" to the Non commercial partnership "ATS".

On the night of April, 1, 2003 the function of operative - dispatching administration of the Unified Energy System of Russia were transferred from regional dispatching administrations (RDA) of JS –energo to the regional dispatching administrations (RDA) , i.e. to the subsidiaries of JSC " System operator – Central Dispatching Administration of Unified Energy System (CDA UES").

In April 2003 the pack of legislative acts on electric power reforming came into the force including such federal laws as:

- "On electric power" ;

- "On the features of electric power functioning during the transition period and on the modifications in some legal acts of Russian Federation, and on recognition as invalid some legal acts of Russian Federation due to adoption of Federal Law "On electric power";

- "On modifications and amendments to the Federal Law "On the Sate regulation of tariffs on electric and heat power in Russian Federation";

- "On modifications and amendments to the Federal Law "On the Natural monopoly";

- «On modifications and amendments to the second part of the Civil Code of Russian Federation";

- "On modifications of the Federal Law "On energy power saving".

Working group on modification of the Strategy of JSC RAO" UES of Russia " for the years 2003 - 2008 "5+5" created at Board of Directors of RAO " UES of Russia " has examined the Program of the Concept of the Strategy of RAO " UES of Russia " for the years 2003 - 2008" 5+5 taking into account the remarks and offers.

Thus in the free sector each manufacturer may offer up to 15 % from the fixed capacity, and each consumer can declare purchase up to 30 % from own scheduled consumption. Economic benefit of the free sector of the wholesale electric power market launching is obvious. Densities of electric power supply by heat power plants with rather low industrial expenses has increased, while the supply by "expensive" generating capacities, on the contrary reduced.

In March 2004 allocation of repairing activity was finished according to the Program on energyreparing activity of JSC "Kuzbassenergo" approved by the Design Group on reforming of energyreparing activities and creation of technological services market of JSC RAO "UES of Russia" dd. 01.07.2003.

Subsidiary named "Maghistralnye electric networks" (Main-line electric networks) was created within the activity on reforming of electric network complex on the ground of the property complex on trunk transmission lines related to the Unique national electric network.

In February 2005 the Board of Directors of RAO "UES of Russia" approved a decision on modification of the scheme of allocation of the main-line transmission lines of JS –energo. New order of electric network complex reforming provided:

1) transfer in the main-line network companies (MNC) over the divided balance of the objects of UNUS and monetary to the expenses compensation;

2) payment of stocks belonging to JSC RAO "UES of Russia" to MNC allocated under the reorganization of JS-energo in the chartered capital of JSC"FNC UES";

3) joining of MNC as its segregation from the composition of JS-energo to one MMNC "Centre", which also the others MMNC simultaneously join.

Within the electric power reforming on the territory of Siberia the competitive sector of wholesale market was created which is till now extending to the European part of Russia and Ural.

Wholesale market of electric power in Russia is divided in two sectors, i.e. regulable (the Sate fixes the tariffs) and competitive, whose participants may sell at the free price to 15% of the outputted energy.

The 1st May 2005 the competitive sector of wholesale market of electric power was launched in Siberia.

The Kuzbass energy system feature is in the fact that the JSC "Kuzbassenergo" both sell and buy electric power.

14 affiliated companies of RAO " UES of Russia " took part in the first tenders in competitive sector of the wholesale market of the electric power on the territory of Siberia. The operator of competitive sector of the wholesale market of the electric power in Siberia is the Noncommercial partnership « Administrator of trade system ».

In the 12ths of July 2005 the Board of Directors of the JSC "Kuzbassenergo" approved the substantial reforming condition contains the action's schedule on the JSC 'Kuzbassenergo" reforming, a target state of reforming and a scheme of interterritorial consolidation.

By the Order №476 dd. July, 29, 2005 the Plan-schedule of reforming was approved, defining the trends of energy system activity at reforming to the 2st half year 2005 and to the year 2006.

Evaluation of a market price of a stock of the JSC "Kuzbassenergo" as for a date of 30.06.2005 was made by the independent valuator. Price per one stock fro redemption purposes was established equal RUR 17,57.

By the resolution of the Board of Directors of JSC RAO "UES of Russia" dd. 23.12.2005 the program on reforming of JSC "Kuzbassenergo" adopted 24.06.2004 was cancelled and the new program was approved provided segregation of JSC "Western-Siberian TETs" and JSC "South-Kuzbass GRES" with proportionally stock allocation between the shareholders except 50%=1 stock subject to purchase by the JSC "Kuzbassenergo". Termination of participation in these two companies will be carried out by way of share holdings selling as united lots at the open auctions furthermore every shareholder will receive right to sell his stocks in composition of the united lots at the date of shareholders register closing.

Purchasing by JSC "Kuzbassenergo" of generating and heat network assets of JSC "Altayenergo" is provided in future.

The extraordinary general meeting of shareholders of JSC "Kuzbassenergo" took place the 30.12.2005.

Decision on reorganization of JSC "Kuzbassenergo" by way of segregation of the following objects saving the structure of the chartered capital was accepted over the voting results:

- *JSC «Kuzbassenergo – regional electric network company";*
- *JSC «Kuzbass energy supply company";*
- *JSC "Main-line electric networks "Kuzbassenergo";*
- *JSC 'Western-Siberian TETs";*
- *JSC "South-Kuzbass GRES".*

Socks of the newly creating by JSC "Kuzbassenergo" companies - (JSC «Kuzbassenergo – regional electric network company", JSC «Kuzbass energy supply company", JSC "Main-line electric networks "Kuzbassenergo", JSC 'Western-Siberian TETs", JSC "South-Kuzbass GRES") shall be distributed between the shareholders of JSC 'Kuzbassenergo' including the shareholders who had voted against or who had not took participation in voting over the agenda on reorganization of the Company proportionally to the number of the stocks owned by them belonging to the JSC "Kuzbassenergo".

JSC "Kuzbassenergo" gets 50%+1 stock in the chartered capital of the JSC "South-Kuzbass GRES" and JSC "West-Siberian" TETs.

To the shareholders who voted against or who did not vote, it is offered to acquire the shares in the JSC "Western-Siberian TETS" and JSC "South –Kuzbass GRES" proportional to their present share in chartered capital of JSC "Kuzbassenergo".

The shareholders voting " for" the segregation of new companies, should acquire the shares proportional to their share in the chartered capital of JSC 'Kuzbassenergo" but from "rest" of chartered capitals of JSC « Western - Siberian TETs » and JSC« South - Kuzbass GRES » minus shares of JSC "Kuzbassenergo" and the shareholders voted against or not voted.

The stock of the newly creating companies not distributed among the shareholders of the Company shall be deemed as acquired by JSC "Kuzbassenergo".

The Board of directors approved a dividing balance at 30.06.2005. Preparation of the forecasted entrance balance by 30.06.2006 is started.

A project on dividing of the output power rates and a volume of the need gross receipt were prepared and submitted to the coordination to the task group in March and April of the current year , also the obligatory documents were submitted to the Not profit partnership "Trade system administrator" and Regional power committee.

Five extraordinary general meetings of shareholders of the companies segregated from the JSC 'Kuzbassenergo" took place in the 18th of May 2006 where the Charters of the companies and management bodies were approved.

Control packets of shares of the companies segregated from the JSC "Kuzbassenergo" , i.e. of the JSC "West-Siberian TETs" and JSC "South-Kuzbass GRES' will be offered for sale in the near future.

Public auctions are scheduled to start at the end of the year 2006 - beginning of the year 2007.

V. DETAILED INFORMATION ABOUT MEMBERS OF THE ISSUER'S ADMINISTRATIVE BODIES, ITS UNITS OF CONTROL OVER ITS FINANCIAL AND ECONOMIC ACTIVITIES; BRIEF INFORMATION ABOUT THE ISSUER'S PERSONNEL (EMPLOYEES)

- *interfarm roads;*
- *other fixed assets;*
- *capital investments on radical improvement of the grounds;*
- *capital investments in the rented objects of the fixed assets;*
- *lands, plots, objects of nature management (being in the property of the company).*

Long-term special editions of technical content are in the structure of the fixed assets (i.e. SNIP (Construction norms and regulations), collections, reference books etc). Acquired book editions with a term of using less than one year contained reference information of temporal keeping are not referred to the objects of the fixed assets and shall to be wrote of to the expenses as other expenditures in the moment of their transfer to maintenance. Writ-off of the book editions of temporal keeping (not to be reordered in the inventory book) shall to be exercised by authority of the director of the branch according to the act on writing off.

5.1.2. Fixed assets acquired for further sale shall to accounted at the account 41 "Goods".

5.1.3. To define composition and classification of the fixed assets it's necessary to guide the All-Russian classifier of fixed assets (OK-013-94) approved by Resolution of the State Committee of RF on standards dd. 26.12.94 №359 (ed. dd. 14.04.1998).

Drawing up of acceptance of the fixed assets in the property composition of the Company is under authority of acceptance committees. The committees are created according the orders:

- *in the executive apparatus;*
- *in the subsidiaries.*

5.1.4. Inventory object shall be regarded as a unit of accounting of the fixed assets that is the object with all adjustments and accessories or separate constructively detached object subject to some single functions fulfillment, or separate complex of constructively jointed objects as an integration subject to the defined work fulfillment (par. 6 PBU 6/01 of Provisions on accounting "Fixed assets accounting" (Order of MF RF №26n dd.30.03.2001(ed. dd. 18.05.2002).

Inventory cost of the fixed asset's objects, i.e. computers shall be determined as a sum of the price of

all devices (system block, monitor, printer, keyboard, mouse etc.) subject to work. Components and peripherals devices purchased as a change of the worn out shall be accounted as spare parts on the corresponding sub account of the account 10 "Materials".

5.2. Fixed assets valuation's ways

5.2. 1. at the acceptance to accounting the objects of the fixed assets are valuated by the next ways:

a) at the purchase of the fixed assets subject to payment- at a rate of actual expenses of the company for the purchase, defined according to par. 8 PBU 6/01 " the Fixed assets accounting " and gathered preliminary on the account 08 " Investments in non circulating assets ", the sub account " Purchase of separate objects of the fixed assets ";

b) at construction of the fixed assets by the contract organizations and own-account construction - at a rate of actual expenses for the finished and putted out capital construction according to Provisions on accounting of long-term investments, authorized by the Order of MF of Russian Federation dd. 30.12. 1993 № 160, gathered preliminary on the account 08 " Investments in non-circulating assets " by one object the subaccount " Construction of separate objects of the fixed assets ";

c) at earning of the fixed assets as investments in the authorized (pooled) capital – in monetary valuation approved by the incorporators (participants) if otherwise is not stipulated by the legislation of the Russian Federation (par. 9 PBU 6/01). The note in the debit of account 08 "Investments in non-circulating assets", subaccount "Acquisition of separate objects of the fixed assets" in the correspondence with an account 75 "Payments with incorporators" is necessary. On the debit of account 08 "Investments in non-circulating assets", subaccount "Acquisition of separate objects of the fixed assets" expenses (including transport and other delivery works) concerned the fixed assets earnings in the chartered capital shall be reflected;

d) at gratuitous acquisition of the fixed assets from the legal entities and natural persons also on posting of the fixed assets revealed as surplus over the results of privatization at the market price as for the date of posting. On gratuities acquisition the note in the debit of account 08 "Investments in non-circulating assets", subaccount "Acquisition of separate objects of the fixed assets" from the credit of the account 98 "Further incomes" is made according to corresponding analytics.

On the debit of account 08 "Investments in non-circulating assets " the subaccount " Acquisition of separate objects of the fixed assets " the expenses (including transport and other delivery works, registration fees and other expenses) concerned the gratuitous receipt of the fixed assets also are reflected. In process of amortization charge at the gratuitously acquired fixed assets, simultaneously, at a rate of charged amortization, records on the debit of account 98 " Further Incomes " according to corresponding analytics and to the credit of account 91 " Other profits and losses" in the composition of extraordinary incomes are made.

At the surplus posting over the results of inventory a record on the debit of account 01 "Fixed assets" from the credit of account 91 "Other profits and losses" is made.

Not accounted real estate revealed in the process of inventory shall be charged in the composition of the fixed assets after the documents submittal to the State registration.

To determine a current market cost the data on the cost of the same fixed assets acquired in written form from the companies – producers may be used; information on the cost level being at the disposal of the State statistics authorities, trade inspections, also mass media and special literature; expert reports on the cost of the single objects of the fixed assets being in force as for a date of taking into account must be proved documentary

or by way of expertise making (par. 29 Methodical recommendations on the fixed assets accounting (Order of MF RF №91n dd. 13.10.2003);

e) acquisition of the fixed assets under the contracts providing execution of liabilities (payment) by nonmonetary assets at the cost of values transferred or subject to transfer to the Company according to the

price which in comparable circumstances the Company usually determines cost of the similar values (par. 11 PBU 6/01);

f) Contract value shall be recognized as the value of the fixed assets acquired under exchange contracts which fixes the contract value of the exchange property.

5.2.2. Expenses on loans and credits (interests etc.) due to the fixed assets acquisition shall be included in the initial value of the fixed assets in accordance with par. 23, 31 of Accounting Provisions "Accounting of loans and credits, also their performance expenses" PBU 15/01 (Order of MF №60n dd.2.09.2001).

5.2.3. Expenses (income) on acquisition of the objects of the fixed assets arisen after its acceptance to accounting (cost and price difference, nonreimbursable taxes etc.) shall be accounted on the account 91 "Other profits and losses" in composition of extraordinary expenses (incomes) according to the corresponding analytics.

5.2.4 Changes in initial cost of the fixed assets shall be only in cases of completion, after equipment, reconstruction and modernization, partial liquidation and revaluation of the fixed assets.

5.2.5. Complex or partial revaluation of groups of similar objects of the fixed assets over the current (replacement cost) by way of indexation or direct converting according to documentary approved market costs is carried out one a year (as for the 1 January of the reporting year) on the ground of the single Order of the Company, and further is carried out regularly (every year).

Revaluation sum of the fixed asset's object resulted to revaluation shall be charged on the account 83"surplus capital" in amount charged minus its discount fulfilled the previous reporting periods and transferred to the account of profits and losses as operational expenses.

Revaluation sum of the fixed asset's object equal to the sum of its discount fulfilled the last previous periods and transferred to the account of profits and losses as expenses shall be transferred to account 91 "Other profits and losses" in composition of operational profits.

Discount sum of the object of the fixed assets shall be referred to the additional capital decreasing composed due to revaluation's sum of this object in the previous reporting periods (par. 15 PBU 6/01, ed. 18.05.2002). Excess of the discount sum of the object of the fixed assets over the sum of its discount related to the additional capital resulted the revaluation spent the previous periods shall be referred to the account 84 "Non distributed profits (uncovered loss)".

5.2.6. Sum of revaluation (discount) arose from revaluation of the fixed assets of the subsidiaries shall be transferred to the executive body of the Company on debit (credit) of account 79 "Intraeconomic payments" on subaccount " Payments on allocated property".

5.2.7. At the object of the fixed assets withdrawal the sum of its revaluation shall be transferred from the account 83 "surplus capital" to the account 84 "Non distributed profits (uncovered loss)" in composition of profit of the reporting period (par. 15 PBU 6/01).

5.2.8. Valuation of the fixed asset's object which cost under acquisition is expressed in foreign exchange shall be realized by way of the sum conversion according to the rate in force of Central Bank of Russia by the date of the object charge to account 01 "Fixed assets".

Furthermore the rate difference shall be accounted on debit (credit) of account 08 "Investments in noncirculated assets" in the credit (debit) of account 91 "other profits and losses" in composition of the extraordinary expenses (profits) (par. 16 PBU 6/01).

5.2.9. Gratuitous transfer and sale of the fixed assets to the third-party companies and natural persons, charge-off of underamortization fixed assets from the balance due to their unfitness to use, also deficient fixed assets revealed under inventory or stolen shall be carried out according to the written order of the JSC 'Kuzbassenergo" prepared by the Department on capital management together with visas of corresponding services.

The document shall be subscribed by Deputies general director to the proper place:

- *fixed assets of nonindustrial activities (Housing and communal services, catering, autotransport etc.) – by the first deputy general director on common problems;*
- *industrial fixed assets – by the deputy general director, technical director;*

Charge-off from the balance of the amortized fixed assets due to their unfitness to use, also partial liquidation of the fixed assets shall be carried out on resolution of director of subsidiary or representative office.

In the process of charging-off from the balance of the underamortized fixed assets, VAT falling at the underamortized part without revaluations shall be restored.

Stocks of materials and capital equipment remained due to discount of unfit to reconstruction and further use of the fixed assets shall be debited at the market price as for the date of the fixed assets object's discount together with transfer to account 91 "Other profits and losses" in composition of operating profits.

5.2.10. Depreciated cost of the retired object of the fixed assets from the credit of account 01 "Fixed assets" shall be withdraw to the debit of corresponding subaccount of account 91 "Other profits and losses":

- *in composition of operating expenses in case of the fixed asset's retire due to sale, charge-off in case of moral or material depreciation;*
- *in composition of extraordinary expenses in case of the fixed asset's retire due to gratuitous transfer.*

Retire of object of the fixed assets transferred on account of investments in the authorized (polled) capital, pay fund in amount of its depreciated cost shall be reflected on debit of account of expenses accounting and credit of account of he foxed assets accounting.

If the object of the fixed assets has not depreciated cost (fully amortized), amount of the conditional value shall be reflected in bookkeeping as operating profits in the line 09010 of the form 2 "Report on profits and losses".

5.2.11. Expenses on the fixed assets charge-off due to accidents, natural disasters and others emergency situations shall be reflected in bookkeeping of reporting period in composition of emergency expenses.

5.3. Amortization of the fixed assets

5.3.1. The method of amortization of the objects of fixed assets is linear, reasoning from the dates of the effective use of these objects. The amortization of the objects of fixed assets, taken on accounting before 01.01.2002, is accrued in accordance with the Regulation of the USSR Council of Ministers from 22.10.1990 № 1072 "About the unified standards of amortization charges for the complete reconstruction of fixed assets of the economy of the USSR". The amortization of the objects of fixed assets, taken on accounting since 01.01.2002, is accrued in accordance with the Regulation of the Government of RF from 01.01.2002 № 1 "About the classification of fixed assets included in the amortization groups".

5.3.2. The amortization of the objects of real estate property, capital investments of which are completed, all primary acceptance instruments are drawn up, the documentation is handed over the state registration and practically put into operation, is accrued in accordance with the established procedure – since the first day of the month, following the month of setting the object into operation. The objects are regarded as the objects of fixed assets.

5.3.3. The objects of fixed assets at the cost of up to RUR 10 000 per unit are charged off according to the item "Amortization" as far as they are put into production or operation. This operation is mentioned in accounting on debit of accounts of inputs account (selling costs) and account credit 01 "Fixed assets" and drawn up by the Act of charging off according to MB-8 form. Such objects are reckoned in the record keeping at the cost of 0. In case of modernization (reconstruction) of these objects, the modernization (reconstruction) expenses are charged to the increase of the cost of the object and amortized in accordance with the established procedure.

The executive body, affiliated companies and the representative office control the movement of these objects in order to ensure their safety in the process of production and operation. Records management of these objects in places of their operation is kept in "The bill of assets at the cost of up to RUR 10 000, put into operation" according to the suggested form, apart from the fixed assets, depreciated in accordance with the established procedure (Appendix 2 to the present Regulation). Accounts department and persons in charge

control the correspondence between the records in the bill and inventory sheets.

The retirement of the objects at the cost of up to RUR 10 000 is drawn up by "The Act of retirement of fixed assets at the cost of up to RUR 10 000", according to the suggested form (Appendix 2 to the present Regulation).

5.3.3. The objects of fixed assets at the cost of up to RUR 10 000 per unit are charged off according to the item "Amortization" as far as they are put into production or operation. This operation is mentioned in accounting on debit of accounts of inputs account (selling costs) and account credit 01 "Fixed assets" and drawn up by the Act of charging off according to MB-8 form. Such objects are reckoned in the record keeping at the cost of 0. In case of modernization (reconstruction) of these objects, the modernization (reconstruction) expenses are charged to the increase of the cost of the object and amortized in accordance with the established procedure.

The executive body, affiliated companies and the representative office control the movement of these objects in order to ensure their safety in the process of production and operation. Records management of these objects in places of their operation is kept in "The bill of assets at the cost of up to RUR 10 000, put into operation" according to the suggested form, apart from the fixed assets, depreciated in accordance with the established procedure (Appendix 2 to the present Regulation). Accounts department and persons in charge control the correspondence between the records in the bill and inventory sheets.

The retirement of the objects at the cost of up to RUR 10 000 is drawn up by "The Act of retirement of fixed assets at the cost of up to RUR 10 000", according to the suggested form (Appendix 2 to the present Regulation).

5.3.4. Amortization of the following objects is not accrued:

- housing resources (par.17 PBU 6/01);

- objects of external accomplishment (par.17 PBU 6/01);

- productive cattle (par.17 PBU 6/01);

- perennial plantations (par.17 PBU 6/01);

- lands (par.17 PBU 6/01);

- objects of nature management (par.17 PBU 6/01);

- fixed assets, received before 01.01.2000 under contracts of donation and gratis in the process of privatization;

- books, brochures and other editions.

5.3.5. The process of amortization accrual can be interrupted by the decision of the director of the affiliated company in the period of restoration (repair, modernization, reconstruction) of the objects of fixed assets, that lasts more than 12 months, and in case of their temporary closing-down for the period of more than 3 months under the order of the JSC "Kuzbassenergo" (par.23 PBU 6/01).

5.3.6. Accrued amortization of the objects of fixed assets of production purposes under the account credit 02 "Depreciation of fixed assets" control account "Accrued amortization" is sent to finance capital investments of production purposes as a record in debit of account 02 "Amortization of fixed assets" control account "Accrued depreciation" from credit 02 "Amortization of fixed assets" control account "Amortization of capital investments".

The off-balance account with the acceptance (transfer) of the funding source among the affiliated companies under off-balance aviso is kept, when nesting at the cost of inter-branch amortization redistribution

5.3.7. Capital investments in the borrowed objects of the fixed assets are amortized as follows:

Capital investments which cost are subject to reimbursement by the leaser to the lessor shall to be depreciated by the lessor in the order similar to the restarting up after reconstruction, modernization or technical reequipment (in case if the JSC "Kuzbassenergo" act as a lessor), that must be stipulated by the lease contract;

Capital investments produced by the lesser by approbation of the lessor and in accordance with the terms of the lease contract, which cost is not reimbursed by the lessor must be amortized by the lesser within the period of validity of the lease contract from the amount of the amortization calculated subject to useful life defined for the leased objects of the fixed assets in accordance with the Classification of the fixed assets approved by the Government of Russian Federation (if the JSC "Kuzbassenergo" acts as a leaser).

5.3.8. In case of rebuilding, reequipment, reconstruction, modernization, partial liquidation and revaluation of an object of the fixed assets the amortization must be calculated subject to the depreciated cost of the fixed assets by the date of its making and months number rest to the fixed assets maintenance termination.

If a useful life of the fixed asset's object grew after rebuilding, reequipment, reconstruction, modernization than the rest months number to the fixed assets maintenance is possible.

Acceptance of the finished works in rebuilding, reequipment, reconstruction, modernization of the fixed assets shall to be formed by the corresponding act.

5.4. Procedure of accounting and financing of the fixed assets repair

5.4.1. For a current fiscal year the reserve for repair work is created on account 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes" at the rate established by the estimate of expenses of the annual standard of repair cost, including it into production costs monthly (accounts 23, 25, 26) at the rate of 1/12 of annual estimate. The reserve is created to include expenses for all types of repair work of fixed assets of production purposes into production costs.

At year end the adjustment of the repair reserve is performed :

- *extra reserved money for the repair of fixed assets (as a result of inventory taking) is reversed an entry.*
- *in case of stress of reserve money for repair of fixed assets, extra charge takes place under debit of accounts of the records of production costs and on account credit 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes".*

Account of repair expenses is carried out separately according to the types of repair (thorough repairs and current repairs) and methods of carrying out (contract and household).

All the expenses for repair of fixed assets of production purposes, carried out with the help of:

- *household method – are accounted object by object on account 23 "Auxiliary processes" under control accounts "Thorough repairs of fixed assets using the household method" and "Current repairs of fixed assets using the household method". Later they will be put in corpore into debit of account 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes" every month.*
- *contract method – are put in corpore from account credit 60 "Settling with suppliers and contractors" on the corresponding control accounts into debit of account 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes"*

In case of stress of reserve money for repair of fixed assets (including leasehold assets) of production purposes, debit balance on account 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes" is mentioned in the line of the balance "Other production costs and resource" at the end of month

Expenses for repair of fixed assets of non-production purposes are charged off from the credit of corresponding control accounts of account 23 "Auxiliary processes" or account 60 "Settling with suppliers and contractors" into debit of account 29 "Attendant production and households" without fund creation .

5.5. Account of intangible assets.

5.5.1. Intangible assets include the objects of intellectual property under all implemented terms, mentioned in par.3 PBU 14/2000 " Account of intangible assets"(The Order of Ministry of Finance of the RF from 16.10.2000 № 91n).

5.5.2. To be taken on accounting the objects of intangible assets are valued in the following ways:
a) intangible assets acquisition subject to payment – at the rate of actual expenses of the Company for the acquisition of the assets, defined in accordance with par.6 PBU 14/2000 " Account of intangible assets"(The Order of Ministry of Finance of the RF from 16.10.2000 № 91n), collected preliminarily on account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets";

b) creation of intangible assets by the Company itself – at the rate of actual expenses for creation and production except for value added tax and other refundable taxes, collected preliminarily on account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets"(par.7 PBU 14/2000);

c) deposition of intangible assets in the authorized (polled) capital – in pecuniary valuation, coordinated by founders (members), if nothing else is provided by the Legislation of RF (par.9 PBU 14/2000).A preliminary record is made in debit of account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets" in correspondence with account 75 "Settling with founders". The expenses connected with deposition of intangible assets in chartered capital are mentioned as well on debit of account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets";

d) non-repayable donation of intangible assets from legal and natural persons - at the common rate at the date of posting. A record in debit of account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets" from account credit 98 "Revenue of next periods" is made. The expenses connected with non-repayable donation of intangible assets are mentioned as well on debit of account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets". The information about the prices, established at the date of taking on accounting, is confirmed authentically or by examining.

By amortization accrual of such intangible assets at the same time at the rate of accrued amortization the records are made on debit of account 98 "Revenue of next periods" in corresponding analytics and account credit 91"Other profits and losses" in non-disposal revenue;

e) acquisition of intangible assets under the contracts, providing for discharge of obligations (payment) with non-monetary funds – at the cost of values, transferred or being subject to transfer by the Company, set reasoning from the price that is fixed by the Company for similar values in similar circumstances (par.11 PBU 14/2000);
f) the cost of intangible assets is the contract value; the assets received under contracts of exchange which fix the contract value of exchanged property;

5.5.3. Amortization of all groups of intangible assets is carried out with the linear method, based on the standards calculated on the basis of the period of the effective use of the objects of intangible assets, using account 05 "Amortization of intangible assets" (par.15, 16, 21 PBU 14/2000).

5.5.4. The period of the effective use of intangible assets is defined independently when the object is taken on accounting, reasoning from the expected period of use of an object, when it is possible to collect revenue. The expected period of the effective use should not exceed the period of validity of a patent, a licence and other legal documents and limits on the use of the objects of intellectual property according the present legislation of Russian Federation (par.17 PBU 14/2000).

If it is impossible to define the period of the effective use of intangible assets, the standards of amortization charges are set counting on 20 years (but it should not exceed the period of functioning of the Company).

5.6. Lease of fixed assets

5.6.1. The leased property is mentioned apart in accounting. All the leased property expenses are carried out on account 90 "Selling". Depreciation of leased property is mentioned on account credit 02 "Amortization of the fixed assets" and debit of account 90 "Selling".

Full payback of the objects (including local taxes: acre-shot, tax on property, etc.) should be provided in lease contracts.

If under the lease contract of the fixed assets the lessor settles up with the communal services suppliers, the lesser must compensate a full cost of these services according to the invoice issued by the lessor. In case of lease of a part of the fixed asset's object of the lessor, a share of communal expenses fallen at the leaser shall to be defined by the measuring devises or in case of their lack as a ratio of a part of an area of the fixed asset's object occupied by the leaser to the total area of an object of the lessor's fixed assets.

The lessor shall to pay off communal services against the invoices issued to him by the communal services suppliers than he must invoice it to the leaser.

Compensation for communal services received by the lessor from the lease is not a profit, but a reimbursement of expenses amount produced by the lessor.

5.6.2. Account of leased fixed assets is kept on off-balance account 001 "Leased fixed assets" according to the valuation, fixed in lease contracts. Analytic account is kept regarding lessors and every object of leased fixed assets.

5.6.3. . Lease contract defines the period of leasing of fixed assets, the amount of rental fee, the terms of the keeping and repair work, valuation changes as a result of thorough repairs, and procedure of settlements.

5.6.4. The property, purchased for leasing and profit earning, is mentioned in accounting on account 03 "Income investments in stocks of materials and capital equipment".

5.6.5. Lease contracts of the fixed assets shall to be coordinated with the Deputy general director of the JSC "Kuzbassenergo" on corporate governance and visaed by the corresponding authorities.

5.7. Account characteristics of the investments in non-circulating assets.

5.7.1. Running expenditures on the CCO capital construction objects) ((wage cost, travel expenses) are covered at the expense of the funds, aimed at financing of capital construction and included in the inventory cost of exploited objects (par.1.4. of the Regulation on accounting of long-term investments, confirmed by the Order of the Ministry of Finance of RF from 30.12.93 №160).

5.7.2. Every month running CCO expenditures of the executive body are distributed among the affiliated companies pro rata average monthly expenditures (AME) volume of affiliated companies in accordance with the coefficient, calculated as in the ratio of AME volume of an affiliated company for the reporting month and total AME volume of the Company for this month.

5.7.3 Capital construction expenses are included in inventory cost of objects of capital investments at taking them on accounting. They are classified by par.3.1.7. of the Regulation on accounting of long-term investments, confirmed by the Order of the Ministry of Finance of RF from 30.12.93 №160 as the expenses not leading to the increase in the cost of fixed assets.

5.7.4. If the Company has shares when the construction is under way, the transfer of monetary funds or property to the chief builder on the basis of share holding is reflected as a accounts receivable of this construction by the record in debit of corresponding control account of account 76 "Settling with various debtors and creditors" in correspondence with accounts of accountability of monetary funds or property.

When the construction (or it's part) comes to an end the corresponding expenses are taken on account by the record from account credit of the corresponding control account 76 "Settling with various debtors and creditors" in debit of account 08 "Investments in non-circulating assets", control account "Construction of the objects of fixed assets".

5.7.5. If the Company is the chief builder, the money, received from the builders who have shares, is mentioned as money for purpose financing on debit of account 86 "Purpose financing" in correspondence with accounts of accountability of monetary funds or property.

5.7.6. Account of NIOKR in the Company is carried out in accordance with the Regulation on accounting "Account of expenses for research engineering, development and technological activity" (PBU 17/02) (approved by the Order of the Ministry on Finances dd. 19.11.2003 №115n).

The expenses for research engineering, development and technological activity are recognized in accounting if:

The sum of the expense can be defined and confirmed;

There is documentation that proves execution phase;

The results of the activity used in production and operation will lead to revenue in future;

The use of results of research engineering, development and technological activity can be demonstrated.

The expenses for research engineering, development and technological activity according to the par. 4 of PBU 17/02 don't contain:

The company's expenses on nature resources development;

Expenses on development of production, new companies, plants, aggregates (start costs);

Expenses on development of manufacturing work;

Expenses concerned the improvement of production technology together with improvement of product quality, change in the product's designing and other operational attributes realized during the manufacturing (technological) process.

The expenses for NIOKR are mentioned in accounting on account 08 "Investments in non-circulating assets" (par.5 PBU 17/02).

The expenses for NIOKR, which results are subject to legal safeguard and drawn up in accordance with legislation order (patents, licenses and other documentation are received to attest the exclusive right of the Company to possess the results of NIOKR), can be considered intangible assets at the account 04 'Intangible assets" (par. 4 PBU 14/2000).

The expenses for NIOKR , which results are not drawn up in accordance with established procedure, are charged off from account credit 08 "Investments in non-circulating assets" for the expenses for usual activities using the linear method during the fixed period (par. 11 PBU 17/02).

The expenses for NIOKR, which results were not satisfactory, and the results of NIOKR which use was stopped, are drawn up by the decision of PTO of an affiliated company.

The decision can be viewed by the service of PTO of the executive body and with the written permission of the technical director. The expenses are charged off at a time in non-disposal expenses of the reporting period.

If in the process of NIOKR fulfillment a positive result not being subject to legal safeguard, that is going to be used in production or in management, such expenses for NIOKR also shall to be accounted reflected at the account 04 "Intangible assets".

The period of charging off the expenses for NIOKR is set within 2 years.

5.7.7. The objects of the incompleted capital construction, which construction was stopped and won't be carried out because of lack of funds in future, exposed to revaluation, the cost of revaluation is transferred from account credit 84 "Surplus earnings (dead loss)" in debit of account 83 "Surplus capital" and as a record from account credit 08 "Investments in non-circulating assets" in debit of account 91 "Other receipts and expenditures" in the sum of actual expenses incurred.

The charge off the objects of incompleted construction is carried out by phased;

Commission (including specialists of account department, technical services, material responsible persons) is created by order of the manager;

According to the commission's report the act on expediency of write-off the object of incompleted construction is drew up. Thus on the base of this act a liquidation of the object by own forces or together with contracting organization is made;

Act on writ-off (liquidation) of the object of incompleted construction is drawn up after all the works at the liquidated object. The act on write-off (liquidation) of the object of incompleted construction shall to contain information on the object's conditions as for a date of writ-off, its short individual characteristic, reference on expenditures caused by the writ-off and on stocks of materials and capital equipment income due to writ-off.

Under the liquidation of the incompleted construction, expenses accrued on the account 08 "Investments in the non circulating assets» on their construction and expenses caused by these objects liquidation are subject to writing-off in the structure of the intangible assets.

Got material and other stocks of materials and capital equipment due to the objects liquidation useful to further using are subject to posting.

5.8. Inventory accountability

5.8.1. Inventory includes assets:

- *for being used as raw material, materials, etc. in the process of production, in execution phase and rendering of service, repair work of fixed assets, building and assembly jobs, cultural and educational needs;*
- *aimed at being sold (finished commodity);*
- *aimed at being used as means of labour during the 12-month period;*
- *aimed at being used by the Company for meeting its administrative needs.*

5.8.2. Inventory, tools and household fixings used less than for 1 year-period are included in inventory on account 10 "Materials".

5.8.3. The stock-list number, worked out for a definite name of inventory, is taken as an accounting unit.

5.8.4. Taking on accounting of the inventory, its valuation is carried out in the following ways:

- *acquisition subject to payment – the sum of actual expenses for acquisition except value added tax and other taxes compensated from the budget, defined in accordance with par.6, 11 PBU 5/01 ("Inventory accounting") approved by the Order of the Ministry of Finance of RF from 09.06.2001 № 44n), with the glance of the regulations of par.15 PBU 15/01 "Account of loans and lending and the expenses for their operation" with the glance of interests and other expenses for borrowed current assets (approve by the Order of the Ministry of Finance of RF from 02.08.2001 № 60n);*
- *making by own strength – reasoning from actual expenses, connected with the production of the inventory. Account and formation of inventory expenses is carried out in the order, established to define the net cost of applicable types of production (par.7 PBU 5/01);*

- invested in chartered capital – reasoning from pecuniary valuation, coordinated by founders (members), if nothing else is provided by the Legislation of RF , with the glance of actual expenses for the delivery of the inventory and putting it in conditions for operation, according to par.6,8, 11 PBU 5/01);

- received gratis or under the contract of donation, left from retirement of fixed assets and other property and posting of the inventory, revealed as surplus as a result of inventory taking – reasoning from current market cost considering the posting date with the glance of actual expenses for the delivery of the inventory and putting it in conditions for operation (par.9, 11 PBU 5/01).

- received under the contracts, providing for discharge of obligations (payment) with non-monetary funds –

at the cost of values, transferred or subject to transfer to the Company, fixed reasoning from the price that is fixed by the Company for similar values in similar circumstances. If it is impossible to define the cost of assets, transferred or subject to transfer to the Company, the cost of the inventory, received by the Company under the contracts, providing for discharge of obligations (payment) with non-monetary fund, is defined reasoning from the price, that is more suitable for acquisition of similar inventory in similar circumstances. The actual cost price of the inventory includes actual expenses for the delivery of the inventory and putting it in conditions for operation in accordance with par.6, 10, 11 PBU 5/01;

- *The cost of the inventory, received under the contracts of exchange, which fix the contract value of the exchanged property, is the fixed contract value.*

5.8.5. 5.8.5. The evaluation of the inventory, which cost is evaluated in foreign currency at the moment of acquisition, is estimated in rubles at the rate of exchange fixed by the Central Bank of RF on the day of taking the inventory on accounting.(par.15 PBU 5/01).

5.8.6. . The inventory received by the Company without calculated-paid documents (non-invoiced deliver) are taken on discount at the price fixed in the contract. If the price is not fixed in the contract, in order to fix it and the amount of payment or account payable, the price, used by the Company in similar circumstances with similar inventory, is tagged (par.6.1. PBU 10/99 "The Company's expenses") approved by the Order of the Ministry of Finances of RF №33n dd. 06.05.1999 (ed. dd. 30.03.2001).

After calculated-paid documents are received, the difference between the actual cost of inventory and its valuation at the moment of taking on discount is included in the same expenses accounts the inventory was charged off, and in the balance of the inventory at the store pro rata its volume.

If calculated documents of non-invoiced delivers were received a year later after the annual accounting had been performed, it means that:

a) account cost of the inventory is not changed;

b) the rate of value added tax is used in accounting in accordance with established procedure;

c) settling with a supplier is being adjusted, the difference between account cost of the inventory and its actual cost is charged off in the month, when the calculated documents were received:

- *cost decrease of the inventory is mentioned on debit of account 60 "Settling with suppliers and contractors" and account credit 91 "Other expenses";*
- *cost increase of the inventory is mentioned on debit of account 91 "Other expenses" and account credit 60 "Settling with suppliers and contractors" (par.41 of Methodical Instructions on the inventory accounting (confirmed by the Order of the Ministry of Finance of RF from 28.12.2001 № 119n).*

5.8.7. Goods bought for sale by retail are accounted at the value of sales on account 42 "Trading extra charge" (par.13 PBU 5/01). The amount of extra charge, falling at the remains of unrealized products, is fixed reasoning from the percentage of the cost of retired products to the cost of the accounted ones.

5.8.8. Goods bought for selling in wholesale are accounted at the acquisition cost with the glance of the expenses for provision and delivery of the products to the stores (bases) till the moment they come into the market (par.13 PBU 5/01).

5.8.9. The inventory, owned by the Company, but being delivered, or transferred to a customer to pawn, is taken on discount in value, fixed in the contract with sequential adjustment of actual cost (par.26 PBU 5/01).

5.8.10. The account of purchased fuel for energy generation is carried out at actual cost and includes: the fuel cost according to the bills of suppliers, including discounts (extra charge) because of poor (good) quality, the payment for other services provided by the supplier and commodity exchange, railway rate quotation of fuel from the shipment place to the station of destination and from the station of destination to discharge arrangements, other expenses according to par.6, 11 PBU 5/01, except the expenses of fuel-shipping department.

The expenses of fuel supply workshop for unloading, warehousing and intraoffice transference of fuel from the stores and fuel delivery for meeting technological needs are not included in the net cost. They are referred to the expenses for power generation of TTTS (par.4.7. of Methodical Instructions on fuel account at heat power plants RD 34.09.105-96).

5.8.11. On putting the inventory (except the products accounted at value of sales) in production and other type of retirement the valuation is appraised at average net cost of each type of inventory.

The average valuation of actual cost of the materials released in production or charged off for other purposes, is estimated by the defining of the actual cost of the material at the moment of its release (sliding valuation).

5.8.12. The putting into production (operation) of the inventory holdings is drawn up as a blading according to form M-11 for intraoffice transference (from one advance holder to another one).

The charging off the inventory in production, except for construction materials, is carried out on the basis of the act of charging off the equipment and other types of the inventory in suggested form (Appendix № 2 to the present Regulation).

The charging off the inventory in production is carried out on the basis of the act of charging off the inventory in suggested form with simultaneous drawing up the blading according to form M-11 for putting in production (Appendix № 2 to the present Regulation).

5.8.13. The account of special tools, special devices, special equipment and working clothes is carried out in the Company in accordance with the Methodical Instructions on accounting of special tools, special devices, special equipment and working clothes, confirmed by the Order of the Ministry of Finance of RF from 26.12.2002 № 135n.)

The list of the means of labour accounted as special tools, special devices, special equipment, used for carrying out non-standard operations (par.2 of the Methodical Instructions), is defined by the affiliated company independently reasoning from the peculiarities of the engineering procedure.

When defining the composition and groups of special equipment one should take into account the All-Russian classifier of fixed assets OK-013-94 (confirmed by the Resolution of the State Committee on standards, metrology and inspection certification from 26.12.94 № 359), and the All-Russian classifier of types of economic activity, production and services OK-004-93(confirmed by the Resolution of the Government standard of RF from 06.08.93 № 17).

Special equipment, working clothes and other means of man-to-man defense, regardless of their cost and the period of effective use, is referred to the means put into circulation (par.50 "The Regulation on bookkeeping of RF", confirmed by the Order of the Ministry of Finance of RF from 29.03.2000). These means are mentioned in control accounts 10.10 "Special equipment and working clothes at the store" and 10.11 "Special equipment and working clothes in use", open to the balance account 10 "Materials".

Bedding, tools aimed at carrying out the standard types of production (par.4 of the Methodical Instructions) and other inventory included in the means put into circulation are mentioned in account 10.9 "Inventory and household equipment"

Working clothes and other means of man-to-man defense, special equipment which can be used up to 12 months, according to the standards, are charged off in debit of accounts of expenses for production at the moment of its transference to the workers of the Company (par.21 of the Methodical Instructions)

The charge off the given working clothes, other means of man-to-man defense etc. is carried out on the basis of the act on charging off according to form MB-8 with simultaneous drawing up the blading according to form M-11 for putting in production.

If the period of operation is more than 12 months, the cost of working clothes and other means of man-to-man defense etc. is covered with the linear method reasoning from the periods of the effective use (par.26 of the Methodical Instructions).

To get working clothes, other means of man-to-man defense etc. aimed at long-term use, a worker must sign in worker's personal card (form MB-2) and in the list accounting the issue of the working clothes, other means of man-to-man defense etc. (form MB-7).

The cost of special equipment is covered with the linear method reasoning from the actual cost of the object

and standards reasoning from the periods of the effective use of the object (par.24 of the Methodical Instructions). The period of the effective use of special equipment in affiliated companies is set by the permanent Commission individually for each type of special equipment.

The charge off the special equipment and working clothes is carried out in case of actual retirement (obsolescence, depreciation, selling, gratuitous assignment, investment in chartered capital of other companies, disposition in case of an emergency etc.).

5.8.14. The charge off the inventory delivered under the contract of donation or gratis is carried out on the basis of the basic document on the release of materials (the blading on the release of materials, of form M-15, the instructions on the release of materials or the order on the release of materials and "the Act of gratuitous reception- assignment of the inventory" (Appendix № 2 to the present Regulation). The materials are charged off in accordance with par.5.8.11 of the present Regulation. The cost of the donative materials is referred to the finance results of non-realized expenses (par.12 PBU 10/99 "The expenses of the Company" from 06.05.1999 № 33n, par.132 of "The Methodical Instructions on the inventory accounting" from 28.12.2001 № 119n (version of 23.04.2002).

5.8.15. Actual reserves of coal, mazut and other stock of materials are created according to the standards, confirmed by the directors of the Company. It is connected with the seasonal nature of production and energy supply.

5.8.16. The inventory, unloaded by the supplier and had not been delivered at the stores of the Company, which became the property of the Company (regardless of the fact of payment), is mentioned as the inventory that was not delivered at the end of the month.

5.8.16. The reception and posting of the materials is carried out by putting on the documents of the supplier a stamp with essential elements of the posting order (account, blading) (par.49 of "the Methodical Instructions on the inventory accounting" from 28.12.2001 №119n (version of 23.04.2002) and not by the drawing up the posting order (form M-4) if there is no discrepancy between the data of the supplier and actual data (quality and quantity).

5.8.17. The reception, storing, control and issue of ethyl alcohol is carried out in order provided by " Instruction on reception, issue, transportation and control over ethyl alcohol", confirmed by the Ministry of food industry of the USSR 25.09.85 (from here- Instruction). This Instruction covers all the types and kinds of ethyl alcohol regardless of the way of its purchase and the purpose of further use.

The reception and posting of ethyl alcohol is carried out in anhydrous calculus (in decalitres) on the basis of the Act of the form № P-24 "About the shipping and acceptance of ethyl alcohol" (Appendix № 7 to the Instruction) with the glance of data about the actual quantity of ethyl alcohol, received as a result of measuring conducted by the company officials and mentioned in the section of the Act.

The issue of ethyl alcohol to production departments and laboratories is carried out in accordance with par.2.1. of the Instruction and drawn up as a requisition according to form № P-29 (Appendix to the Instruction).

The results of acceptance and issue of ethyl alcohol carried out on the basis of corresponding posting and expenses documents are fixed in the log book of the measuring of ethyl alcohol according to form № P-23 (Appendix №4 of the Instruction), conducted by the official who is responsible for the acceptance, issue and storing of ethyl alcohol.

In accordance with the requirements of par. 2.6. of the Instruction production departments and laboratories keep records of supply and consumption of ethyl alcohol every day in the book where they fix the name and the number of industrial operations and analysis, the quantity of consumed ethyl alcohol for each operation and for a day.

The rest of ethyl alcohol at the beginning and at the end of the month is shown according to the inventory taking, that is conducted in accordance with section 6 of the Instruction on the first day of each month. The results of the inventory taking are drawn up as the acts according to form №P-27 (Appendix № 21 to the Instruction).

The declarations "About the volume of output and circulation of ethyl alcohol out of food raw material" are shown quarterly by the Company to the rating authorities and executive authorities, granted a license of this type activity, according to appendixes 2 and 7 to the Resolution of the Government of RF from 25.05.99 № 564 "About the approval of the Regulation on avowal of the production and circulation of ethyl alcohol, alcoholic and spirit-based products".

5.9. Account of financial investments.

5.9.1. The account of financial investments in the Company is carried out in accordance with PBU 19/02 "Account of financial investments", confirmed by the Order of the Ministry of Finance of RF from 10.12.2002 № 126n.

5.9.2. The financial investments of the Company include (par.3 PBU 19/02):

- *state and municipal securities, securities belonging to other companies, including debt securities which fix the date and the cost of acquittance (bonds, bill of credits);*
- *investments in the authorized (pooled) capitals of other companies (including subsidiaries and dependent companies);*
- *loans granted to other companies;*
- *deposit investments in lending agencies;*
- *accounts receivable acquired on the basis of assignment;*
- *investments under the contracts of joint venture etc.*

5.9.3. Accounting of financial investments is carried out on account 58 "Financial investments" with the division of the investments on short-term and long-term, according to the application date (maturity date) and the intentions:

- long-term investments, when the schedule data of the application (maturity) date is more than one year or the investments are made to collect revenue for more than a year;

- short-term investments, when the schedule data of the application (maturity) date is less than one year or the investments are made without the intention to collect revenue for less than a year.

5.9.4. Financial investments are taken on accounting at original cost. The original cost of financial investments, purchased subject to payment, is the sum of actual expenses of the Company for their acquisition, except for value added tax and other compensated taxes (except cases provided by the Legislation of RF about taxes and tallage).

Actual expenses for acquisition of assets in the capacity of financial investments are:

- *the sums paid to a salesman in accordance with the contract;*
- *the sums paid to the companies and other persons for information and consultation services connected with the acquisition of the mentioned assets;*
- *the bonuses paid to mediator companies or another person through whom the assets were bought in the capacity of financial investments;*
- *the expenses of the received loans and lending, made before financial investments are taken on account, at the acquisition of financial investments at the expense of borrowed current assets (par.15 PBU 15/01 "Account of loans and lending and the expenses for their operation" confirmed by the Order of the Ministry of Finance of RF from 02.08.2001 № 60n);*
- *other expenses connected with the acquisition of the assets in the capacity of financial investments.*

Actual expenses for the acquisition of the assets in the capacity of financial investments are defined according to the differences in sums if the payment is in rubles and makes the sum equivalent to the sum in foreign currency, before the assets in the capacity of financial investments are taken to the account.

5.9.5. The original cost of finance investments made in the chartered capital of other companies is the pecuniary valuation, coordinated among the founders (members) of the companies, if nothing else is provided by the Legislation of RF.

At payment of the deposition in the chartered capital with non-monetary funds on account 58 "Financial investments" the depreciated cost of transferred objects is mentioned. At the reception of the deposition in the chartered capital with non-monetary funds on account 80 "Chartered capital" the pecuniary valuation of the transferred objects coordinated by the founders is mentioned; account 58 "Financial investments" of the founder and account 80 "Chartered capital" of the receiving party will have different cost valuation.

5.9.6 The original cost of the loans given to other companies is the sum of actual transferred monitory funds or the book cost of the property, if the loan presents the property (non-monetary funds).

5.9.7. The original cost of the financial investments, deposition under the contract of joint venture is the pecuniary valuation coordinated by the partners of the joint venture.

5.9.8. The original cost of the financial investments acquired under the contracts providing for discharge of obligations (payment) with non-monetary funds is the cost of assets, transferred or being subject to transfer by the Company.

The cost of the assets , transferred or being subject to transfer by the Company, is set reasoning from the price that is fixed by the Company for setting similar costs in similar circumstances.

If it is impossible to set the cost of the assets transferred or being subject to transfer by the Company, the cost of the finance investments received by the Company under the contracts providing for discharge of obligations (payment) with non-monetary funds is set reasoning from the cost of acquisition of similar finance investments in similar circumstances.

5.9.9. The original cost of the financial investments received gratis such as securities is:

- the current market cost on the day of the taking on account. The current market cost of securities is their market price calculated in accordance with established procedure by the trade organizer at the equity market;

- the sum of pecuniary valuation that can be received as a result of received securities sale on the day of their taking on account – for the securities which are not taken into account when the trade organizer at the equity market does not calculated the market price.

5.9.10. The financial investment which help to set in accordance with established procedure the current market cost are mentioned in accounting at the end of fiscal year at the current market cost by the adjustment of their valuation on the previous fiscal date. The mentioned adjustment is carried out quarterly.

The difference between financial investments valuation at the current market cost on the fiscal date and the previous financial investments valuation is referred to the financial results (composed of operational receipts and expenditures).

Financial investments which do not set the current market cost are mentioned in accounting on the fiscal date at the original cost.

If on the fiscal date the current market cost of the object of financial investments, earlier valuated at the current market cost, the current market cost is not set, such an object of financial investments is mentioned in accounting at the cost of its last valuation.

5.9.11. The original market cost of debt securities which do not set the current market cost is not made into the principal value (par.22 PBU 19/02 "Account of financial investments" dd. 10.12.2002 № 126n).

5.9.12. At the retirement of the asset, taken on accounting in the capacity of financial investments, that does

not set the current market cost its cost is defined reasoning from the original cost of each unit of the accounting of financial investments (par.26 PBU 19/02).

5.9.13 At the retirement of the assets taken on accounting in the capacity of financial investments, which define the current market cost, their cost is defined reasoning from the last valuation.

5.9.14. The valuation of financial investments by the end of the fiscal period is carried out at the original cost of each unit of the accounting of financial investments and at the current market cost (par.32 PBU 19/02).

5.9.15. According to par.6 PBU 19/02 in the analytical account the following information about state securities taken on accounting and securities belonging to other companies is given:

- name of the Issuer (Company);
- name of the securities;
- number, series etc.;
- nominal price;
- buying price;
- expenses for the acquisition of securities;
- total amount;
- date of purchase;
-date of sale and other retirement;
- storing place.

5.9.16. At the creation of a reserve on the devaluation of financial investments to carry out a regular supervision and check out of the financial investment's cost on availability of a devaluation signs of the intermediate accounting report by the reporting date (par. IV PBU 19/2). The newly created reserve (fund) shall be approved by the Deputy general director on the corporate governance.

5.10. Creation of the reserves of the doubtful debts.

5.10.1. Due to the results of the inventory of accounts receivable spent at the end of the reporting year, the reserves of the doubtful debts on the settlement with debtors together with transfer of sum of the created reserves to the debit of the account 91 "Other profits and losses" in the structure of operational expenses in correspondence with an account 63 "reserves of doubtful debts" (par.11 PBU 10/99) are creating.

Amount of the reserve shall be defined singly by every doubtful debt according to the financial situation of the debtor and valuation of a possibility of the debt charging off in full volume or partially and is restricted by the Company's financial abilities.
Doubtful debt shall to be recognized a debt of debtors, if such a debt was not paid off in terms stipulated by the contract provisions and was not ensured by a pledge, mortgage, bank warrantee.
The accrued reserve shall to be transferred to the losses cover caused by the doubtful debts.
As a doubtful debt shall to be recognized a debt with the expired period of limitation of action of where the liability was terminated due to impossibility of its execution according to the act of the State authority of due to the Company's liquidation.
The sum of reserves of the doubtful debts not used in the reporting period shall be joined to the profits of the reporting period by the recoding to the credit of account 91 "Other profits and losses" in the structure of other operational profits in correspondence with the account 63 "Reserves of the doubtful debts",

5.11. *Account of the foreign currency transactions and payments in conventional units.*

5.11.1. The property and liabilities which cost is expressed in a foreign currency, are taken on accounting in

ruble valuation converted according to the rate of exchange of the Central Bank of RF on the date of the conducting of a transaction; for drawing up of the accounting – according to the rate of exchange of the latest in the accounting period quotation of rate of the Central Bank of RF (par.3, 6 PBU3/2000 "Accounting of assets and liabilities whose cost is expressed in foreign currency" (approved by the Order of the MF RF dd. 10.01.2000).

5.11.2. The ruble valuation of the property (fixed assets, intangible assets, long-term securities, inventory) purchased at foreign currency and posted at the original cost or at the sum of actual expenses for the purchasing (par.9 PBU 14/2000) is not counted over at the drawing up of the accounting.

5.11.3.The differences in rates of exchange arisen as the difference between the ruble valuation of the property or the liability which cost is expressed in a foreign currency calculated at the rate of exchange of the Central Bank of RF on the date of the discharge of liabilities of payment or on the reporting date of the drawing up of the accounting for the reporting period, and the ruble valuation of the property or the liability calculated at the rate of exchange of the Central Bank of RF on the date of the taking them on accounting in the reporting period or on the reporting date of the drawing up of the accounting for the previous reporting period, are referred to on account 91 "Other profits and losses" in the list of non-disposal revenue (expenses) as far as they appear (par.13 PBU 3/2000).

5.11.4. The differences in sums arisen at the settlement for the inventory, performed work, services rendered which cost is expressed in conventional units are included in the expenses for purchasing of the mentioned assets and reflected on the accounts of the inventory and expenses account till the moment of their posting. The differences in sums arisen after the posting of the inventory, performed work, services rendered are referred to on account 91"Other profits and losses" in non-disposal revenue (expenses) as far as they appear.

5.11.5. The differences in sums arisen at the settlement with the banks at the purchase (sale) of a foreign currency at the rate of exchange different from the rate of the Central Bank of RF is referred to on account 91"Other profits and losses" in non-disposal revenue (expenses) as far as they appear.

5.11.6. The differences in sums arisen at other taking (fines, penalties, forfeits), connected with the implementation of the economic contracts, are referred to on account 91 "Other profits and losses" in non-disposal revenue (expenses) as far as they appear

5.12. *The account of the transactions on the settlement accounts.*

5.11.1. The settling with debtors and creditors is reflected by each parties in the accounting in the sums from the entries and acknowledged by the Company as the correct ones .

The sums on the settling with the banks and the budget are coordinated with the applicable companies, the reservation of the undetermined sums on the balance is not admitted (par.74 of the Regulation on the bookkeeping of RF (the Order of the Ministry of Finance of RF from 29.07.1998 №34n).

The sum on settling with banks, budget reflected in the accounting report shall to be coordinated with the corresponding institutions and be identical. Conservation on the balance sheet of the not adjusted sums on these settlings are not admitted (par. 74 of the Regulation on the bookkeeping of RF (the Order of the Ministry of Finance of RF from 29.07.1998 №34n).

5.12.2. The settling with debtors and creditors is reflected on the applicable accounts provided by the Unified work plan of the accounts of bookkeeping of the Company in accordance with the requirements of timeliness and comprehensiveness of the accounting.

5.12.3. In accordance with the admission of time certainty of economical activity facts, the accounts receivable and the bill payable are created in the current accounting in the reporting period when the applicable facts of the economical activity took place, regardless of the actual time of intake or pay-out of the monetary funds connected with these facts (par.6 of the Regulation on the accounting "Account policy of the Company" PBU 1/98 (the Order of the Ministry of Finance of RF from 09.12.1998 № 60n).

5.12.4 The sums received from the customers in the form of Available Funds are reflected on account credit of the applicable control of account 62 "Settling with buyers and customers".

5.12.5. The discharge by the discount of the counter claim (art.410 of CC of RF) is defalked on the following terms:

- *the actual existence of counter debts, admitted and unchallenged by the parties;*
- *the uniformity of the counter claims, that means the comparability of the debts and the possibility of bringing them to the equivalent (pecuniary valuation);*
- *the date of the discharge of liabilities has come, or it is not indicated or fixed by the moment of claiming;*
- *the absence in the text of the contract of the term about the inadmissibility of the discount sequential from this contract.*

5.12.6. With a purpose of accordance of verification deeds with the contractors o the requirements of the court practice, also to get possibility to use is as an argument in the court, the deed of verification must contain information on the essential elements of the initial accounting documents (invoice, payment order, deed of performance of works, deed of rendering services etc.) and essential elements of the invoices.

He deed of verification must contain information on the contract under which the mutual payments were performed (including number and date of the contract, if otherwise is not provided by the chartered documents in accordance with the legislation , registered office of the contractor (place of the State registration

of legal entity), also the date of drawing up and subscribing of the document by the persons authorized to subscribe the deed of verification (Appendix 2).

5.12.7. 6. The discount of the mutual claims is defalked both by the agreement of the parties and on the unilateral basis with informing of the other party, after the revise of the mutual debts and drawing up of the act of the account revise (in the optional form specifying all the requisites needed for the mutual discounts), signed by the plenipotentiaries of the parties. (Appendix 2).

If the amounts of counter debts differ, the debt which amount is bigger is discharged only in an applicable part, all the rest remains without changes.

5.12.8. Reasoning from par. 5.12.5, 5.12.7. of the present Regulation the suppliers liabilities discounts which are not grounded by calculated-paid documents (non-invoiced delivery) are not defalked till calculated-paid documents are received and the factual rate of the accounts payable is defined on their basis.

5.12.9. The discounts are not defalked if by the application of the alter the term of actional prescription is subject to the claim and this term is expired (art.411 of CC of RF).

5.12.10. The change of the persons in the liability under the assignment contracts is reflected in the accounting in the following way:

- *on the assignment of debt to the Company and affiliated companies, for example of the debtors-energy consumers to the affiliated company Energosbyt, the original debtor is substituted for a new debtor if the Company agreed to assign the debt with the reference to the requisites of the principal contract and the requisites of the assignment agreement (par.1 art.391 of CC of RF). The energy debt is reckoned in corpore in the new debtor account, it means that the original liability is not considered to be fulfilled;*

- *on the assignment of debts by the Company to the other person, the Company debt to the creditor is cut off. The Company debt to the creditors is written off if the creditor agrees to assign the debt to the new debtor with the reference to the requisites of the principal contract and the requisites of the assignment agreement;*
- *on the assignment of debt of the Company or its affiliated companies to the new creditor, it's reflected in the accounting only after the debt notification of the assignment of debt of the original creditor to the new creditor had been received. The accounts payable to the new creditor is still reckoned in corpore in the account of the Company, it means that the original liability is not considered to be fulfilled;*
- *on the assignment of debts by the Company to the other person, the accounts receivable to the Company are cut off. In the account the accounts receivable on the interests are reflected as a record on debit of the applicable control account of account 62 ""Settling with buyers and customers" in the correspondence with the applicable control account of account 91 "Other profit and losses". The debt of the previous debtor is written off from the balance of the Company at the assignment in accordance with the terms of the assignment contract as a record on debit of the applicable control account of account 91 "Other profit and losses " with the simultaneous charge of VAT to be paid in the budget (ch.21 art.167 par.3 of IRC of RF; art.382 par.2 of CC of RF).*

5.12.11. The own, bank and third party's bills of credit are used in the accounts only through the executive body of the Company.

5.12.12. The drawn own bills are reflected in the accounting on account 60 "Settling with suppliers and contractors" in the applicable analytics in the inner correspondence or in the correspondence with debit of account "Internal accounts on current transactions" of the affiliated company, that received the bill to meet the accounts payable.

The affiliated company received the aviso of the executive apparatus on the bill of credit issue , shall to withdraw accounts payable.

The handing over of the own bills in pawn to discharge a liability to the creditors is reckoned on the off-balance account 009 "Discharge of liabilities and payment security" with the analytical breakdown of the pawnbrokers.

5.12.13. The acquired bills (own debtors' bills) are reckoned in the accounting at bill sum with a glance of the interests owed according to the issue of bill terms under debit of account 62 "Settling with buyers and customers" in the applicable analytics in the inner correspondence or in the correspondence with account 79 "Internal accounts on current transactions" of the affiliated company, that received the bill to meet the accounts receivable. On getting the aviso of the executive body about the bill acquisition to pay the accounts receivable the affiliated company withdraws the accounts receivable, the applicable sums of VAT on shipment are transferred to the balance of the executive body of the Company.

5.12.14. The handing over of the acquired bills (own debtors' bills) to pay the accounts payable is reflected in the accounting as a sale of rights of property by a record on debit of account 62 "Settling with buyers and customers" of the applicable control account in the correspondence with account 91 "Other Profits and osses " of the applicable control account. The accounts receivable to the Company or its affiliated companies, the bill was acquired to pay for, is written off from the balance by the record on account credit 91 "Other profits and losses" of the applicable control account .

5.12.15. The acquired bills , including the bills acquired under the endorsement (bank and third party's bills) are reckoned at the rate of actual expenses for acquirement (acquisition) defined in accordance with par.5.9.4. of the present Regulation under debit of account 58 "Financial investments" on the applicable control account in the correspondence with the applicable control account of account 76 "Settling with various debtors and creditors".

If the bill is received to pay the accounts receivable to the Company or its affiliated companies, the accounts receivable is liquidated by the record on the applicable control account of account of the accounts receivable in the correspondence with debit of account 76 "Settling with various debtors and creditors" which reckons the accounts payable for the received bill ..

If such a bill pays the accounts receivable of the affiliated company, the record is made on debit of control account of account 76 "Settling with various debtors and creditors" which reckons the bill payable for the

received bill in the correspondence with account 79 "Internal accounts". On getting the aviso the affiliated company withdraws the accounts receivable by the record on account credit of the account of the accounts receivable in the correspondence with account 79 "Internal accounts"

5.12.16. The handling over of the bank bill or the third party's bill to pay the bill payable is reflected in the accounting as the property sale by the record on debit of account 62 "Settling with buyers and customers" of the applicable control account in the correspondence with the applicable control account of account 91 "Other profits and losses".

The withdrawal of the bill payable is carried out by the record on debit of accounts of the account of the bill payable in the correspondence with the applicable control account 62 "Settling with buyers and customers" .

5.12.17. The retirement of the bank bills and third party's bills from the balance at their submission to the maker for payment is reflected in the accounting under account credit 91 "Other profits and losses " of the applicable control account in the correspondence with the applicable control account of account 76 "Settling with various debtors and creditors".

5.12.18. The accounts receivable with the expired term of actional prescription as well as other debts, unreal for the collection, are written off from the balance .

Debt amortization is carried out on the basis of the act of debt inventory taking, the written reasoning, the order of the director of the Company on each liability at the expense of the present reserve of the shady debts, if it's not enough it is referred to the list of non-disposal expenses (par.12 PBU 10/99 confirmed by the Order of the Ministry of Finance of RF from 06.05.1999 №33n).

The written debt reasoning includes the index of the full name of the debtor, including legal form; the ground, sum and the date of debt origin with the reference to the basic account documents; the ground for the debt amortization with the reference to the rules of law with the vouchers attached:

the copies of the basic account documents (contract, payment order, invoice, deed of works fulfillment (rendered services) , agreement (notification) on set-off etc.);

at the settlement of a debtor being a legal entity - the extract from the unified state list of legal entities, containing information on a liquidation; and in case of settlement of a debtor being a natural person – his death certificate if the legislation in force does not provide succession;

at the failure (bankruptcy) of a debtor - resolution on competitive production termination, or report of the arbitrage manager on a failure to satisfy the creditor's claims;

other documents proving the impossibility of debt collection (the act of state authority etc.).

Affiliated companies need to keep the basic account documents in original within 5 years from the date of the Order on debt amortization.

Debt amortization amounted up to RUR 1500 according to one obligation with all necessary documents present, is carried out under the order of the director of the affiliated company complying the provisions stipulated by the par. 5.12.18 of this present Order.

The accounts receivable written off in view of debtor's insolvency are reflected in the balance sheet during 5 years since the moment of amortization to observe the possibility of its collection in case of debtor property status change.

The terms of actional prescription are fixed on the basis of art.195-208 of CC of RF. The term of actional prescription is interrupted by the filing of a claim in accordance with established procedure as well as by the actions of the person under obligation which prove the acknowledgement of debt. After the break the term of actional prescription opens again, the time before the break is not included in the new term. (art. 204 CC RF).

The agreement of the parties, the acknowledgement of debt out of the terms of actional prescription as well as

the change of persons under obligation can not be the ground for the change of the term of actional prescription and the procedure of its calculation.

The account of accounts receivable is organized according to the terms of actional prescription to observe art. 2 of FL dd. 22.07.2005 №119-FL "On modification to the paragraph 21 of TC of RF and on recognizing as void the single provisions of legislation of RF on taxation".

5.12.19. The amortization from the balance of the unclaimed bill payable and depositor debt with the expired term of actional prescription and under other grounds is carried out at the written permission of the director of the Company (affiliated company) including the index to of the ground, sum, date and legal deeds adjusting the ground of write-off.

Also, amortization from the balance of the unclaimed bill payable and depositor debt with the expired term of actional prescription and under other grounds is carried out at the written permission of the director of the affiliated company according to the standards art.195-208 of CC of RF.

Affiliated companies shall to keep the originals of the aforementioned documents, as the documents certifying assumpsit of a debt by the creditor and break-off the terms of actional prescription too early (two-party deed of verification, letter of warrantee, reply the claim etc.) within 56 years from the date of the Order on a debt depreciation.

The sums of the accounts payable written off are referred to account credit 91 "Other profit and losses" in the list of extraordinary revenues.

The sums of VAT on the bill payable written off are reckoned in the accounting and referred to debit of account 91 "Other receipts and expenditures" in the list of extraordinary expenses.

5.13. Calculation of expenditures on production.

5.12.1. Calculation of expenditures on production shall be carried out in accordance with issue II of Provisions on accounting "Company's expenses" (PBU 10/99 (Order of MF of RF № 33n dd. 06.05.1999 . ed. dd. 30.03.2001))

5.13.2. Calculation of expenditures and calculation of the outputted energy net cost shall be carried out in separate electric plants, electric networks and in energy system as whole.

Full net cost of energy is formed by way of summation of net cost of production by electric plants, net cost of transfer and distribution in electric and power networks, cost of purchased electric power and expenses on the executive body's maintenance including expenses on management of technological process and maintenance of the separate subdivisions on energy selling.

Full net cost of effective output of electric and heat energy to consumers is an object for electric and heat energy net cost calculation.

Calculation units are 1 kw/h and 1Gcal of the effectively outputted electric and heat energy.

5.13.3. Calculation of *expenditures on production and calculation of real net cost of production shall be carried out by traditional calculation way with direct expenditure accounts (20, 23,29) and indirect (25, 26). Calculation of indirect expense's accounts shall be closed in debit of accounts 20 (23) with further calculation of full real production net cost of the produced items every month.*

5.13.4. Expenditures accounted on account 25 "Common production expense" shall be charged-off fully on account 20 "General production" and on account 23 "Auxiliary process" to the proper with their simultaneous distribution between the calculation's objects at the end of month:

- *at the power stations proportionally to the standard fuel level, here expenditures of the plants participated in output of only one type of energy shall be fully referred to this type of energy;*
- *calculation of net cost of production of auxiliary productions - proportionally to the basic salary of employees.*

Common economic expenses (except abonent payment for RAO network's using) on maintenance of the executive body including expenses on maintenance of Energy supply shall be distributed between electric and heat energy proportionally to production expenditures of electric plants and networks.

Expenditures accounted by the subsidiaries on account 26 "Common economic expenses" shall be referred to account 20 "General production", also to account 23 "Auxiliary process" and to account 29 "Auxiliary process and economy" at the end of month in cases of manufacture or production, services and works fulfillment abroad or to other subsidiaries simultaneously their distribution between the objects of calculation:

- *calculating of net cost of production of auxiliary processes shall be referred proportionally to the shop cost of production, works and services. Thus the sum of common economy expenses accounted for production, works and services of the auxiliary and service shops (production) shall be defined due to this share of common economy expenses related to their direct production;*
- *rest part of common economy expenses shall be refereed fully to net cost of general manufacture production (expenses on maintenance of design, technological departments and background of department's manufacture, expenses on maintenance of production laboratories, cost of different tests, researches and experiments subject to general manufacture; expenses concerned rationalization and research on general production; expenses concerned the employee's training and further training for general production; expenses concerned maintenance of watch and fire prevention; expenses concerned payment of land tax, non productive expenses concerned manufacture and supply of general production and other same expenses). Common economy expenses shall be distributed between electric and heat power proportionally to their shop net cost;*

- common economy expenses on services rendered by auxiliary process and auxiliary production and economy (internal consumption by the subsidiary) are not referred.

5.13.5. Net cost of electric power transfer (transit) through the corresponding voltage range shall be defined by product of actual net cost of electric power transfer on corresponding voltage thought electric power plants and Energy Supply and by volume ratio of outputted energy under the transit contract on corresponding voltage to the total volume of corresponding voltage output through the network (except overflow balance to other plants) including electric power outputted under the transit contract in accordance with actual balance of electric power in the networks BH, CH1, CH2, HH.

5.13.6. Finished product (account 43) shall be reflected in accounting on actual production cost.

5.13.7. Expenses concerned production supply accounted on account 44 "Expenses on sale" shall be charged-off fully on account 90 "Sales" in reporting period (par. 9 PBU 10/99).

