Information on the other financial investments (investments in the chartered capitals of the limited liability companies) are not available because they come to less than 10 % of JSC "Kuzbassenergo" full investments by the end of the III quarter 2005 .

4.3.3. The issuer's intangible assets

The Company exclusive rights to the trade mark are displayed in the intangible assets structure.

Intangible assets amortization is charged due to the linear device, reasoning from the following beneficial use period:

Trade mark rights – 10 years.

In the accounts the intangible assets are shown through the original cost minus amortization, saved up during the usage period.

№№	Intangible assets group's name	Overall cost, RUR thousands	Amortization charged amount, rubles.
1.	Trade mark	4,0	3,0
	Total, RUR	4,0	3,0

The intangible assets accounting is carried out according to PBU 14/2000 "The intangible assets accounting " approved by the Order of the Ministry of Finance № 91 dd. 16.10.2000.

4.4. Information about the issuer's policy and expenditures in the sphere of scientific and technological progress, in respect of licenses and patents, new research and development.

Account of NIOKR (Research, developmental and technological works) in the Company is carried out according to the Accounting Regulations "Account of charges on research, developmental and technological works " (PBU 17/02).

NIOKR expenses are shown in the accounting at the ass. 08 "Investments in the non-circulating assets " (p. 5 PBU 17/02).

Charges on research and development, which results are subject to the legal protection and are made out in the order established by the legislation in force (i.e. patents, certificates, other documents certifying the exclusive right of the Company on research and development's results) are received, were accounted as intangible assets (p. 4 ПВU 14/2000).

Charges on research and development, which results were not made out in the provided order should be charge-off from the credit of the acc. 08 "Investments in the non- circulating assets" to the charges on ordinary activity by a linear way during the approved period (p. 11 PBU 17/02).

Research and development charge-off period is within 3 years.

Charges on research and development not given a positive result also research and development results which application was cancelled shall to be formed by the RD department of the subsidiary.

Report shall to be examined by the service of RD department of the executive body and with the technical director's authorization.

Production costs are subject to charge-off once only in composition of nonrealization expenses of the reporting period.

4.5. Overview of the new trends in the sector of the issuer's core business

Electroenergetics is one of the leading industries of Russian economic.

Russian power industry is at the fourth place in the world over the installed capacities and production volumes.

All existing in the Russian electroenergetics somehow or other relates practically all industries of national economy.

Together the energy power is one of the most "problem" industries. Since 1980 the negative tendencies in the power energy of Russia took place: against the background of economic recession, the power industry actually became the donor for other industries

In the greater extent it was caused by macroeconomic factors, but non-payments have played also the great role.

Even in the most prosperous power supply systems of the European part of Russia deterioration of the basic production assets exceeded 50 % and approached to the values when the equipment's repair costs more then its change. Thus reforming necessity was evident by the year 2001.

Structural reorganization of power branch through liberalization and decontrol of potentially competitive sectors were the main tendencies for the last ten years of world power industry development.

According to these principles the Conception of restructuring of the RAO "UES of Russia" was elaborated, which is now is materializing by the management of the RAO "UES of Russia" and by the management of the

regional power companies.

On July, 11, 2001 the Decision № 526 « On reforming of power industry of Russian Federation » was approved by the Government. It directs to:

1. Divide business into monopolistic and competitive components. Generation and supply should be allocated as competitive business. Thus the Federal networks (FSK), Distributive network companies (DNC), and dispatching activity (System operator) will be under supervision of the State.

2. Create a competitive energy market implied a transition of existing sales process at the directive price (FOREM - Federal Wholesale Electric Power Market) to the market pricing mechanism (creation of AMT Administrator of market trade).

Decree of the Government of RF №1040-p approved the Schedule of activities for the primary stage of reforming was adopted as development of this present Decision.

In August, 2001 the Committee on reforming has been established at Board of directors of RAO " UES of Russia ". Its composition included representatives of minority shareholders, potential investors, the State and RAO " UES of Russia ". On December, 21 the Government of Russian Federation has approved the Decision № 881 " On the criteria of transfer of the main transmission lines and objects of the power network economy to the Unique (all-Russian) power network ".

Principal facts of the year 2002 in the sphere of reforming were the following:

- adoption by the State Duma of RF in its first regarding a pack of the bills devoted to energy power reforming;

- spending of auctions of electric power in the imitation mode by the NP "ATS" together with JSC "SO-TsDU UES" ;

- creation of infrastructural institutions in the branch, i.e. the Federal Network Company and the Sysop;

- preparation of a strategy for reforming of RAO "UES of Russia";

- termination of a preparatory stage of reforming of RAO "UES of Russia";

- development and adoption of the basic variant of reforming of JS-energo;

- preparation to implementation of the pilot projects of reforming of JS-energo;

- spending of the first stages of reforming of the scientific and designing complex of RAO "UES of Russia" , also of energyreparing and service activities.

By the Resolution of the Government of Russian federation №226 dd. 2 of April 2002 "On the pricing regarding to electric and heat power" the new "Pricing principles" and "Regulations of the State regulation and application of the tariffs on electric and heat power in Russian Federation" were implemented. The Corporate Governance Code was approved by RAO "UES of Russia".

In September 2002 the not- profit partnership "Administrator of trade system"(NP "ATS" began auctions of electric power in imitation mode. One of the positive tendencies of the year 2002 was approaching of the tariffs to the economic valid, otherwise the level of the cross financing between the groups of consumers reduced.

The Board of Directors of RAO "UES of Russia" approved the base variant for reforming of regional energy systems, i.e. the RAO "UES of Russia" subsidiaries, also the exit of enterprises belonging to the Holding Company RAO "UES of Russia" from the non profile assets aimed to the expenses minimization relate to the ownership. The Board of Directors of RAO "UES of Russia" has approved the decision on termination of participation of RAO "UES pf Russia" in ZAO "TsDR FOREM" by way of selling of 75% holding of stock belonging to ZAO "TsDR FOREM" to the Non commercial partnership "ATS".

On the night of April, 1, 2003 the function of operative - dispatching administration of the Unified Energy System of Russia were transferred from regional dispatching administrations (RDA) of JS –energo to the regional dispatching administrations (RDA) , i.e. to the subsidiaries of JSC " System operator – Central Dispatching Administration of Unified Energy System (CDA UES").

In April 2003 the pack of legislative acts on electric power reforming came into the force including such federal

laws as:

- "On electric power" ;

- "On the features of electric power functioning during the transition period and on the modifications in some legal acts of Russian Federation, and on recognition as invalid some legal acts of Russian Federation due to adoption of Federal Law "On electric power";

- "On modifications and amendments to the Federal Law "On the Sate regulation of tariffs on electric and heat power in Russian Federation";

- "On modifications and amendments to the Federal Law "On the Natural monopoly";

- «On modifications and amendments to the second part of the Civil Code of Russian Federation";

- "On modifications of the Federal Law "On energy power saving".

Working group on modification of the Strategy of JSC RAO" UES of Russia " for the years 2003 - 2008 "5+5" created at Board of Directors of RAO " UES of Russia " has examined the Program of the Concept of the Strategy of RAO " UES of Russia " for the years 2003 - 2008" 5+5 taking into account the remarks and offers.

In the I half-year 2003 the process on enhancement and development of the mechanisms for competitive trade within the regulated wholesale market of electric power (capacity) proceeds. According to the existing normative legal documents monthly auctions of the above-planned electric power were spent, the volume of electric power subjects to selling at the auctions amounted 3,1% of the volume of supply to the home market.

Together with JSC"SO-CDU YES of Russia" (System operator – Central Dispatching Administration of Unified Energy System) in the I six months 2003 the trade of electric power over the scheme "Energopul" proceeds, the share of sale for the reporting period increased twice and amounted 1,3% of the total volume of the supply to the FOREM (home market).

The 31st of October 2003 the Board of Directors of RAO "UES of Russia" at the ordinary meeting heard information on the possibility of creation of the territorial generating companies (TGC) by way of co-incorporation by several JS-energo.

Variant of creation of TGC by way of co-incorporation is implicate its creation as a large operational company at the first stage of JS-Energo reforming. TGC shall be co-incorporated by several JS-energo by way of entering of their generating assets to the authorized capital of the newly created company. Thus it's a possibility at the early stage to create a large operational company whose shareholders will be incorporated it JS-energo .