5.13.8. Expenses incurred in the reporting period but concerned the further reporting periods shall be reflected as future expenses (account 97):

- *holiday pays charge to the next month:*
- *subscription publication's expenditures;*

7. Accounting policy for the purposes of International Financial Reporting Standards (IFRS)

7.1. General provisions

The account policy of the JSC "Kuzbassenergo" defines used during the preparation of the financial accounting definitions, acknowledgment criteria and principles of valuation of assets, liabilities, receipts and expenditures, methods of the reflection of the transactions, events and terms, as well as the judgments worked out by the management of the JSC "Kuzbassenergo", making a great impact on the sums, acknowledged in the financial accounting.

During the working out of the account policy in accordance with IFAS on the year of 2006, the JSC "Kuzbassenergo" was guided by all the acting at that time Standards, Interpretations, and Principles.

The account policy is drawn up on the basis of the admission of the consecutive usage of the chosen account policy from one fiscal period to another. The changes of the account policy are admissible only if they are required by any Standard and Interpretation, or if the given changes lead to more reliable and true information about transaction impact provided by the financial accounting, as well as the events or terms of the financial condition of the Company, its financial results or flow of cash assets.

The financial accounting of the JSC "Kuzbassenergo" according to IFAS 1 "Financial accounting" consists of:

- *sheet balance;*
- *profit-and-loss report;*
- *report on capital changes;*
- *report on cash flow*

notes which include a brief description of essential elements of the account policy and other explanatory notes.

7.2. Consolidation principles

Consolidated annual financial accounting includes the financial accounting of the JSC "Kuzbassenergo" and its subsidiaries (the Group)for the period from the start of the actual control till its actual ending.

7.2.1. Subsidiaries.

The control is supposed to be exercised when the JSC "Kuzbassenergo":

possesses directly or indirectly, through subsidiaries, more than 50% of voting stocks of the subsidiary; or possesses directly or indirectly, through subsidiaries, less than 50% of voting stocks of the subsidiary, but has the right to:

- *Define financial and operational policy of the subsidiary on the basis of the Articles or agreement;*
- *Appoint or dismiss the majority of the members of the committee of directors or similar authorities;*
- *Participate by a majority vote at the meetings of the committee of directors or similar authorities.*

The accounting of the subsidiaries which are under the Group's control is not included in the consolidated accounting of the Group if:

The control is supposed to be temporary as the shares of the subsidiary are taken up and kept only with the sale purpose in the nearest future; the activity of the subsidiary is influenced by tough long-term restrictions which decrease dramatically its potential to transmit assets of the associated company.

Financial investments into such subsidiaries are accounted as financial investments available for sales.

Assets and liabilities of all the subsidiaries are valuated at fair cost on the date of taking up. Minority interest is reflected proportionally to the share in the fair cost of assets and liabilities of the subsidiaries.

Financial accounting of the subsidiaries is drawn up for the fiscal periods which are similar to the fiscal periods of the associated company. If it is necessary, the financial accounting of the subsidiaries can include adjustments to bring the used principles of the account policy in correspondence with the principles of the account policy of the Group.

During the preparation of the consolidated financial accounting, all the remains on calculation and transactions within the Group as well as non-realized receipts and expenditures arisen as a result of transactions within the Group are excluded.

7.2.2. Dependent companies.

A dependent company is a company which is under the influence but not control of the Group, as a result of participation in the financial and management decision making, and the Group has from 20% to 50% of voting shares.

Dependent companies are accounted by the share holding since the start and to the end of the material effect on this company.

The results of the activity of dependent companies are accounted by share holding method on the basis of their last financial accounting. The expenditures of dependent companies are taken to accounting in the consolidated financial accounting before the investment in such companies is written off up to zero. After that the expenditures are accounted only in the volume where the Group has liabilities on financial support to such dependent companies.

The current book cost of the investment in dependent companies present the cost of the acquisition including unamortized part of goodwill as well as the share of the Group in non-distributed profit, received after acquisition, and other changes in reserves which are the part of the owned capital of these companies. The current book cost of dependent companies is constantly revised and in case of devaluation, is decreased in the period when such circumstances are revealed.

Non-realized receipts and expenditures arisen as a result of transactions with dependent companies, are subject to exclusion proportionally to the share of the Group in the capital of dependent companies.

7.3. Methods and ways of valuation of the property and economic transactions.

7.3.1. Currency of measurement and currency of introduction.

The currency chosen as a unit of measurement as well as introduction in the consolidated annual financial accounting is Russian ruble. This reflects economic essence of the main principle of the activity of the Group and its economic transactions.

7.3.2. Transactions in foreign currency.

Transactions in the currency which is different from the currency of RF are referred to the transactions in foreign currency. Cash assets and liabilities of the Group expressed in foreign currency on the fiscal date are recalculated in rubles at the rate of exchange on this date.

Transactions in foreign currency are reflected at the rate on the date of the settlement of transaction. Receipts and expenditures arisen as a result of accounting on the data of transactions and during the recalculation of cash assets and liabilities expressed in foreign currency are reflected in the report on receipts and expenditures.

7.3.3. The use of valuations and admissions.

To prepare the present financial accounting in accordance with the requirements of the IFAS the management worked out the number of valuations and admissions referring to assets and liabilities, which are reflected in the present financial accounting as well as to the information disclosure about contingent assets and liabilities. The actual results can differ from the given valuations taking into account uncertainty

of valuations and admissions.

7.3.4. Financial instruments

Financial instruments reflected in the balance of the Group, include financial investment, given borrowing, trade and other accounts receivable, cash assets and their equivalents, received borrowing, trade and other account payable and derivative financial instruments.

Financial instruments originally are reflected at the fair procurement cost, and in case of financial assets or financial liability which are not valuated at the fair cost through profit or loss, transaction costs directly connected with the procurement or release of a financial instrument are also included.

Financial assets and liabilities are accounted in the balance opposite to each other, when the Group has a legal right to set-off or has an intention to conduct calculation at the sum of balancing of accounts.

A financial instrument or its part is written off in the financial accounting when the Group loses its rights or discharges liabilities connected with the given financial instrument. At the writing off of the financial asset, the difference between compensation received or accrued and the current book cost of the asset is admitted in the report on receipts and expenditures. At the writing-off of the financial liability, the difference between compensation received or accrued and the current book cost of the liability is admitted in the report on receipts and expenditures.

7.3.4.1. Financial investments.

Financial investments, except for the investments in subsidiaries and dependent companies, originally are accounted at the cost on the date of the settlement of transaction, which is equal to the fair cost of paid compensation and the costs on transaction in case of financial investments which are not valuated at the fair cost through profit or loss.

Financial investments are classified in the following way:

- *detained until paying off;*
- *valuated at the fair cost through profit and loss;*
- *available for sale.*

Financial investments in debt securities with fixed time to run, which the Group is intended and has the right to detain till the time to run, except for the given borrowing and accounts receivable, are classified as "detained till paying off". Securities, detained till paying off, are accounted at the amortized cost by the method of effective cost of money after deduction of devaluation reserves. Securities detained till paying off are reflected as non-circulating assets except for the cases when the paying off is expected to be carried out within 12 months after the fiscal date.

Financial investment in securities, acquired to earn profit as a result of short-term price range, is classified as "Meant for trade". Securities meant for trade are reflected as negotiable assets.

Any other financial investments except for giving borrowing and accounts receivable are classified as "available for sale". Financial investments available for sale are referred to negotiable assets if the management of the Group is intended to realize them within 12 months since the fiscal date.

Securities available for sale as well as for trade are reflected at the fair cost reasoning from market rates on the date of drawing up of the accounting, without taking into account costs which the Group may have during their realization or other retirement. Receipts and expenditures connected with the change of the fair cost of financial investments are reflected in the report on receipts and expenditures for corresponding period except for financial investments available for sale. The receipts and expenditures of the latest are reflected in the capital. When the market price can not be defined, the fair cost is defined reasoning from the valuations of the Group.

7.3.4.2. Cash assets and their equivalents.

Cash assets include money in the cash office, money on the account current in banks, bank deposits and other money instruments with the time run not less than three months on the moment of procurement, and can be easily converted in the sum of cash assets and run the slight risk of cost change.

7.3.4.3. Accounts receivable

Trade and other accounts receivable is reflected in the sums presented to payment by contractors, with the deduction of the reserve for doubtful debts which is established if it is necessary.

The reserve sum for the doubtful accounts receivable is calculated on the basis of analysis of its discharge possibility.

Long-term accounts receivable on its original admission is reflected at the fair cost by discounting of all future cash flows at cost of money which is available to the Group on the moment of the original admission. The discounting sum is reflected in the Report on receipts and expenditures as the expenditure from the original admission of accounts receivable at the fair cost. The discounting sum is subject to depreciation during the entire conversion period and is reflected as interest yields in the Report on receipts and expenditures.

7.3.4.4. Account payable

Trade and other account payable is reflected at the nominal value. Long-term account payable on its original admission is reflected at the fair cost by discounting of all future cash flows at cost of money which is available to the Group on the moment of the original admission. The discounting sum is reflected in the Report on receipts and expenditures as the expenditure from the original admission of account payable at the fair cost. The discounting sum is subject to depreciation during the entire conversion period and is reflected as the costs on payment of interest in the Report on receipts and expenditures.

7.3.4.5. The given borrowing

The given borrowing is accounted at the amortized cost by the method of effective interest rate.

7.3.4.6. Credits and received borrowing

All the credits and borrowing originally are admitted at the fair cost of procurement with the deduction of transaction costs. After the original admission all credits and borrowing are reflected at the amortized cost by the method of effective interest rate.
Long-term credits and borrowing received or presented by the Group at the rates which are lower than market ones, on the original admission are reflected at the fair cost by discounting of all future cash flows at the market average cost of money for financial instruments on similar terms.

Borrowed funds which are subject to be discharged within a year from the fiscal date are reflected as short-term liabilities.

Borrowed funds which are subject to be discharged in more than a year from the fiscal date are reflected as long-term liabilities. The part of long-term account payable which is subject to be discharged within 12 months from the fiscal date is reflected as short-term liabilities.

Interests on credits and borrowing are reflected in the accounting by the charge method.
The part of interest unpaid on the fiscal date is reflected in the balance as other account payable.

7.3.5. Dividends

Dividends are admitted as liabilities and calculated from the sum of capital on the fiscal date only when they were declared (approved by shareholders) before the fiscal date inclusive. Dividend information is disclosed in explanatory notes to the financial accounting if they were recommended before the fiscal date as well as after the fiscal date, but before the date when the financial accounting is released.
The amount of non-distributed profit of the Group according to the Russian legislation can be aimed at distribution among shareholders and is defined on the basis of the financial accounting of separate companies which are included in the Group. These sums can differ dramatically from the sums calculated on the basis of the IFAS.

7.3.6. Fixed assets.

The objects of fixed assets are taken to accounting at the actual cost. The actual cost of the object of fixed assets acquired for payment includes the sum of actual costs of the Company on procurement, construction and production, except for the value added tax and other refundable taxes.
Economic and other similar costs are not included into actual costs on procurement, construction or production of fixed assets.
The change of the actual cost of fixed assets at which they were taken to accounting is admissible in cases of completion, reconstruction, modernization, partial liquidation and revaluation of fixed assets. The costs on reconstruction and modernization of the object of fixed assets after they are completed can increase the original cost of such an object if as a result of modernization and reconstruction originally accepted normative functioning indexes (term of usage, power, usage quality, etc) of the object of fixed assets increase.
Fixed assets are reflected in the accounting at the original cost defined on the moment of acceptance of the objects in the accounting and adjusted to the inflation index (consumer price index) calculated for the period from the moment of taking the objects to the accounting to 31.12.2002.
The features of economic obsolescence of fixed assets are defined on each fiscal date. If at least one feature is revealed the management conducts the valuation of compensative cost of fixed assets.
The following features can be regarded as economic obsolescence:
Dramatic changes in technological process of production, economic, legal sphere of activity of the Group;
the presence of obvious depreciation or defacement of the object of fixed assets or the group of the objects of fixed assets;
decrease of market prices for definite types of fixed assets and others.

Refundable cost is defined as the maximum of the fair cost with the deduction of the costs on asset sale and value of its usage (IFAS 36 "Depreciation of assets").
The fair cost with the deduction of the costs on sale is the price of asset in the sale contract in the transaction between well-informed and willing parties to settle such a transaction, with the deduction of additional costs directly connected with the retirement of this asset.
The value of the asset usage presents discounting cost of assumed (evaluative) future flows of cash assets the appearance of which is expected to be from constant asset usage and from its retirement at the end of the period of its service.

Book cost of fixed assets decreases to refundable cost, and the difference is reflected as expenditure (loss from economic obsolescence) in the Report on receipts and expenditures.
Costs on maintenance works, current and capital repairs are referred to the costs as far as they are arisen. All types of costs, which do not lead to the improvement of technical characteristics of fixed assets are referred to the costs on capital repairs.

Profit and losses arisen as a result of the retirement of fixed assets are reflected in the Report on receipts and expenditures as soon as they are arisen.

Depreciation on fixed assets is accrued by uniform charge during the period of effective use of a fixed asset. The following periods of service are used during the depreciation accrual:

Type of fixed assets	*Terms of effective use (years)*
Fixed assets used at the production of heat and electrical energy	*50*
Fixed assets used at the transmission of electrical energy	*40*
Fixed assets used to distribute electrical energy	*40*
Fixed assets used at the transmission of heat energy	*25*
Other	*15*

State subsidies referred to the procurement of fixed assets are reflected in the balance by deduction to get the book cost of the asset. Subsidy is regarded as profit during the term of effective use of depreciated asset by deduction the rate of accrued depreciation referred to expenditures each period.

7.3.7. Intangible assets

Intangible assets are valuated originally at the cost price. The cost price of the acquired intangible asset includes: its buying price, import taxes and nonrefundable buying taxes, after the deduction of trade discounts and any direct costs on putting the asset into operation.

The computer software is accounted as intangible assets.

After the original admission the intangible asset is accounted at the cost price with the deduction of future depreciation and losses from it.

The method of uniform charge is used to distribute the amortized sum of the asset on the systematical basis during the term of its effective service.

Depreciation is admitted as a current expenditure. The term of effective use of the software makes 5 years.

7.3.8. Inventory holdings

Inventory is reflected at the lowest value: actual cost price or the price for possible realization.

The cost price includes the cost of fixed assets, custom duty, transport costs, cargo-handling cost, direct labor costs as well as corresponding part of indirect field cost and overhead charges.

The cost price is calculated by the method of weighted average cost.

The price for possible realization presents the assumed sale price with the deduction of all costs on completion, promotion and production distribution.

The Group valuates from time to time its holdings to reveal goods obsolescence and if it is necessary forms the corresponding reserve.

7.3.9. Profits tax

Profit tax accrued for a year includes sums of current and deferred tax.

Current profits taxes are accrued in accordance with the Legislation of Russian Federation. The account is based on financial results for the year with the account of the articles which do not increase or decrease the taxation base. The current tax which is subject to be paid is accrued on the basis of the sum of taxable profit for the year and rates, active in the fiscal period, and is adjusted on the tax sums which are subject to be paid for previous years.

The deferred tax is calculated by the balance method and accrued on the differences between the taxation base of assets and liabilities and their current cost, reflected in the financial accounting. The deferred tax liabilities are reflected concerning all the differences increasing taxable profits. The deferred tax requirements are reflected to the extent of the possibility of earning taxable profits sufficient to cover non-accepted tax requirements and tax credits which were not used. The deferred tax assets and liabilities are taken to accounting when they are referred to profits taxes collected by one rating authority, and the Group is intended to to account its current tax assets and liabilities.

The deferred profits taxes are calculated by the tax rates which will be used in the next fiscal period. They are reflected in the Report on receipts and expenditures except for the cases when they are connected with the articles directly referred to the owned capital. In this case, the deferred taxes are reflected as owned capital.

7.3.10. Minority interest

The minority interest presents the proportional share of minoritary shareholders in the capital of the subsidiaries of the JSC "Kuzbassenergo". It is calculated on the basis of the share of minoritary shareholders of the subsidiaries of the JSC "Kuzbassenergo"

7.3.11. The phased out activity.

In the accounting the Group discloses the information about the phased out activity, starting with the event that can be defined as the initial disclosure event. The information about the phased out activity is disclosed in the notes to the financial accounting.

Starting with financial accounting for the period when the initial disclosure event took place, the Group includes in its financial accounting the following information, referred to the phased out activity:

- *Description of the phased out activity;*
- *If it makes an economic segment in accordance with the given accounting;*
- *Date and type of the initial disclosure event;*
- *Date and period when the phase out is expected to take place, if they are known or can be defined;*
- *Book costs on the fiscal date of summon assets and liabilities which are planned to retire;*
- *Gain sums, the sums of costs, receipts and expenditures from the main activity before taxation, which are referred to the phased out activity during the current period of financial accounting as well as profits tax;*
- *Sums of net cash flows referred to the main, investment and financial activity within the phased out activity during the current period of financial accounting.*

If the initial disclosure event takes place after the period of financial accounting of the Group ends but before the approval of the financial accounting for this period, this financial accounting discloses the information mentioned above for the period of this financial accounting.

The information is disclosed in the financial accounting during all the periods including the period when the transactions on phasing out the activity were completed. The transactions on phasing out the activity are completed when the plan is almost implemented or it was refused of.

Any information about the phased out activity is disclosed separately for every phased out activity. Comparative information for previous periods, presented in the financial accounting prepared after the initial disclosure event, is recalculated to present the assets, liabilities, profits, losses and cash flows separately which are referred to further and phased out activity, in a similar way that is described above.

7.3.12. The concerned sides.

In the financial accounting the Group discloses the information on the relations between the concerned sides as well as the information on the types and the constituent elements of the operations held with the concerned sides. The constituent elements of the operations include:

The index of the operation volume, either in the form of the amount or the corresponding shares;

The amount or the corresponding shares of the redeemable items;

The price formation policy.

The analogous items are disclosed in the Group's financial accounting with the total sums.

Being controlled the information on the relations between the concerned sides is disclosed regardless of the fact if the operations were held or not.

7.3.13. Contracts.

The profit on the contracts is admitted as soon as it can be surely estimated. The Group takes into consideration the percentage of the works fulfillment while determining the amount to be admitted in the accounting period. The losses are admitted as soon as there is a probability that they can appear. The total amount of the assumed loss, including the loss connected with unfulfilled works according to the contract, is accounted in the period when the loss was determined.

On determining the total amount of the expenses for the accounting period any expenses by the contract and corresponding to the future periods are shown as unfulfilled work by the contracts.

7.3.14. Cashflow statement .

The Group presents the data on the cash flow using the indirect method that presupposes that the net profit or loss is corrected taking into consideration the results of the non-monetary operations, any deferred or accrued past or future monetary earnings or payments on the principle activity, as well as the items of incomes and expenses connected with the receipt or withdrawal of monetary funds on the investing or financial activity.

The net flow of the cash from the operating activity is determined by correcting the net profit and loss taking into consideration the following:

- *the changes in the stock and the operating debit and credit debts during the period;*
- *non-monetary items such as deterioration, evaluative obligations, deferred taxes, unrealized profits or losses on the foreign currency operations, surplus earnings of the associated companies and the minority interest;*
- *all the other items that lead to the flow of the monetary funds from the investing and financial activity.*

7.3.15. Recompense to the employees.

The salary of the employees that is referred to the labour activity of the current period is admitted as the expenses of the given accounting period.

The Group produces all the necessary deductions for its employees to the Pension Fund of the Russian Federation according to the established norms.

The Group has no separate significant schemes on the provision of pensions. All the additional payments to the retired employees are included to the amount of the expenses on the salary, however this information is not disclosed in the accounting due to the insignificance of these payments.

7.3.16. Reserves.

The reserves are admitted when at present the Group has an obligation that can be juridical or based on the practice, arising from the past events, and if there is a probability that in order to redeem this obligations the resources containing economic benefits are to be used, and if a sure avaluation of the obligation amount can

be done.

7.3.17. The acknowledgement of the profits.

The profit is admitted when all the significant risks and benefits connected with the right of property are passed to the buyer, when there is a high probability of receiving economic benefits from the operation and when the amount of the profit can be determined with considerable certainty.

The Group's profits are reflected taking into consideration the electric and thermal energy supply as well as the realization of the goods and services not connected with the power engineering, that took place before the end of the period.

The gain from the realization is reflected in the accounting with the deduction of the value added tax.

The gain is based on the tariffs on the thermal and electric energy that are approved by the Regional energy commission.

7.3.18. Profit for one stock.

Profit for a stock is determined by dividing the net profit related to the Group's general stock holders by the average weighted amount of the general stocks that are being in circulation during the accounting year.

7.3.19. Rendering of segment accounting.

The accounting segments are defined on the basis of operational activity of the Group. The Group includes three main production segments:
The segment "Production and transmission of electrical energy" is presented by power stations and some heat power stations which take part in the energy production as well as electrical networks and Energosbyt which conduct the transmission and distribution of electrical energy from stations to consumers;

The segment "Production and transmission of heat energy" is presented by heat power station and some electric power stations generating heat energy as well as the Department of the heat networks and Energosbyt conducting the transmission of heat energy to the consumers;
The segment "Other" includes the number of small segments such as the activity of repair and auxiliary subdivisions, object of social sphere.

The information about production segments is collected for the year, which ends on 31.12.2006 and for the year which ends on 31.12.2005 according to Appendix #3 to the present Regulations.

7.3.20. Seasonal nature of the activity.

The time and the weather influence the demand for heat energy. The main volume of profits from the realization of heat energy is in the period from October to April. The seasonal nature of the production of heat energy makes a great impact on fuel consumption.
Moreover, from May to September when the production is decreased the costs on repair and maintenance works increase. The seasonal nature of the activity does not influence the procedure of the reflection of profits and costs by the Group.

7.3.21. Events after the fiscal date.

The Group reflects the events which took place after the fiscal date if these events verify the terms which

existed on the fiscal date. The Group does not reflect the consequences of the events after the fiscal date if these events speak about the terms arisen after the fiscal date. If these events are essential, the Group disclose the following information on each essential category of such events after the fiscal date: the character of the event and the valuation of its financial consequences or application.

8.1. Drawing up of the explanatory note.

8.1. The drawing up of the explanatory note to accounting as its integral part (par.5 of the Regulations on accounting "Accounting of the Company" PBU 4/99, approved by the order of the MF of RF from 6.07.1999, #43n), is conducted by the finance department, the department of capital account, law department, accounts department of the executive body of the Company on the basis of the calculations, information and explanations of the subsidiaries, representative office, subsidiaries and dependent companies.

8.3. The explanatory note disclose the information about the following chapters:

- *accountant policy (with full coverage of all components, making an essential impact on valuation and decision taking by the users of accounting who have an interest in it) (par.11 PBU 1/98);*
- *explanations of the accounting and report on receipts and expenditures (par.27 PBU 4.99, par.133-143 of the Methodological recommendations about the procedure of accounting indexes formation, approved by the order of the MF of RF from 28.06.2000 #6n);*
- *events after the fiscal date (par.10 PBU 7/98);*
- *conditional facts of the economic activity (par.21 PBU 8/01);*
- *transactions with affiliated person (ch. II PBU 11/2000);*
- *information about segments (ch.IY PBU 12/2000);*
- *information about profit for one stock (ch.IY of the Methodological recommendations on disclosure of information and profit for one stock, approved by the prder of the MF of RF from 21.03.2000 #29n);*
- *the received state assistance (par.22 PBU 13/2000);*
- *received borrowing and credits (par.33 PBU 15/01);*
- *Information on phased out activity (par.11 PBU 16/02);*
- *Information on the costs on NIOKR (par.16 PBU 17/02);*
- *Information on financial investments (par.42 PBU 19/02);*
- *Information on profits tax calculation (par.25 PBU 18/02)*
- *Information on cumulative accounting (with accounting on subsidiaries and dependent companies).*

9. Organizational aspects of account policy.

9.1. Accounting and tax account of productive-economic activity is conducted in accordance with the unified improvement of corporate management policy and maintenance of software unification with plans of works on automation, the use of computer technologies, and getting the documents on the magnetic mediums and monthly printed out the main book and lists of the accounting.

9.2. Property and liabilities inventory is carried out in accordance with the Regulations on accounting in RF and the Methodological instructions on its implementation (the Order of the MF of RF from 13.06.95 #49).

The number of inventory in the fiscal year, dates, list of property and liabilities is set on separate orders of the Director General of the Company, directors of the subsidiaries and representative office with account of the terms of production procedure or when inventory is compulsory.

The inventory of fixed assets is conducted not less than one time in three years, of library stock – once in five years. In special cases the inventory is conducted every year.

9.3. Reorganization (merger, separation, differentiation of separate affiliates in subsidiaries) is dated for the end of the fiscal period (year or quarter), with the compulsory drawing up of the statement and separating balance.

9.4. The original primary instruments on economic transactions at the subsidiaries and representative office are taken to accounting and kept in the places of their drawing up.

According to art.17 of the Law "About accounting" original primary instruments, lists of accounting and accounting itself are kept in accordance with the typical retention period; not less than five years. The work plan of account of the accounting, other documents of account policy are kept not less than five years from the year when they were used to draw up the accounting for the last time.

Primary instruments, account lists, account reports and balances are subject to compulsory putting to record-keeping office. The retention periods are accounted from January 1 of the year following the year when the document was drawn up (according to the List of typical management documents of the activity of the companies, with retention periods mentioned, approved by Russian record-keeping office 06.10.2000 (with changes and additions from 27.10.2003)). A number of documents or a document concerning the same issue or the segment of activity are filed. Files are opened since the first document was included. Documents are included into the file only in one copy. Drafts and copies are not flied to the case. Documents of permanent and temporary character are grouped in separate cases.

In special cases the documents of different retention periods but referred to one issue are put in one file but after the decision was taken they regrouped again. Documents are grouped for one calendar year. The transient cases make an exception. Documents are put into case with all the appendixes and additional materials arisen while the question was discussed. Plan and accounting documentation (plans, bids, charts, reports and calculations) are put into the case of the year which it is referred to, regardless of the time and date.

The drawing up of accounting documents is conducted in accordance with nomenclature of cases – systematized list of cases, formed in the Company with retention periods mentioned in accordance with the General rules of archives' work (approved by the decision of Russian record-keeping office from 06.02.2002).

The cases which formation is prolonged till the next year keep the same number in the nomenclature.

In the end of the calendar year the total record is made about the categories and number of opened cases, where the total number of cases is mentioned as well as the cases of permanent retention period, temporary (more than 10 years) and temporary of up to 10 years retention period, and the number of transit cases.

The nomenclature is signed by the person, responsible for the record keeping, vised by the chief accountant and coordinated with the office and record-keeping office of the company.

10. Approval of the procedure of changes putting in the account policy of the Company:

10.1. Account policy of the Company changes only in the following cases:

-change of the Legislation of Russian Federation or legal acts on accounting;

- working out by the Company new methods of accounting keeping which presupposes more authentic facts of economic activity in the accounting or less labor-output ratio of the process without the decrease of the level of authenticity of the accounting process (change of the structure of the work plan of accounts during putting into operation of new program devices, work out of the methodology of the account of separate economic processes which have no legal regulation, etc.);

-major modification of the terms of the activity (reorganization, owners' replacement, chang of the types of activity, force majeur, change of the internal structure (with no reorganization), etc.).

10.2. Change of account policy is introduced since January 1 of the year following the year of its approval by the correspondent order about the Company except for the cases when the legal act was drawn up during the year and is recommended to be implemented from the accounting of the current year.

7.5. Information about total sum of export and the share export makes in the total volume of sales

The issuer does not perform export of energy out of the territory of Russian Federation.

7.6. Information about the cost of immovable property and major modifications which took place when the last fiscal year ended.

There were no major modifications in the property of the JSC "Kuzbassenergo" for the fiscal period. Total book cost of retired and procured immovable property makes less than 5 per cent of the book cost of assets of the issuer.

7.7. Information about the participation of the issuer in judicial proceedings if such a participation can have a great impact on the financial-economic activity of the issuer.

There were no significant suits, which sum makes or more than 10% of the cost of assets of the issuer during three years, preceding the date of the 2st quarter of 2006.

Applications and suits (current at the amount more then 10,0 millions RUR) brought to JSC "Kuzbassenergo" which are under consideration as for the date 01.07.2006:

«1) Inspections of the Federal Tax Service of RF in Kemerovo on recover of tax sanctions amounted RUR 214 938 640 accrued due to results of the travelling auditing . Thus the Board of Directors of the Company recommended to the general meeting of shareholders not to pay dividends on ordinary shares of the company by the results of the year 2004.

By the results of 9 months of the year 2005 the extraordinary general meeting of shareholders of JSC "Kuzbassenergo" accepted the following decision: "To pay dividends on ordinary shares of JSC "Kuzbassenergo" by the results of 9 months of the year 2005 amounted RUR 0,670461 rubles per one ordinary share of JSC "Kuzbassenergo" in money terms within 60 days from the date of decision on their payment adoption (minutes №14 dd. 30.12.2005).

Total sum of the accrued dividends amounted RUR 406 409 187,51 thousands

Reference on the dividends pay off and accrual as for a date of 30.06.2006 is attached in the Appendix №4

JSC "Kuzbassenergo" did not issue the bonds.

8.10. Other information

There is no other information on the Issuer and his securities.

AUDITOR'S OPINION ON FINANCIAL (ACCOUNTING) REPORT OF THE KUZBASS OPEN JOINT STOCK COMPANY OF ENERGETICS AND ELECTRIFICATION (JSC "KUZBASSENRGO")

To the shareholders of the Kuzbass Joint Stock Company of energetics and electrification (JSC "Kuzbassenergo")

1. We made an audit of the attached financial (accounting) reports of the Kuzbass Joint Stock Company of energetics and electrification (JSC "Kuzbassenergo") (hereinafter The Company)

for a period from January 1 to December 31, 2005, inclusive. The financial (accounting) reports of the Company consist of the Balance sheet, Profit and loss report, Statement of changes in capital, Cash flow statement, Appendixes to the balance sheet, Explanatory note (hereinafter all statements together are called «financial (accounting) reports»). The financial (accounting) reports were prepared by the management of the Company, based on the legislation of the Russian Federation regarding preparation of financial (accounting) reports. The reports prepared on the basis of the specified legislation essentially differ from the reports made according to International standards of financial accounting.

2. The responsibility for preparation and submission of the financial (accounting) reports is on the executive body of the Company. Our duty is to give an opinion on credibility in every essential respect of the given financial (accounting) reports and conformity of maintenance procedure of accounting records to the legislation of the Russian Federation on the basis of the audit made.

3. We made the audit in conformity with the Federal act «On auditor activity», Federal rules (standards) of auditor activity, International standards of audit, as well as with our internal standards.

4 The audit was planned and made so as to obtain a reasonable assurance that the financial (accounting) reports contain no essential misstatements. The auditing was done on a selective basis and included the study on the basis of testing of evidence confirming numerical indicators in the financial (accounting) reports and disclosure therein of the information on financial and economic activity, an estimation of observing the principles and accountancy requirements applied in preparation of financial (accounting) reports, consideration of the main estimated indicators obtained by the management of the Company, as well as an estimation of submission of financial (accounting) reports. We think that the audit made gives good grounds for expressing our opinion on credibility of the financial (accounting) reports and conformity of maintenance procedure of accounting records to the legislation of the Russian Federation.

5. The audit of the financial (accounting) reports of the Company for a period from January 1 to December 31, 2004, was made by another auditing firm which gave a modified auditor opinion. In this connection we do not express an opinion on credibility of the comparative data included in the financial (accounting) reports of the Company for 2005.

6. In our opinion, except for the influence on the financial (accounting) reports of the circumstance indicated in the previous paragraph of the present Opinion, the financial (accounting) reports of the Company attached to the present Opinion reflects credibly in every essential respect the financial position of the Company as on December 31, 2005, and results of its financial and economic activity for a period from January 1st to December 31, 2005, inclusive, in conformity with requirements of the Russian Federation laws relating to preparation of financial (accounting) reports.

7 Without changing the opinion on credibility of the financial (accounting) reports, we draw attention to

the following circumstances

a. Notification on the right to demand a redemption of stock by the Company

Dear Shareholder!

Inform you that if You will not take part in a voting of if you will vote "Contra" over the question on reorganization of the Company (№1 and №2 of agenda of the general meeting of shareholders), you will have a right to demand from the JSC "Kuzbassenergo" a redemption of all or of a part of the stock belong to you.

If you will vote "Contra" (or if you will not take part in the voting) over one in two questions on reorganization of the Company (or №1, or №2), you will have a right to demand a redemption of stocks only if the decision, that you have vote "Contra" (or if you have not take part in approval of such decision), will be accepted by general meeting of shareholders.

Redemption of stocks will be at the price defined by the Board of Directors of JSC "Kuzbassenergo" in accordance with paragraph 3 of article 75 of FL "About joint stock companies"

Redemption cost of JSC "Kuzbassenergo" shall be the following:

RUR 17,57 for one ordinary stock.

The list of shareholders having right to demand redemption by the Company the stocks belong to them was completed according to the data of the register of shareholders of the Company as of November, 14, 2005.

Redemption of stocks will be carried out by the Company as follows:

1. Shareholder having right to demand redemption of stocks belonging to him by the JSC "Kuzbassenergo" shall send a written demand concerning the redemption of all or part of stocks belonging to him to the company, with the place of residence (place of location) of the stockholder and the number of stocks he demands to be redeemed indicated therein (model form of demand is attached).
2. In case of accounting of rights to the stocks of a nominal shareholder, statement of an account of depot shall be attached to the demand of shareholder.
3. Demand of shareholder concerning redemption of stocks belonging to him shall be sent by registered letter to the following address: JSC "Kuzbassenergo", №30, Kuznetsky prospect, 650000, Kemerovo, Russia; or shall be delivered to the General Director of JSC "Kuzbassenergo" Mr. Mikhailov Sergey Nickolaevich, or to the chief of department on office work of JSC "Kuzbassenergo" Mrs. Chebotarskaya Viktoria Nickolaevna.
4. Demands of stockholders concerning the redemption by the company of stocks belonging to them must be presented to the company not later than 45 days from the date the respective reorganization decision was made by the general meeting of stockholders of JSC "Kuzbassenergo" (the date of general meeting of shareholders over the aforementioned question), i.e. not later than February 13, 2006.

Shareholder has no right to recall (change) his demand concerning redemption upon the date of expiration of 45 day terms.

Demand that will be sent to the Company after the appointed date or that will contained incomplete or doubtful information shall not to be examined.

5. In accordance with art. 44 of FL "About Joint Stock Companies" and paragraph 6.1. Provisions about shareholders register (approved by Regulation of FCCB of Russia dd. the 2nd of October 1997 under the No. 7), all registered persons should inform registrator about all changes provided by subparagraph 3.4.1. of the paragraph 3.4. of this present provisions. If the information about any changes was not given by registered shareholders or if they presented incomplete or doubtful information, demand of shareholders concerning redemption of stocks belonging to him shall not

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

be satisfied, and the Company and registrator will not bear any responsibility under any related losses.

6. If shareholder declared his demand concerning redemption of more quantity of stocks of a certain category (type) than the quantity of stocks belonging to him of a certain category (type) defined in the list of shareholders who have right to demand redemption of stocks belonging to him by the Company, defined quantity in this list of stocks of the certain category (type) belonging to him shall be redeemed.
7. If an aggregate value of presented stocks of JSC "Kuzbassenergo" to be redeem will be more than 10% of a price of net assets of the Company as of the date when the decision about reorganization was made, the stocks will be redeem from shareholders proportionally to declared demands (according to regulations provided by paragraph 5 of art. 76 of Federal Law "About Joint Stock Companies").

Stock's number to be redeemed from each shareholder in such case should be determined through division of the total number of stocks that may be redeemed with consideration of aforementioned limitation, to the total number of stocks declared to redemption; this number (conversion ratio) shall be multiplied by the number of stocks subject to redemption by each shareholder.

Information about conversion ratio may be received by shareholder at the office of JSC "Kuzbassenergo" or at the office of registrator, i.e. JSC "Central Moscow Depository" while the documents necessary to the stock subject to redemption recording on the personal account being registered.

8. If the stock's number subject to redemption from the shareholder will be reduced proportionally to declared demands and such reduction will lead to that the fractional number of stocks subject to redemption from the shareholder, the number of stocks subject to redemption should be express in round numbers. Such rounding shall be carried out as follows:

1) meaning of a character after comma, the character from 5 to 9, one shale be added to a whole number.

2) meaning of a character after comma , the character from 0 to 4, a whole number shall be take into consideration, but the characters after comma are not accounted.

9). **JSC "Kuzbassenergo" redeems stocks from shareholders who have demanded redemption within 45 days from the date of the respective reorganization decision was made by the general meeting of shareholders of JSC "Kuzbassenergo" on the assumption of stocks transfer to the Company (recording of the stocks subject to redemption on the personal account of the Company according to the order (instruction) of shareholder).**

10. Shareholder who have demand redemption of the stocks belonging to the Company, have to provide recording of stocks subject to redemption from his own account to the personal account of the Company not later than the 15th of Mach 2006 (within 30 Days from the date of termination for demands to be send, in accordance with paragraph 4 of this present order). According to the place of registration of rights to the stocks subject to redemption, shareholders should address to the following institutions to carry out this operation:

a) to the Registrator of the Company – JSC "Central Moscow Depository" , No.34, stroenie 8, Bolshaya Pochtovaya str., Moscow, 105082, Russia;
b) to the depository. In such case, in the order of shareholder as deponent should be indication that in the transfer order of the nominal shareholder to be transferred to the registrator, in the transfer reasons of right of ownership should be indicated in addition:

11. for physical bodies – surname, name and patronymic of shareholder, title of identity card, its series and number;

12. for legal entities – name in accordance with Articles of Association; date and registration number (major state registration number), name of registered body or other identifying data of legal entity in accordance with law in force.

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

13. Registration of a transfer of rights for stocks shall be carried out at the expenses of shareholder.
14. If more quantity of stock subject to redemption will be transferred on the personal account of the Company, the last will return the surplus stocks to the personal accounts of persons registered in the register of shareholders, where the charge-off have took place. There is no any redemption by the Company of such stocks.
15. Payment for stocks subject to redemption shall be carried out at the expenses of the Company by way as follows:
- by cash to the cashier's office of the Company: - No.30, Kuznetsky prospect, Kemerovo, Russia

1.3. Information about the issuer's auditor (auditors)

Full firm name and abbreviation: Closed Joint Stock Company "***PricewaterhouseCoopers Audit", ZAO "PwC Audit"***

Location***: №52, stroienie 5 , Kosmodamianskaya nab., 115054, Moscow***
INN: ***7705051102***
Tel***.: (095) 967-60-00***
Fax***: (095) 967-60-01.***
e-mail: ***hrdgph@pwcglobal.com***

Information on the licence of the auditor:
License No***.: E 000376 to render audit services***
Date of issue: ***20.05.2002***
Duration: till the ***20th of May, 2007***
Issuing body: **Ministry of Finance of Russian Federation**

ZAO "PricewaterhouseCoopers Audit" does not spend any works within the limits of special auditor's checks under the contract with the JSC "Kuzbassenergo" except audit of accounting (financial) reports. There are no any close business or allied relations between the Auditor and the Company.

The Company did not grant any loans to the Auditor. Auditor (authorities of the auditor) has no market share in the chartered capital of the company. The company has no information on the officials of the issuer being the officials of the auditor at the same time.

Auditor is independent of the Issuer.

Factors of the Auditor's independency: According to the art. 12 of the Federal Law "On auditing" #119 -FL dd. 07.02.2001 audit may not be fulfilled by:

1) *the auditors being the incorporators (participants) of the auditing persons , also their managers, accountants or other persons responsible for book-keeping organization as keeping and drawing up a financial (accounting) report;*

2) *the auditors being with the incorporators (participants) of the auditing persons, their officials, accountants and other persons responsible for book-keeping organization and keeping also for drawing up a financial (accounting) report in immediate relationship (parents, wife, brothers, sisters, children, also the husband of wife's brothers, sisters, parents and children);*

3) *audit institutions, whose managers and officials are the incorporators (participants) of the auditing persons, their officials, accountants and other persons responsible for book-keeping making and keeping, as for drawing up a financial (accounting) report;*

4) *audit institutions, whose managers and other officials are in immediate relationship (parents, husband or wife, brothers and sisters, also husband and wife's parents, sisters and brothers, children) with the incorporators (participants) of the auditing persons, also their officials, accountants and other persons responsible for book-keeping making and keeping, as drawing up a financial (accounting) report;*

5) *audit institutions acting as the incorporators (participants) of the auditing persons to whom these institutions are the incorporators (participants), in relation to affiliated companies, subsidiaries and representative offices of the aforementioned auditing persons, also in relation to the companies having common incorporators (participants) with this audit institution;*

6) *audit institutions and individual auditors rendered services on book-keeping renewal and making, also on financial (accounting) report drawing up to the natural persons and legal entities, or in respect of these persons during 3 years before the current auditor's checking.*

There are no essential interests tied an auditor (officials of the auditor) with the Issuer (officials of the Issuer).
Auditor (authorities of the auditor) has no market share in the chartered capital of the company.
The Company did not grant any loans to the Auditor.
There is no immediate business relations , no family relations.
The officials of the Issuer are not the officials of the auditor.

Procedure of the Issuer's auditor elections

FL "On Joint Stock Companies" does not determine terms and order for nomination of a candidate for auditor to inscribe him in the lists for voting over the question on approval of auditor of the Company, also this law does not grant to the shareholders the right to nominate of candidate for auditor. Thus the candidate for auditor subject to approval at the annual general meeting of shareholders of the Company is determined by the Board of Directors. The General meeting of shareholders approves auditors of the company every year in accordance with the Charter of the Company .
Amount of remuneration for the auditor services shall to be determined by the Board of Directors of the company."
Auditor of the Company controls financial and economic activity of the Company in accordance with terms of legislation of Russian Federation and in accordance with the signed contract.
During the reporting period ZAO ""PricewaterhouseCoopers Audit" spent an audit of financial (accounting) report of the Company for the period since the 1 of January till the 31st of December 2005. Audit was carried out in accordance with the Federal Law " On the Auditing", also with the Federal Provisions (Standards) on the auditing , International auditor's standards, and the inner standards of the ZAO "PwK Audit".
There are no deferred and late payments for rendered auditor's services.

Note: Data was calculated on the ground of two-way-business contracted during the trade session. Information on the ground of the addressless business was used to prepare the data for the period since the 01st July 2003 till the 30th June 2004

The market capitalization of the Issuer in the 1st quarter of the year 2006 according to the data of the JSC "Stock Exchange "Russian Trade System" amounted RUR 34 145 346 271,67. Market value per one ordinary stock of the JSC "Kuzbassenergo" as for a date of the 31 of March of the year 2006 (last for the 90 trade days) amounted RUR 56, 33023.

2.3. Issuer's liabilities.

2.3.1. Account payable

Account payable
by the 31.12.2005

Table 4.

Accounts payable	Date of payment	
	under 1 year	above 1 year
Accounts payable to the suppliers and contractors, RUR	835 050 000	1 240 468 000
including the past-due, RUR	5 540 000	0
Accounts payable to the personnel of the company, RUR	56 398 000	0
including the past-due, RUR	0	0
Accounts payable to the budget and the State Off-budget funds, RUR	684 983 000	20 507 000
including the past-due, RUR	0	0
Credits, RUR	1 595 127 000	0
including the past-due, RUR	0	0
Loans, total, RUR.	10 000 000	0
including the past-due, RUR.	0	0
including bonded debts, RUR	0	0
including the past-due bonded debts, RUR	0	0
Other accounts payable, RUR	1 213 982 000	0
including the past-due, RUR	2 801 000	0
Total, RUR	4 395 540 000	1 260 975 000
including the past-due, RUR	8 341 000	0

During the financial year 2005 other Company's long-term accounts payable decreased by 1,695,240 thousand roubles or by 57,3%, including:

- ***to the suppliers and contractors – by 272 417 thousand roubles or by 18,0% (due to the transfer to the category of short-term obligations: to open JSC RAO "UES of Russia" – 160,000 thousand roubles; on purchased energy – 119,113 thousand roubles);***
- ***to off-budget funds – by 375 849 thousands roubles or by 97,9 %;***
- ***to the budget – by 1 046 974 thousands roubles or by 98,8 %;***

The decrease of long-term liabilities to the budget and to off-budget funds is caused by the write-off of fines and penalty fee from the Company's balance to the budget and off-budget funds, as a result of a prescheduled discharge of the restructured debt by the amicable agreement.

The short-term debts increased by RUR 530 924 thousands or by 23, 5% (from 2 259 489 thousands roubles to 2 790 413 thousands roubles) in the year 2005.

The main reason of such increase of the short-term liabilities was the transfer of the debt from the long-term category to the short-term one.

Besides, the accounts payable increased:

- to the budget – by 237 844 thousand roubles or by 57,2% (the increase is caused by the reflection in the balance of the penalty fee on VAT to the amount of 149,624 thousand roubles as a result of the court hearing at the suit of IFNS of the Russian Federation, Kemerovo city);

- due to the advances received from the energy consumers – by 208 733 thousand roubles (by 76,8 %).

The past-due accounts payable reduced by RUR 4 994 thousands (or by 31%) from 16 180 thousands roubles to 11 186 thousands roubles.

Due to the expiration of the limitation period and the liquidation of the contractor, in 2005 the Company wrote off the non-demanded accounts payable equal to 2,476 thousand roubles.

As for a date of 31.12.2005 the debt on the short-term credits and loans reduced by RUR 840 378 thousands till

RUR 1 605 127 thousands due to:

- ***decreasing of a debt on the credits equal to RUR 76 408 thousands;***
- ***repayment of loans against the Company's bills of credit to the sum equal to RUR 256 854 thousands;***
- ***withdrawal from the pledging of credit liabilities of the Company's bills of credit to the sum equal to 507 116 thousands (transfer to the crediting without pledging) .***

The short-term credits were taken with a purpose to increase the circulating assets to pay off the current liabilities of the Company.

Creditors whose share amounts no less than 10% of the total sum of accounts payable

2.3.2. Credit history of the issuer

Table 8.

Figure	2001	2002	2003	2004	2005	1st quarter 2006
Value of the net assets by the end of the reporting period, RUR	16 666 809 000	20 847 542 000	24 851 878 000	24 389 890 000	27 343 343 000	28 662 172 000
Borrowed assets, total, RUR.	995 022 000	1 531 056 000	2 112 851 000	2 445 505 000	1 605 127 000	1 383 779 000
Share of the borrowed assets in the value of the net assets, %	5,97	7,34	8,50	10,03	5,87	4,83

As for situation by the 31.03.2006 the share of the borrowed assets in the value of the net assets reduced by 4,83 (by 1,04 percent points) as compare with the beginning of the year, and as compare with the year 2004 by 5,2 percent points.

For the last five finished fiscal years (2001-2005) the Company did not make credit contracts and loan contracts, the sum of the principal debt under which amounts 5 and more percents of the net assets value.

Credit policy of the JSC "Kuzbassenergo" aims at an attraction of credit resources on more gainful terms of crediting, at a reducing of an interest rate for credit resources using. Borrowed current assets are attracted by the Company at the rate that is lower than the refinancing rate fixed by the Central Bank of RF.

Provisions on the credit policy of the Company were approved by the Board of Directors at the general meeting spent the 28 of December 2004. These Provisions determine the order of fixation of Limits of a debt position and the Limit on cost parameters of loan, the order of the control over their observance, and also measures on reduction of the Debt position according to the fixed Limits in case of their excess aimed at the financial stability and minimization of a risk of insolvency of the Company guarantying.

By the Decision of the Board of Directors dd. 05.04.2006 was decided to: "Approve an attraction by the JSC "Kuzbassenergo" in the 2st quarter of the year 2006 of the credit assets at the rate not exceeding that in 1,1 time more the rate of refinancing of the Central Bank RF against the security provided by the credit policy of the Company subject to observance of the maximum sized of a one-time loan debt over the attracted credits by the company by the 01.07.2006 in a volume no more than RUR 1 600 000 000 (One milliard and six hundred million).

There was not the bound's issue during the reporting period.

2.3.3. The issuer's liabilities against the third parties guarantee

In accordance with the reference on the values availability accounted on the off-balance accounts (lines 950 and 960) being a part of the Company's accounting report structure by the 31.12.2005 the total sum of liabilities of the JSC "Kuzbassenergo" was as follows:

- guarantee of liabilities and payments received (line 950) –RUR 88 226 thousands;

- guarantee of liabilities and payments issued (line 960) - RUR 719 451 thousands (guarantee of liabilities under the credit contracts: inventory holdings (including coal) at the assessed value). The Company did not received the bank's requirements on the immediate payment of liabilities with a guarantee and did not created the funds on the conditional facts of economic activity to the issued guarantee in the accounting report.

Accordingly, by the 31.03.2006:

- guarantee of liabilities and payments received (line 950) – amounted RUR 88 123thousands; - guarantee of liabilities and payments issued (line 960) amounted 678 694 thousands.

There were not any liabilities of the issuer against the guarantee given to the third parties, including a pledge or a guarantee amounted not less then 5 per cent of the issuer's assets balance price during the reporting period.

2.3.4. Other liabilities of the Issuer

There are no any agreements including the bargains on term not reflected in the accounting balance and may affect essentially the Issuer's financial situation, also his liquidity, source of finance and their using conditions, activity results and expenses.

2.4. The purpose of the issue and direction of the assets using resulted to the securities floatation

The Issuer did not spent the issue aimed to the assets attraction by the way of the distribution of securities during the reporting period.

Since the moment of the State registration of the Company the Issuer carried out two issues of the securities, asking the following condition:

Report on the issue's outcome was registered.

Sequence number of the issue: 1
Category: ordinary
Form of the securities: registered

2.5. Risks concerned to the acquisition of the distributing (distributed) issuing securities

2.5.1. Branch risks

Electroenergetics was always a branch of high level of technological risks caused by the specific character of the output production and transfer to the consumer.

In spite of the good figures of a stable work of the JSC 'Kuzbassenergo" it is impossible to exclude equipment failures possibility. Thus, the task of reliable and safe supply of a solvent demand and work on the risks reducing concerned the production activity is one of the priority tasks in the power company's activity.

The Issuer did not carried out a foreign trade activity, all volume of electric and heat power realization concerned the home market. Thus there were not the risks concerned the possible change of price to the Issuer's production at the foreign markets.

The risk of nonfulfilment by the issuer of his liabilities before the owners of the issuing securities due to the branch conjuncture change is not subject of this present report because of absence of any liabilities on the dividend payment by the issuer before the owners of the preference stocks and the percents payment off and retirement of bonds The issuer had floated only the ordinary stocks.

Fuel risks proper to the power industry (fuel price and possibility of purchasing in the due volume and in time) also have vital importance. To reduce the fuel risks and to maintain a safety of power system activity the total level of fuel reserve is higher than the tasks of the JSC RAO "UES of Russia".

By the 1st of April 448 thousands ton of coal kept in stock of eight electric plants of the JSC "Kuzbassenergo" against the RAO "UES of Russia" goal equal to 330 thousands ton of coal. Total stock of mazut taking into account the tanks of the Zaiskitimskaya water-heating boiler plant (Kemerovo) is equal to 13,4 thousands ton (goal of the RAO "UES of Russia" is 10 thousands ton).

The risks of the tariff adjustment are more serious and unhandy. The tariff adjustment defines fully a profit base of business.

The policy of tariff fixing in the year 2006 is the same: there is a tariff-corridor with the strictly defined extremely maximum and extremely minimum tariff levels.

Energetics shall to keep within these limits. Due to such limitation the growth rate of tariffs as an earlier remains lower the level of inflation that may led to the dropping profit of the power company.

The tariffs don's provide the investor's interests, thus the company is of little attractive in the investing as usual.

The present tariffs are not transparent thus, an investor don't see the terms for the invested money pay back.

To reduce the risks of tariff adjustment it needs to refuse adjustment in the "Inflation minus" method and to aim to more adequacy and detailed legal and methodological base of adjustment.

The following factors may be related to the other branch risks:

- Change of structure of energy consumption at the groups of consumers from the planned at the expense of production volume reduction of a range of industrial enterprises, may lead to reduction of energy output volume in money terms.

- Bankruptcy of enterprises may lead to the impossibility to recover a debt for consummated energy.

- Decreasing of living standard of some groups of population of Kemerovo region will led inevitably to reduction of payment's level of this type of population.

Expectations of the Stock market's participants concerned to the reforming course of energy market.

2.5.2. Country and regional risks

JSC "Kuzbassenergo" is a registered in Russian Federation company carrying out its activity in Kemerovo region, thus some common changes in the State and other regional developments affect on its activity importantly.

Kemerovo region is one of the most attractive regions of the Western Siberia of Russian Federation. The rating agency "Expert RA' annually spends a rating of investment attractiveness of regions. During the last five years the Kemerovo region was assigned the rating 2B (average potential – medium risk).

In the "Researching in the relative creditworthiness of the RF subjects", made by the Rating Agency "AK&M" the Kemerovo region takes the 47th place (from the 79 researched RF Subjects) at the integrated level of relative creditworthiness of the RF subjects.

As a whole an economic and political situation in the country and in the region is stable, and any possibility of military conflicts, extraordinary situation, walkouts, change of the State and regional leaders is improbable.

As acknowledgement of a stable economic and political situation in the country was increasing of a credit rating by one step by the rating agency Moody's took place in the October 2005.

The experts accepted into consideration " very fast and important growth" of the gold and exchange currency reserves and of the stabilizing fund.

Rating of RF in the liabilities expressed in the exchange and national currency grew to the level "Baa2" from the level "Baa3". A forecast of the rating rests the same. The Mood's also increased the rating of the bonds of the national currency loan (BNCL) of the 5st, 6th and 7th trenches till the level "Baa2", the rating of the bank deposits in exchange currency till the level "Baa2". Rating of the short-term liabilities in exchange currency, short-term bank deposits, rating of the RF as the Issuer at the short term liabilities in exchange currency was increased to "P2" from "NP".

Overwhelming majority of economic factors are out of control of the Issuer.

It's impossible to guarantee that some recent tendencies of Russian economic including increasing of Gross National Product, relative stability of RUR and decreasing of the inflation rates will be kept in future. Besides global fluctuations of oil and gas prices, RUR fortification in the real term concerning USD Dollar, also some consequences of liberalization of a monetary and credit policy and other factors may affect negatively Russian economics and business of the issuer.

Russian economics is not protected against market recessions and delay in economic development in different countries of the world. As it was in the past, financial problems or sensitive perception of the risks related to the investments in the countries with developing economy may reduce a volume of foreign investments to Russia and affect negatively Russian economics.

Ecological factors inseparably linked with general activity of the issuer as a production process, transfer and distribution of heat and electric power demands large quantity of natural sources that call environmental pollution. As significant capital investments are necessary to purchase nature-conservative equipment to remove ecological factors of risk , and payments for natural sources consumption.

There are regional risks related with reforming of JSC "Kuzbassenergo". The management of JSC "Kuzbassenergo" spend active consultations with the government of regional and city Administration over the questions of the Company's reforming to reduce such risks.

To prevent the under financing of the budget consumers the Agreements on payments for the consumed power between the Kemerovo regional Administration, Main Financial Administration of Kemerovo region, Heads of the cities and districts and JSC "Kuzbassenergo" are subscribed every month. Also the meeting in the Kemerovo regional Administration on fulfillment of the aforementioned Agreements in the presence of the Heads of the cities and districts, managers of the territorial financial authorities, managers of the housing and communal services enterprises and the city power networks are spend.

The Kemerovo regional Administration at the interdepartmental commission on power energetics reforming under the RF Government backed a project on the JSC "Kuzbassenergo" reforming in the 05.12.2005.

Risks depending on the regional geographical peculiarity, i.e.:

- *Damnification risks because of emergency situations of natural factors: periodical floods, earthquake on the territory of Kemerovo region.*
- *According to the long-term forecast made by the Ministry on Emergency Situations of Russia for the period 2006, there will be most possible such man-caused emergency situations on the territory of Kemerovo region as:*
- *man-caused conflagration (fire in buildings and constructions of social and cultural purpose). Conflagration peak in the housing sector and at the economic object is traditionally registered in winter-spring period when the total quantity of fires increases as compared with warm period by 5%, and the quantity of conflagrations increases by 40%:*
- *motor transport;*
- *mining industry.*
  - *Continuance of high probability of the accidents and emergency situation in mines is forecasted. Besides the cases of earth quaking equal to 1-2 force on the territory of region is possible because of industrial explosions in mining industry;*
  - *high probability of man-caused emergency situations due to accidents in railway transport during transporting of dangerous cargo. The reason of such emergency situation is improper conditions of approach lines to potentially dangerous enterprises, i.e. ltd. "Kemerovokhimmach", JSC "Novokuznetsk Aluminum plant", etc.*

According to the forecast of the Ministry on Emergency Situations for the winter-spring period the most probable emergency situations of man-caused nature resulting from the complex of dangerous meteorological phenomena (heavy atmospheric precipitation, force wing, sleet adhering) are forecasted in Kemerovo region.

Increasing of household fires in the private sector is forecasted because of temperature decreasing and using of electric heaters, and also wiring inflammation. Accidents in the networks of heat and water supply, outage of heating systems of buildings and constructions are possible.

The prediction of the risk of open military conflict also the risk of national emergency are minimal possible on a national level as ethnic and social tension in the region does not bear critical nature. However there is a risk of terrorist acts to fight with the security measures at the strategic objects of JSC "Kuzbassenergo" were considerably toughened.

Under the special control were took electric plants, large electric substations, pump houses, combustive-lubricating production's storages and other category objects.

Admission regime for motor transport and employees was toughened including using of manual and fixed metal detectors at the enterprises.

Artificial barriers were mounted that stop unofficial passage of motor transport on the territory of enterprises.

Car parks were transferred at the safe distance from energy object guards, also active interaction between security of JSC 'Kuzbassenergo" and Motor licensing and inspection department, duty departments of MIA and MES was organized.

Around-the-clock work for vide control and patrol were organized at the most important and the farthest object of energy system.

2.5.3. Financial risks

Variation of interest rates may affect financial and economic activity of the issuer as the enterprise uses

borrowed current assets in its activity but its will not have significant effect on the financial showings of the company.

Credit policy of the issuer aimed to attraction of credit resources on more favorable credit conditions.

The company attracted borrowed current assets lower then the rate of refinancing fixed by the Central Bank RF (12%).

For the year 2005 the average percent rate of the credit resources attraction reduced from 11,9% to 9,0% of annual.

The average percent rate for the credit funds using by the Company amounted 8,26% by the 31.03.2006. Share of credits without loan guarantee was equal to 52,6% of the total amount of loan debt under the short-term credits by the 31.03.2006.

Inflation effect:

High and insufficiently forecasted inflation level not only affects negative to the gross domestic product growth rate, but also depresses an activity at the securities market: if the inflation is high the income from the securities don't compensate inflationary losses, and a suddenness of the inflation restricts sufficiently an opportunity of forecasting of the yield from investment.

Decreasing of the growth rate of prices incites the long-term investments in production, the normal functioning of economics is under restoring that in turn leads to the raising at the stock market.

Thus the moving of inflation and of the stock market is of different courses in Russia.

After the year 2001 the level of inflation in Russia become decreased. If in the year 2001 the consumer prices increased by 18,6%, then in the year 2005 this figure amounted 10,9%.

Besides, a stabilization of Russian economics has reduced his risk of the inflation level suddenness.

Common for this period decreasing trend became one of the growth factors of the stock market: in the years 2001-2005 the index RTS increased by 786% from 131 to 1126 points.

It's already the third consecutive year the growth rates of power tariffs are retarded the inflation.

Fuel, building materials and equipment become lot quickly cheaper than it stipulated by the business plans of the company. The State defines the growth rate of electric power price depending on the forecasted figures of the inflation. But the problem is in the non fulfillment of the forecasted inflation. In the year 2005 the growth rates of energy tariff were fixed by the Federal Tariff Service (FTS) in the amount equal to 9,2% under the actual inflation 10, 9%. In the year 2006 by the decision of FTS the electric power tariffs grew by 7,5%, against the forecasted 8,5% (according to the forecast of the Ministry of Finance of RF the growth of the inflation in RF at the outcome of the year 2006 will be 10-11%). According to the data of the Federal Service on the State statistics the inflation in the 1st quarter of the year 2006 amounted 5,0%.

The issuer does not bear any exchange rate risks as he is carrying out his activity only at the internal market.

2.5.4. Legal risks

There are legal risks related to the change of exchange regulation, modification of tax legislation, change of regulations of the customs supervision and fees, modification of requirements on licensing, court practice that may affect negatively on the activity's results of the issuer also results of the current legal trials subject of participation of the issuer.

- Modification of tax legislation in part of increasing of tax rates or change in the order and terms of tax calculation and payment may led to decreasing of net income of the issuer that may led to reducing of amount of the dividends subject to payment.

- Change in requirements on licensing of main activity of the issuer may led to increasing of a period for document preparation obligatory to extend a term of duration of the license, also necessity of accordance of the issuer with the produced requirements. However as a whole this risk should be deemed as insufficient except the cases when to extend the duration of the license or to exercise an activity subject to licensing some requirements will be provided that the issuer will not may correspond with or when the corresponding with these requirements will be caused with excess costs that may led to the issuer's activity termination.

- There were not any modification of the court practice related with the issuer's activity that might affect negatively on the results of his activity during the reporting period.

2.5.5. Risks concerned the Issuer's activity.

Risks related with the issuer's activity, i.e. the current legal trial subject to participation of the issuer (actions of the company liquidation, alienation of the company's assets, contestation of rights arisen from the licenses or patents etc.), possible liability of the issuer against the third person's debts are absent.

The Issuer has no the risk concerned the lack of possibility to prolong the period of validity of the Issuer's license to the specified activity.

Other essential risks proper to the issuer are absent.

III. Detailed information about the issuer

3.1. Information about the issuer's establishment and development

3.1.1. Information about the issuer's company name

full company name and abbreviation:

Kuzbass Joint stock Company of energetics and electrification
(JSC «Kuzbassenergo»).
Before the privatization – Kuzbass industrial institution of energetics and electrification ("IIEE "Kuzbassenergo")
Kuzbass Open Joint Stock Company of energetics and electrification (OJSC "Kuzbassenergo")
Introduced: 30.12.1993
Kuzbass open joint stock company of energetics and electrification (JSC "Kuzbassenergo")
Introduced: 15.05.1996

3.1.2. Information about state registration of the issuer

Date of state registration of the issuer: 30.12.1993
Number of state registration's certificate (other document ratified the state registration of the issuer): 1901
Name of registration authority: Kemerovo Administration
In accordance with Federal Law "On State registration of legal entities" the corresponding record under the state registration number 1024200678260 was made in the Uniform State Register of Legal Entities the 23rd of July 2002 (certificate: series 42 №001926135 issued by Administration of the Russian Ministry of Taxation in Kemerovo, Kemerovo region).

3.1.3. Information about the issuer's establishment and development.

The issuer was established in accordance with a privatization schedule of the Kuzbass industrial institution of energy and electrification (IIEE "Kuzbassenergo").

In pursuance of the Decrees issued by the President of the Russian Federation, i.e. № 923 dd. August, 15, 1992 « About the organization of management system of the electric-power complex of the Russian Federation during privatization », № 1334 dd. November, 3, 1992 « About realization in the electric- power industry of the Decree issued by the President of the Russian Federation dd. August, 14, 1992,
№ 922 « About features of transfer of the state enterprises, institutions, organizations of fuel and energy complex into the joint-stock companies », № 721 dd. July, 1, 1992 « About organizational measures in the transfer of the state enterprises, voluntary associations of the state enterprises into the joint-stock companies », the Committee on administration of the state property of Kemerovo region has made the Decision № 330 « On privatization and transfer of IIEE "Kuzbassenergo" into the Kuzbass open joint-stock company of energy and electrification » dd. 21.09.1993.
The Order № 345 « About registration of open joint-stock company "Kuzbassenergo" was approved by Kemerovo Administration the 30th. 12.1993.

The common purpose of the privatized companies was increasing of the efficiency of energy system of the country and transfer from the planned economic to the market relations.

JSC "Kuzbassenergo" was established for and indefinite period of time.

The main purpose of the JSC "Kuzbassenergo" activity is the profit earning.
Activities of the JSC "Kuzbassenergo" are as follows:

- ***electricity and heat energy production;***
- ***electricity and heat energy transmission;***
- ***electricity and heat energy supply (trade) according to the fixed tariffs in accordance with the dispatcher's schedules of electric and heat demands;***

It renders the following services:

- ***energy supply to energy saving enterprises;***
- ***communication facilities, including telecommunications;***

It carries out:

- ***capital repairs;***
- ***technical reequipment;***
- ***reconstruction and development of regional energy system;***
- ***mounting, arrangement and repair of energy objects; electric and heat energy equipment;***
- ***operability assurance of electric and heat energy networks;***
- ***maintenance, mounting, repairing of boilers and buckets under pressure, steam and hot water pipelines;***
- ***providing for maintenance of energy equipment in accordance with the standard requirements in force;***
- ***timely and qualitative repairing of energy equipment;***
- ***technical reequipment and reconstruction of energy objects;***
- ***operability assurance of electric and heat energy networks;***
- ***activities on maintenance of electric an heat energy networks.***

JSC "Kuzbassenergo" is one of the largest energy systems in the body of the Holding company JSC RAO "UES of Russia". Energy complex of the company is the sixth in the installed capacity and the fifth in the volume of energy output to the consumers. Quantity of power output by electric plants of JSC "Kuzbassenergo" exceeded 30% in the balance of UES of Siberia.

Mission of the company is the regular and reliable supply our consumers with heat and electric power providing production efficiency and investment appeal of the company.

3.1.4. Contact information:

Issuer's location: **№ 30, Kuznetsky prospect, GSP-2, Kemerovo, Russia**

Telephone: *(384-2)29-33-59*
Fax: *(384-2)29-37-77*
e-mail:*adm@kuzbe.elektra.ru*
Web-site :*www.kuzbassenergo.ru*

Organizational structure of the executive body of JSC "Kuzbassenergo" was approved by the Order of JSC "Kuzbassenergo" №709 dd. 31.12.2003. Department on corporate management including department on corporate policy which duties include work with shareholders and investors was established due to this Order. Chief of the Department is Ms. Burdina Elena Yakovlevna, date of birth 1964., education – higher.

Location: **№ 30, Kuznetsky prospect, GSP-2, Kemerovo, Russia**

3.2. Principal economic activities of the issuer
3.2.1. Industrial affiliation of the issuer

OKVED (All-Russia classifier of types of economic activity) codes :

40.10.11 –Production of electric power by heat plants
40.10.2 – Energy transmission
40.30.2 – Steam and hot water transmission (heat energy)
51.56.4 – Wholesales of electric and heat power (without its transmission and distribution)
74.60 –Investigations and protection
74.14 – Consulting over the questions on commerce and management.

3.2.2. Principal economic activities of the issuer

The principal activities of the JSC "Kuzbassenergo" are • production, transfer and distribution of electric and heat energy

Production volume in the period in the years 2001-2005, and in the 1st quarter 2006.

Table 9.

Figure's name	2001	2002	2003	2004	2005	1st quarter 2006.
Production volume: - electric power output, kwh millions	27224,616	26618,052	25804,994	22554,273	22960,480	6331,641
- heat power output, Gcal thousands	15425,989	13523,948	13688,506	13352,417	13007,407	5462,735

JSC "Kuzbassenergo" is a subject of natural monopoly working in the sphere of services on transmission of electric and heat energy on the territory of Kemerovo region.

Share of profit of the main activity in the total volume of profit of the JSC "Kuzbassenergo" for the last 5 fiscal years , and for the I st quarter 2006. .

Table 10.

Period	2001	2002	2003	2004	2005	1st quarter 2006.
Aggregate profit, RUR thousands	15285725	17614970	19795684	18043479	21319431	6686584
Profit of the main activity, RUR thousands	11913608	14210479	16486488	16110323	18656988	6311076

Share f profit of the main activity in the aggregate profit %	77,94	80,67	83,28	89,29	87,51	94,38

As the aggregate profit of the Issuer it means the sum of sales proceeds, operational and extraordinary profits – according to the data of the form 32 "Profit and losses report"

Total (aggregate) profit in the period under examination (2001-2005) increased from RUR 15,28 milliards to RUR 21,32 milliards, i.e. in 1,4 times; share of profit of the main activity was constantly increasing , since the year 2001 it makes more than 80% of the total sum of the Company's profit.

Share of profit of the JSC "Kuzbassenergo" of the main activity in the period 2001-2005.

Table 11.

Production	Share of profit, %				
	2001	2002	2003	2004	2005
Electric power	64,02	66,94	67,21	69,91	69,05
Heat power	13,92	13,73	16,07	19,38	18,46
Total:	77,94	80,67	83,28	89,29	87,51

Share of profit of the JSC "Kuzbassenergo" of the main activity in the Ist quarter 2006.

Table 12.

Production	Share of profit, %		Change, increasing (+), decreasing (-)
	I quarter 2005	I quarter 2006	
Electric power	62,27	66,90	+ 4,63
Heat power	26,58	27,48	+ 0,9
Total:	88,85	94,38	+5,53

Share of proceeds of the electric power production is increasing after a number of years, and if it was 64,02% in the year 2001, that in the year 2005 it made 69,05%, i.e. it increased by 5,03%.

In the 1st quarter of the year 2006 as compare with the same period of the previous year the share of profit of the electric power output increased by 4,63%, and of the heat power output by 0,9%. Main activity of the Issuer, i.e. electric and heat power production, transmission and distribution have a season nature.

It should mark that the decreasing of electric and heat power output in the summer months take place.

3.2.3. Principal types of products (operations, services)

Principal types of products of the JSC "Kuzbassenergo» " are of electric and heat energy.

Electric and heat power tariffs are subject to approval by the Regional energy committee 1 time a year in accordance with the Federal Law №41-FL dd. 14.04.1995.

An average electric power output tariff increased by RUR 0,28603 /kwh or by 79,6% since the year 2001 till the year 2005; and average heat power output rate increased from 137,965 roub./Gcal (2201) to 305,527 roub./Gcal (2005) or by 121,5%.

In the I quarter of the year 2006 an average electric power output rate was 0,71175 roub./kwh, and and average heat power output rate amounted 341,222 roub./Gcal.

Table 13.

Figure's name	2001	2002	2003	2004	2005	1 quarter 2006

Proceeds from the production sale (work, services), RUR						
- electric power	9785368000	11792093000	13306092000	12612924000	14722418000	4473657000

Intangible assets depreciation, %	-	-
Remuneration of the rationalization proposals, %	-	-
Obligatory insurance payments, %	0,6	0,3
Representative needs outlay, %	-	-
other, %	24,6	19,0
Total: outlay on production and sale of products (work, services), (net cost) ,%	100,00	100,00
Proceeds of the products sale (works, services) ,%	112,3	129,01

Record keeping of the net cost is in accordance with the Tax Code of Russian Federation, part II dd. 05.08.2000 №117-FL and with the Accounting policy of the JSC "Kuzbassenergo" not stipulated a separate accounting at the products(work, services) types.

3.2.4. Raw materials and suppliers of the issuer.

Principal raw material used by the JSC "Kuzbassenergo" is a fuel. Kuznetsky coal and its cleaning rejects are used as the principal fuel at the power plants of JSC "Kuzbassenergo".

Fuel oil is used as starting fuel and meant for maintenance of burning during low quality coal firing, and as the principal type of fuel at the Zaiskitimskaya water-heating boiler plant.

Analysis of fuel price change

Table 15.

Fuel type	Supplier's name	2005		1 quarter 2006	
		Purchase volume in natural terms, thousands ton	Price of the product unit including VAT and quality, millions RUR	Purchase volume in natural terms, thousands ton	Price of the product unit including VAT and quality, millions RUR
Coal	JSC "Belon"	110,06	459,59	-	-
	TH «Kuzbassrazrezugol"	5417,40	550,67	1198,64	615,43
	JSC «SUEC»	3875,21	549,40	1241,20	621,39
	JSC «CC «YuzhKuzbassugol"»	1382,29	459,21	352,84	519,6
	CC «Yuzhny Kuzbass»	119,03	278,21	102,39	306,77
	ZAO «Chernigovets»	468,95	627,39	206,08	694,47
	Ltd. «OUC» (Moscow)	300,78	456,62	-	-
	Rest suppliers	1344,27	431,60	166,79	473,17
	TOTAL:	**13017,99**	**526,65**	**3267,94**	**595,40**

At the outcome of the year 2005 an average price per one ton of coal amounted RUR 526,65, and at the outcome of the 1st quarter of the year 2006 – RUR 590,40. i.e. its price increased by 13,0% for the 3 months of the current year.

The Major suppliers of coal are: Trade House of the Joint Stock Company Coal Company " Kuzbassrazrezugol" (Kemerovo); Joint Stock company "Siberian Coal And Energy Company (Moscow); Joint Stock Company "Coal Company "YuzhKuzbassugol" (Novokuznetsk).

3.2.5 Markets for products (work, services) of the issuer

Power industry is practically the unique industry whose products and services consumers are all industries and private sector. There are two markets for energy distribution in Russia: wholesales and retail trade. Heat energy distribution is only at the retail market.

Kemerovo region is the principal market where the JSC "Kuzbassenergo" carries out his activity.

Kemerovo region is located in the south-east of the West Siberia at the joint of the West-Siberian plain and the mountains of the South Siberia. It is located at almost equal distance from western and eastern borders of the Russian Federation. It is in the 6th time zone.

Output of electric power to the consumers is according to the contracted "Agreements about output and using of electric power".

Composition of electric and heat power consumers at the retail market is in the table 16 stated above by an example of a scheme showing electric and heat power output.

Structure of electric and heat power output in the 1st quarter 2006.

Table 16.

JSC "Kuzbassenergo"	Electric power			Heat power			Electric power +heat power	
	Output to the ow consumers (thousands kwh)	Accrued, thousands roubles including VAT	Sale, thousand roubles including VAT	Output to the ow consumers (Gcal)	Accrued, thousands roubles including VAT	Sale, thousand roubles including VAT	Accrued, thousands roubles including VAT	Sale, thousand roubles including VAT

According to this table, the largest consumers of electricity and heat energy at the retail market are industrial enterprises, i.e. 61.5 %.

In the industrial sector leaders on electric power consumption are the enterprises of ferrous metallurgy, their share amounts 31,5%

In the structure of heat energy output enterprises of housing and communal services (more 60,2% of consumption) and industry (more 28,6%).Chemical and petrochemical enterprises are the leaders on heat energy consumption in the structure of industry .

Factors which may adversely affect the distribution of the Issuer's products (operations, services) and possible measures of the Issuer to reduce such impact.

1. Purchasing by the consumers of electric power at the free-trade market (hereinafter called FTM) of the wholesales energy market working on the territory of Siberia since 01.05.2005

In the 1st quarter of the year 2006 Ltd. PO "Khimprom (volume of purchase – 9139 thousands kwh) and Ltd. "Topky Cement" (volume of purchase – 10 011 thousand kwh) purchased electric power at the FTM of the wholesales energy market.

Besides, since the 1st of April 2006 the JSC "KOKS" is purchasing electric power at the FTM (expected reducing of electric power consumption due to the exit of this consumer to the FTM will be 11 684 thousands kwh a year).

This present time the documents obligatory to the entrance to FTM prepared by the JSC "Energoupravleniye" Leninsk-Kuznetsky and LTD. "Energy supplying company Energoservice" are under coordination.

Expected reducing of electric power consumption caused by the entrance of this companies to the FTM will be: JSC "Energoupravlenye" (Leninsk-Kuznetsky) 42570 kwh a year and Ltd. "Energysupplying company "Energoservice" – 13821 kwh a year.

JSC "Kuznetskye ferrospavy", KOAO "AZOT" and Ltd. "Mechel-Energo"

prepare all necessary documents and bring AIIS KUE to required parameters at the wholesale market to cover a part of their energy consumption by way of purchase of electric power at FTM of wholesale energy market.

Aggregate decreasing of energy consumption from the JSC "Kuzbassenergo" resources due to entrance of the aforementioned consumers to FTM will be approximate 313 930 thousand kwh a year

Entrance of consumers to FTM of wholesales energy market meet the strategy of energy industry reforming and JSC "Kuzbassenergo" can not affect this tendency change.

2. Development of small generation on the territory of Kemerovo region :

Since the November of the year 2005 the JSC "Yuzhkuzbassugol" acquires a part of volume of the own consumption under the sales contract from the TETs of the Ltd. "URMASH" (in the 1st quarter 2006 reducing of the output was 45 241 thousands kwh).

Also in the year 2006 a reconstruction of this TETs is expected that will let to the block-station to produce electric power not only in winter, but in summer also together with increasing of production volume by 20%. This fact also affects negatively to the sales volume of electric power belonging to the JSC "Kuzbassenergo".

3. Reducing of heat energy output by the JSC "Kuzbassenergo" is related with the launch of own boliler plants (water-heat boilers) at the chemical enterprises , i.e. KOAO "AZOT" Ltd. , besides the "PO TOKEM", Ltd. PO "Khimprom" are going to launch the own boiler houses in the September of the year 2006.

At the KOAO "AZOT" 3 steam boilers BEM-25/3, 9 with nominal steam capacity 25 t/h (18,75 Gcal) each were launched in august 2005, that will reduced heat consumption from the resources of JSC "Kuzbassenergo" by 400 thousand Gcal a year according to the schedule.

Reducing of heat power consumption by the KOAO "AZOT" in the 1 quarter 2006 compared the same period 0f the year 2005 was 14 % (83 492 thousand Gcal). JSC "Kuzbassenergo" has not possibility to affect this situation.

KOAO "AZOT' also had prepared a technical and economic grounds on the own boiler house construction (7 boilers with stem capacity 75 steam-ton an hour each), that will give to the consumer an opportunity to refuse hot water and steam consumption at the JSC 'Kuzbassenergo" at all (annual decreasing of consumption's volume will be 1 848 Gcal).

To prevent such a situation, a mutual agreement was signed between the JSC "Kuzbassenergo", KOAO "AZOT' and the Kemerovo regional Administration on the establishment of the supplied heat power tariffs for the KOAO "AZOT" not accounting the amount of cross financing.

4. Insufficiency of limits and delay in financing of charges on payment of heat and electric energy for budget consumers.

To prevent such a course of events JSC "Kuzbassenergo" subscribes every month Agreements on payment s for consummated energy with Kemerovo regional Administration, General Financial Department of region, Heads

of the cities and districts, included the volumes of the future charging to the budget depending consumers, and also the sums planned to be transferred for the consumed electric power to the JSC "Kuzbassenergo" by the budget of all levels.

With a view to monitor the aforementioned agreements fulfillment the meetings are spent in the Kemerovo regional Administration with an obligatory presence of the Heads of the cities and districts, managers of the territorial financial authorities, managers of the housing and communal services institutions and the city electric main lines.

3.2.7. Joint activities of the Issuer

The issuer does not perform any joint activities with other organizations

3.2.8. Supplementary claims to the issuers being the joint stock investment funds, insurance or credit institutions, hypothecary agents

JSC 'Kuzbassenergo" is not a joint stock investment fund, insurance or credit institution, hypothecary agent.

3.2.9. Supplementary claims to the issuers whose major activity is a mining operations

JSC "Kuzbassenergo" does not spend a mining operations.

3.2.10. Supplementary claims to the issuers whose major activity is rendering of telecommunication services

JSC "Kuzbassenergo" does not render of telecommunication services.

3.3. Future plans of the issuer

The major purpose of the JSC "Kuzbassenergo" fin the year 2006 will by reliable and regular electric and heat energy supply to the consumers, providing profit earning, increasing of the company's capitalization and increasing of its investment appeal during the reforming process of energy industry in Russian Federation.

Purposes of the company for the year 2006 will be the following:

1. *reliable and regular electric and heat energy supply to the consumers of the region especially in autumn and winter periods with proper maximum load;*
2. *fulfillment* of *the program of repair of the equipment of power stations, electric and heat networks;,*

3. fulfillment of the task of JSC RAO "UES of Russia" on creation of fuel reserve in the warehouses by 01.01.2007;

4. Fulfillment of the investment program of the Company.

5. Fulfillment of a Program on realization of an ecological policy of the Company for the years 2006-2008 (organizational actions; atmospheric air protection; actions aimed to achievement technical standards of emissions; protection and rational using of water resources; protection and rational using of lands; participation in the program of the Holding company RAO "UES of Russia" on ecological politics layout.

6. Fulfillment of the expenses reduction program including by way of future development of the competitive system on purchase of goods, works and services;

7. Fulfillment of the Amicable agreement's terms with the Company's creditors as a guarantee of successful reforming;

8. determination of economic based tariffs for the Company;;

9. Increasing of financial stability of the Company, decreasing of a distance between the accounts receivable and account payable.

In accordance with the program of technical development of the company for the years 2001-2011 aimed to ensure the reliable work of the plants and timely change of the used technological equipment in 2006 the Company needs:

- *not to stop in searching of contracting organizations and suppliers for construction, reconstruction and technical reequipment of objects on a competitive basis;*
- *to define their priorities in forming of investment program for 2-3 years for incompleted construction objects and adoption of cardinal decisions;*
- *to tie investment program of the Company with the sources of financing, also timely putting into operation of the objects;*

- to continuer the ash-damp dams extending and to start construction of new ash-damp dams where the reserves for slash warehousing are limited for the possible filling.

For the next 3-5 years it is necessary to fulfill the following works affecting the total power system security :

- Reconstruction and putting into operation of a turboset of st. №8 at Novokemerovskaya TETs of a type PTR-80-130(RUR 500 millions);

- Putting into operation of a turboset of st. №3 of a type R-12-29 at the Kuznetskaya TETs in 2006 to cover a deficit in extracted steam for makeup water heating and increasing of electric power output due to thermal input;

- Putting into operation of a turboset of st. №15 of a type T-115-130 at the Novo-Kemerovskaya TETs capacity 115 Mwt with investments volume equal to RUR 900 millions (including ASU TP) in 2008;

- To proceed with designing and approval of a starting complex of stem boiler of st. №5 at the Kuzbass TETS capacity 160t/h with launching in 2007;

- To replace the turbine of st. №9 of a type r-35-130 by the turbine of a type T-120-12,8 at the Kemerovo GRES in a value of RUR 600 millions;

-To reconstruct a turboset of st. №11 and 12 on a type R-12-90/31 at the Kuznetskaya TETs in a value of RUR 200 millions;

-To reconstruct electrical filters of boilers of type TP-87 to gain standard dustiness of smoke fumes and to fulfill norms of maximum ashes emissions; to reconstruct electrical filters together with leading of ash collection to 99% at the West-Siberian TETs etc.

3.4. The Issuer's participation in industrial, bank and financial groups, holdings, trusts and associations

The Issuer does not participate in the industrial, bank and financial groups, holdings, trusts and associations.

JSC "Kuzbassenergo" is a subsidiary of Holding company RAO "UES of Russia" according to the art. 2.3. of the Articles of Association.

The Issuer is a member of the Russian sectoral union of employers of Electroenergetics (The Union RaEl).

3.5. Subsidiaries and affiliated business divisions of the issuer

JSC "Kuzbassenergo" has 11 subsidiaries.

These companies are regarded as subsidiaries according to the Civil code of Russian federation (art. 105 and 106) and Federal law "On Joint Stock Companies" (art.6).

Full company name: Limited liability company, OOO "Bill centre "Kuzbassenergo"
Location: 30, Kuznetsky prospect, Kemerovo, Kemerovo region, Russia
Issuer's share in the chartered capital of business venture: 100%
Share of business venture in the issuer's chartered capital: 0%
Core business: import and export of production and technical goods and consumer goods, know-how and services; intermediate and trade activities.

Officers of the business company:

Own circulating assets, RUR	F. №1 L. 490 + F №1 L. 640 + F.№1 L. 650 - F. №1 L. 450 - F. №1 L. 190 - F. №1 L. 230	- 2809054000	-980761000
index of the fixed asset	(F. №1 L. 190 + F. №1 L. 230) / (F. №1 L. 490 + F. №1 L. 640 + F. №1 L. 650 - F. №1 L. 450)	1,10	1,03
Ratio of the current liquidity	(F. №1 L. 290 - F. №1 L. 230) / (F. №1 L. 690 - F. №1 L. 640 - F. №1 L. 650)	1,22	1,24
Ratio of the quick liquidity	(F. №1 L. 290 - F. №1 L. 210 - F. №1 L. 220 - F. №1 L. 230) / (F. №1 L. 690 - F. №1 L. 640 - F. №1 L. 650)	0,87	0,89
Ratio of the owned assets autonomy	(F. №1 L. 490 + F. №1 L. 640 +F. №1 L. 650 - F. №1 L. 450) / F. №1 L. 300	0,79	0,85

At the outcome of the 1st quarter of the year 2006 the following changes in the ratio of liquidity took place:

- ***ratio of the current liquidity characterizing the paying capacity of the Company under the complete mobilization of the circulating assets (sale of all reserves, total settle up with the debtors having a debt with a pay off term less than 1 year) amounted 1,24 by the 31.03.2006, i.e. having mobilized all circulating assets the Company will be able to pay off 100% of his short-term liabilities and 24% of the long-term;***
- ***ratio of the quick (term) liquidity characterizes a paying capacity of the Company on timely payments of the debtors. Analysis of the quick liquidity ratio shows that as for a date of the 31.03.2006 the Company may pay off once 89% of his short-term liabilities provided the 100% liquidity of the short-term accounts receivable (term for paying off less than one year). It is the highest level of the quick liquidity for the previous reporting periods;***
- ***ratio of the own assets autonomy defines the property share formed due to own sources (chartered, additional capital; not distributed profit etc.). A defining of a figure more than 50% the risk of creditors reduces to the minimum. At the 31.03.2006 this figure meaning was 85%.***

As for a date of the 31.03.2006 a deficit of the own sources of the circulating asset's forming amounted RUR 980 761 thousands.

The management bodies of the Issuer regarding the aforementioned information agree in their opinion.

4.3. Amount and structure of the issuer's capital and circulating assets

4.3.1. Amount and structure of the issuer's capital and circulating assets

a) accordance with the Articles of Association the chartered capital amounts RUR 606 163 800 (six hundred six millions one hundred sixty three thousands and eight hundred roubles);

b) Information on forming and using of the reserve fund is shown in the paragraph 8.1.3. of this present report.

Table 24.

Figure's name	2001	2002	2003	2004	2005	1 st quarter of the year 2006
a) Amount of the chartered capital, RUR	606 163 800	606 163 800	606 163 800	606 163 800	606 163 800	606 163 800
b) Total cost of the issuer's stock bought out by the issuer for the further resale	did not redeem	did not redeem	did not redeem	did not redeem	did not redeem	did not redeem

c) Amount of the capital reserves of the issuer, RUR	13 841 000	16 818 000	16 818 000	16 858 000	16 858 000	16 858 000
d) Amount of the additional capital, RUR	14849065000	19781299000	23605222000	22236879000	24844246000	25250371000
e) Amount of the unappropriated balance net proceeds, RUR	911 561 000	906 288 000	562 711 000	1655 553 000	1470401000	2386574000
f) amount of the Issue's target investment assets, RUR	0	0	0	0	0	0
g) total amount of the Issuer's capital, RUR	16600640000	20778963000	24791705000	24124874000	26937669000	28259967000

Amount of the additional capital during the period under examination (2001-2005) increased from 14 849 065 thousands roubles to 24 844 246 thousands roubles, or by 67,31%. During the year 2005 the additional capital increased by 2 676 703 thousands due to increasing of a property cost after revaluation, and reduced by 69 336 thousands roubles due to write-off the sum of evaluation of the fixed assets under retirement.

By the 31.03.2006 the sum of the additional capital amounted RUR 25 250 371 thousands. Additional capital may be spent by the Company to the following purposes:

-write-off the cost decreasing of the fixed assets due to their revaluation

-increase of the chartered capital

-writ-off the loss revealed at the outcome of the reporting period

- distribution between the Company's members.

Unappropriated balance of the last years consists of :

- ***accumulation fund (proceeds aimed to the capital investments financing; прибыль***
- ***funds of the additional valuation wrote-off from the additional capital under the fixed asset's object retirement;***
- ***fund of a social sphere (objects of the fixed assets of the municipal property subject to transfer);***
- ***profit earlier aimed to replenish the own circulating assets .***

During the period since the year 2001 till the year 2005 the own capital of the Company increased by 10 337 029 thousands roubles or by 62,3% (from 16 600 640 thousands roubles to 26 937 669 thousands roubles).

Thus an increasing of the own capital shows an effective work of the Company, also increasing of the financial independency.

The Structure of the owned capital was not changed in the 1st quarter of the year 2006: chartered capital, additional capital, capital reserves. The major share of the own assets falls at the additional capital(89,35%). The chartered capital is equal to 2,14%, capital reserves – 0,06% and Unappropriated balance of the previous years – 5,20%.

The structure and rate of circulating assets (thous.of rub.)

Table 25.

CIRCULATING CAPITAL	Line code	for 01.01.2006	for 31.03.2006

Cash resources	260	476 439	491 585
Other circulating capital	270	1 437	781
Total:	290	4 666 566	4 516 832

The own funds of the Company are the source of the circulating assets financing. The Company owned capital is enough for basic company recourse demand and current commitment covering. The demand provides production steadiness and sales of products.

The Company politics concerning circulating capital consists in the supply with acceptable structure and rate of the circulating assets of the Company to enhance assets liquidity. To cut down accounts receivable the work with buyers and customers is kept, bills payable and the overdue accounts receivable collection are handled.

The factors resulting in the changing of the circulating assets financing politics; assessment of chances of their forthcoming:.

The following factors may influence the changing of the circulating assets financing politics:

1. ***The conventional, payment and account discipline violation by customers will lead to the Society earning decrease and debts increase to creditors. In this case the issuer has to repay the bill payable due to charged borrowing costs attraction, substituting credit debts to suppliers and contractors for loan debts to banks and credit companies. According to the issuer's opinion the possibility of this factor is average.***
2. ***The producing costs increasing leads to efficiency and the Company benefit volume reduce. According to the issuer's opinion the possibility of this factor is not high.***

4.3.2. The issuer's investments

The investments in accordance with PBU 4/99 "Company book-keeping" are considered to be:

- ***Investments in associated companies;***
- ***Investments in limited companies;***
- ***Investments in the other companies;***
- ***Borrowing for more than 12 months;***
- ***Borrowing for not more than 12 months;***
- ***Owned shares, bought back from shareholders;***
- ***Other investments.***

The Company takes the balanced account investments into consideration .in accordance with PBU № 19/02 "Investment accounting", approved by the Ministry of Finance ban 10.12.2002 № 126.

The long-term Company investments (Balance sheet article 140) came to 448027 rubles by 31.12.2005 (not regarding the backlog for depreciation of JSC "Kuzbasshydroenergostroy" associated company investment at the rate of 118.619 rubles).

The long-term investments:

1. *Investments in associated companies – 446.456 rubles;*
2. *Investments in the other companies – 55.000 rubles:*

- *50.000 rubles – LLC "TEK Magazine and Kuzbass resources" (6,67%);*
- *4.000 rubles – LLP "South-West" (7,7 %);*
- *1.000 – CJSK "Bagran" (7,14 %).*

3. *Other investments – JSC "Novokuznetsk Aluminium factory" note of hand – 1.516 million rubles (drawn-on date "at sight, but not earlier than 06.03.2021"), got 07.02.2003 for electric power repayment.*

During 2005 long –term investments were cut down to 38 070 rubles.

It depends on:

1. *investment write-off of the liquidated companies:*

- *JSC "Andreevskoe"(Society ban № 553A from 19.09.2005)- 36 437 rubles;*
- *JSC IK "Primula" (Society ban № 194 from 31.03.2005) – 10 000 rubles;*
- *Ltd. "Supervolokno" (Society ban №193 from 31.03.2005) – 240 000 rubles;*

2. *underpayment of postage fee into assessed contribution:*

- *JSC "EAC Kuzbasstechenergo" (notification № IAC-252/434 from 04.04.2005, verification interpayment act of common registered stock floating) – 688 000 rubles;*
- *OJSC "Kuzbassetremont"(notification № 40 from 04.04.2005, verification interpayment act of common registered stock floating) – 23 000 rubles;*
- *OJSC "Kuzbass energy reparing company" (notification № 85-119/54 from 13.04.2005, verification interpayment act of common registered stock floating) – 50 000 rubles;*
- *CJSC MU "HC Energetik"(notification ....of the state report registration of capital issues totals № 05-VG-03/11760 from 21.07.2005) – 30 000 rubles;*
- *CJSC "Bagran" "(notification № 59 from 28.09.2005) – 3 000 rubles;*

3. *sale of shares:*

- *OJSC AKB "Kuzbassugolbank" (shares sale contract № 274 from 06.02.2004; list extract for OJSC AKB "Kuzbassugolbank" issuer according to the owner's account CB № 1376721 LLC "Bill centre Kuzbassenergo" by 09.06.2005) – 589 000 rubles.*

All investments are estimated according to balanced cost.

The intangible assets accounting is carried out according to PBU 14/2000 "The intangible assets accounting " approved by the Ministry of Finance ban № 91 16.10.2000.

4.4. Information about the issuer's policy and expenditures in the sphere of scientific and technological progress, in respect of licenses and patents, new research and development

Account of NIOKR (Research, developmental and technological works) in the Company is carried out according to the Accounting Regulations "Account of charges on research, developmental and technological works " (PBU 17/02).

NIOKR expenses are shown in the accounting at the ass. 08 "Investments in the non-circulating assets " (p. 5 PBU 17/02).

Charges on research and development, which results are subject to the legal protection and are made out in the order established by the legislation in force (i.e. patents, certificates, other documents certifying the exclusive right of the Company on research and development's results) are received, were accounted as intangible assets (p. 4 PBU 14/2000).

Charges on research and development, which results were not made out in the provided order should be charge-off from the credit of the acc. 08 "Investments in the non- circulating assets" to the charges on ordinary activity by a linear way during the approved period (p. 11 PBU 17/02).

Research and development charge-off period is within 3 years.

Charges on research and development not given a positive result also research and development results which application was cancelled shall to be formed by the RD department of the subsidiary.

Report shall to be examined by the service of RD department of the executive body and with the technical director's authorization.

Production costs are subject to charge-off once only in composition of the extraordinary expenses of the reporting period.

Charges on research and development shall to be at the expense of the own assets.

Charges on research and development in the year 2005 see in the Appendix to the Accounting report , 2005 form №5 (Appendix 1), the charges on research and development as for a date of the 31.03.2006 amounted 10 483 thousands roubles.

4.5. Overview of the new trends in the sector of the issuer's core business

Electroenergetics is one of the leading industries of Russian economic.

Russian energy is at the fourth place in the world over the installed capacities and production volumes.
All existing in the Russian electroenergetics somehow or other relates practically all industries of national economy. Together the energy power is one of the most "problem" industries.
Structural reorganization of power branch through liberalization and decontrol of potentially competitive sectors were the main tendencies for the last ten years of world power industry development.
Due to these principles, the Concept of Strategy of reforming of the Joint Stock Company "RAO UES of Russia " "5+5" was developed and created. Nowadays this Concept is realized successfully by the management body "RAO UES of Russia " also by management of regional power companies.
On July, 11, 2001 the Decision № 526 « On reforming of power industry of Russian Federation » was approved by the Government. It directs to:

1. Divide business into monopolistic and competitive components. Generation and supply should be allocated as competitive business. Thus the Federal networks (FSK), Distributive network companies (DNC), and dispatching activity (System operator) will be under supervision of the State.

2. Create a competitive energy market implied a transition of existing sales process at the directive price (FOREM - Federal Wholesale Electric Power Market) to the market pricing mechanism (creation of AMT Administrator of market trade).

Decree of the Government of RF №1040-p approved the Schedule of activities for the primary stage of reforming was adopted as development of this present Decision.
In August, 2001 the Committee on reforming has been established at Board of directors of RAO " UES of Russia ". Its composition included representatives of minority shareholders, potential investors, the State and RAO " UES of Russia ". On December, 21 the Government of Russian Federation has approved the Decision № 881 " On the criteria of transfer of the main transmission lines and objects of the power network economy to the Unique (all-Russian) power network ".

Principal facts of the year 2002 in the sphere of reforming were the following:
- adoption by the State Duma of RF in its first regarding a pack of the bills devoted to energy power reforming;
- spending of auctions of electric power in the imitation mode by the NP "ATS" together with JSC "SO-TsDU UES";
- creation of infrastructural institutions in the branch, i.e. the Federal Network Company and the Sysop;
- preparation of a strategy for reforming of RAO "UES of Russia";
- termination of a preparatory stage of reforming of RAO "UES of Russia";
- development and adoption of the basic variant of reforming of JS-energo;
- preparation to implementation of the pilot projects of reforming of JS-energo;
- spending of the first stages of reforming of the scientific and designing complex of RAO "UES of Russia", also of energyreparing and service activities.
By the Resolution of the Government of Russian federation №226 dd. 2 of April 2002 "On the pricing regarding to electric and heat power" the new "Pricing principles" and "Regulations of the State regulation and application of the tariffs on electric and heat power in Russian Federation" were implemented. The Corporate Policy Code was approved by RAO "UES of Russia".

In September 2002 the non commercial partnership "Administrator of trade system"(NP "ATS" began auctions of electric power in imitation mode. One of the positive tendencies of the year 2002 was approaching of the tariffs to the economic valid, otherwise the level of the cross financing between the groups of consumers reduced.
The Board of Directors of RAO "UES of Russia" approved the base variant for reforming of regional energy systems, i.e. the RAO "UES of Russia" subsidiaries, also the exit of enterprises belonging to the Holding Company RAO "UES of Russia" from the non profile assets aimed to the expenses minimization relate to the ownership. The Board of Directors of RAO "UES of Russia" has approved the decision on termination of participation of RAO "UES pf Russia" in ZAO "TsDR FOREM" by way of selling of 75% holding of stock belonging to ZAO "TsDR FOREM" to the Non commercial partnership "ATS".

On the night of April, 1, 2003 the function of operative - dispatching administration of the Unified Energy System of Russia were transferred from regional dispatching administrations (RDA) of JS –energo to the regional dispatching administrations (RDA) , i.e. to the subsidiaries of JSC " System operator – Central Dispatching Administration of Unified Energy System (CDA UES").

In April 2003 the pack of legislative acts on electric power reforming came into the force including such federal laws as:

- "On electric power" ;

- "On the features of electric power functioning during the transition period and on the modifications in some legal acts of Russian Federation, and on recognition as invalid some legal acts of Russian Federation due to adoption of Federal Law "On electric power";

- "On modifications and amendments to the Federal Law "On the Sate regulation of tariffs on electric and heat power in Russian Federation";

- "On modifications and amendments to the Federal Law "On the Natural monopoly";

- «On modifications and amendments to the second part of the Civil Code of Russian Federation";

- "On modifications of the Federal Law "On energy power saving".

Working group on modification of the Strategy of JSC RAO" UES of Russia " for the years 2003 - 2008 "5+5" created at Board of Directors of RAO " UES of Russia " has examined the Program of the Concept of the Strategy of RAO " UES of Russia " for the years 2003 - 2008" 5+5 taking into account the remarks and offers.

In the I half-year 2003 the process on enhancement and development of the mechanisms for competitive trade within the regulated wholesale market of electric power (capacity) proceeds. According to the existing normative legal documents monthly auctions of the above-planned electric power were spent, the volume of electric power subjects to selling at the auctions amounted 3,1% of the volume of supply to the home market.

Together with JSC"SO-CDU UES of Russia" (System operator – Central Dispatching Administration of Unified Energy System) in the I six months 2003 the trade of electric power over the scheme "Energopul" proceeds, the share of sale for the reporting period increased twice and amounted 1,3% of the total volume of the supply to the FOREM (home market).

The 31st of October 2003 the Board of Directors of RAO "UES of Russia" at the ordinary meeting heard information on the possibility of creation of the territorial generating companies (TGC) by way of co-incorporation by several JS-energo.

Variant of creation of TGC by way of co-incorporation is implicate its creation as a large operational company at the first stage of JS-Energo reforming. TGC shall be co-incorporated by several JS-energo by way of entering of their generating assets to the chartered capital of the newly created company. Thus it's a possibility at the early stage to create a large operational company whose shareholders will be incorporated it JS-energo .

According to the Resolution of the Government of RF №643 dd. 24.10.this present year "On the rules of the electric power (capacity) market during the transition period", since November, 1, 2003 at the same time with the regulated sector of the wholesale electric power market (existing Federal wholesale electric power (capacity) market) the competitive sector supposing the trade in hourly volumes of the electric power on free prices is started.

Thus in the free sector each manufacturer may offer up to 15 % from the fixed capacity, and each consumer can declare purchase up to 30 % from own scheduled consumption. Economic benefit of the free sector of the wholesale electric power market launching is obvious. Densities of electric power supply by heat power plants with rather low industrial expenses has increased, while the supply by "expensive" generating capacities, on the contrary reduced.

In March 2004 allocation of repairing activity was finished according to the Program on energyreparing activity of JSC "Kuzbassenergo" approved by the Design Group on reforming of energyreparing activities and creation of technological services market of JSC RAO "UES of Russia" dd. 01.07.2003.

Subsidiary named "Maghistralnye electric networks" (Main-line electric networks) was created within the activity on reforming of electric network complex on the ground of the property complex on trunk transmission lines related to the Unique national electric network.

In February 2005 the Board of Directors of RAO "UES of Russia" approved a decision on modification of the scheme of allocation of the main-line transmission lines of JS –energo. New order of electric network complex reforming provided:

1) transfer in the main-line network companies (MNC) over the divided balance of the objects of UNUS and monetary to the expenses compensation;

2) payment of stocks belonging to JSC RAO "UES of Russia" to MNC allocated under the reorganization of JS-energo in the chartered capital of JSC"FNC UES";

3) joining of MNC as its segregation from the composition of JS-energo to one MMNC "Centre", which also the others MMNC simultaneously join.

Within the electric power reforming on the territory of Siberia the competitive sector of wholesale market was created which is till now extending to the European part of Russia and Ural.

Wholesale market of electric power in Russia is divided in two sectors, i.e. regulable (the Sate fixes the tariffs) and competitive, whose participants may sell at the free price to 15% of the outputted energy.

The 1st May 2005 the competitive sector of wholesale market of electric power was launched in Siberia.

The Kuzbass energy system feature is in the fact that the JSC "Kuzbassenergo" both sell and buy electric power.

14 affiliated companies of RAO " UES of Russia " took part in the first tenders in competitive sector of the wholesale market of the electric power on the territory of Siberia. The operator of competitive sector of the wholesale market of the electric power in Siberia is the Noncommercial partnership « Administrator of trade system ».

In the 12ths of July 2005 the Board of Directors of the JSC "Kuzbassenergo" approved the substantial reforming condition contains the action's schedule on the JSC 'Kuzbassenergo" reforming, a target state of reforming and a scheme of interterritorial consolidation.

By the Order №476 dd. July, 29, 2005 the Plan-schedule of reforming was approved, defining the trends of energy system activity at reforming to the 2st half year 2005 and to the year 2006.

Evaluation of a market price of a stock of the JSC "Kuzbassenergo" as for a date of 30.06.2005 was made by the independent valuator. Price per one stock fro redemption purposes was established equal RUR 17,57.

By the resolution of the Board of Directors of JSC RAO "UES of Russia" dd. 23.12.2005 the program on reforming of JSC "Kuzbassenergo" adopted 24.06.2004 was cancelled and the new program was approved provided segregation of JSC "Western-Siberian TETs" and JSC "South-Kuzbass GRES" with proportionally stock allocation between the shareholders except 50%=1 stock subject to purchase by the JSC "Kuzbassenergo". Termination of participation in these two companies will be carried out by way of share holdings selling as united lots at the open auctions furthermore every shareholder will receive right to sell his stocks in composition of the united lots at the date of shareholders register closing.

Purchasing by JSC "Kuzbassenergo" of generating and heat network assets of JSC "Altayenergo" is provided in future.

The extraordinary general meeting of shareholders of JSC "Kuzbassenergo" took place the 30.12.2005.

Decision on reorganization of JSC "Kuzbassenergo" by way of segregation of the following objects saving the structure of the chartered capital was accepted over the voting results:

- *JSC «Kuzbassenergo – regional electric network company";*
- *JSC «Kuzbass energy supply company";*
- *JSC "Main-line electric networks "Kuzbassenergo";*
- *JSC 'Western-Siberian TETs";*
- *JSC "South-Kuzbass GRES".*

Socks of the newly creating by JSC "Kuzbassenergo" companies - (JSC «Kuzbassenergo – regional electric network company", JSC «Kuzbass energy supply company", JSC "Main-line electric networks "Kuzbassenergo", JSC 'Western-Siberian TETs", JSC "South-Kuzbass GRES") shall be distributed between the shareholders of JSC 'Kuzbassenergo' including the shareholders who had voted against or who had not took participation in voting over the agenda on reorganization of the Company proportionally to

the number of the stocks owned by them belonging to the JSC "Kuzbassenergo".

JSC "Kuzbassenergo" gets 50%+1 stock in the chartered capital of the JSC "South-Kuzbass GRES" and JSC "West-Siberian" TETs.

To the shareholders who voted against or who did not vote, it is offered to acquire the shares in the JSC "Western-Siberian TETS" and JSC "South –Kuzbass GRES" proportional to their present share in chartered capital of JSC "Kuzbassenergo".

The shareholders voting " for" the segregation of new companies, should acquire the shares proportional to their share in the chartered capital of JSC 'Kuzbassenergo" but from "rest" of chartered capitals of JSC « Western - Siberian TETs » and JSC« South - Kuzbass GRES » minus shares of JSC "Kuzbassenergo" and the shareholders voted against or not voted.

The stock of the newly creating companies not distributed among the shareholders of the Company shall be deemed as acquired by JSC "Kuzbassenergo".

The Board of directors approved a dividing balance at 30.06.2005. Preparation of the intermediate dividing balance at the 31.12.2005 started.

The Board of Directors plan to examine the intermediate dividing and a forecasted entrance balances till the 28 of June 2006.

A project on dividing of the output power rates and a volume of the need gross receipt were prepared and submitted to the coordination to the task group in March and April of the current year , also the obligatory documents were submitted to the Not profit partnership "Trade system administrator" and Regional power committee.

The 20^{h} of March, 2006 the Board of Directors examine the offers of the shareholders of the newly creating companies due to the JSC "Kuzbassenergo" reorganization on the inscribing of the proposed nominees in the list of persons to vote in the elections in the management and supervision bodies of the each of the newly creating companies.

The drafts of the Charters of the segregated companies were worked out in the JSC "Kuzbassenergo" and were sent to the members of the Board of Directors. According to the reforming schedule the meetings of shareholders of the all five segregated companies are scheduled to spend in the 18th of May, 2006 where it is planning to make the final decision on appointment of the general directors of the companies, also forming of the Boards of Directors and Revision committees.

The newly creating companies shall to do the State registration of legal entity till the 1st of July of the year 2006.

V. Detailed information about members of the issuer's administrative bodies, its units of control over its financial and economic activities; brief information about the issuer's personnel (employees)

5.1. Information about the structure and competence of the issuer's regulatory bodies

The Company's regulatory bodies are represented by: **(according to the art. 9 of the Articles of Association)**

- General Meeting of the Company's shareholders
- Board of Directors
- Management Board
- General Director of the Company.

The Company is determined by the Charter of the Company and by the internal documents , i.e.:

- ***Provision on the order of preparation and conducting of General meeting of Shareholders of JSC "Kuzbassenergo" approved by the Annual General meeting of shareholders of JSC 'Kuzbassenergo" dd. 02.06.2003.,***
- ***Provision on convocation and conducting of meetings spend by the Board of Directors of JSC 'Kuzbassenergo" approved by the Annual General meeting of shareholders of JSC 'Kuzbassenergo" dd. 21.06.2002, with amendments and modifications approved by the Annual General meeting of shareholders of JSC 'Kuzbassenergo" dd. 27.06.2005.***
- ***Provision on the Management Board of JSC "Kuzbassenergo" approved by the Annual General meeting of shareholders of JSC 'Kuzbassenergo" dd. 21.06.2002.***

Competence of the General meeting of shareholders, of the General Director and of the Management Board is determined by the Charter of the Company approved by the Annual general meeting of shareholders dd. 21.06.2002 including the following modifications and amendments to the Charter of the Company:

During 2005 the Company' s accounts receivable decreased by 1554 110 thousand roubles

The long-term accounts receivable reduced due to the transfer to the short-term category as a result of the approach of the date of payment of the following arrears:

- arrears of the bills of credit of the closed JSC "SEAR MF" to the amount of 672,938 thousand roubles;

- arrears of the energy consumers to the amount of 296,425 thousand roubles.

In the 2nd quarter of the year 2002 as a result of amicable agreement concluded with the JSC "ZSMK")West-Siberian Metallurgical plant) and debt transfer contract the Closed joint stock company paid off the debts on the consummated power by their own passive bills of credit (without discount) amounted RUR 672 938 thousands. The company is going to submit the aforementioned bills of credit in accordance with their pay off terms "at sight, but not earlier than the 31.07.2006".

Short-term accounts receivable reduced from RUR 2 456 687 thousands on 1 January 2005 to RUR 1 870 240 thousands on 31 December 2005 (by RUR 586 447 thousands или 23,9 %). The main decrease is due to:

- *payments of the energy consumers - by RUR 481 666 thousands or by 42,1 %;*
- *other accounts receivable – by RUR 801 529 thousands or by 74,5 %, including associated and dependent companies debt by RUR 540 157 thousands or by 88,9 %.*

AS a result, by the end of the financial year the debt of the energy consumers amounted to RUR 806 452 thousands, which is by RUR 778 091 thousands (or 49,1%)less than at the beginning of the year, including the main brunches of industry:

Fuel industry	*by 83,8 % (or by RUR 279 543 thousands);*
Non-ferrous metallurgy	*by 15,8 % (or by RUR 1 499 thousands);*
Chemical and oil industry	*by 26,8 % (or by RUR 119 342 thousands);*
Mechanical engineering	*by 1,8 % (or by RUR 3 824 thousands);*
Woodworking industry	*by 89,2% (or by RUR 3 745 thousands);*
Construction materials industry	*by 64,2% (or by RUR 25 496 thousands);*
Food industry	*by 54.4% (or by RUR 2 637 thousands).*

There was also decrease of accounts receivable in other fields:

Agriculture	*by 31,2% (or by RUR 27 239 thousands);*
Housing and communal services	*by 62,1% (or by RUR 21 876 thousands).*

There was established a control over the power consumption by the consumers financed from the federal, regional and municipal budgets. The debt decrease of these enterprises during 2005 amounted to: RUR 9 228 thousands (by 77,0%), RUR 2 249 thousands (by 76,5%), RUR 13 275 thousands (by 71,8 %), accordingly. The energy is supplied in accordance with the volumes of limits, secured by the budget financing.

Other accounts receivable (without the energy arrears) reduced from RUR 2 141 601 thousands on 1 January 2005 to RUR 1 365 582 thousands on 31 December .2005.

The main decrease is connected with the clause "Other debtors" – by RUR 821 936 thousands or by 66,9 % (by RUR 547 967 thousands or by 80,0 % of the sum according to the clause "Accounts payment to affiliated undertakings" due to taking out of pledge of the Company's own assets .....Series DN, handed to loan institutions with the help of LLC "Bill centre Kuzbassenergo" associated company.

Significant to mention the increase of accounts receivable connected with the fallowing clauses:

- "Work and services" – by RUR 19 631 thousands or by 91,5 %;

- "TMTS" - by RUR 14 673 thousands or by 35,5 %;

- "Paid out advances" – by RUR 11 613 thousands or by 6,6 %.

On 31 December 2005 there was created a reserve for doubtful accounts of power consumers to the amount of RUR 324 676 thousands.

In 2005 there was written off and referred to the Company's financial result the accounts receivable, which were unreal to incur a penalty, to the amount of RUR 95 185 thousands, RUR 28 847 thousands of the sum being the energy consumers' debt.

The overdue accounts receivable of the consumers, as well as other debtors, have decreased by RUR 1 038 483 thousands or by 87,3 %.

During the first quarter the Company accounts receivable increased by RUR 672 195 thousand or by 31%, moreover:

- long-term accounts receivable reduced by RUR 13 296 thousands,

- short-term accounts receivable increased by RUR 685 491 thousands (36,7%).

The increasing of short-term accounts receivable is mainly determined by buyers and customers' increase in liability by RUR 360 214 thousands, and by paid out advance money by RUR 408 605 thousands (under the treaty with FSK UES - RUR 211 136 thousands).

VII. The Issuer's accounting reports and other financial information

7.1. The issuer's annual accounting reports

Annual accounting report for the year 2005 contains:

- *balance sheet (Form № 1);*
- *profit and losses report (Form № 2);*
- *report on capital change (Form № 3);*
- *cash flow report (Form № 4);*
- *Appendix to the balance sheet (Form № 5);*
- *Auditor's report.*

Annual accounting report for the year 2005 was included in this report as Appendix №1.

Annual accounting report for the year 2005 made in accordance with the International standards of financial report, will be reflected in the quarterly report of the issuer fir the 2nd quarter 2006.

7.2. The issuer's quarterly accounting reports for the last completed fiscal quarter

Quarterly accountability for the 1st quarter of 2006is re presented by the:

- *balance sheet (form #1);*
- *profit-and-loss report (form #2);*

Quarterly accountability for the 1st quarter of 2006 is included in the report as appendix 2.

7.3. Consolidated accountability of the issuer for one complete fiscal year

Consolidated accountability of the issuer for the year of 2005 is not included in the quarterly report for the 1st quarter.

Consolidated financial accountability for 9 months of 2005, drawn up in accordance with International Financial Accountability Standards, is included in the report as appendix 3.

7.4. Information about the account policy of the issuer

The account policy of the Company on the year of 2005.

2.1. The basis of the drawing up

Account keeping and drawing up of the accountability of the Company is carried out in accordance with the norms set by the Federal Law from 21.11.1996 #129-FL "About accounting" (in the version of the changes and additions to follow), with the Card of accounts of accounting of financial-economical activity of the Company and the Instruction on its application, approved by the order of the Ministry of Finance of Russia from 31.10.2000 #94n, with the Regulations on accounting, with the Regulations on accounting "Accountability of the Company" (PBU 4/99), approved by the order of the Ministry of Finance of RF from 06.07.1999 #43n, with the order of the Ministry of Finance of RF from 22.06.2003 #67n "About the forms of accountability of the Company" and other statutory acts of RF, regulating the procedure of accounting and drawing up of the accountability, as well as the order of the Company from 30.12.2004 #766 "About account and fiscal policy of the JSC "Kuzbassenergo" on the year of 2005".

2.2. Asset and liabilities in foreign currencies

On accounting of the economic transactions in foreign currency, the official ruble rate on the day of the conducting of a transaction. Assets and liabilities, which cost is in foreign currency, are reflected in the accounting in sums calculated on the basis of the ruble rate on 31.12.2005 that made RUR 28,78 for USD 1 (on 31.12.2004 the rate was RUR 27,75 for USD 1).

The differences in rates of exchange arisen during the year as a result of the transactions with assets and liabilities, as well as during the recalculation on 31.12.2005, are referred to the financial result with its reflection in non-realization receipts and expenditures.

2.3. Short-term and long-term assets and liabilities

Financial investments, accounts receivable, account payable, including debts on credits and borrowing, are referred to the short-term ones in the balance sheet, if the time period of their circulation (offset) lasts no longer than 12 months since the reporting date. Any other assets and liabilities are presented in the accounting as long-term ones.

2.4. Fixed assets

Fixed assets include lands, buildings, machines, equipment, vehicle and other objects which time period of exploitation is more than 12 months.

The objects of real property capital investments of which is completed, basic accept-disposal documents are drawn up, the documents are transferred to be nationally registered and are almost in exploitation, are accounted as fixed assets.

The objects of fixed assets are accepted to accounting on actual expenses on procurement (construction).

On 01.01.2005 the Company revalued fixed assets having attracted an independent valuer and defined their total replacement cost.

Amounts of increase of the cost of objects and accumulated depreciation are referred to the increase of extra capital. The depreciation of fixed assets is accrued by the linear method:

- *The depreciation of the objects of fixed assets, taken on accounting before 01.01.2002, is accrued in accordance with the norms approved by the Regulation of the USSR Council of Ministers from 22.10.1990 № 1072;*
- *The depreciation of the objects of fixed assets, taken on accounting since 01.01.2002, is accrued in accordance with the Regulation of the Government of RF from 01.01.2002 № 1 "About the classification of fixed assets included in depreciation groups".*

The terms of exploitation concerning the main groups of fixed assets approved by the Company are given below:

Table 35.

A group of fixed assets	Terms of exploitation (years) of the objects, accepted on the balance sheet	
	before 01.01.2002	since 01.01.2002
Buildings	100	35
Machines and equipment	8-15	5-8
Vehicle	7-10	5-7
Computers	10	5
Other	3-10	2-5

The objects of fixed assets at the cost of up to RUR 10 000 per unit (bought editions, not belonging to the library as well) are charged off according to the item "Depreciation" as far as they are put into production or operation. In case of modernization (reconstruction) of these objects, the modernization (reconstruction) expenses are charged to the increase of the cost of the object and depreciated in accordance with the established procedure.

Depreciation of the following objects is not accrued:
- housing resources;
- objects of external accomplishment;
- lands;
- objects of nature management;

Receipts and expenditures form the retirement of fixed assets (sale, the write-off in case of obsolescence and depreciation) are reflected in the "Report on Receipts and Expenditures" as operational receipts and expenditures.
Interest on credits, attracted to finance the procurement (construction) of these objects, which were accrued before being accepted to the accounting of the objects of fixed assets, are included in their original cost.
Expenditures from the retirement of fixed assets in case of gratuitous assignment (an underdepreciated part) are reflected in the "Report on Receipts and Expenditures" as operational expenditures.

2.5. Financial investments

Financial investments are taken on accounting at actual expenses on procurement.
Financial investments which make it possible to define the current market cost in accordance with established procedure are reflected in accounting on the end of fiscal year at the current market cost by the adjustment of their valuation on the previous fiscal date. The mentioned adjustment is carried out quarterly. The difference between financial investments valuation at the current market cost on the fiscal date and the previous financial investments valuation is referred to the financial results (as operational receipts and expenditures).
Financial investments which do not set the current market cost are reflected in accounting on the fiscal date at the original cost.

If on the fiscal date the current market cost of the object of financial investments, earlier valuated at the current market cost, the current market cost is not set, such an object of financial investments is reflected in accounting at the cost of its last valuation.
On the retirement of financial investments which do not set the current market cost, their cost is defined reasoning from the original cost of each unit of the accounting of financial investments.
The Company creates the reserve for depreciation of financial investments. It is sufficient enough to compensate possible losses connected with the permanent decrease of the cost of financial investments.
The difference between the procurement cost and nominal value of securities is included in other receipts and expenditures evenly as far as the receipts from securities are being accrued during the term of their circulation.

2.6. Inventory

Inventory is valued at the actual expenses on procurement.
Valuation of inventory at putting it into production and other retirement was conducted in 2005, as well as in 2004, at the average cost price. The reserve for inventory was not created in 2005.

2.7. Borrowing and credits

On attracting borrowed funds by the Company by giving the bills of credit the sum of discount owed is referred one time to other expenditures. Additional costs made as a result of borrowing and credits are referred to the expenditures to come with subsequent uniform inclusion in operational expenditures during the time period of extinction of liabilities.

2.8. Expenditures of future periods

Expenditures made by the Company in the fiscal year but referring to the following fiscal periods as well, are reflected as the expenditures of future periods. Such expenditures include:

1. Rental payment, transferred in accordance with the contract for sequential periods;

2. The expenditures on subscription publications which were paid a year or six months ahead, are regarded as the expenditures of every fiscal month at the rate of 1/6, 1/12 of total sum;

3. The costs on the procurement of software according to the sale contracts;

4. The expenditures connected with the education fee according to the contracts with educational institutions for the training of the personnel;

5. Voluntary insurance payments;

6. The sums of future payment for vacation periods of the workers are included piece by piece in the cost price of each fiscal month of a calendar year.

2.9. The debt of buyers and customers

The debt of buyers and customers is defined on the assumption of prices and charges set by the contracts between the Company and buyers (customers) taking into account all the discounts (extra charges) and VAT.

The reserve on doubtful debts was established in 2005. The amount of the reserve was defined separately by each doubtful debt subject to financial condition of a debtor and the possibility of the total or partial discharge of a debt.

Reserve sums of doubtful debts untapped during the fiscal year, which were established in 2004, were added to the receipts of the fiscal year on account credit 91 "Other receipts and expenditures" in other operational receipts in correspondence with account 63 "Reserves on doubtful debts".

2.10. The reserves of forthcoming expenditures

For a current fiscal year the reserve for repair work is created at the rate established by the estimate of expenditure of the annual standard of repair cost, including it into production costs monthly at the rate of 1/12 of annual estimate. The reserve is created to include expenses for all types of repair work of fixed assets of production destination into production costs.

At year end the adjustment of the repair reserve is performed:

- extra reserved money for the repair of fixed assets (as a result of inventory) is reversed an entry.

- in case of stress of money in reserve for repair extra charge takes place under debit of accounts of the records of production costs and under account credit 96 "The reserves of forthcoming expenditures", control account "Reserve for repair of fixed assets (including leasehold assets) of production destination".

2.11. The acknowledgement of receipt

Gain from sales of production and rendering of services, considered for accounting purposes as far as the production is shipped by the buyers and payment documents are submitted, is reflected in the "Report on Receipts and Expenditures" excluding the value added tax, discounts given to the buyers and other similar compulsory payments.

Gain from sales of production and rendering of services was admitted for the purposes of accrual concept taxation.

The receipts of the Company from usual types of activity include:

- *Gain from sale of electric and heat energy;*

- *Gain from high payment charge for compensation of reactive power (tangent "Fi");*
- *Gain received for non-returned condensate;*
- *Gain from sales of makeup water and chemically treated water;*
- *Gain from sales of other finished commodity of auxiliary processes;*
- *Gain from sales of agricultural products of subsidiary economy;*
- *Gain from performed industrial works (services) abroad (including transit);*
- *Gain from sales of other non-industrial goods, production, services (rent, kindergarten fee, payment for vacations in preventoriums, tourist centers, and recreation centers);*
- *Receipts from property leasing.*

The profit from usual types of activity was defined as a difference between the gain from realization of products at current costs and approved by the Regional Energy Commission of the charges with no value added tax and expenditures on its production.

Operational gains of the Company are:

- *Gains in the sums in accordance with the contracts of interests for usage of cash assets by the lending agency which are on the account of the agency, are reflected according to the article "Interest to be received".*
- *gains from the retirement of fixed assets (sale, , the write-off in case of obsolescence and depreciation and other assets –securities, inventory holdings);*
- *gains from the participations in fixed assets of other Companies are reflected according to the article "Gains form the participation of other Companies";*
- *Other operational gains.*

Non-realization gains of the Company are:

-the following types of fines, penalty taxes, forfeits for violation of the terms of the contracts:

- *for extra usage of electric power limit;*
- *for exceeding contractual rate of power consumption;*
- *for under usage of the contractual rate of power consumption;*
- *for switching on of electrical installation without permission;*
- *for non-return of condensate;*
- *for extra hour backlog of heat energy set by the contract;*
- *for water pumping without permission;*
- *assets received without return and on the gift contract;*
- *profit of past years, revealed in the fiscal year;*
- *the sum of account payable and depositor's debt which term of limitation of action was expired;*
- *capital differences and other non-realization revenue.*

2.12. The acknowledgement of expenditure

The costs account and calculation of the cost price of released energy are carried out in separate electric power stations, power networks and power supply system in general. The total cost price of energy is formed by the summation of the cost price of production at power stations, cost price of transmission and distribution in electric and heat networks, cost of bought electrical energy and costs on maintenance of the executive body, including the costs on unified technological process control and maintenance of separate divisions on realization of energy.

The object of the calculation of the cost price of electrical and heat energy is the total cost price of the released electrical and heat energy to the customers.

The costing unit is 1kwh and 1Gcal respectively of net released electrical and heat energy to the customers.

Economic expenditures (except for the user charge for using the nets of RAO) on the maintenance of the executive body, including the costs on the maintenance of the affiliated company "Energosbyt", are distributed between electrical and heat energy proportionally to the production costs of power stations and networks. Economic expenditures are distributed between electrical and heat energy proportionally to their shop cost.

The expenditures connected with production distribution, accounted on account 44 "Sale costs", are written off completely in the fiscal period on account 90 "Sales".

The account of the costs on heat energy transmission at the power stations is carried out separately from the account of energy generation costs. The calculation of transmission cost price is drawn up separately from electrical and heat energy production as a separate type of activity.

2.13. Segment information

The main type of economic activity of the Company is the production of electrical and heat energy, which sale makes 95% of the gain from the production sale (goods, works, services). The Company carries out other types of activity which are not essential and do not form fiscal segments neither taken together nor separately. That is why the information on operational segments is not revealed separately.

The Company carries out its activity on the territory of Russian Federation and does not choose separate geographical segments because the sources and the character of the risks are almost the same on the entire territory of Russian Federation.

2.14. Fixed capital, surplus capital and capital reserves

Fixed capital is reflected in the sum of nominal value of equities and privileged shares, acquired by shareholders, and nominal value of equities, bought out form shareholders by the Company. The amount of fixed capital corresponds to the amount set in the Articles of the Company.

Surplus capital was formed at the expense of fixed assets as a result of revaluation carried out.

Capital reserves are created in the Company at the rate of 5% of fixed capital in accordance with the Legislation.

2.15. Changes in the account policy

There were no changes in the account policy of the Company on the year of 2005 in comparison with the year 2004.

The following changes and additions were put into the account policy of the Company on the year of 2006:

1. In accordance with Federal Law #58 from 06.06.2005 "About putting changes into the second part of the IRC of RF and other taxation acts of law of RF" and with Federal Law #119 from 22.07.2005 "About putting changes into chapter 21, p.2 of the IRC of RF".

On value added tax (VAT):

- *method and time of the tax base defining;*
- *time of acceptance to the deduction of VAT on the objects of capital construction.*

On the profit tax:

- additions were put into the definition of documentary expenditures;

- new norms were introduced concerning the transactions which were conducted but without their taxation procedure.

2. On account of transactions on purchase and sale of electrical energy in the gross market.

The Company has started working in the gross market of electrical energy and power of period of transition with the free trade sector since 01.04.2005. The planned balance of electrical energy and power on the year of 2006 for the Company is divided into sale of all the generated electrical energy and purchase of all the consumption volume in the gross markets; if the scheme of balance-overflow works, the volume of energy generation at own power stations substitutes the consumption volume, purchased in the gross market of electrical energy (letter of JSC RAO "UES of Russia" #YU-1205 form 16.05.2005). Conditionally fixed charges are accounted during the calculation of final charges for the Company in the retail market. The gain and costs on the purchase of electrical energy in free trade sector, in accordance with all the contracts, are reflected in the accounting in form #2 "Report on profits and losses" on the lines of other industrial goods, products, works, services respectively. Costs on purchased electrical energy in the free trade sector do not receive the share of economic expenditures.

2.16. Comparative data

Comparative data in the accounting for 2005 are drawn up by the way of adjustment of the data of the final accounting for 2004 in order to bring them in correspondence with the changes in forms of accountability for 2005.
The introductive balance of 2005 reflects the results of revaluation of fixed assets. The currency of the balance changed by RUR 2 676 703 thousand.

- *plough, productive and pedigree cattle;*
- *perennial plantations;*
- *interfarm roads;*
- *other fixed assets;*
- *capital investments on radical improvement of the grounds;*
- *capital investments in the rented objects of the fixed assets;*
- *lands, plots, objects of nature management (being in the property of the company).*

Long-term special editions of technical content are in the structure of the fixed assets (i.e. SNIP, collections, reference books etc). Acquired book editions with a term of using less than one year contained reference information of temporal keeping are not referred to the objects of the fixed assets and shall to be wrote of to the expenses as other expenditures in the moment of their transfer to maintenance. Writ-off of the book editions of temporal keeping (not to be reordered in the inventory book) shall to be exercised by authority of the director of the branch according to the act on writing off.

5.1.2. Fixed assets acquired for further sale shall to accounted at the account 41 "Goods".

5.1.3. To define composition and classification of the fixed assets it's necessary to guide the All-Russian classifier of fixed assets (OK-013-94) approved by Resolution of the State Committee of RF on standards dd. 26.12.94 №359 (ed. dd. 14.04.1998).

Drawing up of acceptance of the fixed assets in the property composition of the Company is under authority of acceptance committees. The committees are created according the orders:

- *in the executive apparatus;*
- *in the subsidiaries.*

5.1.4. Inventory object shall be regarded as a unit of accounting of the fixed assets that is the object with all adjustments and accessories or separate constructively detached object subject to some single functions fulfillment, or separate complex of constructively jointed objects as an integration subject to the defined work fulfillment (par. 6 PBU 6/01 of Provisions on accounting "Fixed assets accounting" (Order of MF RF №26n dd.30.03.2001(ed. dd. 18.05.2002).

Inventory cost of the fixed asset's objects, i.e. computers shall be determined as a sum of the price of all devices (system block, monitor, printer, keyboard, mouse etc.) subject to work. Components and peripherals devices purchased as a change of the worn out shall be accounted as spare parts on the corresponding sub account of the account 10 "Materials".

5.2. Fixed assets valuation's ways

5.2. 1. at the acceptance to accounting the objects of the fixed assets are valuated by the next ways:

a) at the purchase of the fixed assets subject to payment- at a rate of actual expenses of the company for the purchase, defined according to par. 8 PBU 6/01 " the Fixed assets accounting " and gathered preliminary on the account 08 " Investments in non circulating assets ", the sub account " Purchase of separate objects of the fixed assets ";

b) at construction of the fixed assets by the contract organizations and own-account construction - at a rate of actual expenses for the finished and putted out capital construction according to Provisions on accounting of long-term investments, authorized by the Order of MF of Russian Federation dd. 30.12. 1993 № 160, gathered preliminary on the account 08 " Investments in non-circulating assets " by one object the subaccount " Construction of separate objects of the fixed assets ";

c) at earning of the fixed assets as investments in the authorized (pooled) capital – in monetary valuation approved by the incorporators (participants) if otherwise is not stipulated by the legislation of the Russian Federation (par. 9 PBU 6/01). The note in the debit of account 08 "Investments in non-circulating assets", subaccount "Acquisition of separate objects of the fixed assets" in the correspondence with an account 75 "Payments with incorporators" is necessary. On the debit of account 08 "Investments in non-circulating assets", subaccount "Acquisition of separate objects of the fixed assets" expenses (including transport and other delivery works) concerned the fixed assets earnings in the chartered capital shall be reflected;

d) at gratuitous acquisition of the fixed assets from the legal entities and natural persons also on posting of the fixed assets revealed as surplus over the results of privatization at the market price as for the date of posting. On gratuities acquisition the note in the debit of account 08 "Investments in non-circulating assets", subaccount "Acquisition of separate objects of the fixed assets" from the credit of the account 98 "Further incomes" is made according to corresponding analytics.

On the debit of account 08 "Investments in non-circulating assets " the subaccount " Acquisition of separate objects of the fixed assets " the expenses (including transport and other delivery works, registration fees and other expenses) concerned the gratuitous receipt of the fixed assets also are reflected. In process of amortization charge at the gratuitously acquired fixed assets, simultaneously, at a rate of charged amortization, records on the debit of account 98 " Further Incomes " according to corresponding analytics and to the credit of account 91 " Other profits and losses" in the composition of extraordinary incomes are made.

At the surplus posting over the results of inventory a record on the debit of account 01 "Fixed assets" from the credit of account 91 "Other profits and losses" is made.

Not accounted real estate revealed in the process of inventory shall be charged in the composition of the fixed assets after the documents submittal to the State registration.

To determine a current market cost the data on the cost of the same fixed assets acquired in written form from the companies – producers may be used; information on the cost level being at the disposal of the State statistics authorities, trade inspections, also mass media and special literature; expert reports on the cost of the single objects of the fixed assets being in force as for a date of taking into account must be proved documentary or by way of expertise making (par. 29 Methodical recommendations on the fixed assets accounting (Order of MF RF №91n dd. 13.10.2003);

e) acquisition of the fixed assets under the contracts providing execution of liabilities (payment) by nonmonetary assets at the cost of values transferred or subject to transfer to the Company according to the price which in comparable circumstances the Company usually determines cost of the similar values (par. 11 PBU 6/01);

f) Contract value shall be recognized as the value of the fixed assets acquired under exchange contracts which fixes the contract value of the exchange property.

5.2.2. Expenses on loans and credits (interests etc.) due to the fixed assets acquisition shall be included in the initial value of the fixed assets in accordance with par. 23, 31 of Accounting Provisions "Accounting of loans and credits, also their performance expenses" PBU 15/01 (Order of MF №60n dd.2.09.2001).

5.2.3. Expenses (income) on acquisition of the objects of the fixed assets arisen after its acceptance to accounting (cost and price difference, nonreimbursable taxes etc.) shall be accounted on the account 91 "Other profits and losses" in composition of extraordinary expenses (incomes) according to the corresponding analytics.

5.2.4 Changes in initial cost of the fixed assets shall be only in cases of completion, after equipment, reconstruction and modernization, partial liquidation and revaluation of the fixed assets.

5.2.5. Complex or partial revaluation of groups of similar objects of the fixed assets over the current (replacement cost) by way of indexation or direct converting according to documentary approved market costs is carried out one a year (as for the 1 January of the reporting year) on the ground of the single Order of the Company, and further is carried out regularly (every year).

Revaluation sum of the fixed asset's object resulted to revaluation shall be charged on the account 83"surplus capital" in amount charged minus its discount fulfilled the previous reporting periods and transferred to the account of profits and losses as operational expenses.

Revaluation sum of the fixed asset's object equal to the sum of its discount fulfilled the last previous periods and transferred to the account of profits and losses as expenses shall be transferred to account 91 "Other profits and losses" in composition of operational profits.

Discount sum of the object of the fixed assets shall be referred to the additional capital decreasing composed due to revaluation's sum of this object in the previous reporting periods (par. 15 PBU 6/01, ed. 18.05.2002).

Excess of the discount sum of the object of the fixed assets over the sum of its discount related to the additional capital resulted the revaluation spent the previous periods shall be referred to the account 84 "Non distributed profits (uncovered loss)".

5.2.6. Sum of revaluation (discount) arose from revaluation of the fixed assets of the subsidiaries shall be transferred to the executive body of the Company on debit (credit) of account 79 "Intraeconomic payments" on subaccount " Payments on allocated property".

5.2.7. At the object of the fixed assets withdrawal the sum of its revaluation shall be transferred from the account 83 "surplus capital" to the account 84 "Non distributed profits (uncovered loss)" in composition of profit of the reporting period (par. 15 PBU 6/01).

5.2.8. Valuation of the fixed asset's object which cost under acquisition is expressed in foreign exchange shall be realized by way of the sum conversion according to the rate in force of Central Bank of Russia by the date of the object charge to account 01 "Fixed assets".

Furthermore the rate difference shall be accounted on debit (credit) of account 08 "Investments in noncirculated assets" in the credit (debit) of account 91 "other profits and losses" in composition of the extraordinary expenses (profits) (par. 16 PBU 6/01).

5.2.9. Gratuitous transfer and sale of the fixed assets to the third-party companies and natural persons, charge-off of underamortization fixed assets from the balance due to their unfitness to use, also deficient fixed assets revealed under inventory or stolen shall be carried out according to the written order of the JSC 'Kuzbassenergo" prepared by the Department on capital management together with visas of corresponding services.

The document shall be subscribed by Deputies general director to the proper place:

- *fixed assets of nonindustrial activities (Housing and communal services, catering, autotransport etc.) – by the first deputy general director on common problems;*
- *industrial fixed assets – by the deputy general director, technical director;*

Charge-off from the balance of the amortized fixed assets due to their unfitness to use, also partial liquidation of the fixed assets shall be carried out on resolution of director of subsidiary or representative office.

In the process of charging-off from the balance of the underamortized fixed assets, VAT falling at the underamortized part without revaluations shall be restored.

Stocks of materials and capital equipment remained due to discount of unfit to reconstruction and further use of the fixed assets shall be debited at the market price as for the date of the fixed assets object's discount

together with transfer to account 91 "Other profits and losses" in composition of operating profits.

5.2.10. Depreciated cost of the retired object of the fixed assets from the credit of account 01 "Fixed assets" shall be withdraw to the debit of corresponding subaccount of account 91 "Other profits and losses":

- *in composition of operating expenses in case of the fixed asset's retire due to sale, charge-off in case of moral or material depreciation;*
- *in composition of extraordinary expenses in case of the fixed asset's retire due to gratuitous transfer.*

Retire of object of the fixed assets transferred on account of investments in the authorized (polled) capital, pay fund in amount of its depreciated cost shall be reflected on debit of account of expenses accounting and credit of account of he foxed assets accounting.

If the object of the fixed assets has not depreciated cost (fully amortized), amount of the conditional value shall be reflected in bookkeeping as operating profits in the line 09010 of the form 2 "Report on profits and losses".

5.2.11. Expenses on the fixed assets charge-off due to accidents, natural disasters and others emergency situations shall be reflected in bookkeeping of reporting period in composition of emergency expenses.

5.3. Amortization of the fixed assets

5.3.1. The method of amortization of the objects of fixed assets is linear, reasoning from the dates of the effective use of these objects. The amortization of the objects of fixed assets, taken on accounting before 01.01.2002, is accrued in accordance with the Regulation of the USSR Council of Ministers from 22.10.1990 № 1072 "About the unified standards of amortization charges for the complete reconstruction of fixed assets of the economy of the USSR". The amortization of the objects of fixed assets, taken on accounting since 01.01.2002, is accrued in accordance with the Regulation of the Government of RF from 01.01.2002 № 1 "About the classification of fixed assets included in the amortization groups".

5.3.2. The amortization of the objects of immovable property, capital investments of which are completed, all primary acceptance instruments are drawn up, the documentation is handed over the state registration and practically put into operation, is accrued in accordance with the established procedure – since the first day of the month, following the month of setting the object into operation. The objects are regarded as the objects of fixed assets.

5.3.3. The objects of fixed assets at the cost of up to RUR 10 000 per unit are charged off according to the item "Amortization" as far as they are put into production or operation. This operation is mentioned in accounting on debit of accounts of inputs account (selling costs) and account credit 01 "Fixed assets" and drawn up by the Act of charging off according to MB-8 form. Such objects are reckoned in the record keeping at the cost of 0. In case of modernization (reconstruction) of these objects, the modernization (reconstruction) expenses are charged to the increase of the cost of the object and amortized in accordance with the established procedure.

The executive body, affiliated companies and the representative office control the movement of these objects in order to ensure their safety in the process of production and operation. Records management of these objects in places of their operation is kept in "The bill of assets at the cost of up to RUR 10 000, put into operation" according to the suggested form, apart from the fixed assets, depreciated in accordance with the established procedure (Appendix 2 to the present Regulation). Accounts department and persons in charge control the correspondence between the records in the bill and inventory sheets.

The retirement of the objects at the cost of up to RUR 10 000 is drawn up by "The Act of retirement of fixed assets at the cost of up to RUR 10 000", according to the suggested form (Appendix 2 to the present Regulation).

5.3.4. Amortization of the following objects is not accrued:

- *housing resources (par.17 PBU 6/01);*
- *objects of external accomplishment (par.17 PBU 6/01);*
- *productive cattle (par.17 PBU 6/01);*
- *perennial plantations (par.17 PBU 6/01);*

- lands (par.17 PBU 6/01);
- objects of nature management (par.17 PBU 6/01);
- fixed assets, received before 01.01.2000 under contracts of donation and gratis in the process of privatization;
- books, brochures and other editions.

5.3.5. The process of amortization accrual can be interrupted by the decision of the director of the affiliated company in the period of restoration (repair, modernization, reconstruction) of the objects of fixed assets, that lasts more than 12 months, and in case of their temporary closing-down for the period of more than 3 months under the order of the JSC "Kuzbassenergo" (par.23 PBU 6/01).

5.3.6. Accrued amortization of the objects of fixed assets of production purposes under the account credit 02 "Depreciation of fixed assets" control account "Accrued amortization" is sent to finance capital investments of production purposes as a record in debit of account 02 "Amortization of fixed assets" control account "Accrued depreciation" from credit 02 "Amortization of fixed assets" control account "Amortization of capital investments".
The off-balance account with the acceptance (transfer) of the funding source among the affiliated companies under off-balance aviso is kept, when nesting at the cost of inter-branch amortization redistribution

5.3.7. Capital investments in the borrowed objects of the fixed assets are amortized as follows:
Capital investments which cost are subject to reimbursement by the leaser to the lessor shall to be depreciated by the lessor in the order similar to the restarting up after reconstruction, modernization or technical reequipment (in case if the JSC "Kuzbassenergo" act as a lessor), that must be stipulated by the lease contract;

Capital investments produced by the lesser by approbation of the lessor and in accordance with the terms of the lease contract, which cost is not reimbursed by the lessor must be amortized by the lesser within the period of validity of the lease contract from the amount of the amortization calculated subject to useful life defined for the leased objects of the fixed assets in accordance with the Classification of the fixed assets approved by the Government of Russian Federation (if the JSC "Kuzbassenergo" acts as a leaser).

5.3.8. In case of rebuilding, reequipment, reconstruction, modernization, partial liquidation and revaluation of an object of the fixed assets the amortization must be calculated subject to the depreciated cost of the fixed assets by the date of its making and months number rest to the fixed assets maintenance termination.
If a useful life of the fixed asset's object grew after rebuilding, reequipment, reconstruction, modernization than the rest months number to the fixed assets maintenance is possible.
Acceptance of the finished works in rebuilding, reequipment, reconstruction, modernization of the fixed assets shall to be formed by the corresponding act.

5.4. Procedure of accounting and financing of the fixed assets repair

5.4.1. For a current fiscal year the reserve for repair work is created on account 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes" at the rate established by the estimate of expenses of the annual standard of repair cost, including it into production costs monthly (accounts 23, 25, 26) at the rate of 1/12 of annual estimate. The reserve is created to include expenses for all types of repair work of fixed assets of production purposes into production costs.
At year end the adjustment of the repair reserve is performed :
- extra reserved money for the repair of fixed assets (as a result of inventory taking) is reversed an entry.
- in case of stress of reserve money for repair of fixed assets, extra charge takes place under debit of accounts of the records of production costs and on account credit 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes".

Account of repair expenses is carried out separately according to the types of repair (thorough repairs and current repairs) and methods of carrying out (contract and household).

All the expenses for repair of fixed assets of production purposes, carried out with the help of:

- household method – are accounted object by object on account 23 "Auxiliary processes" under control accounts "Thorough repairs of fixed assets using the household method" and "Current repairs of fixed assets using the household method". Later they will be put in corpore into debit of account 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes" every month.

- contract method – are put in corpore from account credit 60 "Settling with suppliers and contractors" on the corresponding control accounts into debit of account 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes"

In case of stress of reserve money for repair of fixed assets (including leasehold assets) of production purposes, debit balance on account 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes" is mentioned in the line of the balance "Other production costs and resource" at the end of month .

Expenses for repair of fixed assets of non-production purposes are charged off from the credit of corresponding control accounts of account 23 "Auxiliary processes" or account 60 "Settling with suppliers and contractors" into debit of account 29 "Attendant production and households" without fund creation .

5.5. Account of intangible assets.

5.5.1. Intangible assets include the objects of intellectual property under all implemented terms, mentioned in par.3 PBU 14/2000 " Account of intangible assets"(The Order of Ministry of Finance of the RF from 16.10.2000 № 91n).

5.5.2. .To be taken on accounting the objects of intangible assets are valued in the following ways:

a) intangible assets acquisition subject to payment – at the rate of actual expenses of the Company for the acquisition of the assets, defined in accordance with par.6 PBU 14/2000 " Account of intangible assets"(The Order of Ministry of Finance of the RF from 16.10.2000 № 91n), collected preliminarily on account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets";

b) creation of intangible assets by the Company itself – at the rate of actual expenses for creation and production except for value added tax and other refundable taxes, collected preliminarily on account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets"(par.7 PBU 14/2000);

c) deposition of intangible assets in the authorized (polled) capital – in pecuniary valuation, coordinated by founders (members), if nothing else is provided by the Legislation of RF (par.9 PBU 14/2000).A preliminary record is made in debit of account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets" in correspondence with account 75 "Settling with founders". The expenses connected with deposition of intangible assets in chartered capital are mentioned as well on debit of account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets";

d) non-repayable donation of intangible assets from legal and natural persons - at the common rate at the date of posting. A record in debit of account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets" from account credit 98 "Revenue of next periods" is made. The expenses connected with non-repayable donation of intangible assets are mentioned as well on debit of account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets". The information about the prices, established at the date of taking on accounting, is confirmed authentically or by examining.

By amortization accrual of such intangible assets at the same time at the rate of accrued amortization the records are made on debit of account 98 "Revenue of next periods" in corresponding analytics and account

credit 91"Other profits and losses" in non-disposal revenue;

e) acquisition of intangible assets under the contracts, providing for discharge of obligations (payment) with non-monetary funds – at the cost of values, transferred or being subject to transfer by the Company, set reasoning from the price that is fixed by the Company for similar values in similar circumstances (par.11 PBU 14/2000);

f) the cost of intangible assets is the contract value; the assets received under contracts of exchange which fix the contract value of exchanged property;

5.5.3. Amortization of all groups of intangible assets is carried out with the linear method, based on the standards calculated on the basis of the period of the effective use of the objects of intangible assets, using account 05 "Amortization of intangible assets" (par.15, 16, 21 PBU 14/2000).

5.5.4. The period of the effective use of intangible assets is defined independently when the object is taken on accounting, reasoning from the expected period of use of an object, when it is possible to collect revenue. The expected period of the effective use should not exceed the period of validity of a patent, a licence and other legal documents and limits on the use of the objects of intellectual property according the present legislation of Russian Federation (par.17 PBU 14/2000).

If it is impossible to define the period of the effective use of intangible assets; the standards of amortization charges are set counting on 20 years (but it should not exceed the period of functioning of the Company).

5.6. Lease of fixed assets

5.6.1. The leased property is mentioned apart in accounting. All the leased property expenses are carried out on account 90 "Selling". Depreciation of leased property is mentioned on account credit 02 "Amortization of the fixed assets" and debit of account 90 "Selling".

Full payback of the objects (including local taxes: acre-shot, tax on property, etc.) should be provided in lease contracts.

If under the lease contract of the fixed assets the lessor settles up with the communal services suppliers, the lesser must compensate a full cost of these services according to the invoice issued by the lessor. In case of lease of a part of the fixed asset's object of the lessor, a share of communal expenses fallen at the leaser shall to be defined by the measuring devises or in case of their lack as a ratio of a part of an area of the fixed asset's object occupied by the leaser to the total area of an object of the lessor's fixed assets.

The lessor shall to pay off communal services against the invoices issued to him by the communal services suppliers than he must invoice it to the leaser.

Compensation for communal services received by the lessor from the lease is not a profit, but a reimbursement of expenses amount produced by the lessor.

5.6.2. Account of leased fixed assets is kept on off-balance account 001 "Leased fixed assets" according to the valuation, fixed in lease contracts. Analytic account is kept regarding lessors and every object of leased fixed assets.

5.6.3. . Lease contract defines the period of leasing of fixed assets, the amount of rental fee, the terms of the keeping and repair work, valuation changes as a result of thorough repairs, and procedure of settlements.

5.6.4. The property, purchased for leasing and profit earning, is mentioned in accounting on account 03 "Income investments in stocks of materials and capital equipment".

5.6.5. Lease contracts of the fixed assets shall to be coordinated with the Deputy general director of the JSC "Kuzbassenergo" on corporate governance and visaed by the corresponding authorities.

5.7. Account characteristics of the investments in non-circulating assets.

5.7.1. Running OKS costs (wage cost, travel expenses) are covered at the expense of the funds, aimed at financing of capital construction and included in the inventory cost of exploited objects (par.1.4. of the Regulation on accounting of long-term investments, confirmed by the Order of the Ministry of Finance of RF from 30.12.93 №160).

5.7.2. Every month running OKS costs of the executive body are distributed among the affiliated companies pro rata SMR volume of affiliated companies in accordance with the coefficient, calculated as in the ratio of SMR volume of an affiliated company for the reporting month and total SMR volume of the Company for this month.

5.7.3. Capital construction expenses are included in inventory cost of objects of capital investments at taking them on accounting. They are classified by par.3.1.7. of the Regulation on accounting of long-term investments, confirmed by the Order of the Ministry of Finance of RF from 30.12.93 №160 as the expenses not leading to the increase in the cost of fixed assets.

5.7.4. If the Company has shares when the construction is under way, the transfer of monetary funds or property to the chief builder on the basis of share holding is reflected as a accounts receivable of this construction by the record in debit of corresponding control account of account 76 "Settling with various debtors and creditors" in correspondence with accounts of accountability of monetary funds or property.

When the construction (or it's part) comes to an end the corresponding expenses are taken on account by the record from account credit of the corresponding control account 76 "Settling with various debtors and creditors" in debit of account 08 "Investments in non-circulating assets", control account "Construction of the objects of fixed assets".

5.7.5. If the Company is the chief builder, the money, received from the builders who have shares, is mentioned as money for purpose financing on debit of account 86 "Purpose financing" in correspondence with accounts of accountability of monetary funds or property.

5.7.6. Account of NIOKR in the Company is carried out in accordance with the Regulation on accounting "Account of expenses for research engineering, development and technological activity" (PBU 17/02) (approved by the Order of the Ministry on Finances dd. 19.11.2003 №115n).

The expenses for research engineering, development and technological activity are recognized in accounting if:

The sum of the expense can be defined and confirmed;

There is documentation that proves execution phase;

The results of the activity used in production and operation will lead to revenue in future;

The use of results of research engineering, development and technological activity can be demonstrated.

The expenses for research engineering, development and technological activity according to the par. 4 of PBU 17/02 don't contain:

The company's expenses on nature resources development;

Expenses on development of production, new companies, plants, aggregates (start costs);

Expenses on development of manufacturing work;

Expenses concerned the improvement of production technology together with improvement of product quality, change in the product's designing and other operational attributes realized during the manufacturing (technological) process.

The expenses for NIOKR are mentioned in accounting on account 08 "Investments in non-circulating assets" (par.5 PBU 17/02).

The expenses for NIOKR, which results are subject to legal safeguard and drawn up in accordance with

legislation order (patents, licenses and other documentation are received to attest the exclusive right of the Company to possess the results of NIOKR), can be considered intangible assets at the account 04 'Intangible assets" (par. 4 PBU 14/2000).

The expenses for NIOKR , which results are not drawn up in accordance with established procedure, are charged off from account credit 08 "Investments in non-circulating assets" for the expenses for usual activities using the linear method during the fixed period (par. 11 PBU 17/02).

The expenses for NIOKR, which results were not satisfactory, and the results of NIOKR which use was stopped, are drawn up by the decision of PTO of an affiliated company.

The decision can be viewed by the service of PTO of the executive body and with the written permission of the technical director. The expenses are charged off at a time in non-disposal expenses of the reporting period.

If in the process of NIOKR fulfillment a positive result not being subject to legal safeguard, that is going to be used in production or in management, such expenses for NIOKR also shall to be accounted reflected at the account 04 "Intangible assets".

The period of charging off the expenses for NIOKR is set within 2 years.

5.7.7. The objects of the incompleted capital construction, which construction was stopped and won't be carried out because of lack of funds in future, exposed to revaluation, the cost of revaluation is transferred from account credit 84 "Surplus earnings (dead loss)" in debit of account 83 "Surplus capital" and as a record from account credit 08 "Investments in non-circulating assets" in debit of account 91 "Other receipts and expenditures" in the sum of actual expenses incurred.

The charge off the objects of incompleted construction is carried out by phased;

Commission (including specialists of account department, technical services, material responsible persons) is created by order of the manager;

According to the commission's report the act on expediency of write-off the object of incompleted construction is drew up. Thus on the base of this act a liquidation of the object by own forces or together with contracting organization is made;

Act on writ-off (liquidation) of the object of incompleted construction is drawn up after all the works at the liquidated object. The act on write-off (liquidation) of the object of incompleted construction shall to contain information on the object's conditions as for a date of writ-off, its short individual characteristic, reference on expenditures caused by the writ-off and on stocks of materials and capital equipment income due to writ-off.

Under the liquidation of the incompleted construction, expenses accrued on the account 08 "Investments in the non circulating assets» on their construction and expenses caused by these objects liquidation are subject to writing-off in the structure of the intangible assets.

Got material and other stocks of materials and capital equipment due to the objects liquidation useful to further using are subject to posting.

5.8. Inventory accountability

5.8.1. Inventory includes assets:

- *for being used as raw material, materials, etc. in the process of production, in execution phase and rendering of service, repair work of fixed assets, building and assembly jobs, cultural and educational needs;*
- *aimed at being sold (finished commodity);*
- *aimed at being used as means of labour during the 12-month period;*
- *aimed at being used by the Company for meeting its administrative needs.*

5.8.2. Inventory, tools and household fixings used less than for 1 year-period are included in inventory on account 10 "Materials".

5.8.3. The stock-list number, worked out for a definite name of inventory, is taken as an accounting unit.

5.8.4. Taking on accounting of the inventory, its valuation is carried out in the following ways:

- *acquisition subject to payment – the sum of actual expenses for acquisition except value added tax and other taxes compensated from the budget, defined in accordance with par.6, 11 PBU 5/01 ("Inventory accounting") approved by the Order of the Ministry of Finance of RF from 09.06.2001 № 44n), with the glance of the regulations of par.15 PBU 15/01 "Account of loans and lending and the expenses for their operation" with the glance of interests and other expenses for borrowed current assets (approve by the Order of the Ministry of Finance of RF from 02.08.2001 № 60n);*
- *making by own strength – reasoning from actual expenses, connected with the production of the inventory. Account and formation of inventory expenses is carried out in the order, established to define the net cost of applicable types of production (par.7 PBU 5/01);*

- invested in chartered capital – reasoning from pecuniary valuation, coordinated by founders (members), if nothing else is provided by the Legislation of RF , with the glance of actual expenses for the delivery of the inventory and putting it in conditions for operation, according to par.6,8, 11 PBU 5/01);

- received gratis or under the contract of donation, left from retirement of fixed assets and other property and posting of the inventory, revealed as surplus as a result of inventory taking – reasoning from current market cost considering the posting date with the glance of actual expenses for the delivery of the inventory and putting it in conditions for operation (par.9, 11 PBU 5/01).

- received under the contracts, providing for discharge of obligations (payment) with non-monetary funds – at the cost of values, transferred or subject to transfer to the Company, fixed reasoning from the price that is fixed by the Company for similar values in similar circumstances. If it is impossible to define the cost of assets, transferred or subject to transfer to the Company, the cost of the inventory, received by the Company under the contracts, providing for discharge of obligations (payment) with non-monetary fund, is defined reasoning from the price, that is more suitable for acquisition of similar inventory in similar circumstances. The actual cost price of the inventory includes actual expenses for the delivery of the inventory and putting it in conditions for operation in accordance with par.6, 10, 11 PBU 5/01;

- *The cost of the inventory, received under the contracts of exchange, which fix the contract value of the exchanged property, is the fixed contract value.*

5.8.5. 5.8.5. The evaluation of the inventory, which cost is evaluated in foreign currency at the moment of acquisition, is estimated in rubles at the rate of exchange fixed by the Central Bank of RF on the day of taking the inventory on accounting.(par.15 PBU 5/01).

5.8.6. . The inventory received by the Company without calculated-paid documents (non-invoiced deliver) are taken on discount at the price fixed in the contract. If the price is not fixed in the contract, in order to fix it and the amount of payment or account payable, the price, used by the Company in similar circumstances with similar inventory, is tagged (par.6.1. PBU 10/99 "The Company's expenses") approved by the Order of the Ministry of Finances of RF №33n dd. 06.05.1999 (ed. dd. 30.03.2001).

After calculated-paid documents are received, the difference between the actual cost of inventory and its valuation at the moment of taking on discount is included in the same expenses accounts the inventory was charged off, and in the balance of the inventory at the store pro rata its volume.

If calculated documents of non-invoiced delivers were received a year later after the annual accounting had been performed, it means that:

a) account cost of the inventory is not changed;

b) the rate of value added tax is used in accounting in accordance with established procedure;

c) settling with a supplier is being adjusted, the difference between account cost of the inventory and its actual cost is charged off in the month, when the calculated documents were received:

- *cost decrease of the inventory is mentioned on debit of account 60 "Settling with suppliers and contractors" and account credit 91 "Other expenses";*
- *cost increase of the inventory is mentioned on debit of account 91 "Other expenses" and account credit 60 "Settling with suppliers and contractors" (par.41 of Methodical Instructions on the inventory accounting (confirmed by the Order of the Ministry of Finance of RF from 28.12.2001 № 119n).*

5.8.7. Goods bought for sale by retail are accounted at the value of sales on account 42 "Trading extra charge" (par.13 PBU 5/01). The amount of extra charge, falling at the remains of unrealized products, is fixed reasoning from the percentage of the cost of retired products to the cost of the accounted ones.

5.8.8. Goods bought for selling in wholesale are accounted at the acquisition cost with the glance of the expenses for provision and delivery of the products to the stores (bases) till the moment they come into the market (par.13 PBU 5/01).

5.8.9. The inventory, owned by the Company, but being delivered, or transferred to a customer to pawn, is taken on discount in value, fixed in the contract with sequential adjustment of actual cost (par.26 PBU 5/01).

5.8.10. The account of purchased fuel for energy generation is carried out at actual cost and includes: the fuel cost according to the bills of suppliers, including discounts (extra charge) because of poor (good) quality, the payment for other services provided by the supplier and commodity exchange, railway rate quotation of fuel from the shipment place to the station of destination and from the station of destination to discharge arrangements, other expenses according to par.6, 11 PBU 5/01, except the expenses of fuel- shipping department.

The expenses of fuel supply workshop for unloading, warehousing and intraoffice transference of fuel from the stores and fuel delivery for meeting technological needs are not included in the net cost. They are referred to the expenses for power generation of TTTS (par.4.7. of Methodical Instructions on fuel account at heat power plants RD 34.09.105-96).

5.8.11. On putting the inventory (except the products accounted at value of sales) in production and other type of retirement the valuation is appraised at average net cost of each type of inventory.
The average valuation of actual cost of the materials released in production or charged off for other purposes, is estimated by the defining of the actual cost of the material at the moment of its release (sliding valuation).

5.8.12. The putting into production (operation) of the inventory holdings is drawn up as a blading according to form M-11 for intraoffice transference (from one advance holder to another one).

The charging off the inventory in production, except for construction materials, is carried out on the basis of the act of charging off the equipment and other types of the inventory in suggested form (Appendix № 2 to the present Regulation).

The charging off the inventory in production is carried out on the basis of the act of charging off the inventory in suggested form with simultaneous drawing up the blading according to form M-11 for putting in production (Appendix № 2 to the present Regulation).

5.8.13. The account of special tools, special devices, special equipment and working clothes is carried out in the Company in accordance with the Methodical Instructions on accounting of special tools, special devices, special equipment and working clothes, confirmed by the Order of the Ministry of Finance of RF from 26.12.2002 № 135n.)
The list of the means of labour accounted as special tools, special devices, special equipment, used for carrying out non-standard operations (par.2 of the Methodical Instructions), is defined by the affiliated company independently reasoning from the peculiarities of the engineering procedure.
When defining the composition and groups of special equipment one should take into account the All-Russian classifier of fixed assets OK-013-94 (confirmed by the Resolution of the State Committee on standards, metrology and inspection certification from 26.12.94 № 359), and the All-Russian classifier of types of economic activity, production and services OK-004-93(confirmed by the Resolution of the Government standard of RF from 06.08.93 № 17).
Special equipment, working clothes and other means of man-to-man defense, regardless of their cost and the period of effective use, is referred to the means put into circulation (par.50 "The Regulation on bookkeeping of RF", confirmed by the Order of the Ministry of Finance of RF from 29.03.2000). These means are mentioned in control accounts 10.10 "Special equipment and working clothes at the store" and 10.11 "Special equipment

and working clothes in use", open to the balance account 10 "Materials".

Bedding, tools aimed at carrying out the standard types of production (par.4 of the Methodical Instructions) and other inventory included in the means put into circulation are mentioned in account 10.9 "Inventory and household equipment"

Working clothes and other means of man-to-man defense, special equipment which can be used up to 12 months, according to the standards, are charged off in debit of accounts of expenses for production at the moment of its transference to the workers of the Company (par.21 of the Methodical Instructions)

The charge off the given working clothes, other means of man-to-man defense etc. is carried out on the basis of the act on charging off according to form MB-8 with simultaneous drawing up the blading according to form M-11 for putting in production.

If the period of operation is more than 12 months, the cost of working clothes and other means of man-to-man defense etc. is covered with the linear method reasoning from the periods of the effective use (par.26 of the Methodical Instructions).

To get working clothes, other means of man-to-man defense etc. aimed at long-term use, a worker must sign in worker's personal card (form MB-2) and in the list accounting the issue of the working clothes, other means of man-to-man defense etc. (form MB-7).

The cost of special equipment is covered with the linear method reasoning from the actual cost of the object and standards reasoning from the periods of the effective use of the object (par.24 of the Methodical Instructions). The period of the effective use of special equipment in affiliated companies is set by the permanent Commission individually for each type of special equipment.

The charge off the special equipment and working clothes is carried out in case of actual retirement (obsolescence, depreciation, selling, gratuitous assignment, investment in chartered capital of other companies, disposition in case of an emergency etc.).

5.8.14. The charge off the inventory delivered under the contract of donation or gratis is carried out on the basis of the basic document on the release of materials (the blading on the release of materials, of form M-15, the instructions on the release of materials or the order on the release of materials and "the Act of gratuitous reception- assignment of the inventory" (Appendix № 2 to the present Regulation). The materials are charged off in accordance with par.5.8.11 of the present Regulation. The cost of the donative materials is referred to the finance results of non-realized expenses (par.12 PBU 10/99 "The expenses of the Company" from 06.05.1999 № 33n, par.132 of "The Methodical Instructions on the inventory accounting" from 28.12.2001 № 119n (version of 23.04.2002).

5.8.15. Actual reserves of coal, mazut and other stock of materials are created according to the standards, confirmed by the directors of the Company. It is connected with the seasonal nature of production and energy supply.

5.8.16. The inventory, unloaded by the supplier and had not been delivered at the stores of the Company, which became the property of the Company (regardless of the fact of payment), is mentioned as the inventory that was not delivered at the end of the month.

5.8.16. The reception and posting of the materials is carried out by putting on the documents of the supplier a stamp with essential elements of the posting order (account, blading) (par.49 of "the Methodical Instructions on the inventory accounting" from 28.12.2001 №119n (version of 23.04.2002) and not by the drawing up the posting order (form M-4) if there is no discrepancy between the data of the supplier and actual data (quality and quantity).

5.8.17. The reception, storing, control and issue of ethyl alcohol is carried out in order provided by " Instruction on reception, issue, transportation and control over ethyl alcohol", confirmed by the Ministry of

food industry of the USSR 25.09.85 (from here- Instruction). This Instruction covers all the types and kinds of ethyl alcohol regardless of the way of its purchase and the purpose of further use.

The reception and posting of ethyl alcohol is carried out in anhydrous calculus (in decalitres) on the basis of the Act of the form № P-24 "About the shipping and acceptance of ethyl alcohol" (Appendix № 7 to the Instruction) with the glance of data about the actual quantity of ethyl alcohol, received as a result of measuring conducted by the company officials and mentioned in the section of the Act.

The issue of ethyl alcohol to production departments and laboratories is carried out in accordance with par.2.1. of the Instruction and drawn up as a requisition according to form № P-29 (Appendix to the Instruction).

The results of acceptance and issue of ethyl alcohol carried out on the basis of corresponding posting and expenses documents are fixed in the log book of the measuring of ethyl alcohol according to form № P-23 (Appendix №4 of the Instruction), conducted by the official who is responsible for the acceptance, issue and storing of ethyl alcohol.

In accordance with the requirements of par. 2.6. of the Instruction production departments and laboratories keep records of supply and consumption of ethyl alcohol every day in the book where they fix the name and the number of industrial operations and analysis, the quantity of consumed ethyl alcohol for each operation and for a day.

The rest of ethyl alcohol at the beginning and at the end of the month is shown according to the inventory taking, that is conducted in accordance with section 6 of the Instruction on the first day of each month. The results of the inventory taking are drawn up as the acts according to form №P-27 (Appendix № 21 to the Instruction).

The declarations "About the volume of output and circulation of ethyl alcohol out of food raw material" are shown quarterly by the Company to the rating authorities and executive authorities, granted a license of this type activity, according to appendixes 2 and 7 to the Resolution of the Government of RF from 25.05.99 № 564 "About the approval of the Regulation on avowal of the production and circulation of ethyl alcohol, alcoholic and spirit-based products".

5.9. Account of financial investments.

5.9.1. The account of financial investments in the Company is carried out in accordance with PBU 19/02 "Account of financial investments", confirmed by the Order of the Ministry of Finance of RF from 10.12.2002 № 126n.

5.9.2. The financial investments of the Company include (par.3 PBU 19/02):

- *state and municipal securities, securities belonging to other companies, including debt securities which fix the date and the cost of acquittance (bonds, bill of credits);*
- *investments in the authorized (pooled) capitals of other companies (including subsidiaries and dependent companies);*
- *loans granted to other companies;*
- *deposit investments in lending agencies;*
- *accounts receivable acquired on the basis of assignment;*
- *investments under the contracts of joint venture etc.*

5.9.3. Accounting of financial investments is carried out on account 58 "Financial investments" with the division of the investments on short-term and long-term, according to the application date (maturity date) and the intentions:

- long-term investments, when the schedule data of the application (maturity) date is more than one year or the investments are made to collect revenue for more than a year;

- short-term investments, when the schedule data of the application (maturity) date is less than one year or the investments are made without the intention to collect revenue for less than a year.

5.9.4. Financial investments are taken on accounting at original cost. The original cost of financial

investments, purchased subject to payment, is the sum of actual expenses of the Company for their acquisition, except for value added tax and other compensated taxes (except cases provided by the Legislation of RF about taxes and tallage).

Actual expenses for acquisition of assets in the capacity of financial investments are:

- *the sums paid to a salesman in accordance with the contract;*
- *the sums paid to the companies and other persons for information and consultation services connected with the acquisition of the mentioned assets;*
- *the bonuses paid to mediator companies or another person through whom the assets were bought in the capacity of financial investments;*
- *the expenses of the received loans and lending, made before financial investments are taken on account, at the acquisition of financial investments at the expense of borrowed current assets (par.15 PBU 15/01 "Account of loans and lending and the expenses for their operation" confirmed by the Order of the Ministry of Finance of RF from 02.08.2001 № 60n);*
- *other expenses connected with the acquisition of the assets in the capacity of financial investments.*

Actual expenses for the acquisition of the assets in the capacity of financial investments are defined according to the differences in sums if the payment is in rubles and makes the sum equivalent to the sum in foreign currency, before the assets in the capacity of financial investments are taken to the account.

5.9.5. The original cost of finance investments made in the chartered capital of other companies is the pecuniary valuation, coordinated among the founders (members) of the companies, if nothing else is provided by the Legislation of RF.

At payment of the deposition in the chartered capital with non-monetary funds on account 58 "Financial investments" the depreciated cost of transferred objects is mentioned. At the reception of the deposition in the chartered capital with non-monetary funds on account 80 "Chartered capital" the pecuniary valuation of the transferred objects coordinated by the founders is mentioned; account 58 "Financial investments" of the founder and account 80 "Chartered capital" of the receiving party will have different cost valuation.

5.9.6 The original cost of the loans given to other companies is the sum of actual transferred monitory funds or the book cost of the property, if the loan presents the property (non-monetary funds).

5.9.7. The original cost of the financial investments, deposition under the contract of joint venture is the pecuniary valuation coordinated by the partners of the joint venture.

5.9.8. The original cost of the financial investments acquired under the contracts providing for discharge of obligations (payment) with non-monetary funds is the cost of assets, transferred or being subject to transfer by the Company.

The cost of the assets , transferred or being subject to transfer by the Company, is set reasoning from the price that is fixed by the Company for setting similar costs in similar circumstances.

If it is impossible to set the cost of the assets transferred or being subject to transfer by the Company, the cost of the finance investments received by the Company under the contracts providing for discharge of obligations (payment) with non-monetary funds is set reasoning from the cost of acquisition of similar finance investments in similar circumstances.

5.9.9. The original cost of the financial investments received gratis such as securities is:

- the current market cost on the day of the taking on account. The current market cost of securities is their market price calculated in accordance with established procedure by the trade organizer at the equity market;

- the sum of pecuniary valuation that can be received as a result of received securities sale on the day of their taking on account – for the securities which are not taken into account when the trade organizer at the equity market does not calculated the market price.

5.9.10. The financial investment which help to set in accordance with established procedure the current market cost are mentioned in accounting at the end of fiscal year at the current market cost by the adjustment of their valuation on the previous fiscal date. The mentioned adjustment is carried out quarterly.

The difference between financial investments valuation at the current market cost on the fiscal date and the previous financial investments valuation is referred to the financial results (composed of operational receipts and expenditures).

Financial investments which do not set the current market cost are mentioned in accounting on the fiscal date at the original cost.

If on the fiscal date the current market cost of the object of financial investments, earlier valuated at the current market cost, the current market cost is not set, such an object of financial investments is mentioned in accounting at the cost of its last valuation.

5.9.11. The original market cost of debt securities which do not set the current market cost is not made into the principal value (par.22 PBU 19/02 "Account of financial investments" dd. 10.12.2002 № 126n).

5.9.12. At the retirement of the asset, taken on accounting in the capacity of financial investments, that does not set the current market cost its cost is defined reasoning from the original cost of each unit of the accounting of financial investments (par.26 PBU 19/02).

5.9.13 At the retirement of the assets taken on accounting in the capacity of financial investments, which define the current market cost, their cost is defined reasoning from the last valuation.

5.9.14. The valuation of financial investments by the end of the fiscal period is carried out at the original cost of each unit of the accounting of financial investments and at the current market cost (par.32 PBU 19/02).

5.9.15. According to par.6 PBU 19/02 in the analytical account the following information about state securities taken on accounting and securities belonging to other companies is given:

- *name of the Issuer (Company);*
- *name of the securities;*
- *number, series etc.;*
- *nominal price;*
- *buying price;*
- *expenses for the acquisition of securities;*
- *total amount;*
- *date of purchase;*
- *date of sale and other retirement;*
- *storing place.*

5.9.16. At the creation of a reserve on the devaluation of financial investments to carry out a regular supervision and check out of the financial investment's cost on availability of a devaluation signs of the intermediate accounting report by the reporting date (par. IV PBU 19/2). The newly created reserve (fund) shall be approved by the Deputy general director on the corporate governance.

5.10. Creation of the reserves of the doubtful debts.

5.10.1. Due to the results of the inventory of accounts receivable spent at the end of the reporting year, the reserves of the doubtful debts on the settlement with debtors together with transfer of sum of the created reserves to the debit of the account 91 "Other profits and losses" in the structure of operational expenses in correspondence with an account 63 "reserves of doubtful debts" (par.11 PBU 10/99) are creating.

Amount of the reserve shall be defined singly by every doubtful debt according to the financial situation of the debtor and valuation of a possibility of the debt charging off in full volume or partially and is restricted by the Company's financial abilities.

Doubtful debt shall to be recognized a debt of debtors, if such a debt was not paid off in terms stipulated by the contract provisions and was not ensured by a pledge, mortgage, bank warrantee.

The accrued reserve shall to be transferred to the losses cover caused by the doubtful debts.

As a doubtful debt shall to be recognized a debt with the expired period of limitation of action of where the liability was terminated due to impossibility of its execution according to the act of the State authority of due to the Company's liquidation.

The sum of reserves of the doubtful debts not used in the reporting period shall be joined to the profits of the reporting period by the recoding to the credit of account 91 "Other profits and losses" in the structure of other operational profits in correspondence with the account 63 "Reserves of the doubtful debts",

5.11. *Account of the foreign currency transactions and payments in conventional units.*

5.11.1. The property and liabilities which cost is expressed in a foreign currency, are taken on accounting in ruble valuation converted according to the rate of exchange of the Central Bank of RF on the date of the conducting of a transaction; for drawing up of the accounting – according to the rate of exchange of the latest in the accounting period quotation of rate of the Central Bank of RF (par.3, 6 PBU3/2000 "Accounting of assets and liabilities whose cost is expressed in foreign currency" (approved by the Order of the MF RF dd. 10.01.2000).

5.11.2. The ruble valuation of the property (fixed assets, intangible assets, long-term securities, inventory) purchased at foreign currency and posted at the original cost or at the sum of actual expenses for the purchasing (par.9 PBU 14/2000) is not counted over at the drawing up of the accounting.

5.11.3. The differences in rates of exchange arisen as the difference between the ruble valuation of the property or the liability which cost is expressed in a foreign currency calculated at the rate of exchange of the Central Bank of RF on the date of the discharge of liabilities of payment or on the reporting date of the drawing up of the accounting for the reporting period, and the ruble valuation of the property or the liability calculated at the rate of exchange of the Central Bank of RF on the date of the taking them on accounting in the reporting period or on the reporting date of the drawing up of the accounting for the previous reporting period, are referred to on account 91 "Other profits and losses" in the list of non-disposal revenue (expenses) as far as they appear (par.13 PBU 3/2000).

5.11.4. The differences in sums arisen at the settlement for the inventory, performed work, services rendered which cost is expressed in conventional units are included in the expenses for purchasing of the mentioned assets and reflected on the accounts of the inventory and expenses account till the moment of their posting. The differences in sums arisen after the posting of the inventory, performed work, services rendered are referred to on account 91"Other profits and losses" in non-disposal revenue (expenses) as far as they appear.

5.11.5. The differences in sums arisen at the settlement with the banks at the purchase (sale) of a foreign currency at the rate of exchange different from the rate of the Central Bank of RF is referred to on account 91"Other profits and losses" in non-disposal revenue (expenses) as far as they appear.

5.11.6. The differences in sums arisen at other taking (fines, penalties, forfeits), connected with the implementation of the economic contracts, are referred to on account 91 "Other profits and losses" in non-disposal revenue (expenses) as far as they appear

5.12. *The account of the transactions on the settlement accounts.*

5.11.1. The settling with debtors and creditors is reflected by each parties in the accounting in the sums from the entries and acknowledged by the Company as the correct ones.

The sums on the settling with the banks and the budget are coordinated with the applicable companies, the reservation of the undetermined sums on the balance is not admitted (par.74 of the Regulation on the bookkeeping of RF (the Order of the Ministry of Finance of RF from 29.07.1998 №34n).

The sum on settling with banks, budget reflected in the accounting report shall to be coordinated with the corresponding institutions and be identical. Conservation on the balance sheet of the not adjusted sums on these settlings are not admitted (par. 74 of the Regulation on the bookkeeping of RF (the Order of the Ministry of Finance of RF from 29.07.1998 №34n).

5.12.2. The settling with debtors and creditors is reflected on the applicable accounts provided by the Unified work plan of the accounts of bookkeeping of the Company in accordance with the requirements of timeliness and comprehensiveness of the accounting.

5.12.3. In accordance with the admission of time certainty of economical activity facts, the accounts receivable and the bill payable are created in the current accounting in the reporting period when the applicable facts of the economical activity took place, regardless of the actual time of intake or pay-out of the monetary funds connected with these facts (par.6 of the Regulation on the accounting "Account policy of the Company" PBU 1/98 (the Order of the Ministry of Finance of RF from 09.12.1998 № 60n).

5.12.4 The sums received from the customers in the form of Available Funds are reflected on account credit of the applicable control of account 62 "Settling with buyers and customers".

5.12.5. The discharge by the discount of the counter claim (art.410 of CC of RF) is defalked on the following terms:

- *the actual existence of counter debts, admitted and unchallenged by the parties;*
- *the uniformity of the counter claims, that means the comparability of the debts and the possibility of bringing them to the equivalent (pecuniary valuation);*
- *the date of the discharge of liabilities has come, or it is not indicated or fixed by the moment of claiming;*
- *the absence in the text of the contract of the term about the inadmissibility of the discount sequential from this contract.*

5.12.6. With a purpose of accordance of verification deeds with the contractors o the requirements of the court practice, also to get possibility to use is as an argument in the court, the deed of verification must contain information on the essential elements of the initial accounting documents (invoice, payment order, deed of performance of works, deed of rendering services etc.) and essential elements of the invoices.
He deed of verification must contain information on the contract under which the mutual payments were performed (including number and date of the contract, if otherwise is not provided by the chartered documents in accordance with the legislation , registered office of the contractor (place of the State registration of legal entity), also the date of drawing up and subscribing of the document by the persons authorized to subscribe the deed of verification (Appendix 2).

5.12.7. 6. The discount of the mutual claims is defalked both by the agreement of the parties and on the unilateral basis with informing of the other party, after the revise of the mutual debts and drawing up of the act of the account revise (in the optional form specifying all the requisites needed for the mutual discounts), signed by the plenipotentiaries of the parties. (Appendix 2).

If the amounts of counter debts differ, the debt which amount is bigger is discharged only in an applicable part, all the rest remains without changes.

5.12.8. Reasoning from par. 5.12.5, 5.12.7. of the present Regulation the suppliers liabilities discounts which are not grounded by calculated-paid documents (non-invoiced delivery) are not defalked till calculated-paid documents are received and the factual rate of the accounts payable is defined on their basis.

5.12.9. The discounts are not defalked if by the application of the alter the term of actional prescription is subject to the claim and this term is expired (art.411 of CC of RF).

5.12.10. The change of the persons in the liability under the assignment contracts is reflected in the accounting in the following way:

- *on the assignment of debt to the Company and affiliated companies, for example of the debtors-energy consumers to the affiliated company Energosbyt, the original debtor is substituted for a new debtor if the Company agreed to assign the debt with the reference to the requisites of the principal contract and the requisites of the assignment agreement (par.1 art.391 of CC of RF). The energy debt is reckoned in corpore in the new debtor account, it means that the original liability is not considered to be fulfilled;*
- *on the assignment of debts by the Company to the other person, the Company debt to the creditor is cut off. The Company debt to the creditors is written off if the creditor agrees to assign the debt to the new debtor with the reference to the requisites of the principal contract and the requisites of the assignment agreement;*
- *on the assignment of debt of the Company or its affiliated companies to the new creditor, it's reflected in the accounting only after the debt notification of the assignment of debt of the original creditor to the new creditor had been received. The accounts payable to the new creditor is still reckoned in corpore in the account of the Company, it means that the original liability is not considered to be fulfilled;*
- *on the assignment of debts by the Company to the other person, the accounts receivable to the Company are cut off. In the account the accounts receivable on the interests are reflected as a record on debit of the applicable control account of account 62 ""Settling with buyers and customers" in the correspondence with the applicable control account of account 91 "Other profit and losses". The debt of the previous debtor is written off from the balance of the Company at the assignment in accordance with the terms of the assignment contract as a record on debit of the applicable control account of account 91 "Other profit and losses " with the simultaneous charge of VAT to be paid in the budget (ch.21 art.167 par.3 of IRC of RF; art.382 par.2 of CC of RF).*

5.12.11. The own, bank and third party's bills of credit are used in the accounts only through the executive body of the Company.

5.12.12. The drawn own bills are reflected in the accounting on account 60 "Settling with suppliers and contractors" in the applicable analytics in the inner correspondence or in the correspondence with debit of account "Internal accounts on current transactions" of the affiliated company, that received the bill to meet the accounts payable.

The affiliated company received the aviso of the executive apparatus on the bill of credit issue , shall to withdraw accounts payable.

The handing over of the own bills in pawn to discharge a liability to the creditors is reckoned on the off-balance account 009 "Discharge of liabilities and payment security" with the analytical breakdown of the pawnbrokers.

5.12.13. The acquired bills (own debtors' bills) are reckoned in the accounting at bill sum with a glance of the interests owed according to the issue of bill terms under debit of account 62 "Settling with buyers and customers" in the applicable analytics in the inner correspondence or in the correspondence with account 79 "Internal accounts on current transactions" of the affiliated company, that received the bill to meet the accounts receivable. On getting the aviso of the executive body about the bill acquisition to pay the accounts receivable the affiliated company withdraws the accounts receivable, the applicable sums of VAT on shipment are transferred to the balance of the executive body of the Company.

5.12.14. The handing over of the acquired bills (own debtors' bills) to pay the accounts payable is reflected in

the accounting as a sale of rights of property by a record on debit of account 62 "Settling with buyers and customers" of the applicable control account in the correspondence with account 91 "Other Profits and osses " of the applicable control account. The accounts receivable to the Company or its affiliated companies, the bill was acquired to pay for, is written off from the balance by the record on account credit 91 "Other profits and losses" of the applicable control account .

5.12.15. The acquired bills , including the bills acquired under the endorsement (bank and third party's bills) are reckoned at the rate of actual expenses for acquirement (acquisition) defined in accordance with par.5.9.4. of the present Regulation under debit of account 58 "Financial investments" on the applicable control account in the correspondence with the applicable control account of account 76 "Settling with various debtors and creditors".

If the bill is received to pay the accounts receivable to the Company or its affiliated companies, the accounts receivable is liquidated by the record on the applicable control account of account of the accounts receivable in the correspondence with debit of account 76 "Settling with various debtors and creditors" which reckons the accounts payable for the received bill ..

If such a bill pays the accounts receivable of the affiliated company, the record is made on debit of control account of account 76 "Settling with various debtors and creditors" which reckons the bill payable for the received bill in the correspondence with account 79 "Internal accounts". On getting the aviso the affiliated company withdraws the accounts receivable by the record on account credit of the account of the accounts receivable in the correspondence with account 79 "Internal accounts"

5.12.16. The handling over of the bank bill or the third party's bill to pay the bill payable is reflected in the accounting as the property sale by the record on debit of account 62 "Settling with buyers and customers" of the applicable control account in the correspondence with the applicable control account of account 91 "Other profits and losses".

The withdrawal of the bill payable is carried out by the record on debit of accounts of the account of the bill payable in the correspondence with the applicable control account 62 "Settling with buyers and customers" .

5.12.17. The retirement of the bank bills and third party's bills from the balance at their submission to the maker for payment is reflected in the accounting under account credit 91 "Other profits and losses " of the applicable control account in the correspondence with the applicable control account of account 76 "Settling with various debtors and creditors".

5.12.18. The accounts receivable with the expired term of actional prescription as well as other debts, unreal for the collection, are written off from the balance .

Debt amortization is carried out on the basis of the act of debt inventory taking, the written reasoning, the order of the director of the Company on each liability at the expense of the present reserve of the shady debts, if it's not enough it is referred to the list of non-disposal expenses (par.12 PBU 10/99 confirmed by the Order of the Ministry of Finance of RF from 06.05.1999 №33n).

The written debt reasoning includes the index of the full name of the debtor, including legal form; the ground, sum and the date of debt origin with the reference to the basic account documents; the ground for the debt amortization with the reference to the rules of law with the vouchers attached:

the copies of the basic account documents (contract, payment order, invoice, deed of works fulfillment (rendered services) , agreement (notification) on set-off etc.);

at the settlement of a debtor being a legal entity - the extract from the unified state list of legal entities, containing information on a liquidation; and in case of settlement of a debtor being a natural person – his death certificate if the legislation in force does not provide succession;

at the failure (bankruptcy) of a debtor - resolution on competitive production termination, or report of the arbitrage manager on a failure to satisfy the creditor's claims;

other documents proving the impossibility of debt collection (the act of state authority etc.).
Affiliated companies need to keep the basic account documents in original within 5 years from the date of the Order on debt amortization.

Debt amortization in sum up to RUR 1500 according to one liability with all necessary documents present, is carried out under the order of the director of the affiliated company complying the provisions stipulated by the par. 5.12.18 of this present Order.
The accounts receivable written off in view of debtor's insolvency are reflected in the balance sheet during 5 years since the moment of amortization to observe the possibility of its collection in case of debtor property status change.
The terms of actional prescription are fixed on the basis of art.195-208 of CC of RF. The term of actional prescription is interrupted by the filing of a claim in accordance with established procedure as well as by the actions of the person under obligation which prove the acknowledgement of debt. After the break the term of actional prescription opens again, the time before the break is not included in the new term. (art. 204 CC RF).
The agreement of the parties, the acknowledgement of debt out of the terms of actional prescription as well as the change of persons under obligation can not be the ground for the change of the term of actional prescription and the procedure of its calculation.

The account of accounts receivable is organized according to the terms of actional prescription to observe art. 2 of FL dd. 22.07.2005 №119-FL "On modification to the paragraph 21 of TC of RF and on recognizing as void the single provisions of legislation of RF on taxation".

5.12.19. The amortization from the balance of the unclaimed bill payable and depositor debt with the expired term of actional prescription and under other grounds is carried out at the written permission of the director of the Company (affiliated company) including the index to of the ground, sum, date and legal deeds adjusting the ground of write-off.
Also, amortization from the balance of the unclaimed bill payable and depositor debt with the expired term of actional prescription and under other grounds is carried out at the written permission of the director of the affiliated company according to the standards art.195-208 of CC of RF.

Affiliated companies shall to keep the originals of the aforementioned documents, as the documents certifying assumpsit of debt by the creditor and break-off the terms of actional prescription too early (two-party deed of verification, letter of warrantee, reply the claim etc.) within 56 years from the date of the Order on a debt depreciation.
The sums of the accounts payable written off are referred to account credit 91 "Other profit and losses" in the list of extraordinary revenues.
The sums of VAT on the bill payable written off are reckoned in the accounting and referred to debit of account 91 "Other receipts and expenditures" in the list of extraordinary expenses.

5.13. Calculation of expenditures on production.

5.12.1. Calculation of expenditures on production shall be carried out in accordance with issue II of Provisions on accounting "Company's expenses" (PBU 10/99 (Order of MF of RF № 33n dd. 06.05.1999 . ed. dd. 30.03.2001))

5.13.2. Calculation of expenditures and calculation of the outputted energy net cost shall be carried out in separate electric plants, electric networks and in energy system as whole.
Full net cost of energy is formed by way of summation of net cost of production by electric plants, net cost of transfer and distribution in electric and power networks, cost of purchased electric power and expenses on the executive body's maintenance including expenses on management of technological process and maintenance of the separate subdivisions on energy selling.
Full net cost of effective output of electric and heat energy to consumers is an object for electric and heat energy net cost calculation.
Calculation units are 1 kw/h and 1Gcal of the effectively outputted electric and heat energy.

5.13.3. Calculation of expenditures on production and calculation of real net cost of production shall be carried out by traditional calculation way with direct expenditure accounts (20, 23,29) and indirect (25, 26). Calculation of indirect expense's accounts shall be closed in debit of accounts 20 (23) with further calculation of full real production net cost of the produced items every month.

5.13.4. Expenditures accounted on account 25 "Common production expense" shall be charged-off fully on account 20 "General production" and on account 23 "Auxiliary process" to the proper with their simultaneous distribution between the calculation's objects at the end of month:

- *at the power stations proportionally to the standard fuel level, here expenditures of the plants participated in output of only one type of energy shall be fully referred to this type of energy;*
- *calculation of net cost of production of auxiliary productions - proportionally to the basic salary of employees.*

Common economic expenses (except abonent payment for RAO network's using) on maintenance of the executive body including expenses on maintenance of Energy supply shall be distributed between electric and heat energy proportionally to production expenditures of electric plants and networks.

Expenditures accounted by the subsidiaries on account 26 "Common economic expenses" shall be referred to account 20 "General production", also to account 23 "Auxiliary process" and to account 29 "Auxiliary process and economy" at the end of month in cases of manufacture or production, services and works fulfillment abroad or to other subsidiaries simultaneously their distribution between the objects of calculation:

- *calculating of net cost of production of auxiliary processes shall be referred proportionally to the shop cost of production, works and services. Thus the sum of common economy expenses accounted for production, works and services of the auxiliary and service shops (production) shall be defined due to this share of common economy expenses related to their direct production;*
- *rest part of common economy expenses shall be refereed fully to net cost of general manufacture production (expenses on maintenance of design, technological departments and background of department's manufacture, expenses on maintenance of production laboratories, cost of different tests, researches and experiments subject to general manufacture; expenses concerned rationalization and research on general production; expenses concerned the employee's training and further training for general production; expenses concerned maintenance of watch and fire prevention; expenses concerned payment of land tax, non productive expenses concerned manufacture and supply of general production and other same expenses). Common economy expenses shall be distributed between electric and heat power proportionally to their shop net cost;*

- common economy expenses on services rendered by auxiliary process and auxiliary production and economy (internal consumption by the subsidiary) are not referred.

5.13.5. Net cost of electric power transfer (transit) through the corresponding voltage range shall be defined by product of actual net cost of electric power transfer on corresponding voltage thought electric power plants and Energy Supply and by volume ratio of outputted energy under the transit contract on corresponding voltage to the total volume of corresponding voltage output through the network (except overflow balance to other plants) including electric power outputted under the transit contract in accordance with actual balance of electric power in the networks BH, CH1, CH2, HH.

5.13.6. Finished product (account 43) shall be reflected in accounting on actual production cost.

5.13.7. Expenses concerned production supply accounted on account 44 "Expenses on sale" shall be charged-off fully on account 90 "Sales" in reporting period (par. 9 PBU 10/99).

5.13.8. Expenses incurred in the reporting period but concerned the further reporting periods shall be reflected

as future expenses (account 97):

- *holiday pays charge to the next month:*
- *subscription publication's expenditures;*
- *insurance payment charge;*
- *other expenses and payments with further equal charge-off in the related period.*

5.13.9. Expenditures on usual activity shall be classified as in articles , as in elements (par. 8 PBU 10/99).

5.13.10. Expenditures of department on stuff training of the Stuff management department shall be accounted on account 26 "Common economy expenses" separately with further transfer to subsidiaries through account 79 "Intraeconomic payments" in amount of actual expenditures distributed proportionally the volume of rendered works and services.

5.13.11. Expenses on equipment of sanitary-accommodation premises, medical premises, rooms for repose and psychological relaxation, creation of sanitary posts furnished with medicine chests composed of medicine sets subject to initial care etc., provided by the legislation in force, shall be accounted on account 25 "Common productive expenses" according to the fixed norms.

5.13.12. Expenses on preparation and holding of civil defense actions shall be accounted on account 26 "Common economic expenses" (Provisions of the Government №227 dd. 16.03.2000 "On reimbursement of expenses caused by preparation and holding of civil defense actions").

5.13.13. Accounting of expenses on energy transfer at the energy plants shall be carried out apart of accounting of expenses on energy output on the separate subaccount 20.5 "Expenses on heat energy transporting".

Calculation of the transfer net cost shall be accounted apart of electric and heat power production as the separate activity.

5.13.14. Expenses caused by the stuff training:
training cost;;
fare to the place of training;
renting expenses;
daily (travel) allowances for further training (education) of the employee.

5.14. Accounting of operations in electric power sale and purchase at the wholesale market.

5.14.1. In accordance with the sectoral features, electric power purchased at the adjusted sector of wholesales market shall to be included in the electric power net cost and reflected in the book-keeping on the debit of account 30 'Major production" and credit of account 60 "Settlements with suppliers and contractors".

5.14.2. Operations in electric power purchase at the free wholesales market are reflected on the debit of account 41 "Goods" in the book-keeping. Electric power loss caused during its transfer through the power networks are reflected on the account 44 "Purchase expenses". Electric power sales shall be reflected on the credit of account 41 "Goods" in correspondence with the debit of account 90 "Sales".
Services in organizing of a trade system of the wholesales market functioning shall be reflected on the account 44 "Sales expenses" together with further its write-off on the account 90 "Sales".

5.14.3. Electric power purchased at the free market sector shall be transferred to the net cost of the basic electric power shoed in the form №2 "Profit and losses report" in the book-keeping.
5.14.4. Proceeds from electric power sold at the free market sector , in aggregate of all the contracts, shall be reflected in the book-keeping report in the form №2 "Profit and losses report" in the line 015 of the other

goods, products, works and services of industrial nature.

Net cost of electric power sold from the plants shall be calculated due to fuel component of power production at the each power plant and shall be reflected in the form №2 "Profit and losses report" in the line 025.

Expenses on the purchased electric power in the free trade market sector are not provided by a share of economic charges.

5.15. Features of the Company's profits and losses forming

5.15.1. The Company's profits on usual activities are the following:

- *proceeds from electric and heat power sale;*
- *proceeds from increased pay to the rate on reactive power compensation (tangent Fe);*
- *proceeds received for nonrecoverable condensate;*
- *proceeds from makeup and chemical treated water sales;*
- *proceeds from other finished production of auxiliary process sales;*
- *proceeds from agricultural production sales;*
- *proceeds from rendered works (services) of industrial nature (including transit);*
- *earnings concerned temporary use of the Company's assets under the Lease contracts against payment (temporary use and possession).*

5.15.2. Profits on usual activity shall be defined as difference between the earnings on sale of goods, products, works and services according to the current costs and rates on electric and heat power except VAT and expenses on their production and sale approved by REC.

5.15.3Extraordinary profits of the Company shall be declared the following types of penalties, fines and forfeits against the violation of the contract's terms and provisions;

- *electric power capacity excess;*
- *energy consumption contracted size's excess;*
- *energy consumption contracted size's underexploitation;*
- *unauthorized electrical installation's launching;*
- *excess of the fixed by the contract maximum hourly demand of heat energy;*
- *unauthorized water pumping;*
- *excess of the contacted volume of heat energy consumption;*
- *underexploitation of the contracted volume of heat energy consumption , and are reflected on the account 91 'Other profits and losses" in the moment of profit acceptance;*
- *misinformation on instrumentation indications;*
- *seals removing.*

5.15.4. Social oriented expenses, i.e. additional payment to pensions, incentive pays, expenses on health-improving measures, compationate activity, maintenance of objects of social sphere and other similar expenses shall be deemed as other extraordinary expenses and shall be reflected on account 91 "Other profits and losses".

5.15.5. Sum differences over the payments with debtors-buyers arose this reporting period shall be referred to the earning increasing due to sale.

Sum differences arose after the reporting period shall be deemed as profits (losses) of the last years revealed in the reporting period in the result of re-calculations with counteragents and shall be reflected in composition of other extraordinary profits (losses) on account 91 "Other profits and losses".

5.15.6. Interests on the commercial credit granted to the buyer (customer) by the Company on terms of delay of payment including collateral note received from the customer shall be deemed as other extraordinary profits and shall be reflected on account 91 "Other profits and losses".

5.15.7. Energy output to the needs of plants and networks shall be reflected in accounting in appraisal of:

- output to the technological and economy needs of the main and auxiliary processes according to the specially fixed rate without reflection in the sale's volume;

output to own capital construction and to the non industrial economy according to the fixed rates including reflection in the sale's volume.

Electric and heat power consumed by economic needs shall be included in the sale's volume but shall be transfer in aviso through account 79 "Intraeconomy payments" to subsidiaries without invoicing.

According to the "Standard instruction on electric power accounting under its production, transfer and distribution. RD 34.09.101-94 (approved by General State Energy supervision department of Russia (Glavgosenergonadzor of Russia) dd. 02.09.1994), the category of economic needs of energy system involves electric power consumption by auxiliary and non industrial processes being on the balance of electric plants and electric network enterprises obligatory to main production maintenance but not tied directly with technological processes of heat and electric power production at the electric plants, also transfer and distribution of electric power (nomenclature of energy consumption's elements to the economy needs of electric plants and electric networks is defined by the Letter of the Minenergo of USSR №B-6023 dd. 24.04.1980).

Electric power consumption to economic needs of energy system shall be included in the effective output subject to accounting as separate line in form of static report 46-ec "Effective output of electric and heat power" and shall be transferred to subsidiaries according to the special fixed rate.

Electric power consumption to heating, water supply and lighting of dwelling houses, canteens (if these expenses are reflected on b/account 29 "Auxiliary processes and economies"), hostels, hotels, clubs, tourist centers, preventoriums etc. shall not be included in economic needs of energy system.

Also consumers operated from the needs of plants and substations (sub-abonents)are not referred to the economic needs of energy system.

Energy consumed by windings of synchronous condensers and glaze fusion are not referred to the energy consumption to the economic needs of energy system. Aforementioned types of energy consumption form energy losses in electric networks.

Every month according to the reports of PTO of subsidiaries, Energosbyt (Energy supply) shall correct sale's volume on economic need's sum and hand over information on electric and heat power consumed by subsidiaries to economic needs in accordance with approved form "Appendix 2 to this present Provisions) to accounting department of the executive body:

Executive body shall transfer through aviso electric and heat power consumption to the economic needs to the subsidiaries every month. Sum received by the subsidiaries shall be reflected on expenditure accounts (Debit 20,23,25,26; Credit 79).

Heat power (makeup water and unreturned condensate (in tn.) shall be transferred to the subsidiaries through aviso with invoicing by Energosbyt (Energy Supply).

Coordination of parameters with the branch statistical report under the form 46-ES is not provided In the current annual and intermediate accounting. There is a reference to explanation of a reason of data divergence on sales volume with the accounting reporting in the statistical branch report.

5.16. Features of accounting of intraeconomic transactions between the affiliated companies

5.16.1. Operations on the property transfer to subsidiaries shall be reflected in accounting through account 79 "Intraeconomic payments", subaccount "Payments on allotted property" and shall be reflected in passive balance in the filed line 423 of part IV "Capital and reserves"

- any executed before the reporting date actions of other institutions, as a result of which the Company should receive indemnification which amount is a subject of trial ;

- liabilities for environmental protection;

- other analogical facts

5.22.3. Conditional fact of economic activity shall be reflected in accounting and reporting depending on probability of occurrence of its consequences by way of such consequences reflection in analytical and sinthetical accounting (par. 9-13 PBU 8/01) or by way of disclosure of corresponding information in the explanatory note (par. 14 PBU 8/01).

The company creates the funds due to existing liabilities of the company by the reporting date in case of ambiguity concerning an amount or a term of performance under conditions stipulated by the par. 8 of PBU 8/01.

5.22.4. Consequences of conditional fact of economic activity (conditional loss, conditional profit, conditional liability, conditional assets) shall be valuated in money terms on the ground of corresponding calculation according to the discretion requirements (par. 21 PBU 8/01).

Calculations shall be made by corresponding authorized Department (Service).

5.23. Information on affiliated persons.

5.23.1. In the annual accounting report in the explanatory note information on operations with affiliated persons shall be disclosed in cases provided by par. 7 of Provisions on accounting "Information on affiliated persons" PBU 11/2000 approved by the Order of MF RF №5n dd. 13.01.2000):

- *the company is under the control or affect of other institution of natural person;*
- *the company controls or affects other institution..*

5.23.2. Operations between the Company and affiliated person shall be deemed any operation concerned transfer of any assets of liabilities (par. 5 PBU 11/2000).

5.23.3. Information on operations between the Company and affiliated companies and between the affiliated companies composed the group of interrelated companies shall not be disclosed in the consolidated accounting report (par. 9 PBU 11/2000).

5.23.4. List of affiliated persons, information on operations disclosed in accounting report shall be created by the Company independently due to contents of relations between the Company and affiliated person including guidance of priority requirements of the contents to its form.

5.24. Segment Reporting

5.24.1. Information on operational and geographical segments shall be disclosed in the annual accounting report and explanatory note. Information on operational segments shall be deemed as primary information on the segments, as the secondary will be information on geographical segments.

5.24.2. The following activities are in the structure of operational segments (par. 7 Provisions on accounting "Information on the segments" PBU 12/2000 approved by the Order of MF RF №11n dd. 27.01.2000):

- *electric and heat power production;*
- *other activities, in case of disclose in the process of accounting that electric and heat power production composes less 75 % of the Company income (par. 10 PBU 12/2000).*

5.24.3. The following information shall be disclosed over the operational segments: (par. 21 PBU 12/2000):

- *sale's income;*
- *financial result;*
- *total balance amount of assets;*
- *total size of liabilities;*
- *total amount if capital investments in the fixed assets and non-material assets;*
- *total amount of amortization assignments under the fixed assets and non-material assets.*

5.24.4. In the structure of geographical segments shall be included foreign states in case of foreign-economic activity with them, with granting information on amount of sales profit in the context of geographical regions allotted on location of the sales markets on condition that size of sales profit of geographical segment is not less then 10% of sales profit in whole in the Company (par. 9, 22 PBU 12/2000).

5.25. Information on go out of business

5.25.1. Order of disclosure of information on go out of business, including resulted reorganization of the Company (in case of allocation, segregation) shall be carried out in accounting reports according to PBU

16/02 "Information on go out of business" approved by the Order of MF RF №66n dd.02.07.2002.).

7. Accounting policy for the purposes of International Financial Reporting Standards (IFRS)

7.1. General provisions

The account policy of the JSC "Kuzbassenergo" defines used during the preparation of the financial accounting definitions, acknowledgment criteria and principles of valuation of assets, liabilities, receipts and expenditures, methods of the reflection of the transactions, events and terms, as well as the judgments worked out by the management of the JSC "Kuzbassenergo", making a great impact on the sums, acknowledged in the financial accounting.

During the working out of the account policy in accordance with IFAS on the year of 2006, the JSC "Kuzbassenergo" was guided by all the acting at that time Standards, Interpretations, and Principles.

The account policy is drawn up on the basis of the admission of the consecutive usage of the chosen account policy from one fiscal period to another. The changes of the account policy are admissible only if they are required by any Standard and Interpretation, or if the given changes lead to more reliable and true information about transaction impact provided by the financial accounting, as well as the events or terms of the financial condition of the Company, its financial results or flow of cash assets.

The financial accounting of the JSC "Kuzbassenergo" according to IFAS 1 "Financial accounting" consists of:

- *sheet balance;*
- *profit-and-loss report;*
- *report on capital changes;*
- *report on cash flow*

notes which include a brief description of essential elements of the account policy and other explanatory notes.

7.2. Consolidation principles

Consolidated annual financial accounting includes the financial accounting of the JSC "Kuzbassenergo" and its subsidiaries (the Group)for the period from the start of the actual control till its actual ending.

7.2.1. Subsidiaries.

The control is supposed to be exercised when the JSC "Kuzbassenergo":
possesses directly or indirectly, through subsidiaries, more than 50% of voting stocks of the subsidiary; or possesses directly or indirectly, through subsidiaries, less than 50% of voting stocks of the subsidiary, but has the right to:

- *Define financial and operational policy of the subsidiary on the basis of the Articles or agreement;*
- *Appoint or dismiss the majority of the members of the committee of directors or similar authorities;*
- *Participate by a majority vote at the meetings of the committee of directors or similar authorities.*

The accounting of the subsidiaries which are under the Group's control is not included in the consolidated accounting of the Group if:
The control is supposed to be temporary as the shares of the subsidiary are taken up and kept only with the sale purpose in the nearest future; the activity of the subsidiary is influenced by tough long-term restrictions which decrease dramatically its potential to transmit assets of the associated company.
Financial investments into such subsidiaries are accounted as financial investments available for sales.
Assets and liabilities of all the subsidiaries are valuated at fair cost on the date of taking up. Minority interest is

reflected proportionally to the share in the fair cost of assets and liabilities of the subsidiaries.

Financial accounting of the subsidiaries is drawn up for the fiscal periods which are similar to the fiscal periods of the associated company. If it is necessary, the financial accounting of the subsidiaries can include adjustments to bring the used principles of the account policy in correspondence with the principles of the account policy of the Group.

During the preparation of the consolidated financial accounting, all the remains on calculation and transactions within the Group as well as non-realized receipts and expenditures arisen as a result of transactions within the Group are excluded.

7.2.2. Dependent companies.

A dependent company is a company which is under the influence but not control of the Group, as a result of participation in the financial and management decision making, and the Group has from 20% to 50% of voting shares.

Dependent companies are accounted by the share holding since the start and to the end of the material effect on this company.

The results of the activity of dependent companies are accounted by share holding method on the basis of their last financial accounting. The expenditures of dependent companies are taken to accounting in the consolidated financial accounting before the investment in such companies is written off up to zero. After that the expenditures are accounted only in the volume where the Group has liabilities on financial support to such dependent companies.

The current book cost of the investment in dependent companies present the cost of the acquisition including unamortized part of goodwill as well as the share of the Group in non-distributed profit, received after acquisition, and other changes in reserves which are the part of the owned capital of these companies. The current book cost of dependent companies is constantly revised and in case of devaluation, is decreased in the period when such circumstances are revealed.

Non-realized receipts and expenditures arisen as a result of transactions with dependent companies, are subject to exclusion proportionally to the share of the Group in the capital of dependent companies.

7.3. Methods and ways of valuation of the property and economic transactions.

7.3.1. Currency of measurement and currency of introduction.

The currency chosen as a unit of measurement as well as introduction in the consolidated annual financial accounting is Russian ruble. This reflects economic essence of the main principle of the activity of the Group and its economic transactions.

7.3.2. Transactions in foreign currency.

Transactions in the currency which is different from the currency of RF are referred to the transactions in foreign currency. Cash assets and liabilities of the Group expressed in foreign currency on the fiscal date are recalculated in rubles at the rate of exchange on this date.

Transactions in foreign currency are reflected at the rate on the date of the settlement of transaction. Receipts and expenditures arisen as a result of accounting on the data of transactions and during the recalculation of cash assets and liabilities expressed in foreign currency are reflected in the report on receipts and expenditures.

7.3.3. The use of valuations and admissions.

To prepare the present financial accounting in accordance with the requirements of the IFAS the management worked out the number of valuations and admissions referring to assets and liabilities, which are reflected in the present financial accounting as well as to the information disclosure about contingent assets and

liabilities. The actual results can differ from the given valuations taking into account uncertainty of valuations and admissions.

7.3.4. Financial instruments

Financial instruments reflected in the balance of the Group, include financial investment, given borrowing, trade and other accounts receivable, cash assets and their equivalents, received borrowing, trade and other account payable and derivative financial instruments.

Financial instruments originally are reflected at the fair procurement cost, and in case of financial assets or financial liability which are not valuated at the fair cost through profit or loss, transaction costs directly connected with the procurement or release of a financial instrument are also included.

Financial assets and liabilities are accounted in the balance opposite to each other, when the Group has a legal right to set-off or has an intention to conduct calculation at the sum of balancing of accounts.

A financial instrument or its part is written off in the financial accounting when the Group loses its rights or discharges liabilities connected with the given financial instrument. At the writing off of the financial asset, the difference between compensation received or accrued and the current book cost of the asset is admitted in the report on receipts and expenditures. At the writing-off of the financial liability, the difference between compensation received or accrued and the current book cost of the liability is admitted in the report on receipts and expenditures.

7.3.4.1. Financial investments.

Financial investments, except for the investments in subsidiaries and dependent companies, originally are accounted at the cost on the date of the settlement of transaction, which is equal to the fair cost of paid compensation and the costs on transaction in case of financial investments which are not valuated at the fair cost through profit or loss.

Financial investments are classified in the following way:

- *detained until paying off;*
- *valuated at the fair cost through profit and loss;*
- *available for sale.*

Financial investments in debt securities with fixed time to run, which the Group is intended and has the right to detain till the time to run, except for the given borrowing and accounts receivable, are classified as "detained till paying off". Securities, detained till paying off, are accounted at the amortized cost by the method of effective cost of money after deduction of devaluation reserves. Securities detained till paying off are reflected as non-circulating assets except for the cases when the paying off is expected to be carried out within 12 months after the fiscal date.

Financial investment in securities, acquired to earn profit as a result of short-term price range, is classified as "Meant for trade". Securities meant for trade are reflected as negotiable assets.

Any other financial investments except for giving borrowing and accounts receivable are classified as "available for sale". Financial investments available for sale are referred to negotiable assets if the management of the Group is intended to realize them within 12 months since the fiscal date.

Securities available for sale as well as for trade are reflected at the fair cost reasoning from market rates on the date of drawing up of the accounting, without taking into account costs which the Group may have during their realization or other retirement. Receipts and expenditures connected with the change of the fair cost of financial investments are reflected in the report on receipts and expenditures for corresponding period except for financial investments available for sale. The receipts and expenditures of the latest are reflected in the capital. When the market price can not be defined, the fair cost is defined reasoning from the valuations of the

Group.

7.3.4.2. Cash assets and their equivalents.

Cash assets include money in the cash office, money on the account current in banks, bank deposits and other money instruments with the time run not less than three months on the moment of procurement, and can be easily converted in the sum of cash assets and run the slight risk of cost change.

7.3.4.3. Accounts receivable

Trade and other accounts receivable is reflected in the sums presented to payment by contractors, with the deduction of the reserve for doubtful debts which is established if it is necessary.

The reserve sum for the doubtful accounts receivable is calculated on the basis of analysis of its discharge possibility.

Long-term accounts receivable on its original admission is reflected at the fair cost by discounting of all future cash flows at cost of money which is available to the Group on the moment of the original admission. The discounting sum is reflected in the Report on receipts and expenditures as the expenditure from the original admission of accounts receivable at the fair cost. The discounting sum is subject to depreciation during the entire conversion period and is reflected as interest yields in the Report on receipts and expenditures.

7.3.4.4. Account payable

Trade and other account payable is reflected at the nominal value. Long-term account payable on its original admission is reflected at the fair cost by discounting of all future cash flows at cost of money which is available to the Group on the moment of the original admission. The discounting sum is reflected in the Report on receipts and expenditures as the expenditure from the original admission of account payable at the fair cost. The discounting sum is subject to depreciation during the entire conversion period and is reflected as the costs on payment of interest in the Report on receipts and expenditures.

7.3.4.5. The given borrowing

The given borrowing is accounted at the amortized cost by the method of effective interest rate.

7.3.4.6. Credits and received borrowing

All the credits and borrowing originally are admitted at the fair cost of procurement with the deduction of transaction costs. After the original admission all credits and borrowing are reflected at the amortized cost by the method of effective interest rate.
Long-term credits and borrowing received or presented by the Group at the rates which are lower than market ones, on the original admission are reflected at the fair cost by discounting of all future cash flows at the market average cost of money for financial instruments on similar terms.

Borrowed funds which are subject to be discharged within a year from the fiscal date are reflected as short-term liabilities.

Borrowed funds which are subject to be discharged in more than a year from the fiscal date are reflected as long-term liabilities. The part of long-term account payable which is subject to be discharged within 12 months from the fiscal date is reflected as short-term liabilities.

Interests on credits and borrowing are reflected in the accounting by the charge method.
The part of interest unpaid on the fiscal date is reflected in the balance as other account payable.

7.3.5. Dividends

Dividends are admitted as liabilities and calculated from the sum of capital on the fiscal date only when they were declared (approved by shareholders) before the fiscal date inclusive. Dividend information is disclosed in explanatory notes to the financial accounting if they were recommended before the fiscal date as well as after the fiscal date, but before the date when the financial accounting is released.
The amount of non-distributed profit of the Group according to the Russian legislation can be aimed at distribution among shareholders and is defined on the basis of the financial accounting of separate companies which are included in the Group. These sums can differ dramatically from the sums calculated on the basis of the IFAS.

7.3.6. Fixed assets.

The objects of fixed assets are taken to accounting at the actual cost. The actual cost of the object of fixed assets acquired for payment includes the sum of actual costs of the Company on procurement, construction and production, except for the value added tax and other refundable taxes.
Economic and other similar costs are not included into actual costs on procurement, construction or production of fixed assets.
The change of the actual cost of fixed assets at which they were taken to accounting is admissible in cases of completion, reconstruction, modernization, partial liquidation and revaluation of fixed assets. The costs on reconstruction and modernization of the object of fixed assets after they are completed can increase the original cost of such an object if as a result of modernization and reconstruction originally accepted normative functioning indexes (term of usage, power, usage quality, etc) of the object of fixed assets increase.
Fixed assets are reflected in the accounting at the original cost defined on the moment of acceptance of the objects in the accounting and adjusted to the inflation index (consumer price index) calculated for the period from the moment of taking the objects to the accounting to 31.12.2002.
The features of economic obsolescence of fixed assets are defined on each fiscal date. If at least one feature is revealed the management conducts the valuation of compensative cost of fixed assets.
The following features can be regarded as economic obsolescence:
Dramatic changes in technological process of production, economic, legal sphere of activity of the Group;
the presence of obvious depreciation or defacement of the object of fixed assets or the group of the objects of fixed assets;
decrease of market prices for definite types of fixed assets and others.

Refundable cost is defined as the maximum of the fair cost with the deduction of the costs on asset sale and value of its usage (IFAS 36 "Depreciation of assets").
The fair cost with the deduction of the costs on sale is the price of asset in the sale contract in the transaction between well-informed and willing parties to settle such a transaction, with the deduction of additional costs directly connected with the retirement of this asset.
The value of the asset usage presents discounting cost of assumed (evaluative) future flows of cash assets the appearance of which is expected to be from constant asset usage and from its retirement at the end of the period of its service.

Book cost of fixed assets decreases to refundable cost, and the difference is reflected as expenditure (loss from economic obsolescence) in the Report on receipts and expenditures.
Costs on maintenance works, current and capital repairs are referred to the costs as far as they are arisen. All types of costs, which do not lead to the improvement of technical characteristics of fixed assets are referred to the costs on capital repairs.

Profit and losses arisen as a result of the retirement of fixed assets are reflected in the Report on receipts and expenditures as soon as they are arisen.

Depreciation on fixed assets is accrued by uniform charge during the period of effective use of a fixed asset.

The following periods of service are used during the depreciation accrual:

Type of fixed assets	*Terms of effective use (years)*
Fixed assets used at the production of heat and electrical energy	*50*
Fixed assets used at the transmission of electrical energy	*40*
Fixed assets used to distribute electrical energy	*40*
Fixed assets used at the transmission of heat energy	*25*
Other	*15*

State subsidies referred to the procurement of fixed assets are reflected in the balance by deduction to get the book cost of the asset. Subsidy is regarded as profit during the term of effective use of depreciated asset by deduction the rate of accrued depreciation referred to expenditures each period.

7.3.7. Intangible assets

Intangible assets are valuated originally at the cost price. The cost price of the acquired intangible asset includes: its buying price, import taxes and nonrefundable buying taxes, after the deduction of trade discounts and any direct costs on putting the asset into operation.

The computer software is accounted as intangible assets.

After the original admission the intangible asset is accounted at the cost price with the deduction of future depreciation and losses from it.

The method of uniform charge is used to distribute the amortized sum of the asset on the systematical basis during the term of its effective service.

Depreciation is admitted as a current expenditure. The term of effective use of the software makes 5 years.

7.3.8. Inventory holdings

Inventory is reflected at the lowest value: actual cost price or the price for possible realization.

The cost price includes the cost of fixed assets, custom duty, transport costs, cargo-handling cost, direct labor costs as well as corresponding part of indirect field cost and overhead charges.

The cost price is calculated by the method of weighted average cost.

The price for possible realization presents the assumed sale price with the deduction of all costs on completion, promotion and production distribution.

The Group valuates from time to time its holdings to reveal goods obsolescence and if it is necessary forms the corresponding reserve.

7.3.9. Profits tax

Profit tax accrued for a year includes sums of current and deferred tax.

Current profits taxes are accrued in accordance with the Legislation of Russian Federation. The account is based on financial results for the year with the account of the articles which do not increase or decrease the taxation base. The current tax which is subject to be paid is accrued on the basis of the sum of taxable profit for the year and rates, active in the fiscal period, and is adjusted on the tax sums which are subject to be paid for previous years.

The deferred tax is calculated by the balance method and accrued on the differences between the taxation base of assets and liabilities and their current cost, reflected in the financial accounting. The deferred tax liabilities are reflected concerning all the differences increasing taxable profits. The deferred tax requirements are reflected to the extent of the possibility of earning taxable profits sufficient to cover non-accepted tax requirements and tax credits which were not used. The deferred tax assets and liabilities are taken to accounting when they are referred to profits taxes collected by one rating authority, and the Group is intended to to account its current tax assets and liabilities.

The deferred profits taxes are calculated by the tax rates which will be used in the next fiscal period. They are reflected in the Report on receipts and expenditures except for the cases when they are connected with the articles directly referred to the owned capital. In this case, the deferred taxes are reflected as owned capital.

7.3.10. Minority interest

The minority interest presents the proportional share of minoritary shareholders in the capital of the subsidiaries of the JSC "Kuzbassenergo". It is calculated on the basis of the share of minoritary shareholders of the subsidiaries of the JSC "Kuzbassenergo"

7.3.11. The phased out activity.

In the accounting the Group discloses the information about the phased out activity, starting with the event that can be defined as the initial disclosure event. The information about the phased out activity is disclosed in the notes to the financial accounting.

Starting with financial accounting for the period when the initial disclosure event took place, the Group includes in its financial accounting the following information, referred to the phased out activity:

- *Description of the phased out activity;*
- *If it makes an economic segment in accordance with the given accounting;*
- *Date and type of the initial disclosure event;*
- *Date and period when the phase out is expected to take place, if they are known or can be defined;*
- *Book costs on the fiscal date of summon assets and liabilities which are planned to retire;*
- *Gain sums, the sums of costs, receipts and expenditures from the main activity before taxation, which are referred to the phased out activity during the current period of financial accounting as well as profits tax;*
- *Sums of net cash flows referred to the main, investment and financial activity within the phased out activity during the current period of financial accounting.*

If the initial disclosure event takes place after the period of financial accounting of the Group ends but before the approval of the financial accounting for this period, this financial accounting discloses the information mentioned above for the period of this financial accounting.

The information is disclosed in the financial accounting during all the periods including the period when the transactions on phasing out the activity were completed. The transactions on phasing out the activity are completed when the plan is almost implemented or it was refused of.

Any information about the phased out activity is disclosed separately for every phased out activity. Comparative information for previous periods, presented in the financial accounting prepared after the initial disclosure event, is recalculated to present the assets, liabilities, profits, losses and cash flows separately which are referred to further and phased out activity, in a similar way that is described above.

7.3.12. The concerned sides.

In the financial accounting the Group discloses the information on the relations between the concerned sides as well as the information on the types and the constituent elements of the operations held with the concerned sides. The constituent elements of the operations include:

The index of the operation volume, either in the form of the amount or the corresponding shares;

The amount or the corresponding shares of the redeemable items;

The price formation policy.

The analogous items are disclosed in the Group's financial accounting with the total sums.

Being controlled the information on the relations between the concerned sides is disclosed regardless of the fact if the operations were held or not.

7.3.13. Contracts.

The profit on the contracts is admitted as soon as it can be surely estimated. The Group takes into consideration the percentage of the works fulfillment while determining the amount to be admitted in the accounting period. The losses are admitted as soon as there is a probability that they can appear. The total amount of the assumed loss, including the loss connected with unfulfilled works according to the contract, is accounted in the period when the loss was determined.

On determining the total amount of the expenses for the accounting period any expenses by the contract and corresponding to the future periods are shown as unfulfilled work by the contracts.

7.3.14. Cashflow statement .

The Group presents the data on the cash flow using the indirect method that presupposes that the net profit or loss is corrected taking into consideration the results of the non-monetary operations, any deferred or accrued past or future monetary earnings or payments on the principle activity, as well as the items of incomes and expenses connected with the receipt or withdrawal of monetary funds on the investing or financial activity.

The net flow of the cash from the operating activity is determined by correcting the net profit and loss taking into consideration the following:

- *the changes in the stock and the operating debit and credit debts during the period;*
- *non-monetary items such as deterioration, evaluative obligations, deferred taxes, unrealized profits or losses on the foreign currency operations, surplus earnings of the associated companies and the minority interest;*
- *all the other items that lead to the flow of the monetary funds from the investing and financial activity.*

7.3.15. Recompense to the employees.

The salary of the employees that is referred to the labour activity of the current period is admitted as the expenses of the given accounting period.

The Group produces all the necessary deductions for its employees to the Pension Fund of the Russian Federation according to the established norms.

The Group has no separate significant schemes on the provision of pensions. All the additional payments to the retired employees are included to the amount of the expenses on the salary, however this information is not disclosed in the accounting due to the insignificance of these payments.

7.3.16. Reserves.

The reserves are admitted when at present the Group has an obligation that can be juridical or based on the practice, arising from the past events, and if there is a probability that in order to redeem this obligations the resources containing economic benefits are to be used, and if a sure avaluation of the obligation amount can be done.

7.3.17. The acknowledgement of the profits.

The profit is admitted when all the significant risks and benefits connected with the right of property are passed to the buyer, when there is a high probability of receiving economic benefits from the operation and when the amount of the profit can be determined with considerable certainty.

The Group's profits are reflected taking into consideration the electric and thermal energy supply as well as the realization of the goods and services not connected with the power engineering, that took place before the end of the period.

The gain from the realization is reflected in the accounting with the deduction of the value added tax.

The gain is based on the tariffs on the thermal and electric energy that are approved by the Regional energy commission.

7.3.18. Profit for one stock.

Profit for a stock is determined by dividing the net profit related to the Group's general stock holders by the average weighted amount of the general stocks that are being in circulation during the accounting year.

7.3.19. Rendering of segment accounting.

The accounting segments are defined on the basis of operational activity of the Group. The Group includes three main production segments:
The segment "Production and transmission of electrical energy" is presented by power stations and some heat power stations which take part in the energy production as well as electrical networks and Energosbyt which conduct the transmission and distribution of electrical energy from stations to consumers;

The segment "Production and transmission of heat energy" is presented by heat power station and some electric power stations generating heat energy as well as the Department of the heat networks and Energosbyt conducting the transmission of heat energy to the consumers;
The segment "Other" includes the number of small segments such as the activity of repair and auxiliary subdivisions, object of social sphere.

The information about production segments is collected for the year, which ends on 31.12.2006 and for the year which ends on 31.12.2005 according to Appendix #3 to the present Regulations.

7.3.20. Seasonal nature of the activity.

The time and the weather influence the demand for heat energy. The main volume of profits from the realization of heat energy is in the period from October to April. The seasonal nature of the production of heat energy makes a great impact on fuel consumption.
Moreover, from May to September when the production is decreased the costs on repair and maintenance works increase. The seasonal nature of the activity does not influence the procedure of the reflection of profits and costs by the Group.

7.3.21. Events after the fiscal date.

The Group reflects the events which took place after the fiscal date if these events verify the terms which existed on the fiscal date. The Group does not reflect the consequences of the events after the fiscal date if these events speak about the terms arisen after the fiscal date. If these events are essential, the Group disclose the

following information on each essential category of such events after the fiscal date: the character of the event and the valuation of its financial consequences or application.

8.1. Drawing up of the explanatory note.

8.1. The drawing up of the explanatory note to accounting as its integral part (par.5 of the Regulations on accounting "Accounting of the Company" PBU 4/99, approved by the order of the MF of RF from 6.07.1999, #43n), is conducted by the finance department, the department of capital account, law department, accounts department of the executive body of the Company on the basis of the calculations, information and explanations of the subsidiaries, representative office, subsidiaries and dependent companies.

9. Organizational aspects of account policy.

9.1. Accounting and tax account of productive-economic activity is conducted in accordance with the unified improvement of corporate management policy and maintenance of software unification with plans of works on automation, the use of computer technologies, and getting the documents on the magnetic mediums and monthly printed out the main book and lists of the accounting.

9.2. Property and liabilities inventory is carried out in accordance with the Regulations on accounting in RF and the Methodological instructions on its implementation (the Order of the MF of RF from 13.06.95 #49).

The number of inventory in the fiscal year, dates, list of property and liabilities is set on separate orders of the Director General of the Company, directors of the subsidiaries and representative office with account of the terms of production procedure or when inventory is compulsory.
The inventory of fixed assets is conducted not less than one time in three years, of library stock – once in five years. In special cases the inventory is conducted every year.

9.3. Reorganization (merger, separation, differentiation of separate affiliates in subsidiaries) is dated for the end of the fiscal period (year or quarter), with the compulsory drawing up of the statement and separating balance.

9.4. The original primary instruments on economic transactions at the subsidiaries and representative office are taken to accounting and kept in the places of their drawing up.
According to art.17 of the Law "About accounting" original primary instruments, lists of accounting and accounting itself are kept in accordance with the typical retention period, not less than five years. The work plan of account of the accounting, other documents of account policy are kept not less than five years from the year when they were used to draw up the accounting for the last time.
Primary instruments, account lists, account reports and balances are subject to compulsory putting to record-keeping office. The retention periods are accounted from January 1 of the year following the year when the document was drawn up (according to the List of typical management documents of the activity of the companies, with retention periods mentioned, approved by Russian record-keeping office 06.10.2000 (with changes and additions from 27.10.2003)). A number of documents or a document concerning the same issue or the segment of activity are filed. Files are opened since the first document was included. Documents are included into the file only in one copy. Drafts and copies are not flied to the case. Documents of permanent and temporary character are grouped in separate cases.
In special cases the documents of different retention periods but referred to one issue are put in one file but after the decision was taken they regrouped again. Documents are grouped for one calendar year. The transient cases make an exception. Documents are put into case with all the appendixes and additional materials arisen while the question was discussed. Plan and accounting documentation (plans, bids, charts, reports and calculations) are put into the case of the year which it is referred to, regardless of the time and date.

The drawing up of accounting documents is conducted in accordance with nomenclature of cases – systematized list of cases, formed in the Company with retention periods mentioned in accordance with the General rules of archives' work (approved by the decision of Russian record-keeping office from 06.02.2002).

The cases which formation is prolonged till the next year keep the same number in the nomenclature.
In the end of the calendar year the total record is made about the categories and number of opened cases, where the total number of cases is mentioned as well as the cases of permanent retention period, temporary (more than 10 years) and temporary of up to 10 years retention period, and the number of transit cases.
The nomenclature is signed by the person, responsible for the record keeping, vised by the chief accountant and coordinated with the office and record-keeping office of the company.

10. Approval of the procedure of changes putting in the account policy of the Company:

10.1. Account policy of the Company changes only in the following cases:
-change of the Legislation of Russian Federation or legal acts on accounting;

- working out by the Company new methods of accounting keeping which presupposes more authentic facts of economic activity in the accounting or less labor-output ratio of the process without the decrease of the level of authenticity of the accounting process (change of the structure of the work plan of accounts during putting into operation of new program devices, work out of the methodology of the account of separate economic processes which have no legal regulation, etc.);

-major modification of the terms of the activity (reorganization, owners' replacement, chang of the types of activity, force majeur, change of the internal structure (with no reorganization), etc.).

10.2. Change of account policy is introduced since January 1 of the year following the year of its approval by the correspondent order about the Company except for the cases when the legal act was drawn up during the year and is recommended to be implemented from the accounting of the current year.

7.5. Information about total sum of export and the share export makes in the total volume of sales

8.8. Procedure description in taxation of revenues from the issuer's issued securities placed and in floatation

If a Russian institution is an income source, this institution shall to be recognized as tax agent and the tax amount shall be determined in accordance with the RF legislation in force.

At the moment of the reporting quarter terminating the following taxation procedure is in force:

Taxation of legal entity's income on the allocating (allocated) securities as dividends.

Table 37.

№№	Category of securities owners	
	Legal entities – tax residents of RF	
1.Profit's name on the floated securities	**Dividends**	
2. Security tax	Profit tax	
3. Tax rate	9 %	15 %
4.Order and terms of tax payment	Profit tax in form of dividends shall be collected from the source of such tax payment and shall be transferred to the budget by tax agent exercised this payment within 10 days form the date of tax payment.	Amount of the tax withheld from the foreign organizations shall be paid to the budget by tax agent at the same time with profit payment in a currency of this profit payment or in a currency of RF at the official rate of Central Bank as for a date of payments.
5. Features of taxation order for this category of securities owners	The total sum of the tax from the sum of dividends is defined as product of tax rate and a difference between the sum of the dividends subject to distribution between shareholders (participants) in the current tax period, reduced on the sums of dividends subject to payment by the tax agent in the current tax period, and the sum of the dividends received by the tax agent in the current accounting (tax) period and the previous accounting (tax) period if the given sums did not participate in calculation under definition of the taxable income as dividends earlier. In case the received difference is negative, the duty on tax payment does not arise also compensation from the budget is not made	Elimination of double taxation. For exemption of taxation or application of a preferential taxation regime the tax payer (foreign organization) should confirm to the tax agent paying the profit before date of the profit payment that he is a resident of the state, with which Russian Federation has the international contract (agreement) adjusting taxation issues. Such confirmation should be certified by the authorized body of the corresponding foreign state. In a case non confirmation before the date of profit payment the tax agent is to obliged to withhold the profit tax of foreign organization. In accordance with par. 2 of art. 312 of Tax Code of RF (part 2) foreign profit recipient has right to reimburse the early withheld profit tax paid by him earlier within 3 years from the date of tax period termination when the profit tax was paid off under condition of granting by the foreign addressee of the income in the tax body according the place of registration of the tax agent of corresponding documents (list is in art. 312 of the Tax Code of RF (part 2). Repayment of early withheld and paid tax shall be fulfilled within the month from the date of application and aforementioned documents.
6. Legislative and standard acts regulating the order of taxation of the aforementioned profits	Chapter 25 "Profit tax of organizations" of the Tax code of RF (part 2).	

Taxation of profits of natural persons on the allocating (allocated) securities as dividends

8.10. Other information

There is no other information on the issuer and his securities

APPENDIX 1

ANNUAL ACCOUNTING REPORT (except affiliated companies)

Auditor's opinion

On the annual accounting report of the JSC "Kuzbassenergo" at the outcome of the year 2005.

Auditor

The Closed Joint-Stock Company «PricewaterhouseCoopers Audit» (ZAO «PwH Audit»)

Certificate on the state registration of the joint-stock company No. 008.890 was issued by the Moscow registration chamber on February 28, 1992.

The certificate on recording to the Uniform state register of legal entities on the legal entity registered till July 1, 2002, under No. 1027700148431 of August 22, 2002 was issued by Interdistrict inspection of the Ministry of Taxes and Tax Collection of Russia No. 39 for Moscow.

The license for auditing No. E000376 is issued by the Ministry of Finance of the Russian Federation on May 20, 2002. The license is valid till May 20, 2007.

AUDITOR OPINION

on the financial (accounting) reports of the Kuzbass Open Joint-Stock Company of energetics and electrification (OAO "Kuzbassenergo"):

To the shareholders of the Kuzbass Open Joint-Stock Company of energetics and electrification (OAO "Kuzbassenergo"):

1. We made an audit of the attached financial (accounting) reports of the Company for a period from January 1 to December 31, 2005, inclusive. The financial (accounting) reports of the Company consist of the Balance sheet, Profit and loss report, Statement of changes in capital, Cash flow statement, Appendixes to the balance sheet, Explanatory note (hereinafter all statements together are called «financial (accounting) reports»). The financial (accounting) reports were prepared by the management of the Company, based on the legislation of the Russian Federation regarding preparation of financial (accounting) reports. The reports prepared on the basis of the specified legislation essentially differ from the reports made according to International standards of financial accounting.

2. The responsibility for preparation and submission of the financial (accounting) reports is on the executive body of the Company. Our duty is to give an opinion on credibility in every essential respect of the given financial (accounting) reports and conformity of maintenance procedure of accounting records to the legislation of the Russian Federation on the basis of the audit made.

3 We made the audit in conformity with the Federal act «On auditor activity», Federal rules (standards) of auditor activity, International standards of audit, as well as with our internal standards.

4 The audit was planned and made so as to obtain a reasonable assurance that the financial (accounting) reports contain no essential misstatements. The auditing was done on a selective basis and included the study on the basis of testing of evidence confirming numerical indicators in the financial (accounting) reports and disclosure therein of the information on financial and economic activity, an estimation of observing the principles and accountancy requirements applied in preparation of financial (accounting) reports, consideration of the main estimated indicators obtained by the management of the Company, as well as an estimation of submission of financial (accounting) reports. We think that the audit made gives good grounds for expressing our opinion on credibility of the financial (accounting) reports and conformity of maintenance procedure of

accounting records to the legislation of the Russian Federation.

5 The audit of the financial (accounting) reports of the Company for a period from January 1 to December 31, 2004, was made by another auditing firm which gave a modified auditor opinion. In this connection we do not express an opinion on credibility of the comparative data included in the financial (accounting) reports of the Company for 2005.

6 In our opinion, except for the influence on the financial (accounting) reports of the circumstance indicated in the previous paragraph of the present Opinion, the financial (accounting) reports of the Company attached to the present Opinion reflects credibly in every essential respect the financial position of the Company as on December 31, 2005, and results of its financial and economic activity for a period from January 1st to December 31, 2005, inclusive, in conformity with requirements of the Russian Federation laws relating to preparation of financial (accounting) reports.

7 Without changing the opinion on credibility of the financial (accounting) reports, we draw attention to the following circumstances

a. According to the information disclosed in the note 2 of the section III «Disclosure of essential figures» of the explanatory note of the Company for 2005, the company plans beginning from 2006 to liquidate a number of projects under construction. The cost of such projects amounts to 215031 thousand roubles.

b. According to the information disclosed in the note 16 section III «Disclosure of essential indicators» of the explanatory note of the Company for 2005, the company is in process of reorganization in the form of segregation

2.3. Issuer's liabilities.

2.3.1. Account payable

There is no information in this reporting period.

2.3.2. Credit history of the issuer

***For the last five finished financial years (200-2004), and 2005 the Company did not make credit contracts and* contracts of debt, the sum of the total debt over which amounts 5 and more per cents of the cost of the net assets.**

Credit policy of the JSC "Kuzbassenergo" aims at an attraction of credit resources on more gainful terms of crediting, at a reducing of an interest rate for credit resources using. Borrowed current assets are attracted by the Company at the rate that is lower than the refinancing rate fixed by the Central Bank of RF.

Provisions on the credit policy of the Company were approved by the Board of Directors at the general meeting spent the 28 of December 2004. These Provisions determine the order of fixation of Limits of a debt position and the Limit on cost parameters of loan, the order of the control over their observance, and also measures on reduction of the Debt position according to the fixed Limits in case of their excess aimed at the financial stability and minimization of a risk of insolvency of the Company guarantying.

By the 31.12.2005 the size of the borrowed current assets of the JSC "Kuzbassenergo" is reduced as compared with the period of the 30.09.2005 by RUR 472 190 thousand and amounts RUR 1 605 126 thousand.

Reducing of the borrowed current assets has taken place mainly due to reduction of a main debt under the credits amounts RUR 208 000 thousand, and also due to the exit from mortgaging guarantee of the credit liabilities over the bill of credit of the JSC " Kuzbassenergo " to the sum of RUR 209 000 thousand.

The Board of directors approved by its decision for the I quarter 2006 an attraction of the credit assets at the rate not exceeding that in 1,1 time more the rate of refinancing of the Central Bank RF against the security provided by the credit policy of the Company subject to observance of the maximum sized of a one-time loan debt over the attracted credits by the company by the 01.04.2006 in a volume no more than RUR 1 400 000 000 (One milliard and four hundred million) .

There was not the bound's issue during the reporting period.

2.3.3. The issuer's liabilities against the third parties security.

There were not any liabilities of the issuer against the security given to the third parties, including a pledge or a guarantee amounted not less then 5 per cent of the issuer's assets balance price during the reporting period.

2.3.4. Other liabilities of the issuer

During the reporting period the JSC "Kuzbassenergo" did not make any bargains not revealed in the balance sheet that may affect negatively the financial situation of the Company.

2.4. The purpose of the issue and direction of the assets using resulted to distribution of the issuing securities

Issuer did not spent the issue aimed to the assets attraction by the way of the distribution of securities duing the reporting period.

2.5. Risks related with acquisition of the distributing (distributed) issuing securities

2.5.1. Branch risks

JSC "Kuzbassenergo" spend its activity only at the internal Russian market in accordance with area character therefore there are no risks related with possible change of a price for the issuer's production at the foreign markets.

The risk of nonfulfilment by the issuer of his liabilities before the owners of the issuing securities as a result of the branch conjuncture change is not subject of this present report because of absence of any liabilities on the dividend payment by the issuer before the owners of the preference stocks and the percents payment off and retirement of bonds.

The Company has no any risks related to the possible change of a cost of raw material, goods subject to using in production and that may affect negatively its activity.

The following factors may be related to the other branch risks:

- Change of structure of energy consumption on groups of consumers from the planned at the expense of production volume reduction of a range of industrial enterprises, may lead to reduction of energy output volume in money terms.

- Bankruptcy of enterprises may lead to the impossibility to recover a debt for consummated energy.

- Decreasing of living standard of some groups of population of Kemerovo region will led inevitably to reduction of payment's level of this type of population.

Expectations of the Stock market's participants correspond with a reforming course of energy market.

2.5.2. Country and regional risks

JSC "Kuzbassenergo" is a registered in Russian Federation company carrying out its activity in Kemerovo

Region, thus some common changes in the State and other regional developments affect on its activity importantly.

As a whole an economic and political situation in the country and in the region is stable, and any possibility of military conflicts, extraordinary situation, walkouts, change of the State and regional leaders is improbable.

Overwhelming majority of economic factors are out of control of the Issuer.

It's impossible to guarantee that some recent tendencies of Russian economic including increasing of Gross National Product, relative stability of RUR and decreasing of the inflation rates will be kept in future. Besides global fluctuations of oil and gas prices, RUR fortification in the real term concerning USD Dollar, also some consequences of liberalization of a monetary and credit policy and other factors may affect negatively Russian economics and business of the issuer.

Russian economics is not protected against market recessions and delay in economic development in different countries of the world. As it was in the past, financial problems or sensitive perception of the risks related to the investments in the countries with developing economy may reduce a volume of foreign investments to Russia and affect negatively Russian economics.

Ecological factors inseparably linked with general activity of the issuer as a production process, transfer and distribution of heat and electric power demands large quantity of natural sources that call environmental pollution. As significant capital investments are necessary to purchase nature-conservative equipment to remove ecological factors of risk, and payments for natural sources consumption.

There are regional risks related with reforming of JSC "Kuzbassenergo". The management of JSC "Kuzbassenergo" spend active consultations with the government of regional and city Administration over the questions of the Company's reforming to reduce such risks.

Such need is due to existence of the Provisions of Kemerovo regional Administration №54 dd. 26.04.2002 "On reforming of JSC "Kuzbassenergo" and №49 dd. 28.03.2003 "On the project of reforming of JSC "Kuzbassenergo" and social protection of employees of energy system in Kemerovo region" where regional authorities raised the range of demands to the management of the Company under the project coordination.

The 20th of September 2004 a trilateral agreement was completed between JSC RAO "UES of Russia", JSC "Kuzbassenergo" and Kemerovo regional Administration which regulates particularly the questions on the future implementation of the program on the JSC "Kuzbassenergo" reforming.

Over the terms of the Agreement the regional Administration will be assist in the reforming process of the energy company, especially under its segregation from the structure of supplying, managing, power and heat networking companies.

Risks depending on the regional geographical peculiarity, i.e.:

- *Damnification risks because of emergency situations of natural factors: periodical floods,*

earthquake on the territory of Kemerovo region.

- *According to the long-term forecast made by the Ministry on Emergency Situations of Russia for the period 2006, there will be most possible such man-caused emergency situations on the territory of Kemerovo region as:*
- *man-caused conflagration (fire in buildings and constructions of social and cultural purpose). Conflagration peak in the housing sector and at the economic object is traditionally registered in winter-spring period when the total quantity of fires increases as compared with warm period by 5%, and the quantity of conflagrations increases by 40%:*
- *motor transport;*
- *mining industry.*
  - *Continuance of high probability of the accidents and emergency situation in mines is forecasted. Besides the cases of earthquaking equal to 1-2 force on the territory of region is possible because of industrial explosions in mining industry;*
  - *high probability of man-caused emergency situations due to accidents in railway transport during transporting of dangerous cargo. The reason of such emergency situation is improper conditions of approach lines to potentially dangerous enterprises, i.e. ltd. "Kemerovokhimmach", JSC "Novokuznetsk Aluminum plant", etc.*

According to the forecast of the Ministry on Emergency Situations for the winter-spring period the most probable emergency situations of man-caused nature resulting from the complex of dangerous meteorological phenomena (heavy atmospheric precipitation, force wing, sleet adhering) are forecasted in Kemerovo region.

Increasing of household fires in the private sector is forecasted because of temperature decreasing and using of electric heaters, and also wiring inflammation. Accidents in the networks of heat and water supply, outage of heating systems of buildings and constructions are possible.

The prediction of the risk of open military conflict also the risk of national emergency are minimal possible on a national level as ethnic and social tension in the region does not bear critical nature. However there is a risk of terrorist acts to fight with the security measures at the strategic objects of JSC "Kuzbassenergo" were considerably toughened.

Under the special control were took electric plants, large electric substations, pump houses, combustive-lubricating production's storages and other category objects.

Admission regime for motor transport and employees was toughened including using of manual and fixed metal detectors at the enterprises.

Artificial barriers were mounted that stop unofficial passage of motor transport on the territory of enterprises.

Car parks were transferred at the safe distance from energy object guards, also active interaction between security of JSC 'Kuzbassenergo" and Motor licensing and inspection department, duty departments of MIA and MES was organized.

Around-the-clock work for vide control and patrol were organized at the most important and the farthest object of energy system.

2.5.3. Financial risks

Variation of interest rates may affect financial and economic activity of the issuer as the enterprise uses borrowed current assets in its activity but its will not have significant effect on the financial showings of the company.

Credit policy of the issuer aimed on attraction of credit resources on more favorable credit conditions.

The company attracted borrowed current assets lower then the rate of refinancing fixed by the Central Bank RF (12%). Weighted average interest rate for the using of credit resources by the company was 9,03% by the 31.12.2005, that is by 1,15 of per cent's points lower then by the 30.09.2005.

Credit chare except the loan guarantee was 76,14% by the 31.12.2005 of the total amount of liabilities

under the short-time credits.

Inflation effect: Over the forecast made by the International Currency Reserves the inflation in Russia over the results if the year 2005 will be amount 11-11,5%. Particularly the salary depends on the general standard of price in Russia.

The salary is indexed by the issuer. As a whole the effect of inflation factors on the financial stability of the issuer does not seem significant in future and is subject to predict in business-planning of the company.

In the tariff forming there is a risk that the Kemerovo Regional Energy Committee will fix the tariff rate not covering industrial costs and drop-out income because of reducing of profit volume.

Tariff policy for the year 2006 is the same: there is a tariff corridor with the strict defined limited maximum and limited minimum of tariff level. Powermen have to keep within these limits.

Because of such limits the growth rate of tariffs as an earlier keeps lower then the inflation rate: increasing of a price of electricity for the consumers of our region amounts on average 9,1% , and heat energy – 10%.

Investor's interests are not provided in the tariffs thus the company is still of little attractive in investments plan.

Today's tariff are not transparent therefore an investor does not see the period for repayment of the invested money.

The issuer does not bear any exchange rate risks as he is carrying out his activity only at the internal market.

Some financial risks related with future reforming of the issuer (reorganization in form of segregation) take place:

- risk that the creditors of JSC "Kuzbassenergo" having received the notification on adopted decision on reorganization , will demand the advanced repayment of account payable, execution of corresponding liabilities and payment of damages sustained under the Company's reorganization in form of segregation (par. 6 of art. 15 of FL "On Joint Stock Companies"). Creditors having restructured debts for long-time period may act as initiators: JSC RAO " UES of Russia", Tax Ministry, Out budget Funds. Approximate amount of commercial restructured debts subject to demand amounts RUR 3014,4 millions;

- risk that the shareholders having voted against the reorganization or not took participation in the voting will demand the redemption of all or part of the stocks of JSC "Kuzbassenergo" belonging to them and possibility of loss to 10 % of a price of net assets because of satisfaction off the shareholder's demands of the stocks redemption under the reorganization of the companies in form of segregation (art. 75, 76 of FL "On Joint Stock Companies"). Approximate volume of assets subject to redemption of stocks amounts RUR 587,979 million.

2.5.4. Legal risks

There are legal risks related to the change of exchange regulation, modification of tax legislation, change of regulations of the customs supervision and fees, modification of requirements on licensing, court practice that may affect negatively on the activity's results of the issuer also results of the current legal trials subject of participation of the issuer.

- Modification of tax legislation in part of increasing of tax rates or change in the order and terms of tax calculation and payment may led to decreasing of net income of the issuer that may led to reducing of amount of the dividends subject to payment.

- Change in requirements on licensing of main activity of the issuer may led to increasing of a period for document preparation obligatory to extend a term of duration of the license, also necessity of accordance of the issuer with the produced requirements. However as a whole this risk should be deemed as insufficient except the cases when to extend the duration of the license or to exercise an activity subject to licensing some requirements will be provided that the issuer will not may correspond with or when the corresponding with these requirements will be caused with excess costs that may led to the issuer's activity termination.

- There were not any modification of the court practice related with the issuer's activity that might affect negatively on the results of his activity during the reporting period.

2.5.5.Risks related with the issuer's activity.

Risks related with the issuer's activity, i.e. the current legal trial subject to participation of the issuer (actions of the company liquidation, alienation of the company's assets, contestation of rights arisen from the licenses or patents etc.), possible liability of the issuer against the third person's debts are absent.

Other essential risks proper to the issuer are absent.

III. Detailed information about the issuer

3.1. Information about the issuer's establishment and development.

3.1.1. Information about the issuer's company name

full company name and abbreviation:

Kuzbass Joint stock Company of energy and electrification
(JSC «Kuzbassenergo»).
Before the privatization – Kuzbass industrial institution of energy and electrification ("IIEE "Kuzbassenergo")
Kuzbass Open Joint Stock Company of energy and electrification (OJSC "Kuzbassenergo")
Introduced: 30.12.1993
Kuzbass open joint stock company of energy and electrification (JSC "Kuzbassenergo")
Introduced: 15.05.1996

3.1.2. Information about state registration of the issuer

Date of state registration of the issuer: 30.12.1993
Number of state registration's certificate (other document ratified the state registration of the issuer): 1901
Name of registration authority: Kemerovo Administration
In accordance with Federal Law "On State registration of legal entities" the corresponding record under the state registration number 1024200678260 was made in the Uniform State Register of Legal Entities the 23rd of July 2002 (certificate: series 43 №001926135 issued by Administration of the Russian Ministry of Taxation in Kemerovo, Kemerovo region).

3.1.3. Information about the issuer's establishment and development.

The issuer was established in accordance with a privatization schedule of the Kuzbass industrial institution of energy and electrification (IIEE "Kuzbassenergo").

In pursuance of the Decrees issued by the President of Russian Federation, i.e. № 923 dd. August, 15, 1992 « About the organization of management system of the electric-power complex of Russian Federation during privatization », № 1334 dd. November, 3, 1992 « About realization in the electric-power industry of the Decree issued by the President of Russian Federation dd. August, 14, 1992, № 922 « About features of transfer of the state enterprises, institutions, organizations of fuel and energy complex into the joint-stock companies », № 721 dd. July, 1, 1992 « About organizational measures in the transfer of the state enterprises, voluntary associations of the state enterprises into the joint-stock companies », the Committee on administration of the state property of Kemerovo region has made the Decision № 330 « On privatization and transfer of IIEE "Kuzbassenergo" into the Kuzbass open joint-stock company of energy and electrification » dd. 21.09.1993.

The Order № 345 « About registration of open joint-stock company "Kuzbassenergo" was approved by Kemerovo Administration the 30th. 12.1993.

The common purpose of the privatized companies was increasing of the efficiency of energy system of the country and transfer from the planned economic to the market relations.

JSC "Kuzbassenergo" was established for and indefinite period of time.

The main purpose of the JSC "Kuzbassenergo" activity is the profit earning.
Activities of the JSC "Kuzbassenergo" are as follows:

- *electricity and heat energy production;*
- *electricity and heat energy transmission;*
- *electricity and heat energy supply (trade) according to the fixed tariffs in accordance with the dispatcher's schedules of electric and heat demands;*
- renders the following services:
- *energy supply to energy saving enterprises;*
- *communication facilities, including telecommunications;*

- carries out:
- *capital repairs*
- *technical reequipment;*
- *reconstruction and development of regional energy system;*
- *mounting, arrangement and repair of energy objects; electric and heat energy equipment;*
- *operability assurance of electric and heat energy networks;*
- *maintenance, mounting, repairing of boilers and buckets under pressure, steam and hot water pipelines;*
- *providing for maintenance of energy equipment in accordance with the standard requirements in force;*
- *timely and qualitative repairing of energy equipment;*
- *technical reequipment and reconstruction of energy objects;*
- *operability assurance of electric and heat energy networks;*
- *activities on maintenance of electric an heat energy networks.*

JSC "Kuzbassenergo" is one of the largest energy systems in the body of the Holding company JSC RAO "UES of Russia". Energy complex of the company is the sixth in the installed capacity and the fifth in the volume of energy output to the consumers. Quantity of power output by electric plants of JSC "Kuzbassenergo" exceeded 30% in the balance of UES of Siberia.
Mission of the company is the regular and reliable supply our consumers with heat and electric power providing production efficiency and investment appeal of the company.

Internet webpage: ***no***

3.1.5. Taxpayer identification number

INN: *4200000333*

3.1.6. Branches and representative offices of the issuer

There were not changes in the composition of branches and representative offices of the issuer in the IV quarter of the year 2005.

List of branches and representative offices showed in the Appendix to the Articles of Association of JSC "Kuzbassenergo" is at the Internet webpage : ***http://www.kuzbassenergo.ru/invest/doc/doc/***

3.2. Principal economic activities of the issuer

3.2.1. Industrial affiliation of the issuer

OKVED (All-Russia classifier of types of economic activity) codes :

40.10.11 –Production of electric power by heat plants
40.10.2 – Energy transmission
40.30.2 – Steam and hot water transmission (heat energy)
51.56.4 – Wholesales of electric and heat power (without its transmission and distribution)
74.60 –Investigations and protection
74.14 – Consulting over the questions on commerce and management.

3.2.2. Principal economic activities of the issuer

The principal activities of the JSC "Kuzbassenergo" are • production, transfer and distribution of electric and heat energy.

JSC "Kuzbassenergo" is a subject of natural monopoly working in the sphere of services on transmission of electric and heat energy on the territory of Kemerovo region.

Information of this present paragraph does not show in the quarterly report for the IV quarter.

3.2.3. Principal types of products (operations, services)

Principal types of products of the JSC "Kuzbassenergo» " are of electric and heat energy.

Information of this present paragraph does not show in the quarterly report for the IV quarter.

Information on the structure of costs (net cost) of the issuer doest not show the quarterly report for the IV quarter.

3.2.4. Raw materials and suppliers of the issuer.

Principal raw material used by the JSC "Kuzbassenergo" is a fuel. Kuznetsky coal and its cleaning rejects are used as the principal fuel at the power plants of JSC "Kuzbassenergo".

Fuel oil is used as starting fuel and meant for maintenance of burning during low quality coal firing, and as the principal type of fuel at the Zaiskitimskaya water-heating boiler plant.

By the 30th of December 2005 stocks of coal amounted 1 million 379 thousand tons at the warehouses of 8 electric plants of energy company pf the Kuzbass.

The norm fixed for the JSC "Kuzbassenergo" by RAO "UES of Russia" by the 1st January 2005 is 1 million 100 thousand tons.

Main suppliers of the "black gold" are the following companies: Holding company "Kuzbassrazrezugol", JSC "SUEK", JSC "Coal company Yuzhkuzbassugol", ZAO "Chernigovets".

Mazut stocks are also in accordance with the target of Russian energy holding, i.e. by the 30th of December 2005 the mazut stocks amounted 15923 tons at the electric plants of energy system including the Zaiskitimskaya water-heating boiler plant (Kemerovo) with the fixed plant for the 1st of January aggregated 15000 tons.

Information on the structure of costs (net cost) of the issuer doest not show the quarterly report for the IV quarter.

3.2.5. Markets for products (work, services) of the issuer

Power industry is practically the unique industry whose products and services consumers are all industries and private sector. There are two markets for energy distribution in Russia: wholesales and retail trade. Heat energy distribution is only at the retail market.

Kemerovo region is the principal market where the JSC "Kuzbassenergo" carries out his activity.

The Kemerovo region is located in the south-east of the West Siberia at the joint of the West-Siberian plain and the mountains of the South Siberia. It is located at almost equal distance from western and eastern borders of the Russian Federation. It is in the 6th time zone.

Output of electric power to the consumers is according to the contracted "Agreements about output and using of electric power".

Composition of consumers of electricity and heat energy at the retail market is in the table stated above by an example of a scheme illustrating electricity and heat energy distribution.

	output to own consumers	
	electricity (thousand kw)	heat energy (Gcal)

7. Other industries	1 306 201	309 669
Specific weight (%)	**21,1**	**6,9**

According to this table, the largest consumers of electricity and heat energy at the retail market are industrial enterprises, i.e. 67,8%.

In the industrial sector leaders on power consumption are the enterprises of ferrous metallurgy, their share amounts 35,5% (in the III quarter of the year 2005 – 37,5%).

In the structure of heat energy output enterprises of housing and communal services (more 60% of consumption) and industry (more 20%).Chemical and petrochemical enterprises are the leaders on heat energy consumption in the structure of industry (11,3%).

Factors which may adversely affect the distribution of the Issuer's products (operations, services) and possible measures of the Issuer to reduce such impact.
The following factors may adversely affect the volume of electricity and heat energy distribution:

1. Exit of consumers to the free-trade market (hereinafter called FTM) of the wholesales energy market working on the territory of Siberia since 01.05.2005
2. In 2005 the following consumers of JSC "Kuzbassenergo" started to make contracts on energy purchasing at the FTM of wholesales energy market:

- Ltd. PO "Khimprom" since September 2005. The volume of purchase at FTM in 4 quarter 2005 was 8 952 thousand kw of electric power;
- ***Ltd. "Topkinsky Cement" purchases 3 598 kw of electric power at FTM in December 2005.***

Besides, all documents obligatory to the entrance of JSC "Energoupravleniye" (Leninsk-Kuznetsky) to FTM are submitted . Date of this enterprise's start work at the wholesales market is planned for the 1st of February 2006. Expected reducing of energy consumption due to entrance of this consumer to FTM will amount 58 716,3 kw a year.

JSC "Electric network" (Electricheskiye seti), JSC "KOKS", KOAO "AZOT" and Ltd. "Mechel-Energo" prepare all necessary documents and bring AIIS KUE to required parameters at the wholesale market to

cover a part of their energy consumption by way of purchase of electric power at FTM of wholesale energy market.

Aggregate decreasing of energy consumption from the JSC "Kuzbassenergo" resources due to exit of the aforementioned consumers to FTM will be approximate 130 153,1 thousand kw a year.
Today 35 consumers meet the requirements obligatory to get a status of the FTM member.
Entrance of consumers to FTM of wholesales energy market meet the strategy of energy industry reforming and JSC "Kuzbassenergo" can not affect this tendency change.

2. Reducing of heat energy output by the JSC "Kuzbassenergo" is related with the launch of own boliler plants (water-heat boilers) at the chemical enterprises (KOAO "AZOT", Ltd. "PO TOKEM", Ltd. PO "Khimprom").

At the KOAO "AZOT" 3 steam boilers BEM-25/3, 9 with nominal steam capacity 25 t/h (18,75 Gcal) each were launched in august 2005, that will reduced heat consumption from the resources of JSC "Kuzbassenergo" by 400 thousand Gcal a year according to the schedule.
Heat energy consumption by the KOAO "AZOT" in 4 quarter 2005 compared the same period 0f the year 2004 was 21% (116,4 thousand Gcal). JSC "Kuzbassenergo" has not possibility to affect this situation.

3. Insufficiency of limits and delay in financing of charges on payment of heat and electric energy for budget consumers.
To prevent delay in financing of budget consumers JSC "Kuzbassenergo" subscribes every month Agreements on payment s for consummated energy with Kemerovo regional Administration, General Financial Department of region, Heads of the cities and districts.

Kemerovo regional Administration spend conferences with obligatory presence of the city and district Administration in the person of their Heads, also Managers of the territorial financial authorities, managers of enterprises of housing and communal services and city electric networks.

3.2.7. Joint activities of the Issuer

The issuer does not perform any joint activities with other organizations.

3.3. Future plans of the issuer

Purposes of the JSC "Kuzbassenergo" for the year 2006.

Principal purpose of the company for the year 2006 will by reliable and regular electric and heat energy supply to the consumers, providing profit earning, increasing of the company's capitalization and increasing of its investment appeal during the reforming process of energy industry in Russian Federation.

Principal production purposes of the company for the year 2006 will be the following:

1. ***reliable and regular electric and heat energy supply to the consumers of the region especially in autumn and winter periods with proper maximum load;***
2. ***fulfillment of the program of repair of the equipment of power stations, electric and heat networks;,***

3. fulfillment of the task of JSC RAO "UES of Russia" on creation of fuel reserve in the warehouses by 01.01.2007;

4. Fulfillment of the investment program of the Company.
Thus the following production works will be priority:

In part of financial activity the following activities will be priority for the company in 2006:
1. Fulfillment of the expenses reduction program including by way of future development of the competitive system on purchase of goods, works and services;
2. Fulfillment of the Amicable agreement's terms with the Company's creditors as a guarantee of successful reforming;
3. determination of economic based tariffs for the Company;
4. Increasing of financial stability of the Company, decreasing of a distance between the accounts receivable and account payable;
5. Guarantee of the investment appeal of the Company.

In accordance with the program of technical development of the company for the years 2001-2011 aimed to ensure reliable work of the plants and timely change of the used technological equipment in 2006 the Company needs:

- not to stop in searching of contracting organizations and suppliers for construction, reconstruction and technical reequipment of objects on a competitive basis;

- *to define their priorities in forming of investment program for 2-3 years for incompleted construction objects and adoption of cardinal decisions;*
- *to tie investment program of the Company with the sources of financing, also timely putting into operation of the objects;*

- to continuer the ash-damp dams extending and to start construction of new ash-damp dams where the reserves for slash warehousing are limited for the possible filling.

For the next 3-5 years it is necessary to fulfill the following works affecting the total power system security :

- Reconstruction and putting into operation of a turboset of st. №8 at Novokemerovskaya TETs of a type PTR-80-130(RUR 500 millions) in 2006;

- Putting into operation of a turboset of st. №3 of a type R-12-29 at the Kuznetskaya TETs in 206 to cover a deficit in extracted steam for makeup water heating and increasing of electric power output due to thermal input;

- Putting into operation of a turboset of st. №15 of a type T-115-130 at the Novo-Kemerovskaya TETs capacity 115 Mwt with investments volume equal to RUR 900 millions (including ASU TP) in 2008;

- To proceed with designing and approval of a starting complex of stem boiler of st. №5 at the Kuzbass TETS capacity 160t/h with launching in 2007;

- To replace the turbine of st. №9 of a type r-35-130 by the turbine of a type T-120-12,8 at the Kemerovo GRES in a value of RUR 600 millions;

-To reconstruct a turboset of st. №11 and 12 on a type R-12-90/31 at the Kuznetskaya TETs in a value of RUR 200 millions;

-To reconstruct electrical filters of boilers of type TP-87 to gain standard dustiness of smoke fumes and to fulfill norms of maximum ashes emissions; to reconstruct electrical filters together with increasing of

3.4. The Issuer's participation in industrial, bank and financial groups, holdings, trusts and associations

JSC "Kuzbassenergo" is a subsidiary of Holding company RAO "UES of Russia" according to the art. 2.3. of the Articles of Association.

3.5. Subsidiaries and affiliated business divisions of the issuer

JSC "Kuzbassenergo" has 11 subsidiaries.

These companies are regarded as subsidiaries according to the Civil code of Russian federation (art. 105 and 106) and Federal law "On Joint Stock Companies" (art.6).

Full company name: Limited liability company, OOO "Bill centre "Kuzbassenergo"
Location: 30, Kuznetsky prospect, Kemerovo, Kemerovo region, Russia
Issuer's share in the authorized capital of business venture: 100%
Share of business venture in the issuer's authorized capital: 0%
Core business: import and export of production and technical goods and consumer goods, know-how and services; intermediate and trade activities.

Officers of the business company:
Yakovlev Vadim Alexeevich

Date of birth: 1967
Functions: Sole executive body of the business company.

3.6. Composition, structure and cost of the issuer's fixed assets, information about its plans to acquire, replace, dispose of fixed assets, as well as all the facts of encumbrance of the issuer's fixed assets

3.6.1. Fixed assets

In the structure of the fixed assets the lands, buildings, machines, equipment, transport and others corresponding objects with a life time no more than 12 months are shown.
The objects of the fixed assets were taken to account over the actual expenses for purchase and construction.

Information does not shown in the quarterly report for the IV quarter.

Depreciation of the fixed assets was added by a linear way from the terms of actual using of these objects. Over the objects of the fixed assets subject to accounting by 01.01.2002, depreciation was added in accordance with the Regulations adopted by the Sovmin of USSR dd. 22 of October 1990 № 1072 "On the unique norms for depreciation deductions to complete reconstruction of the fixed assets of USSR national economy".
Over the objects of the fixed assets subject to accounting since 01.01.2002 the depreciation was added in accordance with the Resolution adopted by the RF Government dd.01.01.2002 №1 "on classification of the fixed assets included in the depreciation groups".

Since 1999 the JSC "Kuzbassenergo" spend a revaluation of the fixed assets with the aid of experts of the closed joint stock company "ENPI Consult (ZAO "ENPI CCONSULT") (№14, Dukhovsky pereulok, Moscow, 113191, Russia, INN 7737017200 according to the license №000031 for valuator's activity issued 06.08.2001 by the Ministry for Property of Russia.

According to the technical task the revaluation of the fixed assets is carried out by way of indexation of a direct re- appraisal of overall replacement value of the fixed assets. All materials should be in written report form, and on magnetic mediums.

IV. Information about financial and economic activities of the issuer

4.1. Results of financial and economic activities of the issuer

This report period does not contain such information.

4.2. Issuer's liquidity, adequacy and structure of the capital and circulating assets

This report period does not contain such information.

4.3. Amount and structure of the issuer's capital and circulating assets

4.3.1. Amount and structure of the issuer's capital and circulating assets

а) in accordance with the Articles of Association the authorized capital amounts RUR 606 163 800 (six hundred six millions one hundred sixty three thousands and eight hundred roubles);

в) information on forming and using of the reserve fund is shown in the paragraph 8.1.3. of this present report.

Figure's name	At the beginning of the reporting period	By the end of the reporting period
а) Amount of the authorized capital, RUR	606 163 800	606 163 800
б) Total cost of the issuer's stock bought out by the issuer for further resale	no	no

Policy of the Company concerning the authorized capital is in the acceptable volume and structure of the circulating assets of the Company backing aimed to increase the assets liquidity.

Work with costumers and purchasers aimed to decrease accounts receivable, also supervision under the payable accounts, and work on recovering of overdue accounts receivable are carried out.

4.3.2. The Issuer's financial investments

Financial investments according to the Accounting Regulations 4/99 "Accounting of the company" are th following:

- *investments in the subsidiaries;*
- *investments in the affiliated companies;*
- *investments in other companies;*
- *loans granted within 12 months;*
- *loans granted for the period less then 12 months;;*
- *bought out own stocks;*
- *other financial investments.*

Accounting of financial investments is carried out at the acc. 58 "Financial investments" in accordance with Accounting Regulations №19/02 "Financial investments accounting" approved by the Order of Minfin of Russia dd. 10.12.2002 №126n including short-time and long term investments division depending on the terms of circulation (redemption) and purposes:

- long-term investments, when the fixed period for their circulation (redemption) exceeds one year or when the investments are issued with a purpose to get profit over them more then one year;

- short-time investments, when the fixed period for their circulation (redemption) does not exceed one year of when the investments are issued without intend to get profit over them more then one year.

This report period does not contain such information.

4.3.3 The issuer's intangible assets

This report period does not contain such information.

4.4. Information about the issuer's policy and expenditures in the sphere of scientific and technological progress, in respect of licenses and patents, new research and development

Account of NIOKR (Research, developmental and technological works) in the Company is carried out according to the Accounting Regulations "Account of charges on research, developmental and technological works " (PBU 17/02).

NIOKR expenses are shown in the accounting at the ass. 08 "Investments in the non-circulating assets " (p. 5 PBU 17/02).

Charges on research and development, which results are subject to the legal protection and are made out in the order established by the legislation in force (i.e. patents, certificates, other documents certifying the exclusive right of the Company on research and development's results) are received, were accounted as intangible assets (p. 4 ПВU 14/2000).

Charges on research and development, which results were not made out in the provided order should be charge-off from the credit of the acc. 08 "Investments in the non- circulating assets" to the charges on ordinary activity by a linear way during the approved period (p. 11 PBU 17/02).

Research and development charge-off period is within 3 years.

Charges on research and development not given a positive result also research and development results which application was cancelled shall to be formed by the RD department of the subsidiary.

Report shall to be examined by the service of RD department of the executive body and with the technical director's authorization.

Production costs are subject to charge-off once only in composition of nonrealization expenses of the reporting period.

4.5. Overview of the new trends in the sector of the issuer's core business

Electroenergetics is one of the leading industries of Russian economic.

Russian energy is at the fourth place in the world over the installed capacities and production volumes.

All existing in the Russian electroenergetis somehow or other relates practically all industries of national economy.

Together the energy power is one of the most "problem" industries. Since 1980 the negative tendencies in the power energy of Russia took place: against the background of economic recession, the power industry actually became the donor for other industries

In the greater extent it was caused by macroeconomic factors, but non-payments have played also the great role.

Even in the most prosperous power supply systems of the European part of Russia deterioration of the basic production assets exceeded 50 % and approached to the values when the equipment's repair costs more then its change. Thus reforming necessity was evident by the year 2001.

Structural reorganization of power branch through liberalization and decontrol of potentially competitive sectors were the main tendencies for the last ten years of world power industry development.

Due to these principles, the Concept of Strategy of reforming of the Joint Stock Company "RAO UES of Russia " "5+5" was developed and created. Nowadays this Concept is realized successfully by the management body "RAO UES of Russia " also by management of regional power companies.

On July, 11, 2001 the Decision № 526 « On reforming of power industry of Russian Federation » was approved by the Government. It directs to:

1. Divide business into monopolistic and competitive components. Generation and supply should be allocated as competitive business. Thus the Federal networks (FSK), Distributive network companies (DNC), and dispatching activity (System operator) will be under supervision of the State.

2. Create a competitive energy market implied a transition of existing sales process at the directive price (FOREM - Federal Wholesale Electric Power Market) to the market pricing mechanism (creation of AMT Administrator of market trade).

Decree of the Government of RF №1040-p approved the Schedule of activities for the primary stage of reforming was adopted as development of this present Decision.

In August, 2001 the Committee on reforming has been established at Board of directors of RAO " UES of Russia ". Its composition included representatives of minority shareholders, potential investors, the State and RAO " UES of Russia ". On December, 21 the Government of Russian Federation has approved the Decision № 881 " On the criteria of transfer of the main transmission lines and objects of the power network economy to the Unique (all-Russian) power network ".

Principal facts of the year 2002 in the sphere of reforming were the following:

- adoption by the State Duma of RF in its first regarding a pack of the bills devoted to energy power reforming;

- spending of auctions of electric power in the imitation mode by the NP "ATS" together with JSC "SO-TsDU UES" ;

- creation of infrastructural institutions in the branch, i.e. the Federal Network Company and the Sysop;

- preparation of a strategy for reforming of RAO "UES of Russia";

- termination of a preparatory stage of reforming of RAO "UES of Russia";

- development and adoption of the basic variant of reforming of JS-energo;

- preparation to implementation of the pilot projects of reforming of JS-energo;

- spending of the first stages of reforming of the scientific and designing complex of RAO "UES of Russia" , also of energyreparing and service activities.

By the Resolution of the Government of Russian federation №226 dd. 2 of April 2002 "On the pricing regarding to electric and heat power" the new "Pricing principles" and "Regulations of the State regulation and application of the tariffs on electric and heat power in Russian Federation" were implemented. The Corporate Policy Code was approved by RAO "UES of Russia".

In September 2002 the non commercial partnership "Administrator of trade system"(NP "ATS" began auctions of electric power in imitation mode. One of the positive tendencies of the year 2002 was approaching of the tariffs to the economic valid, otherwise the level of the cross financing between the groups of consumers reduced.

The Board of Directors of RAO "UES of Russia" approved the base variant for reforming of regional energy systems, i.e. the RAO "UES of Russia" subsidiaries, also the exit of enterprises belonging to the Holding Company RAO "UES of Russia" from the non profile assets aimed to the expenses minimization relate to the ownership. The Board of Directors of RAO "UES of Russia" has approved

the decision on termination of participation of RAO "UES pf Russia" in ZAO "TsDR FOREM" by way of selling of 75% holding of stock belonging to ZAO "TsDR FOREM" to the Non commercial partnership "ATS".

On the night of April, 1, 2003 the function of operative - dispatching administration of the Unified Energy System of Russia were transferred from regional dispatching administrations (RDA) of JS – energo to the regional dispatching administrations (RDA) , i.e. to the subsidiaries of JSC " System operator – Central Dispatching Administration of Unified Energy System (CDA UES").

In April 2003 the pack of legislative acts on electric power reforming came into the force including such federal laws as:

- "On electric power" ;

- "On the features of electric power functioning during the transition period and on the modifications in some legal acts of Russian Federation, and on recognition as invalid some legal acts of Russian Federation due to adoption of Federal Law "On electric power";

- "On modifications and amendments to the Federal Law "On the Sate regulation of tariffs on electric and heat power in Russian Federation";

- "On modifications and amendments to the Federal Law "On the Natural monopoly";

- «On modifications and amendments to the second part of the Civil Code of Russian Federation";

- "On modifications of the Federal Law "On energy power saving".

Working group on modification of the Strategy of JSC RAO" UES of Russia " for the years 2003 - 2008 "5+5" created at Board of Directors of RAO " UES of Russia " has examined the Program of the Concept of the Strategy of RAO " UES of Russia " for the years 2003 - 2008" 5+5 taking into account the remarks and offers.

In the I half-year 2003 the process on enhancement and development of the mechanisms for competitive trade within the regulated wholesale market of electric power (capacity) proceeds. According to the existing normative legal documents monthly auctions of the above-planned electric power were spent, the volume of electric power subjects to selling at the auctions amounted 3,1% of the volume of supply to the home market.

Together with JSC"SO-CDU YES of Russia" (System operator – Central Dispatching Administration of Unified Energy System) in the I six months 2003 the trade of electric power over the scheme "Energopul" proceeds, the share of sale for the reporting period increased twice and amounted 1,3% of the total volume of the supply to the FOREM (home market).

The 31st of October 2003 the Board of Directors of RAO "UES of Russia" at the ordinary meeting heard information on the possibility of creation of the territorial generating companies (TGC) by way of co-incorporation by several JS-energo.

Variant of creation of TGC by way of co-incorporation is implicate its creation as a large operational company at the first stage of JS-Energo reforming. TGC shall be co-incorporated by several JS-energo by way of entering of their generating assets to the authorized capital of the newly created company. Thus it's a possibility at the early stage to create a large operational company whose shareholders will be incorporated it JS-energo .

According to the Resolution of the Government of RF №643 dd. 24.10.this present year "On the rules of the electric power (capacity) market during the transition period", since November, 1, 2003 at the same time with the regulated sector of the wholesale electric power market (existing Federal wholesale electric power (capacity) market) the competitive sector supposing the trade in hourly volumes of the electric power on free prices is started.

Thus in the free sector each manufacturer may offer up to 15 % from the fixed capacity, and each consumer can declare purchase up to 30 % from own scheduled consumption. Economic benefit of the free sector of the wholesale electric power market launching is obvious. Densities of electric power supply by heat power plants with rather low industrial expenses has increased, while the supply by "expensive" generating capacities, on the contrary reduced.

In March 2004 allocation of repairing activity was finished according to the Program on

energyreparing activity of JSC "Kuzbassenergo" approved by the Design Group on reforming of energyreparing activities and creation of technological services market of JSC RAO "UES of Russia" dd. 01.07.2003.

Subsidiary named "Maghistralnye electric networks" (Main-line electric networks) was created within the activity on reforming of electric network complex on the ground of the property complex on trunk transmission lines related to the Unique national electric network.

In February 2005 the Board of Directors of RAO "UES of Russia" adopted a decision on modification of the scheme of allocation of the main-line transmission lines of JS –energo. New order of electric network complex reforming provided:

1) transfer in the main-line network companies (MNC) over the divided balance of the objects of UNUS and monetary to the expenses compensation;

2) payment of stocks belonging to JSC RAO "UES of Russia" to MNC allocated under the reorganization of JS-energo in the authorized capital of JSC"FNC UES";

3) joining of MNC as its segregation from the composition of JS-energo to one MMNC "Centre", which also the others MMNC simultaneously join.

Within the electric power reforming on the territory of Siberia the competitive sector of wholesale market was created which is till now extending to the European part of Russia and Ural.

Wholesale market of electric power in Russia is divided in two sectors, i.e. regulable (the Sate fixes the tariffs) and competitive, whose participants may sell at the free price to 15% of the outputted energy.

The 1st May 2005 the competitive sector of wholesale market of electric power was launched in Siberia.

The Kuzbass energy system feature is in the fact that the JSC "Kuzbassenergo" both sell and buy electric power.

14 affiliated companies of RAO " UES of Russia " took part in the first tenders in competitive sector of the wholesale market of the electric power on the territory of Siberia. The operator of competitive sector of the wholesale market of the electric power in Siberia is the Noncommercial partnership « Administrator of trade system ».

24 of June 2005 the Board of Directors of RAO"UES of Russia" approved the Program on reforming of JSC "Kuzbassenergo". Also by this decision of the Board of Directors of RAO "UES of Russia" modification in the lay-out of the territorial generating companies approved by the Decision of the Board of directors of JSC RAO "UES of Russia" (minutes №168 dd. 2304.2004) was made, thus the decision on creation of TGC-12 on the base of generating assets of JSC "Altayenergo" and JSC "Kuzbassenergo" was approved.

Taking into account the possible monopolistic situation of JSC "Kuzbassenergo" at the forming wholesales market of electric power the Board of Directors accepted the decision on segregation in separate JS of Western-Siberian TETs and South-Kuzbass GRES.

In pursuance of the decision accepted by the Board of directors of JSC " Kuzbassenergo " (minutes dd. 12.07.05) over the agenda « On definition of priority directions of the Company's activity: about the start of reforming of the Company in part of division by kinds of activity by way of reorganization in form of segregation » the Plan - schedule of activities on reforming defined activity of a power system for the second half-year 2005 and all 2006 was approved by the Order №476 dd. 29.07. 2005.

In accordance with the Plan-schedule of activities on reforming of JSC "Kuzbassenergo" the following activities were spend. To define the market value of the stocks subject to redemption under the reorganization JSC "Kuzbassenergo" spent a candidate selection of independent valuator's institution from the number of valuators accredited by the JSC RAO "UES of Russia".

The Board of Directors of JSC "Kuzbassenergo" approved as independent valuator the Ltd. "Real estate and financial activity appraisal Institute " (Tomsk).

Independent valuator has prepared the report on market value of stocks belonging to JSC "Kuzbassenergo" for 30.06.2005.

Appraisal report was adjusted with shareholders and approved by the Board of Directors of JSC "Kuzbassenergo".

Within the prepare of divide balance of JSC "Kuzbassenergo" the extended inventory of real estate and financial liabilities of the Company for 30.06.2005 was terminated.

Divided balance of JSC "Kuzbassenergo" was approved by the Board of Directors (minutes dd.

28.11.2005).

By the resolution of the Board of Directors of JSC RAO "UES of Russia" dd. 23.12.2005 the program on reforming of JSC "Kuzbassenergo" adopted 24.06.2004 was cancelled and the new program was approved provided segregation of JSC "Western-Siberian TETs" and JSC "South-Kuzbass GRES" with proportionally stock allocation between the shareholders except 50%=1 stock subject to purchase by the JSC "Kuzbassenergo". Termination of participation in these two companies will be carried out by way of share holdings selling as united lots at the open auctions furthermore every shareholder will receive right to sell his stocks in composition of the united lots at the date of shareholders register closing.

Purchasing by JSC "Kuzbassenergo" of generating and heat network assets of JSC "Altayenergo" is provided in future.

The extraordinary general meeting of shareholders of JSC "Kuzbassenergo" took place the 30.12.2005.

Decision on reorganization of JSC "Kuzbassenergo" by way of segregation of the following objects saving the structure of the authorized capital was accepted over the voting results:

- *JSC «Kuzbassenergo – regional electric network company";*
- *JSC «Kuzbass energy supply company";*
- *JSC "Main-line electric networks "Kuzbassenergo";*
- *JSC 'Western-Siberian TETs";*
- *JSC "South-Kuzbass GRES".*

Socks of the newly creating by JSC "Kuzbassenergo" companies - (JSC «Kuzbassenergo – regional electric network company", JSC «Kuzbass energy supply company", JSC "Main-line electric networks "Kuzbassenergo", JSC 'Western-Siberian TETs", JSC "South-Kuzbass GRES") shall be distributed between the shareholders of JSC 'Kuzbassenergo' including the shareholders who had voted against or who had not took participation in voting over the agenda on reorganization of the Company proportionally to the number of the stocks owned by them belonging to the JSC "Kuzbassenergo".

Distribution ratio assumes to issue one stock of the newly created companies for each stock of the Company.

According to the variant of reforming approved by the meeting, JSC "Kuzbassenergo" acquires 50%+1 stock in the authorized capital of JSC "South-Kuzbass GRES" and JSC "Western-Siberian TETs.

To the shareholders who voted against or who did not vote, it is offered to acquire the shares in the JSC "Western-Siberian TETS" and JSC "South –Kuzbass GRES" proportional to their present share in authorized capital of JSC "Kuzbassenergo".

The shareholders voting " for" the segregation of new companies, should acquire the shares proportional to their share in the authorized capital of JSC 'Kuzbassenergo" but from "rest" of authorized capitals of JSC « Western - Siberian TETs » and JSC« South - Kuzbass GRES » minus shares of JSC "Kuzbassenergo" and the shareholders voted against or not voted.

The stock of the newly creating companies not distributed among the shareholders of the Company shall be deemed as acquired by JSC "Kuzbassenergo".

After acquisition by JSC "Kuzbassenergo" of 50%+1 stock of JSC 'Western-Siberian TETs" and JSC 'South-Kuzbass GRES" and proportional distribution of the rest part among the shareholders it's provided to organize the open auctions on the selling of the company's stocks as united lots.

V. Detailed information about members of the issuer's administrative bodies, its units of control over its financial and economic activities; brief information about the issuer's personnel (employees)

5.1. Information about the structure and competence of the issuer's regulatory bodies
The Company's regulatory bodies are represented by: **(according to the art. 9 of the Articles of Association)**
- ***General Meeting of the Company's shareholders***
- ***Board of Directors***
- ***Management Board***
- ***General Director of the Company.***

The Company is determined by the Articles of Association and by the internal documents of the Company, i.e.:

- ***Provision on the order of preparation and conducting of General meeting of Shareholders of JSC "Kuzbassenergo" approved by the Annual General meeting of shareholders of JSC 'Kuzbassenergo" dd. 02.06.2003.,***
- ***Provision on convocation and conducting of meetings spend by the Board of Directors of JSC 'Kuzbassenergo" approved by the Annual General meeting of shareholders of JSC 'Kuzbassenergo" dd. 21.06.2002, with amendments and modifications approved by the Annual General meeting of shareholders of JSC 'Kuzbassenergo" dd. 27.06.2005.***
- ***Provision on the Management Board of JSC "Kuzbassenergo" approved by the Annual General meeting of shareholders of JSC 'Kuzbassenergo" dd. 21.06.2002.***

Competence of the General meeting of shareholders, of the General Director and of the Management Board is determined by the Articles of Association approved by the Annual general meeting of shareholders dd. 21.06.2002 including the following modifications and amendments to the Articles of Association:

- ***modifications and amendments to the Articles of Association of JSC 'Kuzbassenergo" approved by the Board of Directors 02.06.2003;***
- ***modifications and amendments to the Articles of Association of JSC 'Kuzbassenergo" approved by the Annual general meeting of shareholders 02.06.2003;***
- ***modifications and amendments to the Articles of Association of JSC 'Kuzbassenergo" approved by the Board of Directors 01.07.2003;***
- ***modifications and amendments to the Articles of Association of JSC 'Kuzbassenergo" approved by the Board of Directors 26.09.2003;***

Inventory cost of the fixed asset's objects, i.e. computers shall be determined as a sum of the price of all devices (system block, monitor, printer, keyboard, mouse etc.) subject to work. Components and peripherals devices purchased as a change of the worn out shall be accounted as spare parts on the corresponding sub account of the account 10 "Materials".

5.2. Fixed assets valuation's ways

5.2.on acceptance to accounting objects of the fixed assets are valuated by the next ways:

a) purchase of the fixed assets for a payment - at a rate of actual expenses of the company for the purchase, defined according to par. 8 PBU 6/01 " the Fixed assets accounting " and gathered preliminary on the account 08 " Investments in non circulating assets ", the sub account " Purchase of separate objects of the fixed assets ";

b) construction of the fixed assets by the contract organizations and own-account construction - at a rate of actual expenses for the finished and putted out capital construction according to Provisions on accounting of long-term investments, authorized by the Order of MF of Russian Federation dd. 30, 12. 1993 № 160, gathered preliminary on the account

08 " Investments in non-circulating assets " by one object the subaccount " Construction of separate objects of the fixed assets ";

b) earning of the fixed assets as investments in the authorized (cumulative) capital – in monetary valuation approved by the incorporators (participants) if otherwise is not stipulated by the legislation of the Russian Federation (par. 9 PBU 6/01). The note in the debit of account 08 "Investments in non-circulating assets", subaccount "Acquisition of separate objects of the fixed assets" in the correspondence with an account 75 "Payments with incorporators" is necessary. On the debit of account 08 "Investments in non-circulating assets", subaccount "Acquisition of separate objects of the fixed assets" expenses (including transport and other delivery works) concerned the fixed assets earnings in the authorized capital shall be reflected;

d) gratuitous acquisition of the fixed assets from the legal entities and natural persons also on posting of the fixed assets revealed as surplus over the results of privatization at the market price as for the date of posting. On gratuities acquisition the note in the debit of account 08 "Investments in non-circulating assets", subaccount "Acquisition of separate objects of the fixed assets" from the credit of the account 98 "Further incomes" is made according to corresponding analytics.

On the debit of account 08 "Investments in non-circulating assets " the subaccount " Acquisition of separate objects of the fixed assets " the expenses (including transport and other delivery works, registration fees and other expenses) concerned the gratuitous receipt of the fixed assets also are reflected. In process of amortization charge at the gratuitously acquired fixed assets, simultaneously, at a rate of charged amortization, records on the debit of account 98 " Further Incomes " according to corresponding analytics and to the credit of account 91 " Other profits and losses" in the composition of extraordinary incomes are made;

On surplus posting over results of inventory the record on the debit of account 01 "Fixed assets" from the credit of account 91 "Other profits and losses" is made.

Not accounted real estate revealed in the process of inventory shall be charged in the composition of the fixed assets after the documents submittal to the State registration.

Information on prices in force as for a date of accounting acceptance shall be approved by the documents or by way of expertise (par. 29 Methodical recommendations on the fixed assets accounting (Order of MF RF №91n dd. 13.10.2003).

e) acquisition of the fixed assets under the contracts providing execution of liabilities (payment) by nonmonetary assets at the cost of values transferred or subject to transfer to the Company according to the price which in comparable circumstances the Company usually determines cost of the similar values (par. 11 PBU 6/01);

f) Contract value shall be recognized as the value of the fixed assets acquired under exchange contracts which fixes the contract value of the exchange property;

5.2.2.Expenses on loans and credits (interests etc.) due to the fixed assets acquisition shall be included in the initial value of the fixed assets in accordance with par. 23, 31 of Accounting Provisions "Accounting of loans and credits, also their performance expenses" PBU 15/01 (Order of MF №60n dd.2.09.2001).

5.2.3Expenses (profits) on acquisition of the objects of the fixed assets arisen after its acceptance to accounting (cost and price difference, nonreimbursable taxes etc.) shall be accounted on the account

91 "Other profits and losses" in composition of extraordinary expenses (incomes) according to the corresponding analytics.

5.2.4. Changes in initial cost of the fixed assets shall be only in cases of completion, after equipment, reconstruction and modernization, partial liquidation and revaluation of the fixed assets.

5.2.5. Complex and partial revaluation of groups of similar objects of the fixed assets over the current (replacement cost) by way of indexation or direct converting according to documentary approved market costs is carried out one a year (as for the 1 January of the reporting year) on the ground of the single Order to the Company, and further is carried out regularly (one time in three year.

Revaluation sum of the fixed asset's object resulted to revaluation shall be charged on the account 83"additional capital" in amount charged minus its discount fulfilled the previous reporting periods and transferred to the account of profits and losses as operational expenses.

Revaluation sum of the fixed asset's object equal to the sum of its discount fulfilled the last previous periods and transferred to the account of profits and losses as expenses shall be transferred to account 91 "Other profits and losses" in composition of operational profits.

Discount sum of the object of the fixed assets shall be referred to the additional capital decreasing composed due to revaluation's sum of this object in the previous reporting periods (par. 15 PBU 6/01, ed. 18.05.2002). Excess of the discount sum of the object of the fixed assets over the sum of its discount related to the additional capital resulted the revaluation spent the previous periods shall be referred to the account 84 "Non distributed profits (uncovered loss)".

5.2.6. Sum of revaluation (discount) arose from revaluation of the fixed assets of the subsidiaries shall be transferred to the executive body of the Company on debit (credit) of account 79 "Intraeconomic payments" on subaccount " Payments on allotted property".

5.2.7. If the object of the fixed assets withdrew the sum of its revaluation shall be transferred from the account 83 "additional capital" to the account 84 "Non distributed profits (uncovered loss)" in composition of profit of the reporting period (par. 15 PBU 6/01, ed. 18.05.2002).

5.2.8. Valuation of the fixed asset's object which cost under acquisition is expressed in foreign exchange shall be realized by way of the sum conversion according to the rate in force of Central Bank of Russia by the date of the object charge to account 01 "Fixed assets".

Furthermore the rate difference shall be accounted on debit (credit) of account 08 "Investments in noncirculated assets" in the credit (debit) of account 91 "other profits and losses" in composition of the extraordinary expenses (profits) (par. 16 PBU 6/01).

5.2.9. Gratuitous transfer and sale of the fixed assets to the third-party companies and natural persons, charge-off of underamortization fixed assets from the balance due to their unfitness to use, also deficient fixed assets revealed under inventory or stolen shall be carried out according to the written resolution prepared by the Department on capital management of the executive body together with visas of corresponding services.

The document shall be subscribed by Deputies general director to the proper place:

- *fixed assets of nonindustrial activities (Housing and communal services, catering, autotransport etc.) – by the first deputy general director on common problems;*
- *industrial fixed assets – by the deputy general director, technical director;*
- *charge-off from the balance of amortized fixed assets due to their unfitness to use, also partial liquidation of the fixed assets shall be carried out on resolution of director of subsidiary or representative office.*

In the process of charging-off from the balance of underamortized fixed assets VAT falling at the underamortized part without revaluations shall be restored.

Stocks of materials and capital equipment remained due to discount of unfit to reconstruction and further use of the fixed assets shall be debited at the market price as for the date of the fixed assets object's discount together with transfer to account 91 "Other profits and losses" in composition of operating profits.

5.2.10. Depreciated cost of the retired object of the fixed assets from the credit of account 01 "Fixed assets" shall be withdraw to the debit of corresponding subaccount of account 91 "Other profits and losses":

- *in composition of operating expenses in case of the fixed asset's retire due to sale, charge-off in case of moral or material depreciation;*
- *in composition of extraordinary expenses in case of the fixed asset's retire due to gratuitous transfer.*

Retire of object of the fixed assets transferred on account of investments in the authorized (composed) capital, pay fund in amount of its depreciated cost shall be reflected on debit of account of expenses accounting and credit of account of he foxed assets accounting.

If the object of the fixed assets has not depreciated cost (fully amortized), amount of the conditional value shall be reflected in bookkeeping as operating profits in the line 09010 of the form 2 "Report on profits and losses".

5.2.11. Expenses on the fixed assets charge-off due to accidents, natural disasters and others emergency situations shall be reflected in bookkeeping of reporting period in composition of emergency expenses.

5.3. Depreciation of fixed assets

5.3.1. The method of depreciation of the objects of fixed assets is linear, reasoning from the dates of the effective use of these objects. The depreciation of the objects of fixed assets, taken on accounting before 01.01.2002, is accrued in accordance with the Regulation of the USSR Council of Ministers from 22.10.1990 № 1072 "About the unified standards of depreciation charges for the complete reconstruction of fixed assets of the economy of the USSR". The depreciation of the objects of fixed assets, taken on accounting since 01.01.2002, is accrued in accordance with the Regulation of the Government of RF from 01.01.2002 № 1 "About the classification of fixed assets included in depreciation groups".

5.3.2. The depreciation of the objects of immovable property, capital investments of which are completed, all primary acceptance instruments are drawn up, the documentation is handed over the state registration and practically put into operation, is accrued in accordance with the established procedure – since the first day of the month, following the month of setting the object into operation. The objects are regarded as the objects of fixed assets.

5.3.3. The objects of fixed assets at the cost of up to RUR 10 000 per unit (bought editions, not belonging to the library as well) are charged off according to the item "Depreciation" as far as they are put into production or operation. This operation is mentioned in accounting on debit of accounts of inputs account (selling costs) and account credit 01 "Fixed assets" and drawn up by the Act of charging off according to MB-8 form. Such objects are reckoned in the record keeping at the cost of 0. In case of modernization (reconstruction) of these objects, the modernization (reconstruction) expenses are charged to the increase of the cost of the object and depreciated in accordance with the established procedure.

The executive body, affiliated companies and the representative office control the movement of these objects in order to ensure their safety in the process of production and operation. Records management of these objects in places of their operation is kept in "The bill of assets at the cost of up to RUR 10 000, put into operation" according to the suggested form, apart from the fixed assets,

depreciated in accordance with the established procedure (Appendix 2 to the present Regulation). Accounts department and persons in charge control the correspondence between the records in the bill and inventory sheets.

The retirement of the objects at the cost of up to RUR 10 000 is drawn up by "The Act of retirement of fixed assets at the cost of up to RUR 10 000", according to the suggested form (Appendix 2 to the present Regulation).

5.3.4. Depreciation of the following objects is not accrued:

- housing resources (par.17 PBU 6/01);

- objects of external accomplishment (par.17 PBU 6/01);

- productive cattle (par.17 PBU 6/01);

- perennial plantations (par.17 PBU 6/01);

- lands (par.17 PBU 6/01);

- objects of nature management (par.17 PBU 6/01);

- fixed assets, received before 01.01.2000 under contracts of donation and gratis in the process of privatization;

- books, brochures and other editions.

5.3.5. The process of depreciation accrual can be interrupted by the decision of the director of the affiliated company in the period of restoration (repair, modernization, reconstruction) of the objects of fixed assets, that lasts more than 12 months, and in case of their temporary closing-down for the period of more than 3 months under the order of the JSC "Kuzbassenergo" (par.23 PBU 6/01).

5.3.6. Accrued depreciation of the objects of fixed assets of production purposes under the account credit 02 "Depreciation of fixed assets" control account "Accrued depreciation" is sent to finance capital investments of production purposes as a record in debit of account 02 "Depreciation of fixed assets" control account "Accrued depreciation" from credit 02 "Depreciation of fixed assets" control account "Depreciation of capital investments".

The off-balance account with the acceptance (transfer) of the funding source among the affiliated companies under off-balance aviso is kept, when nesting at the cost of inter-branch depreciation redistribution

5.4. The procedure of accounting and financing of the repair of fixed assets.

5.4.1. For a current fiscal year the reserve for repair work is created on account 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes" at the rate established by the estimate of expenses of the annual standard of repair cost, including it into production costs monthly (accounts 23, 25, 26) at the rate of 1/12 of annual estimate. The reserve is created to include expenses for all types of repair work of fixed assets of production purposes into production costs.

At year end the adjustment of the repair reserve is performed:

- extra reserved money for the repair of fixed assets (as a result of inventory taking) is reversed an entry.

- in case of stress of reserve money for repair of fixed assets, extra charge takes place under debit of accounts of the records of production costs and on account credit 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes".

Account of repair expenses is carried out separately according to the types of repair (thorough

repairs and current repairs) and methods of carrying out (contract and household).

All the expenses for repair of fixed assets of production purposes, carried out with the help of:

- household method – are accounted object by object on account 23 "Auxiliary processes" under control accounts "Thorough repairs of fixed assets using the household method" and "Current repairs of fixed assets using the household method". Later they will be put in corpore into debit of account 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes" every month.

- contract method – are put in corpore from account credit 60 "Settling with suppliers and contractors" on the corresponding control accounts into debit of account 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes"

In case of stress of reserve money for repair of fixed assets (including leasehold assets) of production purposes, debit balance on account 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes" is mentioned in the line of the balance "Other production costs and resource" at the end of month

Expenses for repair of fixed assets of non-production purposes are charged off from the credit of corresponding control accounts of account 23 "Auxiliary processes" or account 60 "Settling with suppliers and contractors" into debit of account 29 "Attendant production and households".

5.5. Account of intangible assets.

5.5.1. Intangible assets include the objects of intellectual property under all implemented terms, mentioned in par.3 PBU 14/2000 " Account of intangible assets"(The Order of Ministry of Finance of the RF from 16.10.2000 № 91n)

5.5.2.To be taken on accounting the objects of intangible assets are valued in the following ways:

a) intangible assets acquisition subject to payment – at the rate of actual expenses of the Company for the acquisition of the assets, defined in accordance with par.6 PBU 14/2000 " Account of intangible assets"(The Order of Ministry of Finance of the RF from 16.10.2000 № 91n), collected preliminarily on account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets";

b) creation of intangible assets by the Company itself – at the rate of actual expenses for creation and production except for value added tax and other refundable taxes, collected preliminarily on account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets"(par.7 PBU 14/2000);

c) deposition of intangible assets in authorized capital – in pecuniary valuation, coordinated by founders (members), if nothing else is provided by the Legislation of RF (par.9 PBU 14/2000).A preliminary record is made in debit of account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets" in correspondence with account 75 "Settling with founders". The expenses connected with deposition of intangible assets in authorized capital are mentioned as well on debit of account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets";

d) non-repayable donation of intangible assets from legal and natural persons - at the common rate at the date of posting. A record in debit of account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets" from account credit 98 "Revenue of next periods" is made. The expenses connected with non-repayable donation of intangible assets are mentioned as well on debit of account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets". The information about the prices, established at the date of taking on accounting, is confirmed authentically or by examining.

By depreciation accrual of such intangible assets at the same time at the rate of accrued depreciation the records are made on debit of account 98 "Revenue of next periods" in corresponding

analytics and account credit 91"Other receipts and expenditures" in non-disposal revenue;

e) acquisition of intangible assets under the contracts, providing for discharge of obligations (payment) with non-monetary funds – at the cost of values, transferred or being subject to transfer by the Company, set reasoning from the price that is fixed by the Company for similar values in similar circumstances (par.11 PBU 14/2000);

f) the cost of intangible assets is the contract value; the assets received under contracts of exchange which fix the contract value of exchanged property;

5.5.3. Depreciation of all groups of intangible assets is carried out with the linear method, based on the standards calculated on the basis of the period of the effective use of the objects of intangible assets, using account 05 "Depreciation of intangible assets" (par.15, 16, 21 PBU 14/2000).

5.5.4. The period of the effective use of intangible assets is defined independently when the object is taken on accounting, reasoning from the expected period of use of an object, when it is possible to collect revenue. The expected period of the effective use should not exceed the period of validity of a patent, a licence and other legal documents and limits on the use of the objects of intellectual property according the present legislation of Russian Federation (par.17 PBU 14/2000).

If it is impossible to define the period of the effective use of intangible assets, the standards of depreciation charges are set counting on 20 years (but it should not exceed the period of functioning of the Company).

5.6. Lease of fixed assets

5.6.1. The leased property is mentioned apart in accounting. All the leased property expenses are carried out on account 90 "Selling". Depreciation of leased property is mentioned on account credit 02 "Depreciation of fixed assets" and debit of account 90 "Selling".

Full payback of the objects (including local taxes: acre-shot, tax on property, etc.) should be provided in lease contracts.

5.6.2. Account of leased fixed assets is kept on off-balance account 001 "Leased fixed assets" according to the valuation, fixed in lease contracts. Analytic account is kept regarding lessors and every object of leased fixed assets.

5.6.3. Lease contract defines the period of leasing of fixed assets, the amount of rental fee, the terms of the keeping and repair work, valuation changes as a result of thorough repairs, and procedure of settlements.

5.6.4. The property, purchased for leasing and profit earning, is mentioned in accounting on account 03 "Income investments in stocks of materials and capital equipment".

5.7. Account characteristics of the investments in non-circulating assets.

5.7.1. Running OKS costs (wage cost, travel expenses) are covered at the expense of the funds, aimed at financing of capital construction and included in the inventory cost of exploited objects (par.1.4. of the Regulation on accounting of long-term investments, confirmed by the Order of the Ministry of Finance of RF from 30.12.93 №160).

5.7.2. Every month running OKS costs of the executive body are distributed among the affiliated companies pro rata SMR volume of affiliated companies in accordance with the coefficient, calculated as in the ratio of SMR volume of an affiliated company for the reporting month and total SMR volume of the Company for this month.

5.7.3. Capital construction expenses are included in inventory cost of objects of capital investments at taking them on accounting. They are classified by par.3.1.7. of the Regulation on accounting of long-

term investments, confirmed by the Order of the Ministry of Finance of RF from 30.12.93 №160 as the expenses not leading to the increase in the cost of fixed assets.

5.7.4. If the Company has shares when the construction is under way, the transfer of monetary funds or property to the chief builder on the basis of share holding is reflected as a accounts receivable of this construction by the record in debit of corresponding control account of account 76 "Settling with various debtors and creditors" in correspondence with accounts of accountability of monetary funds or property.

When the construction (or it's part) comes to an end the corresponding expenses are taken on account by the record from account credit of the corresponding control account 76 ""Settling with various debtors and creditors" in debit of account 08 "Investments in non-circulating assets", control account "Construction of the objects of fixed assets".

5.7.5. If the Company is the chief builder, the money, received from the builders who have shares, is mentioned as money for purpose financing on debit of account 86 "Purpose financing" in correspondence with accounts of accountability of monetary funds or property.

5.7.6. Account of NIOKR in the Company is carried out in accordance with the Regulation on accounting "Account of expenses for research engineering, development and technological activity" (PBU 17/02).

The expenses for research engineering, development and technological activity are recognized in accounting if:

- *The sum of the expense can be defined and confirmed;*
- *There is documentation that proves execution phase;*
- *The results of the activity used in production and operation will lead to revenue in future;*
- *The use of results of research engineering, development and technological activity can be demonstrated.*

The expenses for NIOKR are mentioned in accounting on account 08 "Investments in non-circulating assets" (par.5 PBU 17/02).

The expenses for NIOKR, which results are subject to legal safeguard and drawn up in accordance with legislation order (patents, licenses and other documentation are received to attest the exclusive right of the Company to possess the results of NIOKR), can be considered intangible assets.

The expenses for NIOKR , which results are not drawn up in accordance with established procedure, are charged off from account credit 08 "Investments in non-circulating assets" for the expenses for usual activities using the linear method during the fixed period (par. 11 PBU 17/02).

The period of charging off the expenses for NIOKR is set within 3 years.

The expenses for NIOKR, which results were not satisfactory, and the results of NIOKR which use was stopped, are drawn up by the decision of PTO of an affiliated company.

The decision can be viewed by the service of PTO of the executive body and with the written permission of the technical director. The expenses are charged off at a time in non-disposal expenses of the reporting period.

5.7.7. The objects of incompleted capital construction, which construction was stopped and won't be carried out because of lack of funds in future, exposed to revaluation, the cost of revaluation is transferred from account credit 84 "Surplus earnings (dead loss)" in debit of account 83 "Surplus capital" and as a record from account credit 08 "Investments in non-circulating assets" in debit of account 91 "Other receipts and expenditures" in the sum of actual expenses incurred.

The charge off the objects of incompleted construction is carried out on the basis of the regulatory document (order, instruction, etc.), prepared by OKS of the executive body with the explanation of the reasons for charging off on the basis of the letter of inquiry of the affiliated company about charging off and inventory carried out.

5.8. Inventory accountability

5.8.1. Inventory includes assets:

- *for being used as raw material, materials, etc. in the process of production, in execution phase and rendering of service, repair work of fixed assets, building and assembly jobs, cultural and educational needs;*
- *aimed at being sold (finished commodity);*
- *aimed at being used as means of labour during the 12-month period;*
- *aimed at being used by the Company for meeting its administrative needs.*

5.8.2.Inventory, tools and household fixings used less than for 1 year-period are included in inventory on account 10 "Materials".

5.8.3. The stock-list number, worked out for a definite name of inventory, is taken as an accounting unit.

5.8.4. Taking on accounting of the inventory, its valuation is carried out in the following ways:

- *acquisition subject to payment – the sum of actual expenses for acquisition except value added tax and other taxes compensated from the budget, defined in accordance with par.6, 11 PBU 5/01 (the Order of the Ministry of Finance of RF from 09.06.2001 № 44n), with the glance of the regulations of par.15 PBU 15/01 "Account of loans and lending and the expenses for their operation" with the glance of interests and other expenses for borrowed current assets;*
- *making by own strength – reasoning from actual expenses, connected with the production of the inventory. Account and formation of inventory expenses is carried out in the order, established to define the net cost of applicable types of production (par.7 PBU 5/01);*
- *invested in authorized capital – reasoning from pecuniary valuation, coordinated by founders (members), if nothing else is provided by the Legislation of RF , with the glance of actual expenses for the delivery of the inventory and putting it in conditions for operation, according to par.6 PBU 5/01 (par.8, 11 PBU 5/01);*
- *received gratis or under the contract of donation, left from retirement of fixed assets and other property and posting of the inventory, revealed as surplus as a result of inventory taking – reasoning from current market cost considering the posting date with the glance of actual expenses for the delivery of the inventory and putting it in conditions for operation (par.9, 11 PBU 5/01).*
- *received under the contracts, providing for discharge of obligations (payment) with non-monetary funds – at the cost of values, transferred or subject to transfer to the Company, fixed reasoning from the price that is fixed by the Company for similar values in similar circumstances. If it is impossible to define the cost of assets, transferred or subject to transfer to the Company, the cost of the inventory, received by the Company under the contracts, providing for discharge of obligations (payment) with non-monetary fund, is defined reasoning from the price, that is more suitable for acquisition of similar inventory in similar circumstances. The actual cost price of the inventory includes actual expenses for the delivery of the inventory and putting it in conditions for operation in accordance with par.6, 10, 11 PBU 5/01;*
- *The cost of the inventory, received under the contracts of exchange, which fix the contract value of the exchanged property, is the fixed contract value.*

5.8.5. The evaluation of the inventory, which cost is evaluated in foreign currency at the moment of acquisition, is estimated in rubles at the rate of exchange fixed by the Central Bank of RF on the day of taking the inventory on accounting.(par.15 PBU 5/01).

5.8.6. The inventory received by the Company without calculated-paid documents (non-invoiced deliver) are taken on discount at the price fixed in the contract. If the price is not fixed in the contract, in order to fix it and the amount of payment or account payable, the price, used by the Company in similar circumstances with similar inventory, is tagged (par.6.1. PBU 10/99). After calculated-paid documents are received, the difference between the actual cost of inventory and its valuation at the moment of taking on discount is included in the same expenses accounts the inventory was charged

off, and in the balance of the inventory at the store pro rata its volume.

If calculated documents of non-invoiced delivers were received a year later after the annual accounting had been performed, it means that:

a) account cost of the inventory is not changed;

b) the rate of value added tax is used in accounting in accordance with established procedure;

c) settling with a supplier is being adjusted, the difference between account cost of the inventory and its actual cost is charged off in the month, when the calculated documents were received:

- cost decrease of the inventory is mentioned on debit of account 60 "Settling with suppliers and contractors" and account credit 91 "Other expenses";

- cost increase of the inventory is mentioned on debit of account 91 "Other expenses" and account credit 60 "Settling with suppliers and contractors" (par.41 of Methodical Instructions on the inventory accounting (confirmed by the Order of the Ministry of Finance of RF from 28.12.2001 № 119n).

5.8.7. Merchandise bought for sale by retail are accounted at the value of sales on account 42 "Trading extra charge" (par.13 PBU 5/01). The amount of extra charge, falling at the remains of unrealised products, is fixed reasoning from the percentage of the cost of retired products to the cost of the accounted ones.

5.8.8. Merchandise bought for selling in wholesale are accounted at the acquisition cost with the glance of the expenses for provision and delivery of the products to the stores (bases) till the moment they come into the market (par.13 PBU 5/01).

5.8.9. The inventory, owned by the Company, but being delivered, or transferred to a customer to pawn, is taken on discount in value, fixed in the contract with sequential adjustment of actual cost (par.26 PBU 5/01).

5.8.10. The account of purchased fuel for energy generation is carried out at actual cost and includes: the fuel cost according to the bills of suppliers, including discounts (extra charge) because of poor (good) quality, the payment for other services provided by the supplier and commodity exchange, railway rate quotation of fuel from the shipment place to the station of destination and from the station of destination to discharge arrangements, other expenses according to par.6, 11 PBU 5/01, except the expenses of fuel- shipping department.

The expenses of fuel supply workshop for unloading, warehousing and intraoffice transference of fuel from the stores and fuel delivery for meeting technological needs are not included in the net cost. They are referred to the expenses for power generation of TTTS (par.4.7. of Methodical Instructions on fuel account at heat power plants RD 34.09.105-96).

5.8.11. On putting the inventory (except the products accounted at value of sales) in production and other type of retirement the valuation is appraised at average net cost of each type of inventory.

The average valuation of actual cost of the materials released in production or charged off for other purposes, is estimated by the defining of the actual cost of the material at the moment of its release (sliding valuation).

5.8.12. The putting into production (operation) of the inventory holdings is drawn up as a blading according to form M-11 for intraoffice transference (from one advance holder to another one).

The charging off the inventory in production, except for construction materials, is carried out on the basis of the act of charging off the equipment and other types of the inventory in suggested form (Appendix № 2 to the present Regulation).

The charging off the inventory in production is carried out on the basis of the act of charging off the inventory in suggested form with simultaneous drawing up the blading according to form M-11 for putting in production (Appendix № 2 to the present Regulation).

5.8.13. The account of special tools, special devices, special equipment and working clothes is carried out in the Company in accordance with the Methodical Instructions on accounting of special tools,

special devices, special equipment and working clothes, confirmed by the Order of the Ministry of Finance of RF from 26.12.2002 № 135n..

The list of the means of labour accounted as special tools, special devices, special equipment, used for carrying out non-standard operations (par.2 of the Methodical Instructions), is defined by the affiliated company independently reasoning from the peculiarities of the engineering procedure.

When defining the composition and groups of special equipment one should take into account the All-Russian classifier of fixed assets OK-013-94 (confirmed by the Resolution of the State Committee on standards, metrology and inspection certification from 26.12.94 № 359), and the All-Russian classifier of types of economic activity, production and services OK-004-93(confirmed by the Resolution of the Government standard of RF from 06.08.93 № 17).

Special equipment, working clothes and other means of man-to-man defense, regardless of their cost and the period of effective use, is referred to the means put into circulation (par.50 "The Regulation on bookkeeping of RF", confirmed by the Order of the Ministry of Finance of RF from 29.03.2000). These means are mentioned in control accounts 10.10 "Special equipment and working clothes at the store" and 10.11 "Special equipment and working clothes in use", open to the balance account 10 "Materials".

Bedding, tools aimed at carrying out the standard types of production (par.4 of the Methodical Instructions) and other inventory included in the means put into circulation are mentioned in account 10.9 "Inventory and household equipment"

Working clothes and other means of man-to-man defense, special equipment which can be used up to 12 months, according to the standards, are charged off in debit of accounts of expenses for production at the moment of its transference to the workers of the Company (par.21 of the Methodical Instructions)

The charge off the given working clothes, other means of man-to-man defence etc. is carried out on the basis of the act on charging off according to form MB-8 with simultaneous drawing up the blading according to form M-11 for putting in production.

If the period of operation is more than 12 months, the cost of working clothes and other means of man-to-man defense etc. is covered with the linear method reasoning from the periods of the effective use (par.26 of the Methodical Instructions).

To get working clothes, other means of man-to-man defense etc. aimed at long-term use, a worker must sign in worker's personal card (form MB-2) and in the list accounting the issue of the working clothes, other means of man-to-man defense etc. (form MB-7).

The cost of special equipment is covered with the linear method reasoning from the actual cost of the object and standards reasoning from the periods of the effective use of the object (par.24 of the Methodical Instructions). The period of the effective use of special equipment in affiliated companies is set by the permanent Commission individually for each type of special equipment.

The charge off the special equipment and working clothes is carried out in case of actual retirement (obsolescence, depreciation, selling, gratuitous assignment, investment in authorized capital of other companies, disposition in case of an emergency etc.).

5.8.14. The charge off the inventory delivered under the contract of donation or gratis is carried out on the basis of the basic document on the release of materials (the blading on the release of materials, of form M-15, the instructions on the release of materials or the order on the release of materials and "the Act of gratuitous reception- assignment of the inventory" (Appendix № 2 to the present Regulation). The materials are charged off in accordance with par.5.8.11 of the present Regulation. The cost of the donative materials is referred to the finance results of non-realized expenses (par.12 PBU 10/99 "The expenses of the Company" from 06.05.1999 № 33n, par.132 of "The Methodical Instructions on the inventory accounting" from 28.12.2001 № 119n (version of 23.04.2002).

5.8.15. Actual reserves of coal, mazut and other stock of materials are created according to the standards, confirmed by the directors of the Company. It is connected with the seasonal nature of production and energy supply.

5.8.16. The inventory, unloaded by the supplier and had not been delivered at the stores of the Company, which became the property of the Company (regardless of the fact of payment), is mentioned as the inventory that was not delivered at the end of the month.

5.8.17. The reception and posting of the materials is carried out by putting on the documents of the supplier a stamp with essential elements of the posting order (account, blading) (par.49 of "the Methodical Instructions on the inventory accounting" from 28.12.2001 №119n (version of 23.04.2002) and not by the drawing up the posting order (form M-4) if there is no discrepancy between the data of the supplier and actual data (quality and quantity).

5.8.18. The reception, storing, control and issue of ethyl alcohol is carried out in order provided by " Instruction on reception, issue, transportation and control over ethyl alcohol", confirmed by the Ministry of food industry of the USSR 25.09.85 (from here- Instruction). This Instruction covers all the types and kinds of ethyl alcohol regardless of the way of its purchase and the purpose of further use.

The reception and posting of ethyl alcohol is carried out in anhydrous calculus (in decalitres) on the basis of the Act of the form № P-24 "About the shipping and acceptance of ethyl alcohol" (Appendix № 7 to the Instruction) with the glance of data about the actual quantity of ethyl alcohol, received as a result of measuring conducted by the company officials and mentioned in the section of the Act.

The issue of ethyl alcohol to production departments and laboratories is carried out in accordance with par.2.1. of the Instruction and drawn up as a requisition according to form № P-29 to the Instruction).

The results of acceptance and issue of ethyl alcohol carried out on the basis of corresponding posting and expenses documents are fixed in the log book of the measuring of ethyl alcohol according to form № P-23 (Appendix №4 of the Instruction), conducted by the official who is responsible for the acceptance, issue and storing of ethyl alcohol.

In accordance with the requirements of par. 2.6. of the Instruction production departments and laboratories keep records of supply and consumption of ethyl alcohol every day in the book where they fix the name and the number of industrial operations and analysis, the quantity of consumed ethyl alcohol for each operation and for a day.

The rest of ethyl alcohol at the beginning and at the end of the month is shown according to the inventory taking, that is conducted in accordance with section 6 of the Instruction on the first day of each month. The results of the inventory taking are drawn up as the acts according to form №P-27 (Appendix № 21 to the Instruction).

The declarations "About the volume of output and circulation of ethyl alcohol out of food raw material" are shown quarterly by the Company to the rating authorities and executive authorities, granted a license of this type activity, according to appendixes 2 and 7 to the Resolution of the Government of RF from 25.05.99 № 564 "About the approval of the Regulation on avowal of the production and circulation of ethyl alcohol, alcoholic and spirit-based products".

5.9. Account of financial investments.

5.9.1. The account of financial investments in the Company is carried out in accordance with PBU 19/02 "Account of financial investments", **confirmed by the** *Order of the Ministry of Finance of RF from 10.12.2002 № 126n.*

5.9.2. The financial investments of the Company include (par.3 PBU 19/02):

- *state and municipal securities, securities belonging to other companies, including debt securities which fix the date and the cost of acquittance (bonds, bill of credits);*
- *investments in authorized capitals of other companies (including subsidiaries and dependent companies);*
- *loans granted to other companies;*

- *deposit investments in lending agencies;*
- *accounts receivable acquired on the basis of assignment;*
- *investments under the contracts of joint adventure etc.*

5.9.3. Accounting of financial investments is carried out on account 58 "Financial investments" with the division of the investments on short-term and long-term, according to the application date (maturity date) and the intentions:

- long-term investments, when the schedule data of the application (maturity) date is more than one year or the investments are made to collect revenue for more than a year;

- short-term investments, when the schedule data of the application (maturity) date is less than one year or the investments are made without the intention to collect revenue for less than a year;

5.9.4. Financial investments are taken on accounting at original cost. The original cost of financial investments, purchased subject to payment, is the sum of actual expenses of the Company for their acquisition, except for value added tax and other compensated taxes (except cases provided by the Legislation of RF about taxes and tallage).

Actual expenses for acquisition of assets in the capacity of financial investments are:

- *the sums paid to a salesman in accordance with the contract;*
- *the sums paid to the companies and other persons for information and consultation services connected with the acquisition of the mentioned assets;*
- *the bonuses paid to mediator companies or another person through whom the assets were bought in the capacity of financial investments;*
- *the expenses of the received loans and lending, made before financial investments are taken on account, at the acquisition of financial investments at the expense of borrowed current assets (par.15 PBU 15/01 "Account of loans and lending and the expenses for their operation" confirmed by the Order of the Ministry of Finance of RF from 02.08.2001 № 60n);*
- *other expenses connected with the acquisition of the assets in the capacity of financial investments.*

Actual expenses for the acquisition of the assets in the capacity of financial investments are defined according to the differences in sums if the payment is in rubles and makes the sum equivalent to the sum in foreign currency, before the assets in the capacity of financial investments are taken to the account.

5.9.5. The original cost of finance investments made in the authorized capital of other companies is the pecuniary valuation, coordinated among the founders (members) of the companies, if nothing else is provided by the Legislation of RF.

At payment of the deposition in the authorized capital with non-monetary funds on account 58 "Financial investments" the depreciated cost of transferred objects is mentioned. At the reception of the deposition in the authorized capital with non-monetary funds on account 80 "Authorized capital" the pecuniary valuation of the transferred objects coordinated by the founders is mentioned; account 58 "Financial investments" of the founder and account 80 "Authorized capital" of the receiving party will have different cost valuation.

5.9.6. The original cost of the loans given to other companies is the sum of actual transferred monitory funds or the book cost of the property, if the loan presents the property (non-monitory funds).

5.9.7. The original cost of the financial investments, deposition under the contract of joint adventure is the pecuniary valuation coordinated by the partners of the joint adventure.

5.9.8. The original cost of the financial investments acquired under the contracts providing for discharge of obligations (payment) with non-monetary funds is the cost of assets, transferred or being subject to transfer by the Company.

The cost of the assets , transferred or being subject to transfer by the Company, is set reasoning from the price that is fixed by the Company for setting similar costs in similar circumstances.

If it is impossible to set the cost of the assets transferred or being subject to transfer by the

Company, the cost of the finance investments received by the Company under the contracts providing for discharge of obligations (payment) with non-monetary funds is set reasoning from the cost of acquisition of similar finance investments in similar circumstances.

5.9.9. The original cost of the financial investments received gratis such as securities is:

- the current market cost on the day of the taking on account. The current market cost of securities is their market price calculated in accordance with established procedure by the trade organizer at the equity market;

- the sum of pecuniary valuation that can be received as a result of received securities sale on the day of their taking on account – for the securities which are not taken into account when the trade organizer at the equity market does not calculated the market price.

5.9.10. The finance investment which help to set in accordance with established procedure the current market cost are mentioned in accounting at the end of fiscal year at the current market cost by the adjustment of their valuation on the previous fiscal date. The mentioned adjustment is carried out quarterly.

The difference between financial investments valuation at the current market cost on the fiscal date and the previous financial investments valuation is referred to the financial results (composed of operational receipts and expenditures).

Financial investments which do not set the current market cost are mentioned in accounting on the fiscal date at the original cost.

If on the fiscal date the current market cost of the object of financial investments, earlier valuated at the current market cost, the current market cost is not set, such an object of financial investments is mentioned in accounting at the cost of its last valuation.

5.9.11. The original market cost of debt securities which do not set the current market cost is not made into the principal value (par.22 PBU 19/02 "Account of financial investments" from 10.12.2002 № 126n).

5.9.12. On the retirement of the asset, taken on accounting in the capacity of financial investments; that does not set the current market cost its cost is defined reasoning from the original cost of each unit of the accounting of financial investments (par.26 PBU 19/02).

5.9.13. On the retirement of the assets taken on accounting in the capacity of financial investments, which define the current market cost, their cost is defined reasoning from the last valuation.

5.9.14. The valuation of financial investments at the end of the fiscal period is carried out at the original cost of each unit of the accounting of financial investments and at the current market cost (par.32 PBU 19/02).

5.9.15. According to par.6 PBU 19/02 in the analytical account the following information about state securities taken on accounting and securities belonging to other companies is given:

- name of the Issuer (Company);
- name of the securities;
- number, series etc.;
- nominal price;
- buying price;
- expenses for the acquisition of securities;
- total amount;
- date of purchase;
-date of sale and other retirement;
- storing place.

5.10. Account of the foreign currency transactions and payments in conventional units.

5.10.1. The property and liabilities which cost is expressed in a foreign currency, are taken on accounting in ruble valuation converted according to the rate of exchange of the Central Bank of RF on the date of the conducting of a transaction; for drawing up of the accounting – according to the rate of exchange of the latest in the accounting period quotation of rate of the Central Bank of RF (par.3, 6 PBU3/2000).

5.10.2. The ruble valuation of the property (fixed assets, intangible assets, long-term securities, inventory) purchased at foreign currency and posted at the original cost or at the sum of actual expenses for the purchasing (par.9 PBU 14/2000) is not counted over at the drawing up of the accounting.

5.10.3. The differences in rates of exchange arisen as the difference between the ruble valuation of the property or the liability which cost is expressed in a foreign currency calculated at the rate of exchange of the Central Bank of RF on the date of the discharge of liabilities of payment or on the reporting date of the drawing up of the accounting for the reporting period, and the ruble valuation of the property or the liability calculated at the rate of exchange of the Central Bank of RF on the date of the taking them on accounting in the reporting period or on the reporting date of the drawing up of the accounting for the previous reporting period, are referred to on account 91 "Other receipts and expenditures" in the list of non-disposal revenue (expenses) as far as they appear (par.13 PBU 3/2000).

5.10.4. The differences in sums arisen at the settlement for the inventory, performed work, services rendered which cost is expressed in conventional units are included in the expenses for purchasing of the mentioned assets and reflected on the accounts of the inventory and expenses account till the moment of their posting. The differences in sums arisen after the posting of the inventory, performed work, services rendered are referred to on account 91"Other receipts and expenditures" in non-disposal revenue (expenses) as far as they appear.

5.10.5. The differences in sums arisen at the settlement with the banks at the purchase (sale) of a foreign currency at the rate of exchange different from the rate of the Central Bank of RF is referred to on account 91"Other receipts and expenditures" in non-disposal revenue (expenses) as far as they appear.

5.10.6. The differences in sums arisen at other taking (fines, penalties, forfeits), connected with the implementation of the economic contracts, are referred to on account 91 "Other receipts and expenditures" in non-disposal revenue (expenses) as far as they appear".

5.11. The account of the transactions on the settlement accounts.

5.11.1. The settling with debtors and creditors is reflected in the accounting in the sums from the entries and acknowledged by the Company as the correct ones (par.73 of the Regulation on the bookkeeping of RF (the Order of the Ministry of Finance from 29.07.1998 №34n).

The sums on the settling with the banks and the budget are coordinated with the applicable companies, the reservation of the undetermined sums on the balance is not admitted (par.74 of the Regulation on the bookkeeping of RF (the Order of the Ministry of Finance of RF from 29.07.1998 №34n).

5.11.2. The settling with debtors and creditors is reflected on the applicable accounts provided by the Unified work plan of the accounts of bookkeeping of the Company in accordance with the requirements of timeliness and comprehensiveness of the accounting.

5.11.3. In accordance with the admission of time certainty of economical activity facts, the accounts receivable and the bill payable are created in the current accounting in the reporting period when the

applicable facts of the economical activity took place, regardless of the actual time of intake or pay-out of the monetary funds connected with these facts (par.6 of the Regulation on the accounting "Account policy of the Company" PBU 1/98 (the Order of the Ministry of Finance of RF from 09.12.1998 № 60n).

5.11.4. The sums received from the customers in the form of Available Funds are reflected on account credit of the applicable control of account 62 "Settling with buyers and customers".

Discharge of liabilities by the discount of the counter claim, including the transient supply, is reflected according to debit of account or account credit of the applicable expenses account.

5.11.5. The discharge by the discount of the counter claim (art.410 of CC of RF) is defalked on the following terms:

- *the actual existence of counter debts, admitted and unchallenged by the parties;*
- *the uniformity of the counter claims, that means the comparability of the debts and the possibility of bringing them to the equivalent (pecuniary valuation);*
- *the date of the discharge of liabilities has come, or it is not indicated or fixed by the moment of claiming;*
- *the absence in the text of the contract of the term about the inadmissibility of the discount sequential from this contract.*

5.11.6. The discount of the mutual claims is defalked both by the agreement of the parties and on the unilateral basis with informing of the other party, after the revise of the mutual debts and drawing up of the act of the account revise (in the optional form specifying all the requisites needed for the mutual discounts), signed by the plenipotentiaries of the parties.

If the amounts of counter debts differ, the debt which amount is bigger is discharged only in an applicable part, all the rest remains without changes.

5.11.7. Reasoning from par.5.11.5, 5.11.6. of the present Regulation the suppliers liabilities discounts which are not grounded by calculated-paid documents (non-invoiced delivery) are not defalked till calculated-paid documents are received and the factual rate of the bill payable is defined on their basis.

5.11.8. The discounts are not defalked if by the application of the alter the term of actional prescription is subject to the claim and this term is expired (art.411 of CC of RF).

5.11.9. The change of the persons in the liability under the assignment contracts is reflected in the accounting in the following way:

- *on the assignment of debt to the Company and affiliated companies, for example of the debtors-energy consumers to the affiliated company Energosbyt, the original debtor is substituted for a new debtor if the Company agreed to assign the debt with the reference to the requisites of the principal contract and the requisites of the assignment agreement (par.1 art.391 of CC of RF). The energy debt is reckoned in corpore in the new debtor account, it means that the original liability is not considered to be fulfilled;*
- *on the assignment of debts by the Company to the other person, the Company debt to the creditor is cut off. The Company debt to the creditors is written off if the creditor agrees to assign the debt to the new debtor with the reference to the requisites of the principal contract and the requisites of the assignment agreement;*
- *on the assignment of debt of the Company or its affiliated companies to the new creditor, it's reflected in the accounting only after the debt notification of the assignment of debt of the original creditor to the new creditor had been received. The bill payable to the new creditor is still reckoned in corpore in the account of the Company, it means that the original liability is not considered to be fulfilled;*
- *on the assignment of debts by the Company to the other person, the accounts receivable to the*

Company are cut off. In the account the accounts receivable on the interests are reflected as a record on debit of the applicable control account of account 62 ""Settling with buyers and customers" in the correspondence with the applicable control account of account 91 "Other receipts and expenditures". The debt of the previous debtor is written off from the balance of the Company at the assignment in accordance with the terms of the assignment contract as a record on debit of the applicable control account of account 91 "Other receipts and expenditures" with the simultaneous charge of VAT to be paid in the budget (ch.21 art.167 par.3 of IRC of RF; art.382 par.2 of CC of RF).

5.11.10. The own, bank and third party's bills of credit are used in the accounts only through the executive body of the Company.

5.11.11. The drawn own bills are reflected in the accounting on account 60 "Settling with suppliers and contractors" in the applicable analytics in the inner correspondence or in the correspondence with debit of account "Internal accounts on current transactions" of the affiliated company, that received the bill to meet the bill payable.

On getting the aviso of the executive body about the bill drawing the affiliated company withdraws a bill payable, the applicable sums of VAT (except for VAT on capital investments) are transferred from account 19 "Value added tax on acquired values" to the balance of the executive body of the Company:

- *to deduction at computation in the part of expenses accepted for profit tax computation in the same month (par.1 art.170 of IRC of RF);*
- *In the part of expenses for capital investments – from the moment of depreciation of the commissioned object (par.5 art.172 of IRC of RF) with the copies of invoices and acts of objects commissioning attached, certified in accordance with established procedure.*

The acceptance to deduction of VAT sums on the acquired values, the bill was transferred to pay for, is carried out in the executive body at the moment of the payment of the own bill with monetary funds.

The handing over of the own bills in pawn to discharge a liability to the creditors is reckoned on the off-balance account 009 "Discharge of liabilities and payment security" with the analytical breakdown of the pawnbrokers.

5.11.12. The acquired bills (own debtors' bills) are reckoned in the accounting at bill sum with a glance of the interests owed according to the issue of bill terms under debit of account 62 "Settling with buyers and customers" in the applicable analytics in the inner correspondence or in the correspondence with account 79 "Internal accounts on current transactions" of the affiliated company, that received the bill to meet the accounts receivable. On getting the aviso of the executive body about the bill acquisition to pay the accounts receivable the affiliated company withdraws the accounts receivable, the applicable sums of VAT on shipment are transferred to the balance of the executive body of the Company:

VAT, owed to be paid in the budget, is reflected in the accounting of the executive body at the moment of payment of a bill with monetary funds or transfer of goods (execution phase, rendering of services) on account of the payment of this bill (par.41.4 of the Methodical recommendations on use ch.21 "Value added tax" of IRC of RF from 20.12.2000, № BG-3-03/447, version of 26.12.2003).

5.11.13. The handing over of the acquired bills (own debtors' bills) to pay the bill payable is reflected in the accounting as a sale of rights of property by a record on debit of account 62 "Settling with buyers and customers" of the applicable control account in the correspondence with account 91 "Other receipts and expenditures" of the applicable control account. The accounts receivable to the Company or its affiliated companies, the bill was acquired to pay for, is written off from the balance by the record on account credit 91 "Other receipts and expenditures" of the applicable control account with simultaneous VAT charge owed to be paid in the budget.

5.11.14.. The acquired bills , including the bills acquired under the endorsement (bank and third party's bills) are reckoned at the rate of actual expenses for acquirement (acquisition) defined in accordance with par.5.9.4. of the present Regulation under debit of account 58 "Financial

investments" on the applicable control account in the correspondence with the applicable control account of account 76 "Settling with various debtors and creditors".

If the bill is received to pay the accounts receivable to the Company or its affiliated companies, the accounts receivable is liquidated by the record on the applicable control account of account of the accounts receivable in the correspondence with debit of account 76 "Settling with various debtors and creditors" which reckons the bill payable for the received bill with simultaneous VAT charge owed to be paid in the budget.

If such a bill pays the accounts receivable of the affiliated company, the record is made on debit of control account of account 76 "Settling with various debtors and creditors" which reckons the bill payable for the received bill in the correspondence with account 79 "Internal accounts". On getting the aviso the affiliated company withdraws the accounts receivable by the record on account credit of the account of the accounts receivable in the correspondence with account 79 "Internal accounts", with simultaneous VAT charge owed to be paid in the budget.

5.11.15. The handling over of the bank bill or the third party's bill to pay the bill payable is reflected in the accounting as the property sale by the record on debit of account 62 "Settling with buyers and customers" of the applicable control account in the correspondence with the applicable control account of account 91 "Other receipts and expenditures" (Letters of the Ministry of Finance of RF from 24.06.1997 № 04-02-13, from 07.08.1998 № 04-03-05, from 30.10.1992 № 16-05/4).

The withdrawal of the bill payable is carried out by the record on debit of accounts of the account of the bill payable in the correspondence with the applicable control account 62 "Settling with buyers and customers" with simultaneous acceptance to deduction of VAT sums in accordance with procedure provided by par.2 art.172 of IRC of RF.

If such a bill pays the bill payable of the affiliated company, the record is made on debit of account 79 "Internal accounts" in the correspondence with the applicable control account of account 62"Settling with buyers and customers" which reckons the accounts receivable for the handled over bill. On getting the aviso the affiliated company withdraws the bill payable by the record on debit of account of the applicable accounts of the accounting of bill payable in the correspondence with account 79 "Internal accounts", with simultaneous acceptance to deduction of VAT sums in accordance with procedure provided by par.2 art.172 of IRC of RF.

5.11.16. The retirement of the bank bills and third party's bills from the balance at their submission to the maker for payment is reflected in the accounting under account credit 91 "Other receipts and expenditures" of the applicable control account in the correspondence with the applicable control account of account 76 "Settling with various debtors and creditors".

5.11.17. The accounts receivable with the expired term of actional prescription as well as other debts, unreal for the collection, are written off from the balance.

The unreal for the collection are:

1. The accounts receivable with the expired term of actional prescription;

2. The discharged debts in accordance with art.416, 417,418,419 of CC of RF.

3. The shortage of the property or its anientisement in excess of planned rate, as well as embezzlement loss, if guilty persons are not identified (the fact must be proved by the authorized state authority) or the court refused the recovery of damages.

4.The debts which recovery is impossible on the basis of the Federal Law of RF "About executive production".

Debt amortization is carried out on the basis of the act of debt inventory taking, the written reasoning, the order of the director of the Company on each liability at the expense of the present reserve of the shady debts, if it's not enough it is referred to the list of non-disposal expenses (par.12 PBU 10/99 confirmed by the Order of the Ministry of Finance of RF from 06.05.1999 №33n).

The written debt reasoning includes the index of the ground and the sum of the debt with the reference to the basic account documents; the ground for the debt amortization with the reference to

the rules of law with the vouchers attached:

- *the copies of the basic account documents;*
- *at the settlement of a debtor:*

a) of a legal person – the extract from the unified state list of legal persons;

b) of a citizen – the death certificate;

c) other documents proving the impossibility of debt collection (the act of state authority etc.).

Debt amortization in sum up to RUR 1500 according to one liability with all necessary documents present, is carried out under the order of the director of the affiliated company.

The accounts receivable written off in view of debtor's insolvency are reflected in the balance sheet during 5 years since the moment of amortization to observe the possibility of its collection in case of debtor property status change.

The terms of actional prescription are fixed on the basis of art.195-208 of CC of RF. The term of actional prescription is interrupted by the filing of a claim in accordance with established procedure as well as by the actions of the person under obligation which prove the acknowledgement of debt. After the break the term of actional prescription opens again, the time before the break is not included in the new term.

The agreement of the parties, the acknowledgement of debt out of the terms of actional prescription as well as the change of persons under obligation can not be the ground for the change of the term of actional prescription and the procedure of its calculation.

The account of accounts receivable is organized according to the terms of actional prescription to observe par.5 art 167 of IRC of RF.

5.11.18. The amortization from the balance of the unclaimed bill payable and depositor debt with the expired term of actional prescription and under other grounds is carried out at the written permission of the director of the affiliated company according to the standards art.195-208 of CC of RF.

The sums of the bill payable written off are referred to account credit 91 "Other receipts and expenditures" in the list of non-disposal revenues.

The sums of VAT on the bill payable written off are reckoned in the accounting and referred to debit of account 91 "Other receipts and expenditures" in the list of non-disposal expenses.

5.12. Calculation of expenditures on production.

5.12.1. Calculation of expenditures on production shall be carried out in accordance with issue II of Provisions on accounting "Company's expenses" (PBU 10/99 (Order of MF of RF № 33n dd. 06.05.1999.

5.12.2. Calculation of expenditures and calculation of the outputted energy net cost shall be carried out in separate electric plants, electric networks and in energy system as whole.

Full net cost of energy is formed by way of summation of net cost of production by electric plants, net cost of transfer and distribution in electric and power networks, cost of purchased electric power and expenses on the executive body's maintenance including expenses on management of technological process and maintenance of the separate subdivisions on energy selling.

Full net cost of effective output of electric and heat energy to consumers is an object for electric and heat energy net cost calculation.

Calculation units are 1 kw/h and 1Gcal of the effectively outputted electric and heat energy.

5.12.3. Calculation of expenditures on production and calculation of real net cost of production shall be carried out by traditional calculation way with direct expenditure accounts (20, 23,29) and indirect (25, 26). Calculation of indirect expense's accounts shall be closed in debit of accounts 20 (23) with further calculation of full real production net cost of the produced items every month.

5.12.4. Expenditures accounted on account 25 "Common production expense" shall be charged-off fully on account 20 "General production" and on account 23 "Auxiliary process" to the proper with their simultaneous distribution between the calculation's objects at the end of month:

- *at the power stations proportionally to the standard fuel level, here expenditures of the plants participated in output of only one type of energy shall be fully referred to this type of energy;*
- *calculation of net cost of production of auxiliary productions - proportionally to the basic salary of employees.*

Common economic expenses (except abonent payment for RAO network's using) on maintenance of the executive body including expenses on maintenance of Energy supply shall be distributed between electric and heat energy proportionally to production expenditures of electric plants and networks.

Expenditures accounted by the subsidiaries on account 26 "Common economic expenses" shall be referred to account 20 "General production", also to account 23 "Auxiliary process" and to account 29 "Auxiliary process and economy" at the end of month in cases of manufacture or production, services and works fulfillment abroad or to other subsidiaries simultaneously their distribution between the objects of calculation:

- *calculating of net cost of production of auxiliary processes shall be referred proportionally to the shop cost of production, works and services. Thus the sum of common economy expenses accounted for production, works and services of the auxiliary and service shops (production) shall be defined due to this share of common economy expenses related to their direct production;*
- *rest part of common economy expenses shall be refereed fully to net cost of general manufacture production (expenses on maintenance of design, technological departments and background of department's manufacture, expenses on maintenance of production laboratories, cost of different tests, researches and experiments subject to general manufacture; expenses concerned rationalization and research on general production; expenses concerned the employee's training and further training for general production; expenses concerned maintenance of watch and fire prevention; expenses concerned payment of land tax, non productive expenses concerned manufacture and supply of general production and other same expenses). Common economy expenses shall be distributed between electric and heat power proportionally to their shop net cost;*

- common economy expenses on services rendered by auxiliary process and auxiliary production and economy)internal consumption by the subsidiary) are not referred.

5.12.5. Net cost of electric power transfer (transit) through the corresponding voltage range shall be defined by product of actual net cost of electric power transfer on corresponding voltage thought electric power plants and Energy Supply and by volume ratio of outputted energy under the transit contract on corresponding voltage to the total volume of corresponding voltage output through the network (except overflow balance to other plants) including electric power outputted under the transit contract in accordance with actual balance of electric power in the networks BH, CH1, CH2, HH.

5.12.6. Finished product (account 43) shall be reflected in accounting on actual production cost.

5.12.7. Expenses concerned production supply accounted on account 44 "Expenses on sale" shall be charged-off fully on account 90 "Sales" in reporting period (par. 9 PBU 10/99).

5.12.8. Expenses incurred in the reporting period but concerned the further reporting periods shall be reflected as future expenses (account 97):

- *holiday pays charge to the next month:*
- *subscription publication's expenditures;*
- *insurance payment charge;*
- *other expenses and payments with further equal charge-off in the related period.*

5.12.9. Expenditures on usual activity shall be classified as in articles , as in elements (par. 8 PBU 10/99).

5.12.10. Expenditures of department on stuff training of the Stuff management department shall be accounted on account 26 "Common economy expenses" separately with further transfer to subsidiaries through account 79 "Intraeconomic payments" in amount of actual expenditures distributed proportionally the volume of rendered works and services.

5.12.11.Expenses on equipment of sanitary-accommodation premises, medical premises, rooms for repose and psychological relaxation, creation of sanitary posts furnished with medicine chests composed of medicine sets subject to initial care etc., provided by the legislation in force, shall be accounted on account 25 "Common productive expenses" according to the fixed norms.

5.12.12. Expenses on preparation and holding of civil defense actions shall be accounted on account 26 "Common economic expenses" (Provisions of the Government №227 dd. 16.03.2000

5.12.13. Accounting of expenses on energy transfer at the energy plants shall be carried out apart of accounting of expenses on energy output on the separate subaccount 20.5 "Expenses on heat energy transporting".

Calculation of the transfer net cost shall be accounted apart of electric and heat power production as the separate activity.

5.12.14. Division into the Company activities shall be carried out according the single issued Order and Provisions on separate accounting over the activities.

5.13. Features of the Company's profits and losses forming

5.13.1. The Company's profits on usual activities are the following:

- *proceeds from electric and heat power sale;*
- *proceeds from increased pay to the rate on reactive power compensation (tangent Fe);*
- *proceeds received for nonrecoverable condensate;*
- *proceeds from makeup and chemical treated water sales;*
- *proceeds from other finished production of auxiliary process sales;*
- *proceeds from agricultural production sales;*
- *proceeds from rendered works (services) of industrial nature (including transit);*
- *proceeds from nonindustrial works (services) sales including profit on sale of medical services to the third parties, profit on sale of tickets in the own medical institutions (sanatorium-preventoriums) to the third parties and to own employees; profit on housing services (rent), services of preschool institution (payment for children keeping), other services of nonindustrial nature (payment for weekend tickets in the sanatorium-preventoriums, rest in tourist centers, in the pioneer camps etc.);*
- *proceeds from good's sale including retail trade (through the stores against cash, also instalment selling against salary), also wholesale trade (profit of inventory holdings sale abroad), foreign trade (export trade);*
- *proceeds from catering goods sale;*
- *earnings concerned temporary use of the Company's assets under the Lease contracts against payment (temporary use and possession).*

5.13.2. Profits on usual activity shall be defined as difference between the earnings on sale of goods, products, works and services according to the current costs and rates on electric and heat power except VAT and expenses on their production and sale approved by REC.

5.13.3. Extraordinary profits of the Company shall be declared the following types of penalties, fines and forfeits against the violation of the contract's terms and provisions;

- *electric power capacity excess;*
- *energy consumption contracted size's excess;*
- *energy consumption contracted size's underexploitation;*
- *unauthorized electrical installation's launching;*
- *nonrecover of condensate;*
- *excess of the fixed by the contract maximum hourly demand of heat energy;*
- *unauthorized water pumping;*
- *excess of the contacted volume of heat energy consumption;*
- *temperature excess of return delivery water;*
- *underexploitation of the contracted volume of heat energy consumption*

shall be reflected on account 91 "other profits and losses" in the moment of profit acceptance.

5.13.4. Social oriented expenses, i.e. additional payment to pensions, incentive pays, expenses on health-improving measures, compationate activity, maintenance of objects of social sphere and other similar expenses shall be deemed as other extraordinary expenses and shall be reflected on account 91 "Other profits and losses".

5.13.5. Sum differences over the payments with debtors-buyers arose this reporting period shall be referred to the earning increasing due to sale.

Sum differences arose after the reporting period shall be deemed as profits (losses) of the last years revealed in the reporting period in the result of re-calculations with counteragents and shall be reflected in composition of other extraordinary profits (losses) on account 91 "Other profits and losses".

5.13.6. Interests on the commercial credit granted to the buyer (customer) by the Company on terms of delay of payment including collateral note received from the customer shall be deemed as other extraordinary profits and shall be reflected on account 91 "Other profits and losses".

5.13.7. By results of inventory of accounts receivable spent at the end of fiscal year the reserves on dubious debts over the payments with debtors with the debtors and the sums of created reserves shall be refereed to the debit of account 91 "the profits and losses" in composition of operative expenses in correspondence with account 63 "Reserves on the dubious debts" (par. 11 Provisions on accounting "Company's expenses" PBU 10/99 (ed. 30.03.2001).

The reserve's size shall be defined separately by each dubious debt depending on the debtor's financial situation and appraisal of probability of a debt repayment fully or partially, also shall be limited by the Company's financial abilities.

Any debtor's debt shall be deemed as dubious debt if this debt was not paid in terms prescribed by the contract and was not ensured with mortgage, voucher of bank guaranty.

Accrued reserve shall be aimed at coverage of losses incurred due to bad debts.

The bad debt is a debt which limitation period has expired or in case of discharge owing to impossibility of its execution on the ground of the act of the State body or of the company's liquidation.

Unused reserve sum of bad debts in the fiscal year shall be added to the profits of the fiscal year together with a record in the credit of account 91 "Other profits and losses" in composition of operative expenses in correspondence with account 63 "Reserves on bad debts".

5.13.8. Energy output to the needs of plants and networks shall be reflected in accounting in appraisal of:

- output to the technological and economy needs of the main and auxiliary processes according to the specially fixed rate without reflection in the sale's volume;

- output to own capital construction and to the non industrial economy according to the fixed rates including reflection in the sale's volume.

Electric and heat power consumed by economic needs shall be included in the sale's volume but shall be transfer in aviso through account 79 "Intraeconomy payments" to subsidiaries without invoicing.

According to the "Standard instruction on electric power accounting under its production, transfer and distribution RD 34.09.101-94 (approved by General State Energy supervision department of Russia (Glavgosenergonadzor of Russia) dd. 02.09.1994), the category of economic needs of energy system involves electric power consumption by auxiliary and non industrial processes being on the balance of electric plants and electric network enterprises obligatory to main production maintenance but not tied directly with technological processes of heat and electric power production at the electric plants, also transfer and distribution of electric power (nomenclature of energy consumption's elements to the economy needs of electric plants and electric networks is defined by the Letter of the Minenergo of USSR №B-6023 dd. 24.04.1980).

Electric power consumption to economic needs of energy system shall be included in the effective output subject to accounting as separate line in form of static report 46-ec "Effective output of electric and heat power" and shall be transferred to subsidiaries according to the special fixed rate.

Electric power consumption to heating, water supply and lighting of dwelling houses, canteens (if these expenses are reflected on b/account 29 "Auxiliary processes and economies"), hostels, hotels, clubs, tourist centers, preventoriums etc. shall not be included in economic needs of energy system.

Also consumers operated from the needs of plants and substations (sub-abonents)are not referred to the economic needs of energy system.

Energy consumed by windings of synchronous condensers and glaze fusion are not referred to the energy consumption to the economic needs of energy system. Aforementioned types of energy consumption form energy losses in electric networks.

Every month according to the reports of PTO of subsidiaries, Energosbyt (Energy supply) shall correct sale's volume on economic need's sum and hand over information on electric and heat power consumed by subsidiaries to economic needs in accordance with approved form "Appendix 2 to this present Provisions) to accounting department of the executive body:

Executive body shall transfer through aviso electric and heat power consumption to the economic needs to the subsidiaries every month. Sum received by the subsidiaries shall be reflected on expenditure accounts (Debit 20,23,25,26; Credit 79).

Heat power (makeup water and unreturned condensate (in tn.) shall be transferred to the subsidiaries through aviso with invoicing by Energosbyt (Energy Supply).

Coordination of parameters with the branch statistical report under the form 46-ES is not provided In the current annual and intermediate accounting. There is a reference to explanation of a reason of data divergence on sales volume with the accounting reporting in the statistical branch report.

5.14. Disposition of profits

5.14.1. Disposition of net profits in the Company shall be approved by the general meeting of shareholders and shall be hold in accordance with Law "On Joint Stock Companies" and with standard documents on book keeping.

5.14.2. Tax and other similar payments accrued during the fiscal year from the profits shall be

reflected on account 99 "Profits and losses".

5.14.3. Accounting of transactions with authorized capital, additional capital and reserve capital shall be closed in the executive body of the company as property owner.

8.8. Description of the order of taxation of revenues from the issuer's issued securities placed and in floatation

Order of taxation of revenues from the issuer's issued securities (dividends- on shares, interests – on bonds) shall be adjusted by the Tax Code of Russian Federation.

Table 1: Taxation of legal entities profit tax on the floated securities (subject to floatation) in form of dividends in accordance with legislation if force as for a date 2005:

№№	Category of securities owners	
	Legal entities – tax residents of RF	Foreign legal entities – (non-residents), getting profits from the sources located in RF
1.Profit's name on the floated securities	**Dividends**	
2. Security tax	Profit tax	
3. Tax rate	9 %	15 %
4.Order and terms of tax payment	Profit tax in form of dividends shall be collected from the source of such tax payment and shall be transferred to the budget by tax agent exercised this payment within 10 days form the date of tax payment.	Amount of the tax withheld from the foreign organizations shall be paid to the budget by tax agent at the same time with profit payment in a currency of this profit payment or in a currency of RF at the official rate of Central Bank as for a date of payments.
5. Features of taxation order for this category of securities owners	The total sum of the tax from the sum of dividends is defined as product of tax rate and a difference between the sum of the dividends subject to distribution between shareholders (participants) in the current tax period, reduced on the sums of dividends subject to payment by the tax agent in the current tax period, and the sum of the dividends received by the tax agent in the current accounting (tax) period and the previous accounting (tax) period if the given sums did not participate in calculation under definition of the taxable income as dividends earlier. In case the received difference is negative, the duty on tax payment does not arise also compensation from the budget is not made	Elimination of double taxation. For exemption of taxation or application of a preferential taxation regime the tax payer (foreign organization) should confirm to the tax agent paying the profit before date of the profit payment that he is a resident of the state, with which Russian Federation has the international contract (agreement) adjusting taxation issues. Such confirmation should be certified by the authorized body of the corresponding foreign state. In a case non confirmation before the date of profit payment the tax agent is to obliged to withhold the profit tax of foreign organization. In accordance with par. 2 of art. 312 of Tax Code of RF (part 2) foreign profit recipient has right to reimburse the early withheld profit tax paid by him earlier within 3 years from the date of tax period termination when the profit tax was paid off under condition of granting by the foreign addressee of the income in the tax body according the place of registration of the tax agent of corresponding documents (list is in art. 312 of the Tax Code of RF (part 2). Repayment of early withheld and paid tax shall be fulfilled within the month from the date of application and aforementioned documents.
6. Legislative and standard acts regulating the order of taxation of the aforementioned profits	Chapter 25 "Profit tax of organizations" of the Tax code of RF (part 2).	

Table 2. Taxation of profits of natural persons on the floated securities in form of dividends in accordance with legislation in force as for a date 2005.

№№	Category of securities owners	
	Legal entities – tax residents of RF	Foreign legal entities – (non-residents), getting profits from the sources located in RF
1. Profit's name on the floated securities	**Dividends**	

2. Profits' name on securities	Tax on the natural person's profits	
3. Tax rate	9 %	30 %
4. Results of the voting: «FOR» - 1 784 961 votes, «AGAINST» - 562 614 277 votes (% from the voted participants - 99,4742, «ABSTAIN» - 551 350 votes. Number of the votes in the ballots that were recognized as VOID - 93 000.

3. **On payment (announcement) of dividends for the shares of the Company at the outcome of 9 months of 2005.**

Results of the voting: «FOR» - 565 322 381 votes (% from the voted participants – 99,9530), «AGAINST» - 33 600 votes, «ABSTAIN» - 148 400 votes. Number of the votes in the ballots that were recognized as VOID – 84 000 votes.

2.6. Formulating of the decisions accepted by the general meeting:

Over the question № 1:

1. **1. To reorganize JSC "Kuzbassenergo" by means of segregation:**
   - JSC "Kuzbassenergo – regional electricity supplying company";
   - JSC "Kuzbass energy distributing company";
   - JSC "Main power lines of Kuzbassenergo";
   - JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)";
   - JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)".
2. **To establish the following procedure and terms of segregation:**

2.1. Stock floatation of the created companies is carried out in the procedure and on terms prescribed by article 4 of the present resolution.

2.2. Part of property, rights and obligations of the Company are transferred to the segregated companies in accordance with the divided balance.

2.3. The procedure of preparation for and holding general meetings of shareholders of the companies created as well as the voting procedure on issues of the agenda of specified meetings of shareholders is stipulated by the given resolution (article 3) and the Statute of JSC "Kuzbassenergo".

2.4. Within 3 days after the decision on reorganization of the Company by means of segregation is taken by the General meeting of shareholders, the General director of the Company notifies the taxation authority about the decision taken.

2.5. Not later than 30 days of the date of the decision-making on the issue of reorganization in the form of segregation the general director notifies the creditors of the Company on making the decision through sending in the announcement via registered letter and publishes the announcement on reorganization of the Company in print assigned for publishing information on state registration of legal entities.

2.6. Within 30 days of the date of publishing of the announcement on the decision made or within 30 days of the date the announcement was send to them creditors of the Company have a right to demand termination or advance execution of the corresponding liabilities of the Company and repayment of damages. Based on the demands received from the creditors the Company draws up the register of demands both satisfied and being subject to satisfaction.

2.7. General director notifies employees of JSC "Kuzbassenergo" of taking the decision on reorganization of JSC "Kuzbassenergo" and carries out a complex of activities connected with formalizing labor relations in accordance with the Labor Code of the Russian Federation.

2.8. In accordance with article 1 of clause 75 of Federal Law "On joint stock companies" shareholders of the Company who voted against the decision to reorganize the Company or who did not participate in voting on the given issue have a right to demand full or partial redemption of shares held by them from the Company in the procedure prescribed by Board of Directors of the Company in accordance with the requirements of the legislation of the Russian Federation in the announcement on holding an extraordinary general meeting of shareholders of the Company.

Redemption of shares is carried out in accordance with the price stipulated by the Board of Directors of the Company in accordance with article 3 of clause 75 of Federal

Law "On joint stock companies".

Bought out shares are paid off at the moment of redemption and the shares of the created

companies are not subject to allocation among them.

2.9. The report on overall results of redemption of shares of the Company is approved by the Board of Directors of the Company within 5 days of the date of paying off the bought out shares.

As a result of paying off bought off shares the authorized capital stock of JSC "Kuzbassenergo" is diminished to the amount of nominal value of the shares paid off.

3. To establish the following legal entities:

- JSC "Kuzbassenergo – regional electricity supplying company";
- JSC "Kuzbass energy distributing company";
- JSC "Main power lines of Kuzbassenergo";
- JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)";
- JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)".

3.1. To determine that the quantitative composition of the board of directors of each of the created companies equals 11 persons.

To determine that the quantitative composition of the revision committee of each of the created companies equals 5 persons.

3.2. To determine that shareholders (shareholder) of JSC "Kuzbassenergo" being in the aggregate holders of 2 or more per cent of common shares of JSC "Kuzbassenergo" have a right to forward to the address of the Company suggestions on nomination of candidatures for election of members of the board of directors of each of the created companies (up to 11 candidatures for each of the created companies) and members of the revision committee of each of the created companies (up to 5 candidatures for each of the created companies), as well as candidatures for the positions of general directors of each of the created companies (not more than 1 candidature for each of the created companies). Such suggestions must be received by the company not later than March 15, 2006.

Only candidatures who were nominated in accordance with the prescribed requirements and suggestions on whom were received within the deadline prescribed by the present resolution, by the shareholders (shareholder) being in the aggregate holders of 2 or more per cent of common shares of JSC "Kuzbassenergo"at the moment of nomination are subject to inscription in voting papers for the general meetings of shareholders.

The mentioned nominations are to be inscribed in written form with indication of the name (title) of the nominating shareholders (shareholder) and the number of common shares of JSC "Kuzbassenergo" owned by them (him/her).

In case the indicated suggestions on nomination are signed by a representative of the shareholder they should be accompanied by power of attorney (copy of power of attorney attested in prescribed order), arranged in accordance with the requirements for drawing up of a power of attorney for voting of the Federal Law "On joint stock companies".

In case the indicated suggestions on nomination are signed by a shareholder (shareholders) whose share rights are taken account of in accordance with the deposit account in depositary, such suggestion should be accompanied by the extract of deposit record of the shareholder in depositary carrying out the registration of rights of the mentioned shares.

The suggestion on nomination of the indicated candidates must contain:

- name of the created company, in the bodies of which the candidates are nominated;
- last name, first name, patronymic and the principal place of business of each of the

nominated candidates;
- name of the body for which the candidate is nominated.

The Board of Directors of the company must review the suggestions received and take the decision on inclusion or on the refusal to include the nominated candidatures in the list of candidates for the election in the bodies of the created company by March 20, 2006.

The nominated candidates are subject to inclusion in voting papers for the election in the corresponding body of the created companies with the exception of the following cases:
- when the nomination does not correspond to the requirements prescribed by the present article;
- when the nomination of shareholders (shareholder) is received by the Company later than March 15, 2006;
- when the shareholders (shareholder) do not in the aggregate own the necessary amount of shares of JSC "Kuzbassenergo".

Reasoned decision of the Board of Directors of the Company on refusal to include the nominated candidates in the list of candidatures for voting in the elections for the specific body of the created companies is forwarded not later then March 23, 2006 to shareholders (shareholder) who nominated the candidate.

3.3. At general meetings of shareholders of the created companies the functions of the counting commission are executed by the registrar of the Company – Joint Stock Company "Central Moscow Depositary".

3.4. It must be determined that at voting during general meetings of shareholders of the created companies on issues of approval of the Statute of the created company, of election of members of the revision commission or of election of general director, each common share of the created company subject for floatation gives the shareholder of the created company being the holder of common shares one vote.

The decision on issues of approval of the Statute of the created company, on election of the general director and members of the revision commission is taken by the general meeting of shareholders with the majority of votes of shareholders of the created company – holders of common shares participating in the general meeting of shareholders of the created company.

3.5. It must be determined that elections of members of the board of directors of the created companies are carried out by cumulative voting. At cumulative voting the number of votes of every shareholder of the created company – holder of common shares is multiplied by the number of persons to be elected in the board of directors of the company in accordance with article 3.1. of the present resolution and the shareholder of the created company owning common shares has a right to give all of his/her votes for one candidate or to distribute them among two or more candidates.
The 11 candidates collecting the largest number of votes are considered elected for the board of directors of the created company.

3.6. General meetings of shareholders of the created companies are authorized (muster a quorum) on condition that shareholders of the created companies possessing in the aggregate more than half of votes subject to floatation of common shares of the corresponding created company, participated in the elections.
Shareholders of created companies registered for participation in the general meeting and shareholders whose voting papers were received by the Company not later than two days before the date of the general meeting of shareholders of the created company are considered to have taken part in the general meeting of shareholders.

3.7. At decision-making on issues connected with holding general meetings of shareholders of the created companies which are not stipulated by the present resolution, standard acts of the Russian Federation regulating similar relations (by analogy) are to be used.

4. To establish the following procedure of floatation of shares of the created

companies:

4.1. Shares of the newly established JSC "Kuzbassenergo - regional electricity supplying company", JSC "Kuzbass energy distributing company", JSC "Main power lines of Kuzbassenergo", JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)", JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" are distributed among the shareholders of JSC "Kuzbassenergo" including the shareholders who voted against or not having participated in voting on the issue of reorganization of the Company, proportionally to the number of shares of the Company owned by them.

To establish the following coefficients of distribution of common shares of JSC "Kuzbassenergo – regional electricity supplying company", JSC "Kuzbass energy distributing company", JSC "Main power lines of Kuzbassenergo", and their nominal value:

counting for every common share of JSC "Kuzbassenergo" the following are simultaneously subject to distribution:

1 (one) common share of JSC "Kuzbassenergo – regional electricity supplying company", with nominal value of 2, 90 RUR,

1 (one) common share of JSC "Kuzbass energy distributing company" with nominal value of 0,05 RUR,

1 (one) common share of JSC "Main power lines of Kuzbassenergo" with nominal value of 1 RUR,

4.2. The number of shares of JSC "Kuzbassenergo – regional electricity supplying company", JSC "Kuzbass energy distributing company", JSC "Main power lines of Kuzbassenergo" of the soecific category (type) which every shareholder of JSC "Kuzbassenergo" is to receive is equal to the number of shares of "Kuzbassenergo" of the corresponding category (type) owned by him/her.

4.3. Shares of the newly established JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" are floated in the following way:

- JSC "Kuzbassenergo" purchases 303 081 901 common shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)", 303 081 901 common shares of JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" and also purchases the shares of the newly estavlished companies in accordane with the procedure prescribed by article 4.11 of the present resolution;
- other common shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" subject to floatation are distributed among the shareholders of JSC "Kuzbassenergo" in accordance with articles 4.4., 4.5., 4.8. of the present resolution.

Nominal value of 1 (one) common share of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" – 1, 50 RUR.

Nominal value of 1 (one) common share of JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)"- 0, 90 RUR.

4.4. Every shareholder who participated in voting on the issue of reorganization of JSC "Kuzbassenergo" and didn't vote against taking the decision on reorganization is to receive shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" in the number calculated in the following way:

$$X = \frac{A}{B-C} \times D$$

Where :

X – the number of shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)", JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" to be received by the shareholder who participated in voting on the issue of reorganization of JSC "Kuzbassenergo" and didn't vote against taking the decision on reorganization;

A – the number of shares of JSC "Kuzbassenergo" owned by the shareholder at the date of state registration of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" accordingly;

B – total amount of shares of JSC "Kuzbassenergo" at the date of state registration of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" (with the deduction of the shares being the property of or being at the disposal of JSC "Kuzbassenergo");

C – total number of shares of JSC "Kuzbassenergo"owned by the shareholders who voted against taking the decision on reorganization or did not participate in voting on this issue, at the date of state registration of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" accordingly;

D – total amount of shares of the newly established company (JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)"or JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" subject to distribution among the shareholders of JSC "Kuzbassenergo" (resulted at calculation in accordance with the regulations of paragraph 1 of article 4.5. of the present resolution, minus total number of shares or the corresponding newly established company subject to purchase by JSC "Kuzbassenergo" and distribution among the shareholders of the Company who voted against taking the decision on reorganization or didn't take part in voting on this issue).

In case at calculating the number of shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" that is to be received by the shareholders of JSC "Kuzbassenergo" at the result of distribution, the number of shares of any shareholder turns out to be fractional the fraction is not taken into consideration.

In case in the result of rounding-up a shareholder does not obtain any share of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" or JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)", such shareholder receives one share of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and one share of JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)".

4.5. The total number of shares of each of the newly established companies subject to floatation equals the number of shares of JSC "Kuzbassenergo" at the moment of taking the decision on reorganization (minus the number of shares beign the property or being at the disposal of JSC "Kuzbassenergo").

At that the total number of shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)"subject to floatation may be increased in case the sum of shares of the indicated companies subject to floatation, calculated in accordance with articles 4.3., 4.4. turns out to be larger than the number of shares subject to floatation in

acordance with paragraph 1 of the present resolution.

4.6. The amont of the authorized capital stock of each of the newly established companies is determined through multiplication of the total number of shares of the specific company subject for floatation by the nominal value of one share.

4.7. The authorized capital stock of the newly established companies are formed at the expense of the funds of additional capital.

4.8. In accordance with paragraph 3 article 3 clause 19 of Federal Law "On joint stock companies" shares of each of the newly established companies in the number equal to the number of shares of the Company owned are subject to distribution among the shareholders of the company who voted against taking the decision on reorganization of the Company or did not participate in voting on this issue.

4.9. Common shares or the newly established companies will grant their owners the following rights:

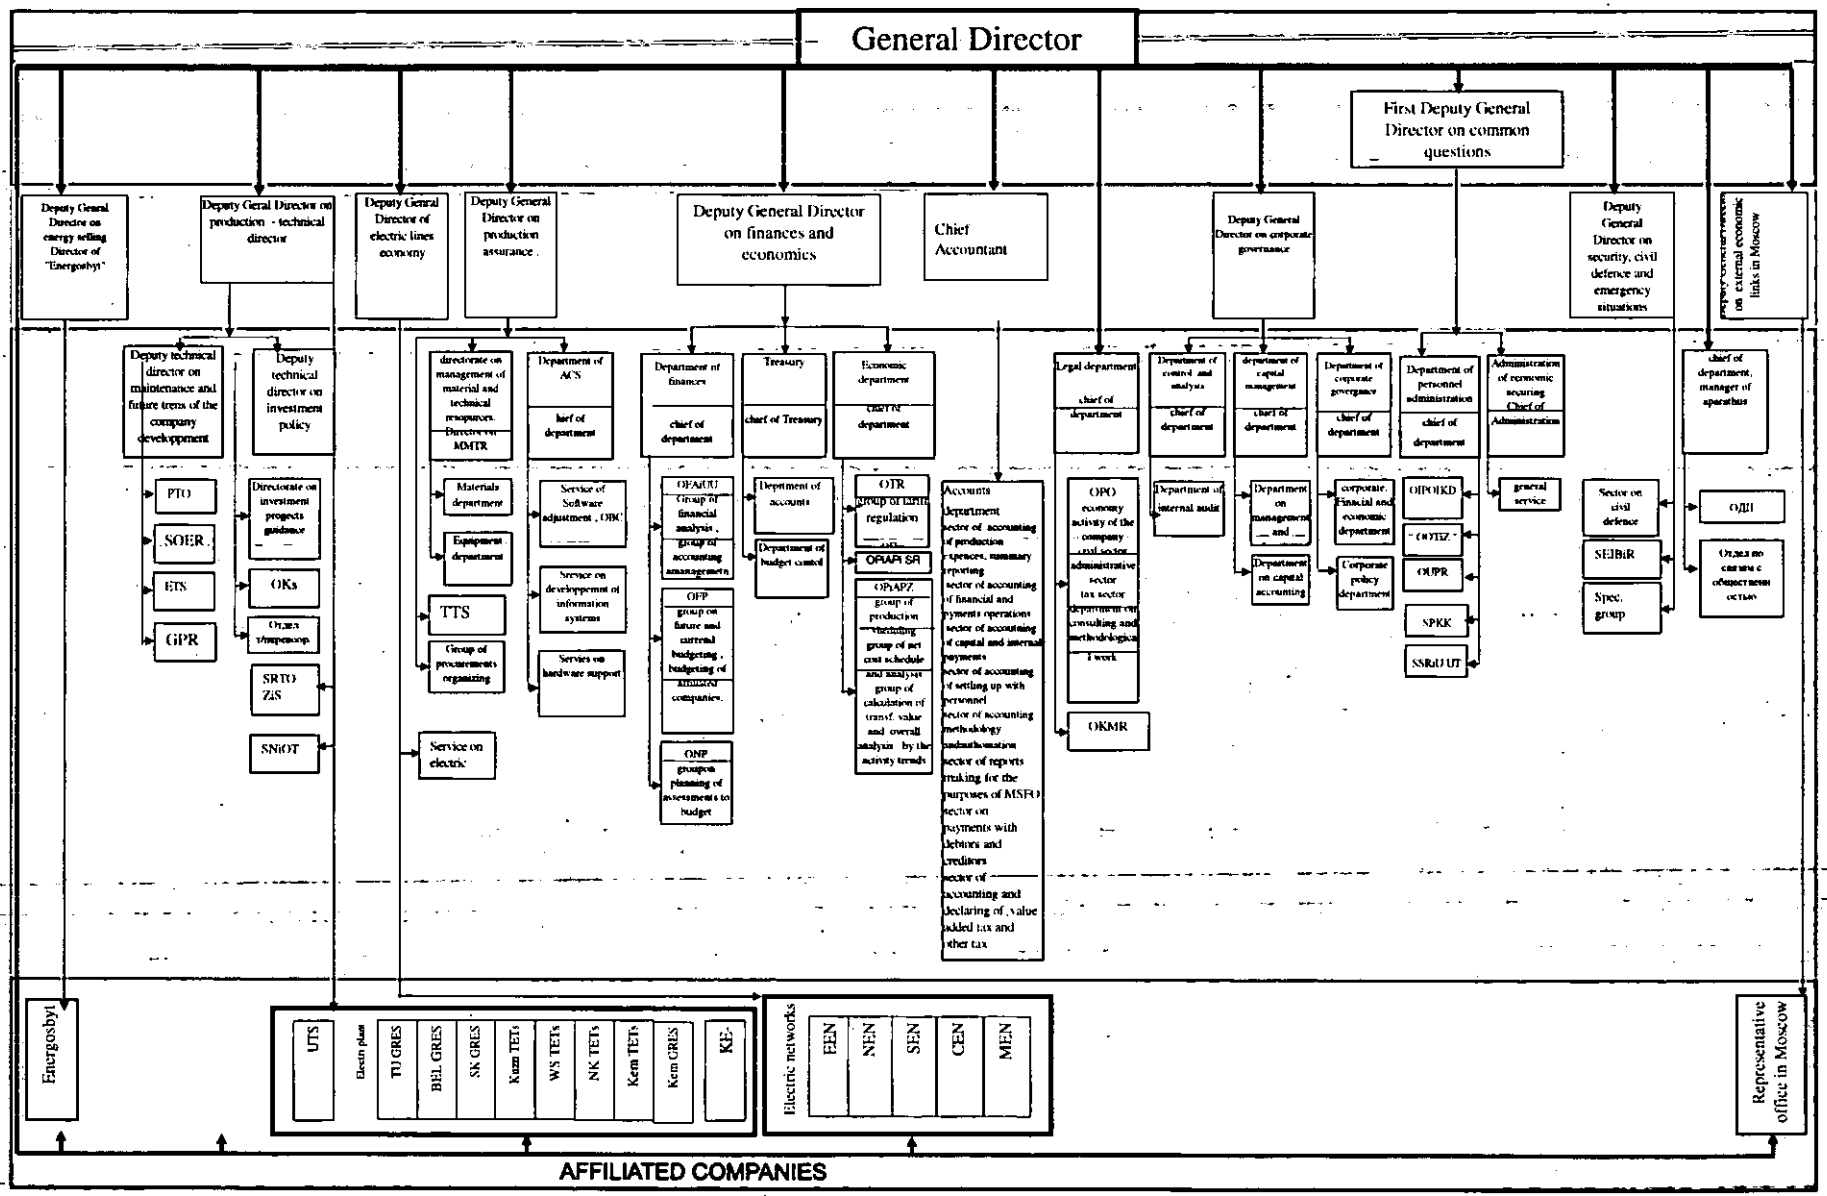
1. to participate in the General meeting of shareholders of the company personally or through representation with the right to vote on all the issues under the competence;
2. to put forward suggestions into the agenda of the general meeting of shareholders in the procedure prescribed by the legislation of the Russian Federation and the Statutes of the company;
3. to obtain information on activities carried out by the company and to review the documentation of the Company in accordance with article 91 of the Federal Law "On joint stock companies", as well as other standard acts and the Statute of the company;
4. to collect dividends announced by the company;
5. of preferred purchase of excess shares floated through open subscription and emissive securities convertible into shares, in the number proportional to the number of shares of this category (type) owned by them;
6. in case of liquidation of the company to receive part of its property;
7. to realize other rights prescribed by the legislation of the Russian Federation and the Statute of the company.

4.10. The shares of the Company, property right for which has passed on to new owners after taking the decision on reorganization of the Company and before the moment of state registration of the newly established companies, give their owners the same scope of rights as of the shareholders who voted for taking the decision on reorganization of the Company.

4.11. The shares of the companies that were not distributed among the shareholders of the Company are declared as being purchased by JSC "Kuzbassenergo".

4.12. The shares of the newly established companies at the moment of state registration of the companies established as the result of reorganization on the basis or the data contained in the register of shareholders of JSC "Kuzbassenergo" at the corresponding date are considered floated (distributed among the shareholders of JSC "Kuzbassenergo", purchased by JSC "Kuzbassenergo").

5. To approve the dividing balance.



Over the question № 2: Decision was not accepted.

Over the question № 3: To pay off dividends for the ordinary shares of the JSC "Kuzbassenergo" at the outcome of 9 months of 2005 in amount of RUR 0,670461 for one ordinary share of JSC 'Kuzbassenergo" in cash within 60 days from the date of the decision's adoption.

2.5.	Competitiveness of the company and risks.	20
III	**Corporate Governance.**	25
3.1	Principles. Documents.	25
3.2.	Information on members of management on control bodies of the Company.	32
3.3	Affiliated and subsidiary companies.	48
3.4	Information about the substantial facts.	50
3.5.	The Chronicle of transactions made by the Company during the year 2005.	50
IV	**Major production figures.**	71
4.1	Structure and volume of electricity generation and capacity spaced out generating capacity for the last 3 years, including demand and reserve of the Company	71
4.2	Dynamics of electricity and heat energy effective output for the last three years	74
4.3	Dynamics of energy output volumes to FOREM , also of own output and purchase energy for the last three years.	75
4.4	Generating and transferring capacity	77
4.5	Dynamic of expenses on repair of main production funds for 2003-2005.	79
4.6	Dynamics of breakdown rates for the last 3 years.	80
V	**Power supply activity.**	**83**
5.1	Dynamics of commodity supply and energy sale for the last 3 years, including dynamics of abonents debts.	83
5.2	Dynamics of energy realization structure changes	84
5.3	Dynamics of tariff changing on electric and heat power according to the date of tariffs launching since 2003 till 2005	84
5.4	Dynamics of energy consumption, payments with the consumers and structure of abonent debts for the last three years.	85
VI	**Major figures of accounting and financial reporting of the**	**88**

	Company	
6.1	Major provisions of accounting policy of the Company	88
6.2	The analysis of the dynamics of the results of the company's activity and financial situation (including the analysis of the structure and the dynamics of net assets) for the latest 3 years.	137
6.3	Auditor's report	147
6.4	Balance sheet	152
6.5	Profit and losses statement	154
VII	**Allocation of profit and dividend policy**	**166**
VIII	**Investment activity**	**167**
8.1	Investments of the Company including modernization and technical reequipment	167
8.2	Sources of financing of investment programs	171
8.3	Structure of capital investments by sectors: electric plants, electric networks of all voltage class, heat power networks, equipment not requiring mounting and which is not a part of the construction's estimates.	171
8.4	Non-profile financial investments.	175
8.5	Strategy of the Company's participation in the non profile financial investments	177
IX	**Perspective of technical reequipment and development of the Company**	**178**
9.1	Introduction of new technologies and dynamics of the Company's development	178
9.2	Fulfillment of programs on energy system work safety improvement (consumers energy supply)	180
X	**Development of the Company's communications network and Internet-technologies**	**182**
XI	**Procurement activity.**	**185**
9.1	General provisions of the Company's policy on the procurement activity according to the Regulation about the procedure of regulated procurement of goods, operation and services for the Company's needs.	185
9.2	Report of General Director on procurement activity of the Company for the 12 month of the year 2005 (by the trends of activity)	187
XII	**Preservation of environment .**	**191**
12.1	Fulfillment of ecological measure on protection of air and water basins , also protection and rational using of lands, reducing of deleterious effect to the atmosphere	191
12.2	Application of perspective technologies and decisions (ecological) under electric and heat power output..	192
12.3	Primary ecological tasks of the Company in the year 2006 and strategic ecological tasks for the next three years, including corresponding with Ecological policy of RAO UES of Russia and its fulfillment conception adopted by the JSC RAO "UES of Russian" in the December 2005.	192

VOTING BALLOT NO. 1

for voting at an extraordinary General shareholders' meeting of JSC "Kuzbassenergo"

The form of the shareholders' general meeting: absentee voting.
The date of the shareholders' general meeting: December 30, 2005.

The filled voting papers should be sent to the mail address:
JSC "Central Moscow Depositary" build. 8, 34 Bolshaya Pochtovaya Street, Moscow, 105082, Russia.

First name, middle name, last name of the shareholder: _____

The amount of stocks belonging to him: _____

QUESTION No. 2: ***About the reorganization of the Company in the form of segregation, about the order and conditions of the segregation, about new companies (including JSC "South-Kuzbass GRES" and JSC "West-Sibirean TETS"), about the distribution of the stocks of the new companies, about the ratification of the divisional balance.***

DECISION:

1. **To reorganize JSC "Kuzbassenergo" by division into:**
   - JSC "Kuzbassenergo – regional electricity network Company";
   - JSC "Kuzbassenergo energy merchandising Company";
   - JSC "Electric mains of Kuzbassenergo";
   - JSC "West-Sibirean TETS"
   - JSC "South-Kuzbass GRES"
2. **To establish the following order and conditions of the segregation:**

   2.1. A distribution of the stocks of the new companies is carried out in the order specified in paragraph 4 of the present decision.

   2.2. A part of the property, rights and duties of the Company is given to the new companies in accordance with the divisional balance.

   2.3. The order of arrangement and carrying out of the General meeting of shareholders of the new companies as well as the order of voting on the items of agenda for the shareholders' meetings is determined by present decision (par. No.3) and by the Charter of JSC "Kuzbassenergo".

   2.4. Within 3 days after the decision by the General meeting of shareholders of the Company about the reorganization in the form of division is made, the General Director of the Company notifies the rating authority of the decision.

   2.5. Not later than 30 days after the decision about the reorganization is made the General Director notifies the Company's creditors of the decision by mailing registered letters as well as he publishes in print an announcement of the reorganization of the Company, which is aimed for announcements for the state registration of bodies corporate.

   2.6. The Company's creditors within 30 days since the announcement of the decision was published or within 30 days since the notifications were mailed to them have a right to claim for the suspending or a pre-term execution of the duties of the Company and to claim for the payment of damages. The Company basing on the claims that it got from the creditors makes a list of satisfied and unsatisfied creditors' claims, the latter should be satisfied.

   2.7. The General Director notifies the workers of JSC "Kuzbassenergo" of the decision about the reorganization of JSC "Kuzbassenergo" and carries out a list of activities concerning labour relationships in accordance with the Labour Code of the Russian Federation.

   2.8. In accordance with paragraph 2 article 75 of the Federal Law "About Joint Stock Companies" the shareholders of the Company who voted against or who didn't take part in the voting on this item of agenda have a right to claim the Company to purchase a part or all stocks owned by them in order, that was determined in accordance with the requirements of the Russian Federation by the Board of the Directors of the Company, in the notification of an extraordinary General meeting of shareholders of the Company.

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

The price of purchased stocks was determined by the Board of the Directors of the Company in accordance with paragraph 3 article 75 of the Federal Law "About Joint Stock Companies".

The purchased stocks pay the dept when they are purchased and the stocks of the new Companies are not distributed to them.

2.9. The account of the result of the purchased Company's stocks is ratified by the Board of the Directors of the Company not later than 5 days after the payment of the debt by stocks.

As a result of the payment of the debt by stocks the stock capital of JSC "Kuzbassenergo" is reduced at the sum of par value of these stocks.

3. **To establish the following bodies corporate:**
   - JSC "Kuzbassenergo – regional electricity network Company";
   - JSC "Kuzbassenergo energy merchandising Company";
   - JSC "Electric mains of Kuzbassenergo";
   - JSC "West-Sibirean TETS"
   - JSC "South-Kuzbass GRES"

3.1. To establish that the number of people in the Board of Directors of every new Company is 11.

To establish that the number of people in the Auditing Commission of every new Company is 5.

3.2. To establish that the shareholders (a shareholder) of JSC "Kuzbassenergo" who hold in the aggregate 2 and more percent of stocks of JSC "Kuzbassenergo" may send to the Company's office their proposals of nominate candidates to be elected to the Company's Board of Directors of every new Company and members of the Auditing Commission of every new Company as well as their proposals of nominate candidates to be elected to the position of the General Director. These proposals should be submitted to the Company's office not later than March 15, 2006.

The inclusion into the list of nominees in the voting papers at General shareholders' meetings of the new Companies should be only for such nominees whose proposals are properly legalized in accordance with the requirements and were submitted in the set time, that is given in the present regulations, from the shareholders (a shareholder) who hold in the aggregate 2 and more percent of stocks of JSC "Kuzbassenergo" at the moment of nominating candidates.

The mentioned proposals are presented in written form that include first name, middle name, last name of the shareholder (shareholders) who submitted the candidate and include the amount of stocks belonging to him (them) of JSC "Kuzbassenergo". The proposals should be signed by the shareholder (shareholders).

But if the proposal is signed by the representative acting by proxy, a letter of attorney (that was properly legalized) is attached and should be made in accordance with the Federal Law "On Joint Stock Companies".

If the proposals are signed by a shareholder (or his representative) whose rights for stocks are considered on the account in the depositary then to such proposal a copy of the account in the depositary (that gives the right for the amount of shares) should be attached.

The candidate nomination proposal should include:

- the name of a new company to which the nominee is proposed;
- first name, middle name, last name of the nominee and his permanent work place;
- the name of the body to which the nominee is proposed;

The Board of Directors of the Company should consider the received proposals and make a decision about the inclusion in the list the nominees who are to be elected to the bodies of the Community or about the refusal to include in the list not later than March 20, 2006.

The nominees are to be included in the voting ballots for elections to corresponding bodies of companies, except the cases when:

- the proposal doesn't meet the requirements of the present paragraph;
- the shareholder's (shareholders') proposal was received after March 15, 2006;
- the shareholder (shareholders) in the aggregate doesn't hold the necessary amount of stocks of JSC "Kuzbassenergo".

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

Motivated decision of the Board of Directors of the Company about the refusal to include the proposed nominees in the list of nominees for the election to the body of new companies is sent to the shareholder (shareholders) who proposed the nominees not later than March 23, 2006.

3.3. The registrator of the Company (JSC "Central Moscow Depositary") carries out the functions of the Returning Board at General meetings of the new companies.

3.4. To establish that when voting at General shareholders' meetings of the new companies concerning the questions of ratification of the charter of a new company, the election of the members of the Auditing Commission, the election of the General Director, each stock of a new company that is to be distributed, gives a shareholder of a new company one voice.

The decision on questions of ratification of the charter of a new company, on the election of the General Director and the Auditing Commission members is ratified by a General meeting of shareholders of a new company in case of the majority of a new company shareholders' voices, who hold stocks and take part in the voting at a General meeting of shareholders of a company.

3.5. To establish that the election of the members of the Board of Directors of hew companies is carried out on the principle of cumulative voting. When using cumulative voting the number of voices that belongs to every shareholder of a new company who holds stocks is multiplied by the number of people who are to be elected to the Board of Directors of a new company in accordance with par. 3.1. of the present decision, and a shareholder of a new company who holds stocks has the right to give all acquired voices to one nominee or distribute them among two or more nominees.

Those 11 nominees who acquired the majority of voices are considered being elected to the Board of Directors.

3.6. General meeting of shareholders of new companies have the quorum if the shareholders of new companies took part in it and if they have more than a half of voices that are to be given for stocks of a new company.

The shareholders of new companies, who took part in General meeting of shareholders of the companies, are considered taking part in it if they registered themselves for taking part in it, or they may be such shareholders whose voting papers were received by the Company not later than two days before the General meeting of shareholders of the companies.

3.7. When making decisions concerning questions of carrying out General meeting of shareholders of the companies, that were not regulated directly in the present decision, statutory acts of the Russian Federation that regulate similar relationships are applied.

4. **To establish the following order of distribution of new companies' stocks:**

4.1. The stocks of new Companies are distributed among the shareholders of JSC "Kuzbassenergo regional electricity network Company", JSC "Kuzbassenergo energy merchandising Company", JSC "Electric mains of Kuzbassenergo" are distributed among the shareholders of JSC "Kuzbassenergo" - including the shareholders who voted against or didn't participate in the voting with the agenda of reorganization of the Company, proportionate to the amount of stocks of the Company they have.

To establish the following percent distribution of stocks of JSC "Kuzbassenergo regional electricity network Company", JSC "Kuzbassenergo energy merchandising Company", JSC "Electric mains of Kuzbassenergo" as well as the amount of their par value:

For every stock of JSC "Kuzbassenergo" should be distributed at the same time:

1 (One) stock of JSC "Kuzbassenergo – regional electricity network Company" at par value of 2.90 rub.,

1 (One) stock of JSC "Kuzbassenergo energy merchandising Company" at par value of 0.05 rub.;

1 (One) stock of "Electric mains of Kuzbassenergo" at par value 1 rub.,

4.2. The amount of stocks of a particular type of JSC "Kuzbassenergo regional electricity network Company", JSC "Kuzbassenergo energy merchandising Company", JSC "Electric mains of Kuzbassenergo" to be distributed for every shareholder of JSC "Kuzbassenergo" equals the amount of stocks of a particular type of JSC "Kuzbassenergo".

4.3. The stocks of JSC "West-Sibirean TETS" and JSC "South-Kuzbass GRES" are distributed in the following way:

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

- JSC "Kuzbassenergo" purchases 303,081,901 stock of JSC "West-Sibirean TETS", 303,081,901 stock of JSC "South-Kuzbass GRES" as well as buys stocks of the new companies in accordance with paragraph 4.11 of the present decision;
- The rest of stocks of JSC "West-Sibirean TETS" and JSC "South-Kuzbass GRES" that are to be distributed are distributed among the shareholders of JSC "Kuzbassenergo" in accordance with paragraph 4.4, 4.5, 4.8 of the present decision;

Par value of 1 (one) stock of JSC "West-Sibirean TETS" is 1.50 rub.

Par value of 1 (one) stock of JSC "South-Kuzbass GRES" is 0.90 rub.

4.4. Each shareholder who took part in the voting about the question of reorganization of JSC "Kuzbassenergo" and who didn't voted against the decision of the reorganization of the Company should get the stocks of JSC "West-Sibirean TETS" and JSC "South-Kuzbass GRES" in the amount that is calculated in the following way:

$$X = \frac{A}{B-C} \times D$$

where:

X – is the amount of stocks of JSC "West-Sibirean TETS" and JSC "South-Kuzbass GRES" that each shareholder who took part in the voting about the question of reorganization of JSC "Kuzbassenergo" and who didn't voted against the decision of the reorganization of the Company should get;

A – is the amount of stocks of JSC "Kuzbassenergo", that belong to a shareholder at the moment of the state registration of JSC "West-Sibirean TETS" and JSC "South-Kuzbass GRES" correspondingly;

B – is the total amount of stocks of JSC "Kuzbassenergo" at the moment of the state registration of JSC "West-Sibirean TETS" and JSC "South-Kuzbass GRES" (except the stocks that are at property or at the disposal of JSC "Kuzbassenergo");

C – is the total amount of stocks of JSC "Kuzbassenergo" that belongs to the shareholders who didn't take part in the voting about the question of reorganization of JSC "Kuzbassenergo" and who voted against the decision of the reorganization at the moment of the state registration of JSC "West-Sibirean TETS" and JSC "South-Kuzbass GRES" correspondingly;

D – is the total amount of stocks of a new company (JSC "West-Sibirean TETS" or JSC "South-Kuzbass GRES") that are to be distributed among the shareholders of JSC "Kuzbassenergo" (calculated in accordance with sub-paragraph 1 paragraph 4.5, of the present decision, except the total amount of stocks of the corresponding company that are to be purchased by JSC "Kuzbassenergo" and that are to be distributed among the shareholders of the company, who didn't take part in the voting about the question of reorganization of JSC "Kuzbassenergo" and who voted against the decision of the reorganization).

In the distribution if there is a fraction in the amount of stocks of JSC "West-Sibirean TETS" and JSC "South-Kuzbass GRES" that each shareholder of JSC "Kuzbassenergo" should get then this fraction if not taken into consideration.

As a result of rounding if any of the shareholders happens to have no stocks of JSC "West-Sibirean TETS" and JSC "South-Kuzbass GRES" then such shareholder gets one stock of both JSC "West-Sibirean TETS" and JSC "South-Kuzbass GRES".

4.5. The total amount of stocks to be distributed for every new company equals the amount of stocks of JSC "Kuzbassenergo" at the moment of making decision about the reorganization (except the stocks that are at property or at the disposal of JSC "Kuzbassenergo").

Besides, the total amount of stocks of JSC "West-Sibirean TETS" and JSC "South-Kuzbass GRES"to be distributed may be increased in case if the sum of the stocks of the companies to be distributed (calculated in accordance with paragraph 4.3, 4.4) happens to be higher than the stocks of the companies to be distributed in accordance with the sub-paragraph 1 of the present paragraph.

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

4.6. The amount of the stock capital of every new company is calculated by multiplying the total amount of stocks to be distributed of a new company by par value of one stock.
4.7. The stock capitals of the new companies consist of additional capital.
4.8. The shareholders of the Company who either voted against the decision of the reorganization of the Company or who didn't take part in this question in accordance with sub-paragraph 3 paragraph 3 article 19 of the Federal Law "About Joint Stock Companies" the distribution of stocks of a particular type of new companies is carried out in the amount of stocks of a particular type of the Company.
4.9. Stocks of new companies will allow its holders the following rights:
1) to participate both personally and through his representative in General meeting of shareholders with the right of voice for all questions of its competence;
2) to include proposals to the items on agenda of a General meeting of shareholders in the order specified by the legislation of the Russian Federation;
3) to receive information about the activity of the company and to get acquainted with the Company's documents in accordance with article 73 of the Federal Law "About Joint Stock Companies", statutory acts and the Charter of the company;
4) to receive dividends, ratified by the Company;
5) to have a prior purchase of additional stocks, issued securities that are converted into stocks (they are distributed by means of public subscription); in is done in a corresponding proportion of stocks they hold;
6) in case of closing down the company to get a part of its property;
7) to have other rights mentioned in the legislation of the Russian Federation and the Carter of the Company.
4.10. The stocks of a new Company, that changed their holders after the decision of the reorganization of the Company and up to the moment of the state registration of new companies, give their new holders the same rights as the shareholders who voted for the decision of the reorganization of the Company.
4.11. The stocks of new companies that were not distributed among the shareholders of the Company are considered to be purchased by JSC "Kuzbassenergo".
4.12. The stocks of new companies are considered to be distributed (distributed among the shareholders of JSC "Kuzbassenergo", purchased by JSC "Kuzbassenergo") at the moment of the state registration of companies that were established as a result of the reorganization, basing on the list of the shareholders of JSC "Kuzbassenergo" at the exact date.

5. **To ratify the divisional balance.**

VOTING BALLOT NO. 2
for voting at an extraordinary General shareholders' meeting of JSC "Kuzbassenergo"

The form of the shareholders' general meeting: absentee voting.
The date of the shareholders' general meeting: December 30, 2005.

The filled voting papers should be sent to the mail address:
JSC "Central Moscow Depositary" build. 8, 34 Bolshaya Pochtovaya Street, Moscow, 105082, Russia.

First name, middle name, last name of the shareholder: _____

The amount of stocks belonging to him: _____

QUESTION No. 2: ***About the reorganization of the Company in form of segregation, about the order and conditions of segregation, about new companies (except JSC "South-Kuzbass GRES" and JSC "West-Sibirean TETS"), about the distribution of the stocks of the new companies, about the ratification of the divisional balance.***

DECISION:

1. **To reorganize JSC "Kuzbassenergo" by division into:**
   - JSC "Kuzbassenergo – regional electricity network Company";
   - JSC "Kuzbassenergo energy merchandising Company";
   - JSC "Electric mains of Kuzbassenergo";
2. **To establish the following order and conditions of segregation:**

2.1. A distribution of the stocks of the new companies is carried out in the order specified in paragraph 4 of the present decision.

2.2. A part of the property, rights and duties of the Company is given to the new companies in accordance with the divisional balance.

2.3. The order of arrangement and carrying out of the General meeting of shareholders of the new companies as well as the order of voting on the items of agenda for the shareholders' meetings is determined by present decision (par. No.3) and by the Charter of JSC "Kuzbassenergo".

2.4. Within 3 days after the decision by the General meeting of shareholders of the Company about the reorganization in the form of division is made, the General Director of the Company notifies the rating authority of the decision.

2.5. Not later than 30 days after the decision about the reorganization is made the General Director notifies the Company's creditors of the decision by mailing registered letters as well as he publishes in print an announcement of the reorganization of the Company, which is aimed for announcements for the state registration of bodies corporate.

2.6. The Company's creditors within 30 days since the announcement of the decision was published or within 30 days since the notifications were mailed to them have a right to claim for the suspending or a pre-term execution of the duties of the Company and to claim for the payment of damages. The Company basing on the claims that it got from the creditors makes a list of satisfied and unsatisfied creditors' claims, the latter should be satisfied.

2.7. The General Director notifies the workers of JSC "Kuzbassenergo" of the decision about the reorganization of JSC "Kuzbassenergo" and carries out a list of activities concerning labour relationships in accordance with the Labour Code of the Russian Federation.

2.8. In accordance with paragraph 2 article 75 of the Federal Law "On Joint Stock Companies" the shareholders of the Company who voted against or who didn't take part in the voting on this item of agenda have a right to claim the Company to purchase a part or all stocks owned by them in order, that was determined in accordance with the requirements of the Russian Federation by the Board of the Directors of the Company, in the notification of an extraordinary General meeting of shareholders of the Company.

The price of purchased stocks was determined by the Board of Directors of the Company in accordance with paragraph 3 article 75 of the Federal Law "About Joint Stock Companies".

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

The purchased stocks pay the dept when they are purchased and the stocks of the new Companies are not distributed to them.

2.9. The account of the result of the purchased Company's stocks is ratified by the Board of the Directors of the Company not later than 5 days after the payment of the debt by stocks.

As a result of the payment of the debt by stocks the stock capital of JSC "Kuzbassenergo" is reduced at the sum of par value of these stocks.

3. **To establish the following bodies corporate:**
   - JSC "Kuzbassenergo – regional electricity network Company";
   - JSC "Kuzbassenergo energy merchandising Company";
   - JSC "Electric mains of Kuzbassenergo";

3.1. To establish that the number of people in the Board of Directors of every new Company is 11.

To establish that the number of people in the Auditing Commission of every new Company is 5.

3.2. To establish that the shareholders (a shareholder) of JSC "Kuzbassenergo" who hold in the aggregate 2 and more percent of stocks of JSC "Kuzbassenergo" may send to the Company's office their proposals of nominate candidates to be elected to the Company's Board of Directors of every new Company and members of the Auditing Commission of every new Company as well as their proposals of nominate candidates to be elected to the position of the General Director. These proposals should be submitted to the Company's office not later than March 15, 2006.

The inclusion into the list of nominees in the voting papers at General shareholders' meetings of the new Companies should be only for such nominees whose proposals are properly legalized in accordance with the requirements and were submitted in the set time, that is given in the present regulations, from the shareholders (a shareholder) who hold in the aggregate 2 and more percent of stocks of JSC "Kuzbassenergo" at the moment of nominating candidates.

The mentioned proposals are presented in written form that include first name, middle name, last name of the shareholder (shareholders) who submitted the candidate and include the amount of stocks belonging to him (them) of JSC "Kuzbassenergo". The proposals should be signed by the shareholder (shareholders).

But if the proposal is signed by the representative acting by proxy, a letter of attorney (that was properly legalized) is attached and should be made in accordance with the Federal Law "About Joint Stock Companies".

If the proposals are signed by a shareholder (or his representative) whose rights for stocks are considered on the account in the depositary then to such proposal a copy of the account in the depositary (that gives the right for the amount of shares) should be attached.

The candidate nomination proposal should include:
- the name of a new company to which the nominee is proposed;
- first name, middle name, last name of the nominee and his permanent work place;
- the name of the body to which the nominee is proposed;

The Board of Directors of the Company should consider the received proposals and make a decision about the inclusion in the list the nominees who are to be elected to the bodies of the Community or about the refusal to include in the list not later than March 20, 2006.

The nominees are to be included in the voting ballots for elections to corresponding bodies of companies, except the cases when:
- the proposal doesn't meet the requirements of the present paragraph;
- the shareholder's (shareholders') proposal was received after March 15, 2006;
- the shareholder (shareholders) in the aggregate doesn't hold the necessary amount of stocks of JSC "Kuzbassenergo".

Motivated decision of the Board of Directors of the Company about the refusal to include the proposed nominees in the list of nominees for the election to the body of new companies is sent to the shareholder (shareholders) who proposed the nominees not later than March 23, 2006.

3.3. The registrator of the Company (JSC "Central Moscow Depositary") carries out the functions of the Returning Board at General meetings of the new companies.

3.4. To establish that when voting at General shareholders' meetings of the new companies concerning the questions of ratification of the charter of a new company, the election of the

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

members of the Auditing Commission, the election of the General Director, each stock of a new company that is to be distributed, gives a shareholder of a new company one voice.

The decision on questions of ratification of the charter of a new company, on the election of the General Director and the Auditing Commission members is ratified by a General shareholders' meeting of a new company in case of the majority of a new company shareholders' voices, who hold stocks and take part in the voting at a General shareholders' meetings of a company.

3.5. To establish that the election of the members of the Board of Directors of hew companies is carried out on the principle of cumulative voting. When using cumulative voting the number of voices that belongs to every shareholder of a new company who holds stocks is multiplied by the number of people who are to be elected to the Board of Directors of a new company in accordance with par. 3.1. of the present decision, and a shareholder of a new company who holds stocks has the right to give all acquired voices to one nominee or distribute them among two or more nominees.

Those 11 nominees who acquired the majority of voices are considered being elected to the Board of Directors.

3.6. General meeting of shareholders of new companies have the quorum if the shareholders of new companies took part in it and if they have more than a half of voices that are to be given for stocks of a new company.

The shareholders of new companies, who took part in General meeting of shareholders of the companies, are considered taking part in it if they registered themselves for taking part in it, or they may be such shareholders whose voting papers were received by the Company not later than two days before the General meeting of shareholders of the companies.

3.7. When making decisions concerning questions of carrying out General shareholders' meetings of the companies, that were not regulated directly in the present decision, statutory acts of the Russian Federation that regulate similar relationships are applied.

4. **To establish the following order of distribution of new companies' stocks:**

4.1. The stocks of new Companies are distributed among the shareholders of JSC "Kuzbassenergo" including the shareholders who voted against or didn't participate in the voting with the agenda of reorganization of the Company, proportionate to the amount of stocks of the Company they have.

4.2. To establish the following percent distribution of stocks of every new Company as well as the amount of their par value:

For every stock of JSC "Kuzbassenergo" should be distributed at the same time:

1 (One) stock of JSC "Kuzbassenergo – regional electricity network Company" at par value of 2.90 rub.,

1 (One) stock of JSC "Kuzbassenergo energy merchandising Company" at par value of 0.05 rub.,

1 (One) stock of "Electric mains of Kuzbassenergo" at par value 1 rub.,

4.3. The amount of stocks of a particular type to be distributed for every new company equals the amount of stocks of a particular type of JSC "Kuzbassenergo" at the moment of making decision about the reorganization (except the stocks that are at property or at the disposal of JSC "Kuzbassenergo").

4.4. The amount of stocks of a particular type for every new company that every shareholder of JSC "Kuzbassenergo" should get equals the number of stocks of a particular type of JSC "Kuzbassenergo" he holds.

4.5. The amount of the stock capital of every new company is calculated by multiplying the total amount of stocks to be distributed of a new company by par value of one stock.

4.6. The stock capitals of the new companies consist of additional capital.

4.7. The shareholders of the Company who either voted against the decision of the reorganization of the Company or who didn't take part in this question in accordance with sub-paragraph 3 paragraph 3 article 19 of the Federal Law "About Joint Stock Companies" the distribution of stocks of a particular type of new companies is carried out in the amount of stocks of a particular type of the Company.

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

4.8. Stocks of new companies will allow its holders the following rights:

1) to participate both personally and through his representative in General shareholders' meetings with the right of voice for all questions of its competence;

2) to include proposals to the items on agenda of a General meeting of shareholders in the order specified by the legislation of the Russian Federation;

3) to receive information about the activity of the company and to get acquainted with the Company's documents in accordance with article 73 of the Federal Law "On Joint Stock Companies", statutory acts and the Charter of the company;

4) to receive dividends, ratified by the Company;

5) to have a prior purchase of additional stocks, issued securities that are converted into stocks (they are distributed by means of public subscription); in is done in a corresponding proportion of stocks they hold;

6) in case of closing down the company to get a part of its property;

7) to have other rights mentioned in the legislation of the Russian Federation and the Carter of the Company.

4.9. The stocks of a new Company, that changed their holders after the decision of the reorganization of the Company and up to the moment of the state registration of new companies, give their new holders the same rights as the shareholders who voted for the decision of the reorganization of the Company.

4.10. The stocks of new companies that were not distributed among the shareholders of the Company are considered to be purchased by JSC "Kuzbassenergo".

4.11. The stocks of new companies are considered to be distributed (distributed among the shareholders of JSC "Kuzbassenergo", purchased by JSC "Kuzbassenergo") at the moment of the state registration of companies that were established as a result of the reorganization, basing on the list of the shareholders of JSC "Kuzbassenergo" at the exact date.

5. **To ratify the divisional balance.**

To determine that shareholders (shareholder) of JSC "Kuzbassenergo" being in the aggregate holders of 2 or more per cent of cordinary shares of JSC "Kuzbassenergo" have a right to forward to the address of the Company suggestions on nomination of candidatures for election of members of the board of directors of each of the created companies (up to 11 candidatures for each of the created companies) and members of the revision committee of each of the created companies (up to 5 candidatures for each of the created companies), as well as candidatures for the positions of general directors of each of the created companies (not more than 1 candidature for each of the created companies). Such suggestions must be received by the company not later than March 15, 2006.

Only candidatures who were nominated in accordance with the prescribed requirements and suggestions on whom were received within the deadline prescribed by the present resolution, by the shareholders (shareholder) being in the aggregate holders of 2 or more per cent of ordinary shares of JSC "Kuzbassenergo"at the moment of nomination are subject to inscription in voting papers for the general meetings of shareholders.

The mentioned nominations are to be inscribed in written form with indication of the name (title) of the nominating shareholders (shareholder) and the number of ordinary shares of JSC "Kuzbassenergo" owned by them (him/her).

In case the indicated suggestions on nomination are signed by a representative of the shareholder they should be accompanied by power of attorney (copy of power of attorney attested in prescribed order), arranged in accordance with the requirements for drawing up of a power of attorney for voting of the Federal Law "On joint stock companies".

In case the indicated suggestions on nomination are signed by a shareholder (shareholders) whose share rights are taken account of in accordance with the deposit account in depositary, such suggestion should be accompanied by the extract of deposit record of the shareholder in depositary carrying out the registration of rights of the mentioned shares.

The suggestion on nomination of the indicated candidates must contain:

- name of the created company, in the bodies of which the candidates are nominated;
- last name, first name, patronymic and the principal place of business of each of the nominated candidates;
- name of the body for which the candidate is nominated.

The Board of Directors of the company must review the suggestions received and take the decision on inclusion or on the refusal to include the nominated candidatures in the list of candidates for the election in the bodies of the created company by March 20, 2006.

The nominated candidates are subject to inclusion in voting papers for the election in the corresponding body of the created companies with the exception of the following cases:

- when the nomination does not correspond to the requirements prescribed by the present article;
- when the nomination of shareholders (shareholder) is received by the Company later than March 15, 2006;
- when the shareholders (shareholder) do not in the aggregate own the necessary amount of shares of JSC "Kuzbassenergo".

Reasoned decision of the Board of Directors of the Company on refusal to include the nominated candidates in the list of candidatures for voting in the elections for the specific body of the created companies is forwarded not later then March 23, 2006 to shareholders (shareholder) who nominated the candidate.

3.3. At general meetings of shareholders of the created companies the functions of the counting commission are executed by the registrar of the Company – Joint Stock Company "Central Moscow Depositary".

3.4. It must be determined that at voting during general meetings of shareholders of the created companies on issues of approval of the Statute of the created company, of election of members of the revision commission or of election of general director, each ordinary share of the created company subject for floatation gives the shareholder of the created company being the holder of ordinary shares one vote.

The decision on issues of approval of the Statute of the created company, on election of the general director and members of the revision commission is taken by the general meeting of shareholders with the majority of votes of shareholders of the created company – holders of ordinary shares participating in the general meeting of shareholders of the created company.

3.5. It must be determined that elections of members of the board of directors of the created companies are carried out by cumulative voting. At cumulative voting the number of votes of every shareholder of the created company – holder of ordinary shares is multiplied by the number of persons to be elected in the board of directors of the company in accordance with article 3.1. of the present resolution and the shareholder of the created company owning ordinary shares has a right to give all of his/her votes for one candidate or to distribute them among two or more candidates.

The 11 candidates collecting the largest number of votes are considered elected for the board of directors of the created company.

3.6. General meetings of shareholders of the created companies are authorized (muster a quorum) on condition that shareholders of the created companies possessing in the aggregate more than half of votes subject to floatation of ordinary shares of the corresponding created company, participated in the elections.

Shareholders of created companies registered for participation in the general meeting and shareholders whose voting papers were received by the Company not later than two days before the date of the general meeting of shareholders of the created company are considered to have taken part in the general meeting of shareholders.

3.7. At decision-making on issues connected with holding general meetings of shareholders of the created companies which are not stipulated by the present resolution, standard acts of the Russian Federation regulating similar relations (by analogy) are to be used.

4. To establish the following procedure of floatation of shares of the created companies:

4.1. Shares of the newly established JSC "Kuzbassenergo - regional electricity supplying company", JSC "Kuzbass energy distributing company", JSC "Main power lines of Kuzbassenergo", JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)", JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" are distributed among the shareholders of JSC "Kuzbassenergo" including the shareholders who voted against or not having participated in voting on the issue of reorganization of the Company, proportionally to the number of shares of the Company owned by them.

To establish the following coefficients of distribution of ordinary shares of JSC "Kuzbassenergo – regional electricity supplying company", JSC "Kuzbass energy distributing company", JSC "Main power lines of Kuzbassenergo", and their nominal value:

counting for every ordinary share of JSC "Kuzbassenergo" the following are simultaneously subject to distribution:

1 (one) ordinary share of JSC "Kuzbassenergo – regional electricity supplying company", with nominal value of 2, 9 RUR,

1 (one) ordinary share of JSC "Kuzbass energy distributing company" with nominal

value of 0,05 RUR,

1 (one) ordinary share of JSC "Main power lines of Kuzbassenergo" with nominal value of 1 RUR,

4.2. The number of shares of JSC "Kuzbassenergo – regional electricity supplying company", JSC "Kuzbass energy distributing company", JSC "Main power lines of Kuzbassenergo" of the specific category (type) which every shareholder of JSC "Kuzbassenergo" is to receive is equal to the number of shares of "Kuzbassenergo" of the corresponding category (type) owned by him/her.

4.3. Shares of the newly established JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" are floated in the following way:

- JSC "Kuzbassenergo" purchases 303 081 901 ordinary shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)", 303 081 091 ordinary shares of JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" and also purchases the shares of the newly established companies in accordance with the procedure prescribed by article 4.11 of the present resolution;
- other ordinary shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" subject to floatation are distributed among the shareholders of JSC "Kuzbassenergo" in accordance with articles 4.4., 4.5., 4.8. of the present resolution.

Nominal value of 1 (one) ordinary share of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" – 1, 5 RUR.

Nominal value of 1 (one) ordinary share of JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)"- 0, 9 RUR.

4.4. Every shareholder who participated in voting on the issue of reorganization of JSC "Kuzbassenergo" and didn't vote against taking the decision on reorganization is to receive shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" in the number calculated in the following way:

$$X = \frac{A}{B-C} \times D$$

Where :

X – the number of shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)", JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" to be received by the shareholder who participated in voting on the issue of reorganization of JSC "Kuzbassenergo" and didn't vote against taking the decision on reorganization;

A – the number of shares of JSC "Kuzbassenergo" owned by the shareholder at the date of state registration of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" accordingly;

B – total amount of shares of JSC "Kuzbassenergo" at the date of state registration of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" (with the deduction of the shares being the property of or being at the disposal of JSC "Kuzbassenergo");

C – total number of shares of JSC "Kuzbassenergo"owned by the shareholders who voted against taking the decision on reorganization or did not participate in voting on this issue, at the date of state registration of JSC "Zapadno-Sibirskaya TETs (West Siberian

Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" accordingly;

D – total amount of shares of the newly established company (JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)"or JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" subject to distribution among the shareholders of JSC "Kuzbassenergo" (resulted at calculation in accordance with the regulations of paragraph 1 of article 4.5. of the present resolution, minus total number of shares or the corresponding newly established company subject to purchase by JSC "Kuzbassenergo" and distribution among the shareholders of the Company who voted against taking the decision on reorganization or didn't take part in voting on this issue).

In case at calculating the number of shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" that is to be received by the shareholders of JSC "Kuzbassenergo" at the result of distribution, the number of shares of any shareholder turns out to be fractional the fraction is not taken into consideration.

In case in the result of rounding-up a shareholder does not obtain any share of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" or JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)", such shareholder receives one share of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and one share of JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)".

4.5. The total number of shares of each of the newly established companies subject to floatation equals the number of shares of JSC "Kuzbassenergo" at the moment of taking the decision on reorganization (minus the number of shares being the property or being at the disposal of JSC "Kuzbassenergo").

At that the total number of shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)"subject to floatation may be increased in case the sum of shares of the indicated companies subject to floatation, calculated in accordance with articles 4.3., 4.4. turns out to be larger than the number of shares subject to floatation in accordance with paragraph 1 of the present resolution.

4.6. The amount of the authorized capital stock of each of the newly established companies is determined through multiplication of the total number of shares of the specific company subject for floatation by the nominal value of one share.

4.7. The authorized capital stock of the newly established companies is formed at the expense of the funds of additional capital.

4.8. In accordance with paragraph 3 article 3 clause 19 of Federal Law "On joint stock companies" shares of each of the newly established companies in the number equal to the number of shares of the Company owned are subject to distribution among the shareholders of the company who voted against taking the decision on reorganization of the Company or did not participate in voting on this issue.

4.9. Ordinary shares or the newly established companies will grant their owners the following rights:

1. to participate in the General meeting of shareholders of the company personally or through representation with the right to vote on all the issues under the competence;
2. to put forward suggestions into the agenda of the general meeting of shareholders in the procedure prescribed by the legislation of the Russian Federation and the Statutes of the company;
3. to obtain information on activities carried out by the company and to review the documentation of the Company in accordance with article 91 of the Federal Law "On joint stock companies", as well as other standard acts and the Statute of the company;

4. to collect dividends announced by the company;
5. of preferred purchase of excess shares floated through open subscription and emissive securities convertible into shares, in the number proportional to the number of shares of this category (type) owned by them;
6. in case of liquidation of the company to receive part of its property;
7. to realize other rights prescribed by the legislation of the Russian Federation and the Statute of the company.

4.10. The shares of the Company, property right for which has passed on to new owners after taking the decision on reorganization of the Company and before the moment of state registration of the newly established companies, give their owners the same scope of rights as of the shareholders who voted for taking the decision on reorganization of the Company.

4.11. The shares of the companies that were not distributed among the shareholders of the Company are declared as being purchased by JSC "Kuzbassenergo".

4.12. The shares of the newly established companies at the moment of state registration of the companies established as the result of reorganization on the basis or the data contained in the register of shareholders of JSC "Kuzbassenergo" at the corresponding date are considered floated (distributed among the shareholders of JSC "Kuzbassenergo", purchased by JSC "Kuzbassenergo").

To approve the dividing balance.

<u>Draft resolution B</u> (as of the issue of the agenda of the General meeting of shareholders "On reorganization of JSC "Kuzbassenergo" in the form of segregation, on procedure and terms of segregation, on establishment of new companies (without the establishment of JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" and JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)"), on stock floatation of the created companies and on the procedure of floatation, on approval of the divided balance"):

1. **To reorganize JSC "Kuzbassenergo" by means of segregation:**

- JSC "Kuzbass regional electricity supplying company";
- JSC "Kuzbass energy distributing company";
- JSC "Main power lines of Kuzbassenergo".

2. **To establish the following procedure and terms of segregation:**

2.1. Stock floatation of the created companies is carried out in the procedure and on terms established in article 4 of the given resolution.

2.2. Part of property, rights and obligations of the Company is transferred to the segregated companies in accordance with the divided balance.

2.3. The procedure of preparation for and holding general meetings of shareholders of the companies created as well as the voting procedure on issues of the agenda of specified meetings of shareholders is determined by the given resolution (article 3) and the Statute of JSC "Kuzbassenergo".

2.4. Within 3 days after the decision on reorganization of the Company by means of segregation is taken by the General meeting of shareholders, the General director of the Company notifies the taxation authority about the decision taken

2.5. Not later than 30 days of the date of the decision-making on the issue of reorganization in the form of segregation the general director notifies the creditors of the Company on making the decision through sending in the announcement via registered letter and publishes the announcement on reorganization of the Company in print assigned for publishing information on state registration of legal entities.

2.6. Within 30 days of the date of publishing of the announcement on the decision made or within 30 days of the date the announcement was send to them creditors of the Company have a right to demand termination or advance execution of the corresponding liabilities of

the Company and repayment of damages. Based on the demands received from the creditors the Company draws up the register of demands both satisfied and being subject to satisfaction.

2.7. General Director notifies employees of JSC "Kuzbassenergo" of taking the decision on reorganization of JSC "Kuzbassenergo" and carries out a complex of activities connected with formalizing labor relations in accordance with the Labor code of the Russian Federation.

2.8. In accordance with article 1 of clause 75 of Federal Law "On joint stock companies" shareholders of the Company who voted against the decision to reorganize the Company or who did not participate in voting on the given issue have a right to demand full or partial redemption of shares held by them from the Company in the procedure prescribed by Board of Directors of the Company in accordance with the requirements of the legislation of the Russian Federation in the announcement on holding an extraordinary general meeting of shareholders of the Company.

Redemption of shares is carried out in accordance with the price prescribed by the Board of Directors of the Company in accordance with article 3 of clause 75 of Federal Law "On joint stock companies".

Bought out shares are paid off at the moment of redemption and the shares of the created Companies are not subject to allocation among them.

2.9. The report on overall results of redemption of shares of the Company is approved by the Board of Directors of the Company within 5 days of the date of paying off the bought out shares.

As a result of paying off bought off shares the authorized capital stock of JSC "Kuzbassenergo" is diminished to the amount of nominal value of the shares paid off.

3. To establish the following legal entities:

- JSC "Kuzbass regional electricity supplying company";
- JSC "Kuzbass energy distributing company";
- JSC "Main power lines of Kuzbassenergo".

3.1. To determine that the quantitative composition of the board of directors of each of the created companies equals 11 persons.

To determine that the quantitative composition of the revision committee of each of the created companies equals 5 persons.

3.2. To determine that shareholders (share holder) of JSC "Kuzbassenergo" being in the aggregate holders of 2 or more per cent of ordinary shares of JSC "Kuzbassenergo" have a right to forward to the address of the Company suggestions on nomination of candidatures for election of members of the board of directors of each of the created companies (up to 11 candidatures for each of the created companies) and members of the revision committee of each of the created companies (up to 5 candidatures for each of the created companies), as well as candidatures for the positions of general directors of each of the created companies (not more than 1 candidature for each of the created companies). Such suggestions must be received by the company not later than March 15, 2006.

Only candidatures who were nominated in accordance with the prescribed requirements and suggestions on whom were received within the deadline prescribed by the present resolution, by the shareholders (shareholder) being in the aggregate holders of 2 or more per cent of ordinary shares of JSC "Kuzbassenergo"at the moment of nomination are subject to inscription in voting papers for the general meetings of shareholders.

The mentioned nominations are to be inscribed in written form with indication of the name (title) of the nominating shareholders (shareholder) and the number of ordinary shares of JSC "Kuzbassenergo" owned by them (him/her).

In case the indicated suggestions on nomination are signed by a representative of the

shareholder they should be accompanied by power of attorney (copy of power of attorney attested in prescribed order), arranged in accordance with the requirements for drawing up of a power of attorney for voting of the Federal Law "On joint stock companies".

In case the indicated suggestions on nomination are signed by a shareholder (shareholders) whose share rights are taken account of in accordance with the deposit account in depositary, such suggestion should be accompanied by the abstract of deposit record of the shareholder in depositary carrying out the registration of rights of the mentioned shares.

The suggestion on nomination of the indicated candidates must contain:

- name of the created company, in the bodies of which the candidates are nominated;
- last name, first name, patronymic and the principal place of business of each of the nominated candidates;
- name of the body for which the candidate is nominated.

The Board of Directors of the company must review the suggestions received and take the decision on inclusion or on the refusal to include the nominated candidatures in the list of candidates for the election in the bodies of the created company by March 20, 2006.

The nominated candidates are subject to inclusion in voting papers for the election in the corresponding body of the created companies with the exception of the following cases:

- when the nomination does not correspond to the requirements prescribed by the present article;
- when the nomination of shareholders (shareholder) is received by the Company later than March 15, 2006;
- when the shareholders (shareholder) do not in the aggregate own the necessary amount of shares of JSC "Kuzbassenergo".

Reasoned decision of the Board of Directors of the Company on refusal to include the nominated candidates in the list of candidatures for voting in the elections for the specific body of the created companies is forwarded not later then March 23, 2006 to shareholders (shareholder) who nominated the candidate.

3.3. At general meetings of shareholders of the created companies the functions of the counting commission are executed by the registrar of the Company – Joint Stock Company "Central Moscow Depositary".

3.4. It must be determined that at voting during general meetings of shareholders of the created companies on issues of approval of the Statute of the created company, of election of members of the revision commission or of election of general director, each ordinary share of the created company subject for floatation gives the shareholder of the created company being the holder of ordinary shares one vote.

The decision on issues of approval of the Statute of the created company, on election of the general director and members of the revision commission is taken by the general meeting of shareholders with the majority of votes of shareholders of the created company – holders of ordinary shares participating in the general meeting of shareholders of the created company.

3.5. It must be determined that elections of members of the board of directors of the created companies is carried out by cumulative voting. At cumulative voting the number of votes of every shareholder of the created company – holder of ordinary shares is multiplied by the number of persons to be elected in the board of directors of the company in accordance with article 3.1. of the present resolution and the shareholder of the created company owning ordinary shares has a right to give all of his/her votes for one candidate or to distribute them among two or more candidates.

The 11 candidates collecting the largest number of votes are considered elected for the board of directors of the created company.

3.6. General meetings of shareholders of the created companies are authorized (muster a quorum) on condition that shareholders of the created companies possessing in the

aggregate more than half of votes subject to floatation of ordinary shares of the corresponding created company, participated in the elections.

Shareholders of created companies registered for participation in the general meeting and shareholders whose voting papers were received by the Company not later than two days before the date of the general meeting of shareholders of the created company are considered to have taken part in the general meeting of shareholders.

3.7. At taking the decisions on issues connected with holding general meetings of shareholders of the created companies that are not regulated by the present resolution standard acts of the Russian Federation regulating similar relations (by analogy) are used.

4. To establish the following procedure of distribution of shares of the newly established companies:

4.1. Shares of the newly established companies are distributed among the shareholders of JSC "Kuzbassenergo" including the shareholders who voted against or not having participated in voting on the issue of reorganization of the Company, proportionally to the number of shares of the Company owned by them.

4.2. To establish the following coefficients of distribution of ordinary shares of each of the newly established companies and their nominal value:

counting on every ordinary share of JSC "Kuzbassenergo" the following are simultaneously subject to distribution:

1 (one) ordinary share of JSC "Kuzbass regional electricity supplying company", with nominal value of 2, 9 RUR,

1 (one) ordinary share of JSC "Kuzbass energy distributing company" with nominal value of 0,05 RUR,

1 (one) ordinary share of JSC "Main power lines of Kuzbassenergo" with nominal value of 1 RUR,

4.3. The total number of share of each of the newly established companies of the corresponding category (type) subject for floatation equals the number of shares of JSC "Kuzbassenergo" of the corresponding category (type) at the moment of taking the decision on reorganization (minus the shares being the property of or being at the disposal of JSC "Kuzbassenergo").

4.4. The number of share of each of the newly created companies of specific category (type) to be obtained by each shareholder of JSC "Kuzbassenergo" equals the number of shares of JSC "Kuzbassenergo" of specific category (type) owned by him/her.

4.5. The amont of authorized capital stock of each of the newly established companies is determined through multiplication of the total number of shares of the specific company subject for floatation by the nominal value of one share.

4.6. Authorized capital stocks of the newly established companies are formed at the expense of the funds of additional capital.

4.7. In accordance with paragraph 3 article 3 clause 19 of Federal Law "On joint stock companies" shares of the newly established companies of corresponding category (type) are subject to distribution among the shareholders of the company who voted against taking the decision on reorganization of the Company or did not participate in voting on this issue, in the number equal to the number of owned shares of the corresponding category (type) of the Company.

4.8. Ordinary shares or the newly established companies will grant their owners the following rights:

1. to participate in the General meeting of shareholders of the company personally or through representation with the right to vote on all the issues under the competence;
2. to put forward suggestions into the agenda of the general meeting of shareholders in the procedure prescribed by the legislation of the Russian Federation and the Statutes

of the company;

3. to obtain information on activities carried out by the company and to review the documentation of the Company in accordance with article 91 of the Federal Law "On joint stock companies", as well as other standard acts and the Statute of the company;
4. to collect dividends announced by the company;
5. of preferred purchase of excess shares floated through open subscription and emissive securities convertible into shares, in the number proportional to the number of shares of this category (type) owned by them;
6. in case of liquidation of the company to receive part of its property;
7. to realize other rights prescribed by the legislation of the Russian Federation and the Statute of the company.

4.9. The shares of the Company, property right for which has passed on to new owners after taking the decision on reorganization of the Company and before the moment of state registration of the newly established companies, give their owners the same scope of rights as of the shareholders who voted for taking the decision on reorganization of the Company.

4.10. The shares of the companies that were not distributed among the shareholders of the Company are declared as being purchased by JSC "Kuzbassenergo".

4.11. The shares of the newly established companies at the moment of state registration of the companies established as the result of reorganization on the basis or the data contained in the register of shareholders of JSC "Kuzbassenergo" at the corresponding date are considered floated (distributed among the shareholders of JSC "Kuzbassenergo", purchased by JSC "Kuzbassenergo").

5. **To approve the divided balance (Appendix 3 to the Minutes).**

2. Over the question: "On determination of price for buying out shares of the Company from the shareholders who voted against taking the decision on reorganization of the Company or did not participate in voting on this question".

Decided:

To determine (with consideration of the opinion of an independent appraiser) the following price for buying out shares from the shareholders of JSC "Kuzbassenergo" who voted against taking the decision on reorganization or did not participate in voting on this question:

- one ordinary share – 17, 57 (Seventeen point fifty seven) Russian roubles

3. Over the question: "On making alterations and addenda to the resolution of the Board of Directors of the Company of 14.11.2005 on the issue "On convocation of the extraordinary general meeting of shareholders of the Company"

Decided:

To set the resolution of the Board of Directors of the Company of November 14, 2005 (minutes of the meeting of the Board of Directors of JSC "Kuzbassenergo" № 7/11 of 14.11.2005) on the issue № 3 "On convocation of the extraordinary meeting of shareholders of JSC "Kuzbassenergo" in the following redaction:

"1. To convoke the extraordinary meeting of shareholders of JSC "Kuzbassenergo" in form of the absentee voting.

To set the deadline of December 30, 2005 for receiving filled in voting papers.

To determine postal address to which the filled in voting papers must be forwarded: 105082, Russia, Moscow, Bolshaya Pochtovaya, 34, building 8, JSC "Central Moscow Depositary".

1. To approve the agenda of the extraordinary general meeting of shareholders:

– On reorganization of JSC "Kuzbassenergo" in form of segregation, on procedure and terms of segregation, on establishment of new companies (including JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" and JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)"), on stock floatation of the established companies and on the procedure of floatation, on approval of divided balance";

- On reorganization of JSC "Kuzbassenergo" in form of segregation, on procedure and terms of segregation, on establishment of new companies (including JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" and JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)"), on distribution of shares of the established companies and on the procedure of distribution, on approval of divided balance";

2.7

Extract from the minutes # 8/11
of the meeting of the Board of Directors
of Kuzbass joint stock company for energy and electrification
(JSC "Kuzbassenergo")
by means of questioning

Kemerovo November 28, 2005

The questionnaire was distributed among the members of the Board of Directors of the Company.
8 out of 11 members of the Board participated in the questioning:

Bolshakov A.N., Vagner A.A., Grekhov A.N., Eliseeva I.E., Kozhura R.V., Mazikin V.P., Shumilov A.A., Shulin M.I.

RECEIVED
2005 NOV 21
OFFICE OF INTERNATIONAL
CORPORATE FINANCE

Quorum for decision-making is secured.

Third issue:

On approval of suggestions of the Board of Directors on reorganization of the Company.
Two draft resolutions of the Board of Directors of JSC "Kuzbassenergo" were put to the vote (draft resolution #1 and draft resolution #2).

Draft resolution #1 suggested by deputy Chairman of the Board of Directors Shumilov A.A. (representative of JSC "SUEK"):

Recommend the general meeting of shareholders to take on the two decisions as follows:

Draft resolution A (as of the issue of the agenda of the General meeting of shareholders *"On reorganization of JSC "Kuzbassenergo" in the form of segregation, on procedure and terms of segregation, on establishment of new companies (including JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" and JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)"), on stock floatation of the created companies and on the procedure of floatation, on approval of divided balance,"*):

1. **To reorganize JSC "Kuzbassenergo" by means of segregation:**
- JSC "Kuzbassenergo – regional electricity supplying company";
- JSC "Kuzbass energy distributing company";
- JSC "Main power lines of Kuzbassenergo";
- JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)";
- JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)".

2. **To establish the following procedure and terms of segregation:**

2.1. Stock floatation of the created companies is carried out in the procedure and on terms prescribed by article 4 of the present resolution.

2.2. Part of property, rights and obligations of the Company are transferred to the segregated companies in accordance with the divided balance.

2.3. The procedure of preparation for and holding general meetings of shareholders of the companies created as well as the voting procedure on issues of the agenda of specified meetings of shareholders is stipulated by the given resolution (article 3) and the Statute of JSC "Kuzbassenergo".

2.4. Within 3 days after the decision on reorganization of the Company by means of segregation is taken by the General meeting of shareholders, the General director of the Company notifies the taxation authority about the decision taken.

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

2.5. Not later than 30 days of the date of the decision-making on the issue of reorganization in the form of segregation the general director notifies the creditors of the Company on making the decision through sending in the announcement via registered letter and publishes the announcement on reorganization of the Company in print assigned for publishing information on state registration of legal entities.

2.6. Within 30 days of the date of publishing of the announcement on the decision made or within 30 days of the date the announcement was send to them creditors of the Company have a right to demand termination or advance execution of the corresponding liabilities of the Company and repayment of damages. Based on the demands received from the creditors the Company draws up the register of demands both satisfied and being subject to satisfaction.

2.7. General director notifies employees of JSC "Kuzbassenergo" of taking the decision on reorganization of JSC "Kuzbassenergo" and carries out a complex of activities connected with formalizing labor relations in accordance with the Labor Code of the Russian Federation.

2.8. In accordance with article 1 of clause 75 of Federal Law "On joint stock companies" shareholders of the Company who voted against the decision to reorganize the Company or who did not participate in voting on the given issue have a right to demand full or partial redemption of shares held by them from the Company in the procedure prescribed by Board of Directors of the Company in accordance with the requirements of the legislation of the Russian Federation in the announcement on holding an extraordinary general meeting of shareholders of the Company.

Redemption of shares is carried out in accordance with the price stipulated by the Board of Directors of the Company in accordance with article 3 of clause 75 of Federal Law "On joint stock companies".

Bought out shares are paid off at the moment of redemption and the shares of the created companies are not subject to allocation among them.

2.9. The report on overall results of redemption of shares of the Company is approved by the Board of Directors of the Company within 5 days of the date of paying off the bought out shares.

As a result of paying off bought off shares the authorized capital stock of JSC "Kuzbassenergo" is diminished to the amount of nominal value of the shares paid off.

3. To establish the following legal entities:

- JSC "Kuzbassenergo – regional electricity supplying company";
- JSC "Kuzbass energy distributing company";
- JSC "Main power lines of Kuzbassenergo";
- JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)";
- JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)".

3.1. To determine that the quantitative composition of the board of directors of each of the created companies equals 11 persons.

To determine that the quantitative composition of the revision committee of each of the created companies equals 5 persons.

3.2. To determine that shareholders (shareholder) of JSC "Kuzbassenergo" being in the aggregate holders of 2 or more per cent of common shares of JSC "Kuzbassenergo" have a right to forward to the address of the Company suggestions on nomination of candidatures for election of members of the board of directors of each of the created companies (up to 11 candidatures for each of the created companies) and members of the revision committee of each of the created companies (up to 5 candidatures for each of the created companies), as well as candidatures for the positions of general directors of each of the created companies (not more than 1 candidature for each of the created

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

companies). Such suggestions must be received by the company not later than March 15, 2006.

Only candidatures who were nominated in accordance with the prescribed requirements and suggestions on whom were received within the deadline prescribed by the present resolution, by the shareholders (shareholder) being in the aggregate holders of 2 or more per cent of common shares of JSC "Kuzbassenergo"at the moment of nomination are subject to inscription in voting papers for the general meetings of shareholders.

The mentioned nominations are to be inscribed in written form with indication of the name (title) of the nominating shareholders (shareholder) and the number of common shares of JSC "Kuzbassenergo" owned by them (him/her).

In case the indicated suggestions on nomination are signed by a representative of the shareholder they should be accompanied by power of attorney (copy of power of attorney attested in prescribed order), arranged in accordance with the requirements for drawing up of a power of attorney for voting of the Federal Law "On joint stock companies".

In case the indicated suggestions on nomination are signed by a shareholder (shareholders) whose share rights are taken account of in accordance with the deposit account in depositary, such suggestion should be accompanied by the extract of deposit record of the shareholder in depositary carrying out the registration of rights of the mentioned shares.

The suggestion on nomination of the indicated candidates must contain:

- name of the created company, in the bodies of which the candidates are nominated;
- last name, first name, patronymic and the principal place of business of each of the nominated candidates;
- name of the body for which the candidate is nominated.

The Board of Directors of the company must review the suggestions received and take the decision on inclusion or on the refusal to include the nominated candidatures in the list of candidates for the election in the bodies of the created company by March 20, 2006.

The nominated candidates are subject to inclusion in voting papers for the election in the corresponding body of the created companies with the exception of the following cases:

- when the nomination does not correspond to the requirements prescribed by the present article;
- when the nomination of shareholders (shareholder) is received by the Company later than March 15, 2006;
- when the shareholders (shareholder) do not in the aggregate own the necessary amount of shares of JSC "Kuzbassenergo".

Reasoned decision of the Board of Directors of the Company on refusal to include the nominated candidates in the list of candidatures for voting in the elections for the specific body of the created companies is forwarded not later then March 23, 2006 to shareholders (shareholder) who nominated the candidate.

3.3. At general meetings of shareholders of the created companies the functions of the counting commission are executed by the registrar of the Company – Joint Stock Company "Central Moscow Depositary".

3.4. It must be determined that at voting during general meetings of shareholders of the created companies on issues of approval of the Statute of the created company, of election of members of the revision commission or of election of general director, each common share of the created company subject for floatation gives the shareholder of the created company being the holder of common shares one vote.

The decision on issues of approval of the Statute of the created company, on election of the general director and members of the revision commission is taken by the general meeting of shareholders with the majority of votes of shareholders of the created company – holders of common shares participating in the general meeting of shareholders of the created company.

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

3.5. It must be determined that elections of members of the board of directors of the created companies is carried out by cumulative voting. At cumulative voting the number of votes of every shareholder of the created company – holder of common shares is multiplied by the number of persons to be elected in the board of directors of the company in accordance with article 3.1. of the present resolution and the shareholder of the created company owning common shares has a right to give all of his/her votes for one candidate or to distribute them among two or morre candidates.
The 11 candidates colelcting the largest number of votes are considered elected for the board of directors of the created company.

3.6. General meetings of shareholders of the created companies are authorized (muster a quorum) on condition that shareholders of the created companies possessing in the aggregate more than half of votes subject to floatation of common shares of the corresponding created company, participated in the elections.
Shareholders of created companies registered for participation in the general meeting and shareholders whose voting papers were received by the Company not later than two days before the date of the general meeting of shareholders of the created company are considered to have taken part in the general meeting of shareholders.

3.7. At decision-making on issues connected with holding general meetings of shareholders of the created companies which are not stipulated by the present resolution, standard acts of the Russian Federation regulating similar relations (by analogy) are to be used.

4. To establish the following procedure of floatation of shares of the created companies:

4.1. Shares of the newly established JSC "Kuzbassenergo - regional electricity supplying company", JSC "Kuzbass energy distributing company", JSC "Main power lines of Kuzbassenergo", JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)", JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" are distributed among the shareholders of JSC "Kuzbassenergo" including the shareholders who voted against or not having participated in voting on the issue of reorganization of the Company, proportionally to the number of shares of the Company owned by them.
To establish the following coefficients of distribution of common shares of JSC "Kuzbassenergo – regional electricity supplying company", JSC "Kuzbass energy distributing company", JSC "Main power lines of Kuzbassenergo", and their nominal value:
counting for every common share of JSC "Kuzbassenergo" the following are simultaneously subject to distribution:
1 (one) common share of JSC "Kuzbassenergo – regional electricity supplying company", with nominal value of 2, 9 RUR,
1 (one) common share of JSC "Kuzbass energy distributing company" with nominal value of 0,05 RUR,
1 (one) common share of JSC "Main power lines of Kuzbassenergo" with nominal value of 1 RUR,

4.2. The number of shares of JSC "Kuzbassenergo – regional electricity supplying company", JSC "Kuzbass energy distributing company", JSC "Main power lines of Kuzbassenergo" of the soecific category (type) which every shareholder of JSC "Kuzbassenergo" is to receive is equal to the number of shares of "Kuzbassenergo" of the corresponding category (type) owned by him/her.

4.3. Shares of the newly established JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" are floated in the following way:

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

- JSC "Kuzbassenergo" purchases 303 081 901 common shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)", 303 081 091 common shares of JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" and also purchases the shares of the newly estavlished companies in accordane with the procedure prescribed by article 4.11 of the present resolution;
- other common shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" subject to floatation are distributed among the shareholders of JSC "Kuzbassenergo" in accordance with articles 4.4., 4.5., 4.8. of the present resolution.

Nominal value of 1 (one) common share of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" – 1, 5 RUR.

Nominal value of 1 (one) common share of JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)"- 0, 9 RUR.

4.4. Every shareholder who participated in voting on the issue of reorganization of JSC "Kuzbassenergo" and didn't vote against taking the decision on reorganization is to receive shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" in the number calculated in the following way:

$$X = \frac{A}{B-C} \times D$$

Where :

X – the number of shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)", JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" to be received by the shareholder who participated in voting on the issue of reorganization of JSC "Kuzbassenergo" and didn't vote against taking the decision on reorganization;

A – the number of shares of JSC "Kuzbassenergo" owned by the shareholder at the date of state registration of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" accordingly;

B – total amount of shares of JSC "Kuzbassenergo" at the date of state registration of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" (with the deduction of the shares being the property of or being at the disposal of JSC "Kuzbassenergo");

C – total number of shares of JSC "Kuzbassenergo" owned by the shareholders who voted against taking the decision on reorganization or did not participate in voting on this issue, at the date of state registration of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" accordingly;

D – total amount of shares of the newly established company (JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)"or JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" subject to distribution among the shareholders of JSC "Kuzbassenergo" (resulted at calculation in accordance with the regulations of paragraph 1 of article 4.5. of the present resolution, minus total number of shares or the corresponding newly established company subject to purchase by JSC "Kuzbassenergo" and distribution among the shareholders of the Company who voted against taking the decision on reorganization or didn't take part in voting on this issue).

In case at calculating the number of shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

Kuzbass hydroelectric power station)" that is to be received by the shareholders of JSC "Kuzbassenergo" at the result of distribution, the number of shares of any shareholder turns out to be fractional the fraction is not taken into consideration.

In case in the result of rounding-up a shareholder does not obtain any share of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" or JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)", such shareholder receives one share of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and one share of JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)".

4.5. The total number of shares of each of the newly established companies subject to floatation equals the number of shares of JSC "Kuzbassenergo" at the moment of taking the decision on reorganization (minus the number of shares beign the property or being at the disposal of JSC "Kuzbassenergo").

At that the total number of shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)"subject to floatation may be increased in case the sum of shares of the indicated companies subject to floatation, calculated in accordance with articles 4.3., 4.4. turns out to be larger than the number of shares subject to floatation in acordance with paragraph 1 of the present resolution.

4.6. The amont of the authorized capital stock of each of the newly established companies is determined through multiplication of the total number of shares of the specific company subject for floatation by the nominal value of one share.

4.7. The authorized capital stock of the newly established companies are formed at the expense of the funds of additional capital.

4.8. In accordance with paragraph 3 article 3 clause 19 of Federal Law "On joint stock companies" shares of each of the newly established companies in the number equal to the number of shares of the Company owned are subject to distribution among the shareholders of the company who voted against taking the decision on reorganization of the Company or did not participate in voting on this issue.

4.9. Common shares or the newly established companies will grant their owners the following rights:

1. to participate in the General meeting of shareholders of the company personally or through representation with the right to vote on all the issues under the competence;
2. to put forward suggestions into the agenda of the general meeting of shareholders in the procedure prescribed by the legislation of the Russian Federation and the Statutes of the company;
3. to obtain information on activities carried out by the company and to review the documentation of the Company in accordance with article 91 of the Federal Law "On joint stock companies", as well as other standard acts and the Statute of the company;
4. to collect dividends announced by the company;
5. of preferred purchase of excess shares floated through open subscription and emissive securities convertible into shares, in the number proportional to the number of shares of this category (type) owned by them;
6. in case of liquidation of the company to receive part of its property;
7. to realize other rights prescribed by the legislation of the Russian Federation and the Statute of the company.

4.10. The shares of the Company, property right for which has passed on to new owners after taking the decision on reorganization of the Company and before the moment of state registration of the newly established companies, give their owners the same scope of rights as of the shareholders who voted for taking the decision on reorganization of the Company.

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

4.11. The shares of the companies that were not distributed among the shareholders of the Company are declared as being purchased by JSC "Kuzbassenergo".

4.12. The shares of the newly established companies at the moment of state registration of the companies established as the result of reorganization on the basis or the data contained in the register of shareholders of JSC "Kuzbassenergo" at the corresponding date are considered floated (distributed among the shareholders of JSC "Kuzbassenergo", purchased by JSC "Kuzbassenergo").

5. To approve the deviding balance (Appendix 2 to the Minutes).

Draft resolution B (as of the issue of the agenda of the General meeting of shareholders *"On reorganization of JSC "Kuzbassenergo" in the form of segregation, on procedure and terms of segregation, on establishment of new companies (without the establishment of JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" and JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)"), on stock floatation of the created companies and on the procedure of floatation, on approval of the divided balance"*):

1. To reorganize JSC "Kuzbassenergo" by means of segregation:

- JSC "Kuzbass regional electricity supplying company";
- JSC "Kuzbass energy distributing company";
- JSC "Main power lines of Kuzbassenergo".

2. To establish the following procedure and terms of segregation:

2.1. Stock floatation of the created companies is carried out in the procedure and on terms established in article 4 of the given resolution.

2.2. Part of property, rights and obligations of the Company is transferred to the segregated companies in accordance with the divided balance.

2.3. The procedure of preparation for and holding general meetings of shareholders of the companies created as well as the voting procedure on issues of the agenda of specified meetings of shareholders is determined by the given resolution (article 3) and the Statute of JSC "Kuzbassenergo".

2.4. Within 3 days after the decision on reorganization of the Company by means of segregation is taken by the General meeting of shareholders, the General director of the Company notifies the taxation authority about the decision taken

2.5. Not later than 30 days of the date of the decision-making on the issue of reorganization in the form of segregation the general director notifies the creditors of the Company on making the decision through sending in the announcement via registered letter and publishes the announcement on reorganization of the Company in print assigned for publishing information on state registration of legal entities.

2.6. Within 30 days of the date of publishing of the announcement on the decision made or within 30 days of the date the announcement was send to them creditors of the Company have a right to demand termination or advance execution of the corresponding liabilities of the Company and repayment of damages. Based on the demands received from the creditors the Company draws up the register of demands both satisfied and being subject to satisfaction.

2.7. General director notifies employees of JSC "Kuzbassenergo" of taking the decision on reorganization of JSC "Kuzbassenergo" and carries out a complex of activities connected with formalizing labor relations in accordance with the Labor code of the Russian Federation.

2.8. In accordance with article 1 of clause 75 of Federal Law "On joint stock companies" shareholders of the Company who voted against the decision to reorganize the Company or who did not participate in voting on the given issue have a right to demand full or partial redemption of shares held by them from the Company in the procedure prescribed by Board of Directors of the Company in accordance with the requirements of the

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

legislation of the Russian Federation in the announcement on holding an extraordinary general meeting of shareholders of the Company.

Redemption of shares is carried out in accordance with the price prescribed by the Board of Directors of the Company in accordance with article 3 of clause 75 of Federal Law "On joint stock companies".

Bought out shares are paid off at the moment of redemption and the shares of the created companies are not subject to allocation among them.

2.9. The report on overall results of redemption of shares of the Company is approved by the Board of Directors of the Company within 5 days of the date of paying off the bought out shares.

As a result of paying off bought off shares the authorized capital stock of JSC "Kuzbassenergo" is diminished to the amount of nominal value of the shares paid off.

3. To establish the following legal entities:

- JSC "Kuzbass regional electricity supplying company";
- JSC "Kuzbass energy distributing company";
- JSC "Main power lines of Kuzbassenergo".

3.1. To determine that the quantitative composition of the board of directors of each of the created companies equals 11 persons.

To determine that the quantitative composition of the revision committee of each of the created companies equals 5 persons.

3.2. To determine that shareholders (share holder) of JSC "Kuzbassenergo" being in the aggregate holders of 2 or more per cent of common shares of JSC "Kuzbassenergo" have a right to forward to the address of the Company suggestions on nomination of candidatures for election of members of the board of directors of each of the created companies (up to 11 candidatures for each of the created companies) and members of the revision committee of each of the created companies (up to 5 candidatures for each of the created companies), as well as candidatures for the positions of general directors of each of the created companies (not more than 1 candidature for each of the created companies). Such suggestions must be received by the company not later than March 15, 2006.

Only candidatures who were nominated in accordance with the prescribed requirements and suggestions on whom were received within the deadline prescribed by the present resolution, by the shareholders (shareholder) being in the aggregate holders of 2 or more per cent of common shares of JSC "Kuzbassenergo"at the moment of nomination are subject to inscription in voting papers for the general meetings of shareholders.

The mentioned nominations are to be inscribed in written form with indication of the name (title) of the nominating shareholders (shareholder) and the number of common shares of JSC "Kuzbassenergo" owned by them (him/her).

In case the indicated suggestions on nomination are signed by a representative of the shareholder they should be accompanied by power of attorney (copy of power of attorney attested in prescribed order), arranged in accordance with the requirements for drawing up of a power of attorney for voting of the Federal Law "On joint stock companies".

In case the indicated suggestions on nomination are signed by a shareholder (shareholders) whose share rights are taken account of in accordance with the deposit account in depositary, such suggestion should be accompanied by the abstract of deposit record of the shareholder in depositary carrying out the registration of rights of the mentioned shares.

The suggestion on nomination of the indicated candidates must contain:

- name of the created company, in the bodies of which the candidates are nominated;
- last name, first name, patronymic and the principal place of business of each of the nominated candidates;

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

- name of the body for which the candidate is nominated.

The Board of Directors of the company must review the suggestions received and take the decision on inclusion or on the refusal to include the nominated candidatures in the list of candidates for the election in the bodies of the created company by March 20, 2006.

The nominated candidates are subject to inclusion in voting papers for the election in the corresponding body of the created companies with the exception of the following cases:

- when the nomination does not correspond to the requirements prescribed by the present article;
- when the nomination of shareholders (shareholder) is received by the Company later than March 15, 2006;
- when the shareholders (shareholder) do not in the aggregate own the necessary amount of shares of JSC "Kuzbassenergo".

Reasoned decision of the Board of Directors of the Company on refusal to include the nominated candidates in the list of candidatures for voting in the elections for the specific body of the created companies is forwarded not later then March 23, 2006 to shareholders (shareholder) who nominated the candidate.

3.3. At general meetings of shareholders of the created companies the functions of the counting commission are executed by the registrar of the Company – Joint Stock Company "Central Moscow Depositary".

3.4. It must be determined that at voting during general meetings of shareholders of the created companies on issues of approval of the Statute of the created company, of election of members of the revision commission or of election of general director, each common share of the created company subject for floatation gives the shareholder of the created company being the holder of common shares one vote.

The decision on issues of approval of the Statute of the created company, on election of the general director and members of the revision commission is taken by the general meeting of shareholders with the majority of votes of shareholders of the created company – holders of common shares participating in the general meeting of shareholders of the created company.

3.5. It must be determined that elections of members of the board of directors of the created companies is carried out by cumulative voting. At cumulative voting the number of votes of every shareholder of the created company – holder of common shares is multiplied by the number of persons to be elected in the board of directors of the company in accordance with article 3.1. of the present resolution and the shareholder of the created company owning common shares has a right to give all of his/her votes for one candidate or to distribute them among two or morre candidates.

The 11 candidates colelcting the largest number of votes are considered elected for the board of directors of the created company.

3.6. General meetings of shareholders of the created companies are authorized (muster a quorum) on condition that shareholders of the created companies possessing in the aggregate more than half of votes subject to floatation of common shares of the corresponding created company, participated in the elections.

Shareholders of created companies registered for participation in the general meeting and shareholders whose voting papers were received by the Company not later than two days before the date of the general meeting of shareholders of the created company are considered to have taken part in the general meeting of shareholders.

3.7. At taking the decisions on issues connected with holding general meetings of shareholders of the created companies that are not regulated by the present resolution standard acts of the Russian Federation regulating similar relations (by analogy) are used.

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

4. **To establish the following procedure of distribution of shares of the newly established companies:**

4.1. Shares of the newly established companies are distributed among the shareholders of JSC "Kuzbassenergo" including the shareholders who voted against or not having participated in voting on the issue of reorganization of the Company, proportionally to the number of shares of the Company owned by them.

4.2.To establish the following coefficients of distribution of common shares of each of the newly established cmpanies and their nominal value:

counting on every common share of JSC "Kuzbassenergo" the following are simultaneously subject to distribution:

1 (one) common share of JSC "Kuzbass regional electricity supplying company", with nominal value of 2, 9 RUR,

1 (one) common share of JSC "Kuzbass energy distributing company" with nominal value of 0,05 RUR,

1 (one) common share of JSC "Main power lines of Kuzbassenergo" with nominal value of 1 RUR,

4.3. The total number of share of each of the newly established companies of the corresponding category (type) subject for floatation equals the number of shares of JSC "Kuzbassenegro" of the corresponding category (type) at the moment of taking the decision on reorganization (minus the shares being the property of or being at the disposal of JSC "Kuzbassenergo").

4.4. The number of share of each of the newly created companies of specific category (type) to be obtained by each shareholder of JSC "Kuzbassenergo" equals the number of shares of JSC "Kuzbassenergo" of specific category (type) owned by him/her.

4.5.The amont of authorized capital stock of each of the newly established companies is determined through multiplication of the total number of shares of the specific company subject for floatation by the nominal value of one share.

4.6.Authorized capital stocks of the newly established companies are formed at the expense of the funds of additional capital.

4.7. In accordance with paragraph 3 article 3 clause 19 of Federal Law "On joint stock companies" shares of the newly established companies of corresponding category (type) are subject to distribution among the shareholders of the company who voted against taking the decision on reorganization of the Company or did not participate in voting on this issue, in the number equal to the number of owned shares of the corresponding category (type) of the Company.

4.8.Common shares or the newly established companies will grant their owners the following rights:

1. to participate in the General meeting of shareholders of the company personally or through representation with the right to vote on all the issues under the competence;
2. to put forward suggestions into the agenda of the general meeting of shareholders in the procedure prescribed by the legislation of the Russian Federation and the Statutes of the company;
3. to obtain information on activities carried out by the company and to review the documentation of the Company in accordance with article 91 of the Federal Law "On joint stock companies", as well as other standard acts and the Statute of the company;
4. to collect dividends announced by the company;
5. of preferred purchase of excess shares floated through open subscription and emissive securities convertible into shares, in the number proportional to the number of shares of this category (type) owned by them;
6. in case of liquidation of the company to receive part of its property;

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

7. to realize other rights prescribed by the legislation of the Russian Federation and the Statute of the company.

4.9. The shares of the Company, property right for which has passed on to new owners after taking the decision on reorganization of the Company and before the moment of state registration of the newly established companies, give their owners the same scope of rights as of the shareholders who voted for taking the decision on reorganization of the Company.

4.10. The shares of the companies that were not distributed among the shareholders of the Company are declared as being purchased by JSC "Kuzbassenergo".

4.11. The shares of the newly established companies at the moment of state registration of the companies established as the result of reorganization on the basis or the data contained in the register of shareholders of JSC "Kuzbassenergo" at the corresponding date are considered floated (distributed among the shareholders of JSC "Kuzbassenergo", purchased by JSC "Kuzbassenergo").

5. To approve the devided balance (Appendix 3 to the Minutes).

Voting: "for" – 6 (Bolshakov A.N., Eliseeva I.E., Kuzhura R.V., Mazikin V.P., Shumilov A.A., Shulin M.I.), **"against" – 0, "abstentions" – 2** (Vagner A.A., Grekhov A.N.).

Decision taken.

Draft resolution #2 suggested by Chairman of the Board of Directors Vagner A.A. (representative of JSC RAO "UES of Russia"):

Recommend the general meeting of shareholders to take on the following decision:

1. To reorganize JSC "Kuzbassenergo" by means of segregation of:
- JSC "Kuzbass regional electricity supplying company";
- JSC "Kuzbass energy distributing company";
- JSC "Main power lines of Kuzbassenergo".

2. To establish the following procedure and terms of segregation:

2.1. Stock floatation of the newly established companies is carried out in the procedure and on terms established in article 4 of the given resolution.

2.2. Part of property, rights and obligations of the Company is transferred to the segregated companies in accordance with the divided balance.

2.3. The procedure of preparation for and holding general meetings of shareholders of the companies created as well as the voting procedure on issues of the agenda of specified meetings of shareholders is determined by the given resolution (article 3) and the Statute of JSC "Kuzbassenergo".

2.4. Within 3 days after the decision on reorganization of the Company by means of segregation is taken by the General meeting of shareholders, the General director of the Company notifies the taxation authority about the decision taken.

2.5. Not later than 30 days of the date of the decision-making on the issue of reorganization in the form of segregation the general director notifies the creditors of the Company on making the decision through sending in the announcement via registered letter and publishes the announcement on reorganization of the Company in print assigned for publishing information on state registration of legal entities.

2.6. Within 30 days of the date of publishing of the announcement on the decision made or within 30 days of the date the announcement was send to them creditors of the Company have a right to demand termination or advance execution of the corresponding liabilities of the Company and repayment of damages. Based on the demands received from the

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

creditors the Company draws up the register of demands both satisfied and being subject to satisfaction.

2.7. General director notifies employees of JSC "Kuzbassenergo" of taking the decision on reorganization of JSC "Kuzbassenergo" and carries out a complex of activities connected with formalizing labor relations in accordance with the Labor code of the Russian Federation.

2.8. In accordance with article 1 of clause 75 of Federal Law "On joint stock companies" shareholders of the Company who voted against the decision to reorganize the Company or who did not participate in voting on the given issue have a right to demand full or partial redemption of shares held by them from the Company in the procedure prescribed by Board of Directors of the Company in accordance with the requirements of the legislation of the Russian Federation in the announcement on holding an extraordinary general meeting of shareholders of the Company.

Redemption of shares is carried out in accordance with the price prescribed by the Board of Directors of the Company in accordance with article 3 of clause 75 of Federal Law "On joint stock companies".

Bought out shares are paid off at the moment of redemption and the shares of the created companies are not subject to distribution among them.

2.9. The report on overall results of redemption of shares of the Company is approved by the Board of Directors of the Company within 5 days of the date of paying off the bought out shares.

As a result of paying off bought off shares the authorized capital stock of JSC "Kuzbassenergo" is diminished to the amount of nominal value of the shares paid off.

3. To establish the following legal entities:

- JSC "Kuzbass regional electricity supplying company";
- JSC "Kuzbass energy distributing company";
- JSC "Main power lines of Kuzbassenergo".

3.1. To determine that the quantitative composition of the board of directors of each of the created companies equals 11 persons.

To determine that the quantitative composition of the revision committee of each of the created companies equals 5 persons.

3.2. To determine that shareholders (share holder) of JSC "Kuzbassenergo" being in the aggregate holders of 2 or more per cent of common shares of JSC "Kuzbassenergo" have a right to forward to the address of the Company suggestions on nomination of candidatures for election of members of the board of directors of each of the newly established companies (up to 11 candidatures for each of the created companies) and members of the revision committee of each of the created companies (up to 5 candidatures for each of the created companies), as well as candidatures for the positions of general directors of each of the newly established companies (not more than 1 candidature for each of the created companies). Such suggestions must be received by the company not later than March 15, 2006.

Only candidatures who were nominated in accordance with the prescribed requirements and suggestions on whom were received within the deadline prescribed by the present resolution, by the shareholders (shareholder) being in the aggregate holders of 2 or more per cent of common shares of JSC "Kuzbassenergo"at the moment of nomination are subject to inscription in voting papers for the general meetings of shareholders.

The mentioned nominations are to be inscribed in written form with indication of the name (title) of the nominating shareholders (shareholder) and the number of common shares of JSC "Kuzbassenergo" owned by them (him/her).

In case the indicated suggestions on nomination are signed by a representative of the shareholder they should be accompanied by power of attorney (copy of power of attorney

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

attested in prescribed order), arranged in accordance with the requirements for drawing up of a power of attorney for voting of the Federal Law "On joint stock companies".

In case the indicated suggestions on nomination are signed by a shareholder (his/her representative) whose share rights are taken account of in accordance with the deposit account in depositary, such suggestion should be accompanied by the abstract of deposit record of the shareholder in depositary carrying out the registration of rights of the mentioned shares.

The suggestion on nomination of the indicated candidates must contain:

- name of the established company, in the bodies of which the candidates are nominated;
- last name, first name, patronymic and the principal place of business of each of the nominated candidates;
- name of the body for which the candidate is nominated.

The Board of Directors of the company must review the suggestions received and take the decision on inclusion or on the refusal to include the nominated candidatures in the list of candidates for the election in the bodies of the created company by March 20, 2006.

The nominated candidates are subject to inclusion in voting papers for the election in the corresponding body of the created companies with the exception of the following cases:

- when the nomination does not correspond to the requirements prescribed by the present article;
- when the nomination of shareholders (shareholder) is received by the Company later than March 15, 2006;
- when the shareholders (shareholder) do not in the aggregate own the necessary amount of shares of JSC "Kuzbassenergo".

Reasoned decision of the Board of Directors of the Company on refusal to include the nominated candidates in the list of candidatures for voting in the elections for the specific body of the created companies is forwarded not later then March 23, 2006 to shareholders (shareholder) who nominated the candidate.

3.3. At general meetings of shareholders of the created companies the functions of the counting commission are executed by the registrar of the Company – Joint Stock Company "Central Moscow Depositary".

3.4. It must be determined that at voting during general meetings of shareholders of the created companies on issues of approval of the Statute of the created company, of election of members of the revision commission or of election of general director, each common share of the created company subject for floatation gives the shareholder of the created company being the holder of common shares one vote.

The decision on issues of approval of the Statute of the created company, on election of the general director and members of the revision commission is taken by the general meeting of shareholders with the majority of votes of shareholders of the created company – holders of common shares participating in the general meeting of shareholders of the created company.

3.5. It must be determined that elections of members of the board of directors of the created companies is carried out by cumulative voting. At cumulative voting the number of votes of every shareholder of the created company – holder of common shares is multiplied by the number of persons to be elected in the board of directors of the company in accordance with article 3.1. of the present resolution and the shareholder of the created company owning common shares has a right to give all of his/her votes for one candidate or to distribute them among two or morre candidates.

The 11 candidates colelcting the largest number of votes are considered elected for the board of directors of the created company.

3.6. General meetings of shareholders of the created companies are authorized (muster a quorum) on condition that shareholders of the created companies possessing in the

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

aggregate more than half of votes subject to floatation of common shares of the corresponding created company, participated in the elections.

Shareholders of created companies registered for participation in the general meeting and shareholders whose voting papers were received by the Company not later than two days before the date of the general meeting of shareholders of the created company are considered to have taken part in the general meeting of shareholders.

3.7. At taking the decisions on issues connected with holding general meetings of shareholders of the created companies that are not regulated by the present resolution standard acts of the Russian Federation regulating similar relations (by analogy) are to be used.

4. To establish the following procedure of distribution of shares of the newly established companies:

4.1. Shares of the newly established companies are distributed among the shareholders of JSC "Kuzbassenergo" including the shareholders, who voted against or not having participated in voting on the issue of reorganization of the Company, proportionally to the number of shares of the Company owned by them.

4.2.To establish the following coefficients of distribution of common shares of each of the newly established cmpanies and their nominal value:

counting on every common share of JSC "Kuzbassenergo" the following are simultaneously subject to distribution:

1 (one) common share of JSC "Kuzbass regional electricity supplying company", with nominal value of 2, 9 RUR,

1 (one) common share of JSC "Kuzbass energy distributing company" with nominal value of 0,05 RUR,

1 (one) common share of JSC "Main power lines of Kuzbassenergo" with nominal value of 1 RUR,

4.3. The total number of share of each of the newly established companies of the corresponding category (type) subject for floatation equals the number of shares of JSC "Kuzbassenegro" of the corresponding category (type) at the moment of taking the decision on reorganization (minus the shares being the property of or being at the disposal of JSC "Kuzbassenergo").

4.4. The number of share of each of the newly created companies of specific category (type) to be obtained by each shareholder of JSC "Kuzbassenergo" equals the number of shares of JSC "Kuzbassenergo" of specific category (type) owned by him/her.

4.3.The amount of authorized capital stock of each of the newly established companies is determined through multiplication of the total number of shares of the specific company subject for floatation by the nominal value of one share.

4.4.Authorized capital stocks of the newly established companies are formed at the expense of the funds of additional capital.

4.5. In accordance with paragraph 3 article 3 clause 19 of Federal Law "On joint stock companies" shares of the newly established companies of corresponding category (type) are subject to distribution among the shareholders of the company who voted against taking the decision on reorganization of the Company or did not participate in voting on this issue, in the number equal to the number of owned shares of the corresponding category (type) of the Company.

4.6.Common shares or the newly established companies will grant their owners the following rights:

8. to participate in the General meeting of shareholders of the company personally or through representation with the right to vote on all the issues under the competence;

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

9. to put forward suggestions into the agenda of the general meeting of shareholders in the procedure prescribed by the legislation of the Russian Federation and the Statutes of the company;
10. to obtain information on activities carried out by the company and to review the documentation of the Company in accordance with article 91 of the Federal Law "On joint stock companies", as well as other standard acts and the Statute of the company;
11. to collect dividends announced by the company;
12. of preferred purchase of excess shares floated through open subscription and emissive securities convertible into shares, in the number proportional to the number of shares of this category (type) owned by them;
13. in case of liquidation of the company to receive part of its property;
14. to realize other rights prescribed by the legislation of the Russian Federation and the Statute of the company.

4.7. The shares of the Company, property right for which has passed on to new owners after taking the decision on reorganization of the Company and before the moment of state registration of the newly established companies, give their owners the same scope of rights as of the shareholders who voted for taking the decision on reorganization of the Company.

4.8. The shares of the companies that were not distributed among the shareholders of the Company are declared as being purchased by JSC "Kuzbassenergo".

4.9. The shares of the newly established companies at the moment of state registration of the companies established as the result of reorganization on the basis or the data contained in the register of shareholders of JSC "Kuzbassenergo" at the corresponding date are considered floated (distributed among the shareholders of JSC "Kuzbassenergo", purchased by JSC "Kuzbassenergo").

5. To approve the deviding balance (Appendix 3 to the Minutes).

Voting: "for" – 2 (Vagner A.A., Grekhov A.N.), **"against" – 5** (Bolshakov A.N., Eliseeva I.E., Kuzhura R.V., Mazikin V.P., Shumilov A.A.), **"abstentions" – 1** (Shulin M.I.).

Decision not taken.

Fourth issue:

On determination of price for buying out shares of the Company from the shareholders who voted against taking the decision on reorganization of the Company or did not participate in voting on this issue.

Decision:

1. To determine (with consideration of the opinion of an independent appraiser) the following price for buying out shares from the shareholders of JSC "Kuxbassenergo" who voted against taking the decision on reorganization or did not participate in voting on this issue:

- one common share – 17, 57 (Seventeen point fifty seven) Russian roubles.

Voting: "for" – 8 (Bolshakov A.N., Vagner A.A., Grekhov A.N., Eliseeva I.E., Kuzhura R.V., Mazikin V.P., Shumilov A.A., Shulin M.I.), **"against" – 0, "abstentions" – 0.**

Decision taken.

Fifth issue:

PDF создан испытательной версией pdfFactory Pro www.pdffactory.com

Sum of accounts payable, RUR	1 290 372 000
Size and conditions of the past-due accounts payable (percent rate, penalty provisions, fines)	0.
Affiliation	Affiliated person
Market share of the Issuer in the chartered capital of the affiliated person	0 %

Share of ordinary stocks of the affiliated person owned by the Issuer	0 %
Market share of the affiliated person in the chartered capital of the Issuer	49,0 %
Share of ordinary stocks of the Issuer owned by the affiliated person	49,0 %

Accounts payable (including credits and loans) of the JSC "Kuzbassenergo' increased by RUR 209 873 thousands during the III quarter of the year 2005 opposite the previous period.

Main reason is an increase by RUR 353 209 thousands of a debt of bills of the JSC "Kuzbassenergo" rendered earlier to the suppliers and contractors on account under the concluded contracts.

Credit debt increased by RUR 205 000 thousands, as loan debt reduced by RUR 340 391 thousands during the reporting period (owing to withdrawal from the pledge of the JSC "Kuzbassenergo" bills transferred against the credit security).

Accounts payable increased in the III quarter of the year 2005 by:

- ***RUR 107 865 thousands to the suppliers and contractors;***
- ***RUR 94 356 thousands to the advances received, also by RUR 107 140 thousands from the power consumers.***

Besides the noted loan debts, accounts payable reduced in the III quarter:

- ***to the budget and off-budget funds – by RUR 99 347 thousands;***
- ***to the VAT on shipped goods – by RUR 74 155 thousands.***

2.3.2. Credit history of the Issuer

For the last five finished fiscal years (2000-2004), also during the 9 months of the year 2005, the Company did not make credit contracts and loan contracts, the sum of the principal debt under which amounts 5 and more percents of the net assets value.

Credit policy of the JSC "Kuzbassenergo" aims at an attraction of credit resources on more gainful terms of crediting, at a reducing of an interest rate for credit resources using. Borrowed current assets are attracted by the Company at the rate lower than the refinancing rate fixed by the Central Bank of RF.

Provisions on the credit policy of the Company were approved by the Board of Directors at the general meeting spent the 28 of December 2004.

These Provisions determine the order of fixation of Limits of a debt position and the Limit on cost parameters of loan, the order of the control over their observance, and also measures on reduction of the Debt position according to the fixed Limits in case of their excess aimed at the financial stability and minimization of a risk of insolvency of the Company guarantying.

Figure	as for a date of 30.06.2005	as for a date of 30.09.2005
Net assets cost by the end of the reporting period, RUR	28 267 627 000	28 067 128 000
Share of the borrowed funds, RUR	2 213 270 000	2 077 316 000
Share of the borrowed funds in the net assets value, %	7,80	7,40

By the 30.09.2005, share of the borrowed funds in the net assets value reduced from 7,8 to 7,4 percent point as compare with 30.06.2005.

The Board of directors approved their decision on attraction of the borrowed funds at the rate not exceed the rate of refinancing fixed by the central bank of the Russian federation more than in 1,1, time against the security provided by the credit policy of the Company subject to observance of the maximum size of a one-time loan debt over the attracted credits by the company by the 01.07.2006 in a volume no more than RUR

1 600 000 000 (One milliard and six hundred million for the IV quarter of the year 2005.

There was not the bound's issue during the reporting quarter.

2.3.3. The issuer's liabilities against the third parties guarantee

In accordance with the reference on the values availability accounted on the off-balance accounts (lines 950-960), included in the Company's accounting report, the total sum of liabilities of the JSC "Kuzbassenergo" by the 30.09.2005 amounted accordingly:

- *guarantee of liabilities and payments received (line 950) RUR 88 337 thousands.*
- *Guarantee of liabilities and payments issued (line 960) RUR 740 754 thousands.*

There were not any liabilities of the issuer against the security given to the third parties, including a pledge or a guarantee amounted not less then 5 per cent of the issuer's assets balance price during the reporting period.

2.3.4. Other liabilities of the Issuer

There are no any agreements including the bargains on term not reflected in the accounting balance and may affect essentially the Issuer's financial situation, also his liquidity, source of finance and their using conditions, activity results and expenses.

2.4. The purpose of the issue and direction of the assets using resulted to distribution of the issuing securities

Issuer did not spent the issue aimed to the assets attraction by the way of the distribution of securities during the reporting period.

2.5. Risks related with acquisition of the distributing (distributed) issuing securities

2.5.1. Branch risks

JSC "Kuzbassenergo" spend its activity only at the internal Russian market in accordance with area character therefore there are no risks related with possible change of a price for the issuer's production at the foreign markets.

The risk of nonfulfilment by the issuer of his liabilities before the owners of the issuing securities as a result of the branch conjuncture change is not subject of this present report because of absence of any liabilities on the dividend payment by the issuer before the owners of the preference stocks and the percents payment off and retirement of bonds.

The Company has no any risks related to the possible change of a cost of raw material, goods subject to using in production and that may affect negatively its activity.

The following factors may be related to the other branch risks:

- Change of structure of energy consumption at the groups of consumers from the planned at the expense of production volume reduction of a range of industrial enterprises, may lead to reduction of energy output volume in money terms.

- Bankruptcy of enterprises may lead to the impossibility to recover a debt for consummated energy.

- Decreasing of living standard of some groups of population of Kemerovo region will led inevitably to reduction of payment's level of this type of population.

Expectations of the Stock market's participants concerned to the reforming course of energy market.

2.5.2. Country and regional risks

JSC "Kuzbassenergo" is a registered in Russian Federation company carrying out its activity in Kemerovo region, thus some common changes in the State and other regional developments affect on its activity importantly.

As a whole an economic and political situation in the country and in the region is stable, and any possibility of

military conflicts, extraordinary situation, walkouts, change of the State and regional leaders is improbable.
In case of change in political policy "freeze" of the problem on the branch restructuring is possible in the country , that has no substantial effect to the issuer's activity, also "freeze", or directive reducing of rates are possible that may affect negatively the Issuer's activity. Walkouts are prohibited by legislation in the company (according to the LC of RF), but low income growth of the Company's personnel as compare with the other branches may lead to some social tension.

Overwhelming majority of economic factors are out of control of the Issuer.
It's impossible to guarantee that some recent tendencies of Russian economic including increasing of Gross National Product , relative stability of RUR and decreasing of the inflation rates will be kept in future. Besides global fluctuations of oil and gas prices, RUR fortification in the real term concerning USD Dollar, also some consequences of liberalization of a monetary and credit policy and other factors may affect negatively Russian economics and business of the issuer.

Russian economics is not protected against market recessions and delay in economic development in different countries of the world. As it was in the past, financial problems or sensitive perception of the risks related to the investments in the countries with developing economy may reduce a volume of foreign investments to Russia and affect negatively Russian economics.

Ecological factors inseparably linked with general activity of the issuer as a production process, transfer and distribution of heat and electric power demands large quantity of natural sources that call environmental pollution. As significant capital investments are necessary to purchase nature-conservative equipment to remove ecological factors of risk , and payments for natural sources consumption.
There are regional risks related with reforming of JSC "Kuzbassenergo". The management of JSC "Kuzbassenergo" spend active consultations with the government of regional and city Administration over the questions of the Company's reforming to reduce such risks.
Such need is caused by the Provisions of Kemerovo regional Administration №54 dd. 26.04.2002 "On reforming of JSC "Kuzbassenergo" and №49 dd. 28.03.2003 "On the project of reforming of JSC "Kuzbassenergo" and social protection of employees of energy system in Kemerovo region" where regional authorities raised the range of demands to the management of the Company under the project coordination.
The 20th of September 2004 a trilateral agreement was completed between JSC RAO "UES of Russia", JSC "Kuzbassenergo" and Kemerovo regional Administration which regulates particularly the questions on the future implementation of the program on the JSC "Kuzbassenergo" reforming.

Over the terms of the Agreement the regional Administration will be assist in the reforming process of the energy company, especially under its segregation from the structure of supplying, managing, power and heat networking companies.
Risks depending on the regional geographical peculiarity, i.e.:

- *Damnification risks because of emergency situations of natural factors: periodical floods, earthquake on the territory of Kemerovo region.*

According to the long-term forecast made by the Ministry on Emergency Situations of Russia for the period 2005, there will be most possible such man-caused emergency situations of federal and regional level on the territory of Kemerovo region as.

In the structure of man-caused emergency situation of territorial and superior levels the accidents at the power systems of life support will be prevail (50-525 % of the total number of ES and accidents at the not power systems (15-17%).
Besides, Kemerovo region is characterized by the menace of buildings and constructions failure.
According to the short-term forecasts of emergency situations in the Kemerovo region , the most probable emergency situations of complex of dangerous meteorological phenomena (mudflow, landslide, stone falls), also caused by built-up area underflooding, flooodwatert erosion of roads, bridges and dams caused by ring flood.

Besides, it is forecasted emergency situations of man-caused nature resulting from the complex of dangerous

meteorological phenomena (heavy atmospheric precipitation, force wing, sleet adhering) forecasted in Kemerovo region.

The prediction of the risk of open military conflict also the risk of national emergency are minimal possible on a national level as ethnic and social tension in the region does not bear critical nature. However there is a risk of terrorist acts to fight with the security measures at the strategic objects of JSC "Kuzbassenergo" were considerably toughened.

Under the special control were took electric plants, large electric substations, pump houses, combustive-lubricating production's storages and other category objects.

Admission regime for motor transport and employees was toughened including using of manual and fixed metal detectors at the enterprises.

Artificial barriers were mounted that stop unofficial passage of motor transport on the territory of enterprises.

Car parks were transferred at the safe distance from energy object guards, also active interaction between security of JSC 'Kuzbassenergo" and Motor licensing and inspection department, duty departments of MIA and MES was organized.

Around-the-clock work for vide control and patrol were organized at the most important and the distant objects of energy system.

Also a schedule of actions aimed to reinforce technical protection of power objects for the year 2005 was elaborated. Also the sources and volumes of financing equal almost RUR 40 millions were defined.

2.5.3. Financial risks

Variation of percent rates may affect financial and economic activity of the issuer as the enterprise uses borrowed funds in its activity but it will not have significant effect on the financial showings of the company.

Credit policy of the Issuer aimed to attract credit resources at the more favorable crediting conditions. The borrowed funds were attracted by the Company at the rate lower the rate of refinancing fixed by the Central bank of RF (i.e.13%). Weighted average interest rate for the using of credit resources by the company was 10,18% by the 30.09.2005, i.e. by 1.24 per cent points lower then by the 30.06.2005.

Share of credits without loan guarantee was equal to 56,7% of the total amount of loan debt under the short-term credits by the 30.09.2005.

Inflation effect: According to the forecast of the International Currency Reserves the inflation in Russia will be equal to 11-11,5% at the outcome of the year 2005. Particularly the salary depends on the general standard of price in Russia.

The salary is indexed by the issuer. As a whole the effect of inflation factors on the financial stability of the issuer does not seem significant in future and is subject to predict in business-planning of the company.

In the tariff forming there is a risk that the Kemerovo Regional Energy Committee will fix the tariff rate not covering industrial costs and drop-out income because of reducing of profit volume.

So, the Regional Energy Committee fixed an average electric power rate at the level amounted 65,8 copecks, as heat power rate amounted 310 roubles /Gcal fro the year 2005.

It corresponds to the upper limit level of growth determined by the Federal rate service (FRS), i.e. electric power – 12,2%, and heat power – 10,8% accordingly.

Moreover, fuel purchase expenditures amounted RUR 300-400 millions were not included in the rate base. REC did not accounted repair expense amounted approximately RUR 300 millions in the year 2005.

Also the company's insurance expensed were not taken into account fully , thus the production assets may be insured less than for a half year , the rest calendar time such a type of financial defense of property against the unexpected developments will not be valid.

The issuer does not bear any exchange rate risks as he is carrying out his activity only at the internal market.

There are the financial risks of the issuer concerned the future reforming of the issuer (reorganization by the way of segregation):

- risk that the creditors of JSC "Kuzbassenergo" having received the notification on adopted decision on reorganization , will demand the advanced repayment of account payable, execution of corresponding liabilities and payment of damages sustained under the Company's reorganization in form of segregation (par. 6 of art. 15 of FL "On Joint Stock Companies"). Creditors having restructured debts for long-time period may act as initiators: JSC RAO " UES of Russia", Tax Ministry, Out budget Funds. Approximate amount of commercial restructured debts subject to demand amounts RUR 3014,4 millions;

- risk that the shareholders having voted against the reorganization or not took participation in the voting will demand the redemption of all or part of the stocks of JSC "Kuzbassenergo" belonging to them and possibility of loss to 10 % of a price of net assets because of satisfaction off the shareholder's demands of the stocks redemption under the reorganization of the companies in form of segregation (art. 75, 76 of FL "On Joint Stock Companies"). Approximate volume of assets subject to redemption of stocks amounts RUR 587,979 million.

2.5.4. Legal risks

There are some legal risks concerned the change of exchange regulation, modification of tax legislation, change of regulations of the customs supervision and fees, modification of requirements on licensing, court practice that may affect negatively on the activity's results of the issuer also results of the current legal trials subject of participation of the issuer.

- Modification of tax legislation in part of increasing of tax rates or change in the order and terms of tax calculation and payment may led to decreasing of net income of the issuer that may led to reducing of amount of the dividends subject to payment.

- Change in requirements on licensing of main activity of the issuer may led to increasing of a period for document preparation obligatory to extend a term of duration of the license, also necessity of accordance of the issuer with the produced requirements. However as a whole this risk should be deemed as insufficient except the cases when to extend the duration of the license or to exercise an activity subject to licensing some requirements will be provided that the issuer will not may correspond with or when the corresponding with these requirements will be caused with excess costs that may led to the issuer's activity termination.

- There were not any modification of the court practice related with the issuer's activity that might affect negatively on the results of his activity during the reporting period.

2.5.5. Risks related with the issuer's activity.

Risks related with the issuer's activity, i.e. the current legal trial subject to participation of the issuer (actions of the company liquidation, alienation of the company's assets, contestation of rights arisen from the licenses or patents etc.), possible liability of the issuer against the third person's debts are absent.

Other essential risks proper to the issuer are absent.

3.1.5. Taxpayer identification number

INN: *420000033*

3.1.6. Branches and representative offices of the issuer

There were not the changes in the structure of the affiliated companies as the Issuer's representative office

during the III quarter of the year 2005 , except the fact of appointment of a new director in the affiliated company named "Eastern electric power lines".

Company firm name*: "Eastern electric power lines"*
Registered office: *№11-a, Saryghin str., Kemerovo, 650025*
Manager: *Tiumentsev Evgeny Mikhailovich*
Date of creation: *30.12.1993*
Power of attorney is valid up to: *31.12.2005*
The list of affiliated companies is in the Appendix to the Charter of the JSC 'Kuzbassenergo" and available on the Web. page: http://www.kuzbassenergo.ru/inf/ustav/index.shtml

3.2. Principal economic activities of the issuer
3.2.1. Industrial affiliation of the issuer

OKVED (All-Russia classifier of types of economic activity) codes :
40.10.11 –Production of electric power by heat plants
40.10.2 – Energy transmission
40.30.2 – Steam and hot water transmission (heat energy)
51.56.4 – Wholesales of electric and heat power (without its transmission and distribution)
74.60 –Investigations and protection
74.14 – Consulting over the questions on commerce and management.

3.2.2. Principal economic activities of the issuer

Production, transfer and distribution of electric and heat energy are the major activities of the JSC "Kuzbassenergo".
JSC "Kuzbassenergo" is an object of natural monopoly working in the sphere of servicing on transmission of electric and heat energy on the territory of Kemerovo region.

Share of profit of the main activity in the total volume of profit of the JSC "Kuzbassenergo"

Period	2 quarter, 2005	3 quarter, 2005	As reference: 3 quarter, 2004
Aggregate profit, RUR thousands	4 825 352	4 372 947	3 724 979
Profit of the main activity, RUR thousands	4 141 062	3 843 772	3 258 743
Share of profit of the main activity in the aggregate profit %	85,82	87,90	87,48

As the aggregate profit of the Issuer it means the sum of sales proceeds, operational and extraordinary profits – according to the data of the form № 2 "Profit and losses report" (line 010 + line 060 + line 080 + line090 + line 120).

Share of profit of the main activity in the total volume of profit increased by 0,42% during the reporting period and as compare with the previous II quarter of the year 2005 by 2,08%.

Share of profit of the JSC "Kuzbassenergo" of the main activity :

Production	Share of profit, %		
	2 quarter, 2005	3 quarter, 2005	As reference: 3 quarter, 2004

Electric power	73,24	80,35	78,70
Heat power	12,58	7,55	8,78
Total:	85,82	87,90	87,48

In the reporting period as compare with the same period of the previous year the share of profit of the electric power output increased by 1,65 %, and as compare with the previous quarter it increased by 7.11%

Share of heat power output reduced by 1.23% as compare with the same period of the previous year, and by 5.03% - as compare with the previous quarter

Electric and heat power production are not referred to the season activity. But decrease of electric and heat power load take place in the summer months. Maximum consumption of electric and heat power is falls at the autumn and winter months.

3.2.3. Principal types of products (operations, services)

Principal types of products of the JSC "Kuzbassenergo» " are of electric and heat energy.

Figure's name	2 quarter 2005	3 quarter 2005
Proceeds from the production sale, RUR		
- electric power	3 534 293 000	3 513 506 000
- heat power	606 769 000	330 266 000
Share of the aggregate proceeds volume, %		
- electric power	81,2	85,52
- heat power	13,9	8,04

Share of the aggregate proceeds volume, % was calculated by formula: (part of the line 010 №2 falling at the principal activity type) / line 010 of the form №2.

Total structure of the net cost of the Issuer :

Outlays items	by 30.09.2005
Raw materials and soft goods, %	3,6
Purchased components , prepared raw materials, %	-
Work and services of industrial nature fulfilled by the third-party firms, %	1,4
Fuel, %	39,2
Electric power, %	5,9
Remuneration of labour , %	7,3
Credit interests , %	-
Rent, %	0,1
Assignments to the social needs, %	1,8
The fixed assets depreciation, %	11,7
Taxation included in the production net cost, , %	3,8

Other outlay (explain), %	25,2
- abonent payment for the RAO UES of Russia networks exploitation, %	-
- intangible assets depreciation, %	-
- remuneration of the rationalization proposals, %	-
- obligatory insurance payments, %	0,6
- representative needs outlay, %	-
other, %	24,6
Total: outlay on production and sale of products (work, services), (net cost) ,%	100,00
Proceeds of the products sale (works, services) ,%	110,82

Record keeping of the net cost is in accordance with the Tax Code of Russian Federation, part II dd. 05.08.2000 №117-FL and with the Accounting policy of the JSC "Kuzbassenergo" not stipulated a separate accounting at the products (work, services) types.

3.2.4. Raw materials and suppliers of the issuer.

Principal raw material used by the JSC "Kuzbassenergo" is a fuel. Kuznetsky coal and its cleaning rejects are used as the principal fuel at the power plants of JSC "Kuzbassenergo".

Fuel oil is used as starting fuel and meant for maintenance of burning during low quality coal firing, and as the principal type of fuel at the Zaiskitimskaya water-heating boiler plant.

The Major suppliers of coal are(not less than 10% of all supply): Trade House of the Joint Stock Company Coal Company " Kuzbassrazrezugol" (Kemerovo); Joint Stock company "Siberian Coal And Energy Company (Moscow).

The issuer's suppliers whose share is about 20 and more percents of all supplies of inventory holdings, including their share in the total volume of supply.

Coal suppliers	location	3 quarter 2005
TH JSC Coal company "Kuzbassrazrezugol"	4a, Pionersky boulevard, Kemerovo,650000	41,72 %
JSC "SUEC"	7, stroenye 22, Derbenevskaya naberezhnaya, Moscow, 115114	27,37 %

Purchase price per one ton of coal within the reporting period increased by 20-40% as compare with the corresponding period of the previous fiscal year.

As for the winter fuel stocks does not create the Company's anxiety.

3.2.5. Markets for products (work, services) of the issuer

Power industry is practically the unique industry whose products and services consumers are all industries and private sector. There are two markets for energy distribution in Russia: wholesales and retail trade. Heat energy distribution is only at the retail market.

Kemerovo region is the principal market where the JSC "Kuzbassenergo" carries out his activity.

The Kemerovo region is located in the south-east of the West Siberia at the joint of the West-Siberian plain and the mountains of the South Siberia. It is located at almost equal distance from western and eastern borders of the Russian Federation. It is in the 6th time zone.

Output of electric power to the consumers is according to the contracted "Agreements about output and using of electric power".

Composition of consumers of electricity and heat energy at the retail market is in the table stated above by an

example of a scheme illustrating electricity and heat energy distribution:

Structure of electric and heat power sale by the branches

	output to own consumers	
	electricity (thousand kw)	Heat power (Gcal)
Total in power system	5 218 744	1 085 100
I. Industry	3 838 681	389 612
Specific weight (%)	**73,6**	**35,9**
1. Fuel, total	1 280 831	1 740
Specific weight (%)	**24,5**	**0,2**
2. Ferrous metallurgy	1 959 381	27 257
Specific weight (%)	**37,5**	**2,5**
3.Non-ferrous metallurgy	3 672	26 362
Specific weight (%)	**0,1**	**2,4**
4. Chemistry and petrochemistry	346 530	307 799
Specific weight (%)	**6,6**	**28,4**
2. Agriculture	40 067	6 940
Specific weight (%)	**0,8**	**0,6**
3. Transport and telecommunications	307 832	2 516
Specific weight (%)	**5,9**	**0,2**
4. Construction	13 094	6 899
Specific weight (%)	**0,2**	**0,3**
5. Housing and communal services	79 853	657 251
Specific weight (%)	**1,5**	**60,6**
6. Population	57 501	298
Specific weight (%)	**1,1**	**0,0**
7. Other industries	883 684	28 897
Specific weight (%)	**16,9**	**2,7**

According to this table, the largest consumers of electricity at the retail market are industrial enterprises, i.e. 73.60 %.

In the industrial sector the leaders on power consumption are the enterprises of ferrous metallurgy, their share amounts 37,5% (in the II quarter of the year 2005 – 37,9%).

In the structure of heat energy output enterprises of housing.and communal services (more 60% of consumption) and industry (more 30%).Chemical and petrochemical enterprises are the leaders on heat energy consumption in the structure of industry (28,4%).

Factors which may adversely affect the distribution of the Issuer's products (operations, services) and possible measures of the Issuer to reduce such impact:
The following factors may adversely affect the volume of electricity and heat energy distribution:

1. Exit of consumers to the wholesales power market . Due to launching of the second price zone of the wholesales power (capacity) market of a transition period on the territory of Siberia since the 01.05.2005 the consumers whose power receiving devices answer the standard requirements to receive a status of a member of the free-trade market (aggregate installed capacity is more than 20 MBA, installed capacity of the each GTP is more than 4MBA) has a possibility to purchase in the free trade market of the wholesales market au to 15% of

the own scheduled consumption.

- Ltd. PO "Khimprom" since September 2005 make bargains on energy purchasing at the wholesales energy market since September 2005.

During the aforementioned period this consumer purchased 1 903,4 Mw/h of electric power at the free-trade market. Decrease of sale proceeds of the JSC "Kuzbassenergo" amounted RUR 1 098 thousands.

During the year decrease of sale proceeds of the Ltd. PO "Khimprom" at the FMS may achieve RUR 20 342 thousands.

- Ltd. "Topky cement" (total installed capacity -88 MBA) whose AIIS answer requirements of the market bylaws have a technical possibility to cover their power consumption due to purchase of electric power at the adjusted sector of wholesales market. The lost profit of the JSC "Kuzbassenergo" in such a case will be amounted RUR 21 546 thousands a year.

- now the documents to coordination obligatory to the entrance to the FTM are received from the JSC "Electric power networks", JSC "Energoupravlenye"(Leninsk-Kuznetsky) and JSC "KOKS".

The aforementioned consumers correspond the requirements on a quantity of installed capacity equal to 642 MBA.

In case of bringing of accounting system of electric power in accordance with the market requirements and entrance to the free trade market, decrease of sale profit of the JSC "Kuzbassenergo" may amount RUR 83 909 thousands a year.

-also 35 consumers of the JSC "Kuzbassenergo" (total installed capacity equal to 4 999MBA) correspond to the criteria on a size of the installed capacity. Under the entrance of their consumers to the wholesales power (capacity) market and purchase at the FTM up to the 15% of the own scheduled consumption, amount of decreasing of a sale profit of the JSC "Kuzbassenergo" may reach up to RUR 810 250 thousands a year.

Process of entrance of the consumers to the free sector of electric power wholesales market is stipulated by the standard documents ensuring power industry reforming, thus it's impossible to prevent such a situation development.

1. The following factor of power consumption decreasing, particularly of heat power, due to the launching of own boilers (water heating boilers) at the chemical enterprises (KOAO "Azot", Ltd. PO Tokem", Ld. PO "Khimprom"). Thus, it is planning decrease of heat power output by the JSC "Kuzbassenergo". Particularly, 3 steam boiler BEM-25/3,9 of nominal steam capacity 25t/h (18,75 Gcal) each were launched at the KOAO "Azot" in the august, 2005. It will help to reduce heat power consumption from the sources of the JSC "Kuzbassenergo" by 400 thousands a year. JSC "Kuzbassenergo" have not possibility affect such a situation.

2. Insufficiency of limits and delay in financing of charges on payment of heat and electric energy for budget consumers.

To prevent delay in financing of budget consumers, JSC "Kuzbassenergo" subscribes every month Agreements on payment s for consummated energy with Kemerovo regional Administration, General Financial Department of region, Heads of the cities and districts.

Kemerovo regional Administration spend conferences with obligatory presence of the city and district Administration in the person of their Heads, also Managers of the territorial financial authorities, managers of enterprises of housing and communal services and city electric networks.

3.2.7. Joint activities of the Issuer

The issuer does not perform any joint activities with other organizations.

3.3. Future plans of the issuer

Purposes of the JSC "Kuzbassenergo" for the year 2005.
Principal purpose of the company for the year 2005 will by reliable and regular electric and heat energy supply to the consumers, providing profit earning, increasing of the company's capitalization and increasing of its investment appeal during the reforming process of power industry in Russian Federation.

Principal production purposes of the company for the year 2005 will be the following:
1. reliable and regular electric and heat energy supply to the consumers of the region especially in autumn and winter periods with proper maximum load;
2. fulfillment of the program of repair of the equipment of power stations, electric and heat networks;,
3. fulfillment of the task of JSC RAO "UES of Russia" on creation of fuel reserve in the warehouses by 01.01.2006;
4. Fulfillment of the investment program of the Company.

Thus the following production works will be priority:

Putting into service the boiler of station № 16 ТП-87М-type with steam capacity of 420 t/h at the Kemerovskaya GRES;
- ***reconstruction of the boiler of station № 8, ТП-10-type with the purpose of reduction of NOx emission at***

the Tom-Usinskaya GRES;

- ***modernization of electric precipitators of the boiler of station № 14 at the Kemerovskaya GRES;***
- ***introduction of three-stage fuel burning in the boiler of station № 11 with the purpose of reduction of NOx emission at the Kemerovskaya TETS;***
- ***reconstruction of ash-catching installations of the boiler of station № 8 at the Novo-Kemerovskaya TETS;***
- ***installation of the fire-extinguishing system of fuel feeder at the Tom-Usinskaya GRES, Belovskaya GRES, the Thouth-Kuzbass GRES, Kemerovskaya GRES, the Western-Siberian TETS, the Kuznetskaya TETS;***
- ***reconstruction of SS Pashkovsk 35/10 KWt with replacement of oil circuit breakers for electrogas ones in the Western electrical networks;***
- ***installation of ASDU system of the tidal electric station in the Northern electrical networks;***
- ***replacement of the transformer of 32 MVA for 40 MVA at SS Tyrgansk in the Central electrical networks;***
- ***reconstruction of ZRU of 6 kV with replacement of oil circuit breakers and PZA SS of 356 kV at SS Abashevsk 1/2","Severnaya" in the Southern electrical networks;***
- ***above-ground laying of the head section of heat pipeline 2 Du 600 mm of the Kuznetskaya TETS from TK-1 up to TK-2 with a bridge system above the railway in the thermal networks;***
- ***introduction of the automated informational-measuring system of the commercial accounting in the Energosbyt;***

In part of financial activity the following activities will be priority for the company in 2005:

1. Fulfillment of the expenses reduction program including by way of future development of the competitive system on purchase of goods, works and services;

2. Fulfillment of the Amicable agreement's terms with the Company's creditors as a guarantee of successful reforming;

3. determination of economic based tariffs for the Company;

4. Increasing of financial stability of the Company, decreasing of a distance between the accounts receivable and account payable;

5. Guarantee of the investment appeal of the Company.

To further reforming of the company in the year 2005 the following tasks will be priority:

1. The company's reforming project coordination with the largest shareholders, state authorities and management;

2. Full termination of the preliminary stage on the Company's reforming in part of split-off all not profile activity types and not profile property;

3. Training of a stuff reserve of managers and leading specialists to form the newly creating companies;

4. Perfection of forms and methods of the corporate governance, maximum transparency of the company as a public company playing an important role in the regional life.

In accordance with the program of technical development of the company for the years 2001-2011 aimed to ensure reliable work of the plants and timely change of the used technological equipment in the year 2006 the Company needs:

- not to stop in searching of contracting organizations and suppliers for construction, reconstruction and technical reequipment of objects on a competitive basis;

- to define their priorities in forming of investment program for 2-3 years for incompleted construction objects and adoption of cardinal decisions;

- to tie investment program of the Company with the sources of financing, also timely putting into operation of the objects;

- to continuer the ash-damp dams extending and to start construction of new ash-damp dams where the reserves for slash warehousing are limited for the possible filling.

For the next 3-5 years it is necessary to fulfill the following works affecting the total power system security :

- Reconstruction and putting into operation of a turboset of st. №8 at Novokemerovskaya TETs of a type

PTR-80-130(RUR 500 millions) in 2006;

- Putting into operation of a turboset of st. №3 of a type R-12-29 at the Kuznetskaya TETs in 206 to cover a deficit in extracted steam for makeup water heating and increasing of electric power output due to thermal input;

- Putting into operation of a turboset of st. №15 of a type T-115-130 at the Novo-Kemerovskaya TETs capacity 115 Mwt with investments volume equal to RUR 900 millions (including ASU TP) in 2008;

- To proceed with designing and approval of a starting complex of stem boiler of st. №5 at the Kuzbass TETS capacity 160t/h with launching in 2007;

- To replace the turbine of st. №9 of a type r-35-130 by the turbine of a type T-120-12,8 at the Kemerovo GRES in a value of RUR 600 millions;

-To reconstruct a turboset of st. №11 and 12 on a type R-12-90/31 at the Kuznetskaya TETs in a value of RUR 200 millions;

-To reconstruct electrical filters of boilers of type TP-87 to gain standard dustiness of smoke fumes and to fulfill norms of maximum ashes emissions; to reconstruct electrical filters together with increasing of ash collecting up to 99% at the West Siberian TETs;

- To fulfill the directives and prescriptions of the State supervision authorities in the all affiliated companies in amount equal to RUR 60 millions.

- To change electric equipment in the affiliated companies in amount equal to RUR 100 millions.

3.4. The Issuer's participation in industrial, bank and financial groups, holdings, trusts and associations

JSC "Kuzbassenergo" is a subsidiary of Holding company RAO "UES of Russia" according to the art. 2.3. of the Articles of Association.

3.5. Subsidiaries and affiliated business divisions of the issuer

JSC "Kuzbassenergo" has 11 subsidiaries.

These companies are regarded as subsidiaries according to the Civil code of Russian federation (art. 105 and 106) and Federal law "On Joint Stock Companies" (art.6).

Ratio of the uncovered loss at the reporting date and the balance currency	F. №1 L. 475 / F. №1 L. 300	0,00	0,00

During the reporting quarter the proceeds from sales of the commodity output amounted RUR 4 108 508 thousands, i.e. lower by 245 220 thousands roubles as compare with the II quarter of the year 2005 due to the seasonal decrease of heat power consumption.

Profit on power sale in the III quarter 2005 as compare with the previous period decreased by RUR 297 290 thousands or by 7,2%, proceeds from other activity increased by RUR 52 070 thousands or by 24,5% during the III quarter.

As compare with the II quarter 2005 , net cost of commodity foods reduced by RUR 130 940 thousands or by 3,1% , also power production and transfer expenditures reduced by RUR 202 771 thousands or by 4,9%.

Thus the gross profit in the III quarter 2005 amounted RUR 40 636 thousands, i.e. by RUR 77 480 thousands lower than in the similar period of the previous year.

According to the results of financial and economic activity during the III quarter of the year 2005, the Company suffered net loss amounted RUR 255 416 thousands. It's important that as a whole the JSC "Kuzbassenergo" took the net profit amounted RUR 876 266 thousands during the 9 months of the year 2005.

In comparing to the results of financial and economic activity of the JSC "Kuzbassenergo" during the III quarter of the year 2005 the previous period, it's important to mark made changes in the accounting and financial reports of the company in the II quarter of the year 2005 due to writing-off the restructured fines and penalties restored in the December 2004 at the Company's balance to the budget and off-budget funds in the sum equal to RUR 1 226 791 thousands (due to speeded up pay off the restructured debt to the budget and off-budget funds by the JSC "Kuzbassenergo" the Taxation Ministry accepted a decision on writing-off the fines and penalties debts).

Profit caused by the wrote-off restructured fines and penalties amounted RUR 1 234 738 thousands that affected net profiting by the Company in the II quarter of the year 2005 amounted RUR 425 829 thousands.

The management bodies of the Issuer regarding to the given analysis of a profitability and unprofitableness agree in their opinion.

4.1.2. Factors affecting the change of the gain amount from the sales by the issuer of goods, products, services and profit (loss) of the major activity of the issuer

Factors affecting the change of the gain amount are not presented due to its small changing during the reporting period, according to the opinion of the management bodies of the issuer .

4.2. Issuer's liquidity, adequacy of the capital and circulating assets

Figure's name	Calculation's methodic	At the beginning of the year	At the end of the reporting period
Own circulating assets, RUR	F. №1 L. 490 + F. №1 L. 640 + F. №1 L. 650 - F. №1 L. 450 - F. №1 L. 190 - F. №1 L. 230	- 2 268 583 000	- 1 734 646 000
Index of the fixed asset	(F. №1 L. 190 + F. №1 L. 230) / (F. №1 L. 490 + F. №1 L. 640 + F. №1 L. 650 - F. №1 L. 450)	1,08	1,06
Ratio of the current liquidity	(F. №1 L. 290 - F. №1 L. 230) / (F. №1 L. 690 - F. №1 L. 640 – F. №1 L. 650)	0,98	1,09
Ratio of the quick liquidity	(F. №1 L. 290 - F. №1 L. 210 - F. №1 L. 220 - F. №1 L. 230) / (F. №1 L. 690 - F. №1 L. 640 - F. №1 L. 650)	0,57	0,58
Ratio of the owned assets autonomy	(F. №1 L. 490 + F. №1 L. 640 + F. №1 L. 650 - F. №1 L. 450) / F. №1 L. 300	0,81	0,81

As compare with the previous period, change in the Company's ratio of liquidity took place in the III quarter of the reporting period :

- ratio of the current liquidity characterizes the Company's paying capacity under the complete mobilization of the circulating assets (sale of all the reserves, full settlement of the debtor having the debts with a maturity date less then 1 year). Ratio of the current liquidity of the JSC "Kuzbassenergo" amounted 1,09 by the 30.09.2005. i.e. having mobilized all the circulating assets the Company will be able to pay back 100% of their short-term liabilities;

- ***ratio of the quick liquidity characterizes the Company's paying capacity under the timely settlement of the debtors. Analysis of a ratio of quick liquidity shows that the JSC "Kuzbassenergo" will be able to pay back 58% of their short-term liabilities by the 30.09.2005 subject to 100% liquidity of the short-term accounts receivable (maturity date is within one year).***

- ***ratio of the owned assets autonomy defines a property share formed due to owned sources (chartered, surplus capital and unappropriated profit, etc). If this a figure is higher than 50%, the creditor's risk is reduced to the minimum. I.e. having sold a half of a property formed due to the owned assets the Company may pay off all their debt liabilities even so the second half part containing the borrowed assets will be depreciated. As for situation of 30.09.2005 this figure meaning amounted 81%.***

the Company's reserves were formed due to the borrowed sources. As for a dated of the 30.09.2005 lack of the own resources of the circulating assets forming amounted RUR 1 734 646 thousands against RUR 2 809 054 thousands against RUR.2 268 583 thousands as compare with the 30.06.2005.

The management bodies of the Issuer regarding the aforementioned information agree in their opinion.

4.3. Amount and structure of the issuer's capital and circulating assets

4.3.1. Amount and structure of the issuer's capital and circulating assets

a) in accordance with the Articles of Association the chartered capital amounts RUR 606 163 800 (six hundred six millions one hundred sixty three thousands and eight hundred roubles);
b) Information on forming and using of the reserve fund is shown in the paragraph 8.1.3. of this present report.

Index	At the beginning of the reporting period	At the end of the reporting period
a) Amount of the chartered capital, RUR	606 163 800	606 163 800
b) Total cost of the issuer's stock bought out by the issuer for the further resale	did not redeem	did not redeem
c) Amount of the capital reserves of the issuer, RUR	16 858 000	16 858 000
d) Amount of the additional capital, RUR	24 904 067 000	24 894 675 000
e) Amount of the unappropriated balance of the previous years, RUR	1 131 682 000	876 266 000
f) amount of the Issue's target investment assets, RUR	0	0
g) total amount of the Issuer's capital, RUR	27 931 460 000	27 676 031 000

By the 30.09.2005 the amount of the additional capital amounted RUR 24 894 675 thousands having reduced by RUR 9 392 thousands during a quarter. Total sum of the capital reduced by RUR 255 429 thousands due to received net losses during the reporting quarter.

Amount of the owned capital is sufficient to fulfill the short-term liabilities and to cover the current operational expenses by the Company.