According to the Resolution of the Government of RF №643 dd. 24.10.this present year "On the rules of the electric power (capacity) market during the transition period", since November, 1, 2003 at the same time with the regulated sector of the wholesale electric power market (existing Federal wholesale electric power (capacity) market) the competitive sector supposing the trade in hourly volumes of the electric power on free prices is started.

Thus in the free sector each manufacturer may offer up to 15 % from the fixed capacity, and each consumer can declare purchase up to 30 % from own scheduled consumption. Economic benefit of the free sector of the wholesale electric power market launching is obvious. Densities of electric power supply by heat power plants with rather low industrial expenses has increased, while the supply by "expensive" generating capacities, on the contrary reduced.

The Board of Directors of the JSC RAO "UES of Russia" approved the following principles to carry out the auctions in the UGC:

- absolute rights of shareholders of the JSC RAO "USE of Russia" to proportional stocks distribution;

- UGC's stock market value defining;

- Openness of information on the actual profit receivers from the auctions participants and on the purchasers of large –scale (more than 25%) of the UGC 's share holdings;

- maximum transparency and simplicity of mechanisms;

- JSC RAO "UES of Russia" shareholder's rights security and interests protection.

The Issuer's activity in the power system mainly conditioned by the industry-wide trends.

Power system conflicted as with the problems of nonpayment peculiar to economic sphere at the macrolevel, as especially regional problems mainly in their relations with the Regional energy committee.

A year 2003 was the year of large starting objects having important meaning not only for power system, but for the whole Kuzbass. High voltage transmission line ВЛ-35 was successfully putted into operation in august month in the South Electric networks to electrify the distant village of the Gornaya Shoria of the Ust-Kabyrza being the largest in the district.

In March 2004 the segregation of repairing activity was finished in accordance with the Project on repairing activity reforming in the JSC "Kuzbassenergo" approved by the Project Group on reforming of repairing activity and optimization of technological services market in the JSC "RAO "UES of Russia" dd. 01.07.2003.

Also 3 affiliated companies with a 100% market share of the JSC "Kuzbassenergo" were founded and started their activity:

- JSC "Kuzbassetremont" – competitive energy repairing company, carries out its activity in electric power lines. Registered 04.03.2004.

- JSC "Engineering and analytical centre "Kuzbasstekhenergo" – competitive engineering company. Registered 09.03.04.

- JSC "Kuzbass energy repairing company" – competitive energy repairing company carries out current and capital repair of power plant equipment . Registered 01.03.2004 .

The companies were created on the base of the JSC "Kuzbassenergo" property with its own personnel participation.

JSC "Kuzbassenergoservice" (100% SDC established on the base of property and personnel participation of the liquidated affiliated company RP "Kuzbassenergoremont") carries out current repair of boilers, turbines, transformers, also works in capital construction and technical reequipment, produces spare parts.

Subsidiary named "Maghistralnye electric networks" (Main-line electric networks) was created within the activity on reforming of electric network complex on the ground of the property complex on trunk transmission lines related to the Unique national electric network.

The Board of Directors approved an independent valuator to define a market value of property.

Agency contract between the JSC "Kuzbassenergo", MMSC "Siberia" and JSC "FSC UES" was made and satisfied, also a market evaluation of a cost of electric power system property together with ZAO "ENPI Consult".

Right- institutive documents over the all object forming was completed.

In February 2005 the Board of Directors of RAO "UES of Russia" adopted a decision on modification of the scheme of allocation of the main-line transmission lines of JS –energo. New order of electric network complex reforming provided:

1) transfer in the main-line network companies (MNC) over the divided balance of the objects of UNUS and monetary to the expenses compensation ;

2) payment of stocks belonging to JSC RAO "UES of Russia" to MNC allocated under the reorganization of JS-energo in the authorized capital of JSC"FNC UES";

3) joining of MNC as its segregation from the composition of JS-energo to one MMNC "Centre", which also the others MMNC simultaneously join.

Within the electric power reforming on the territory of Siberia the competitive sector of wholesale market was created which is till now extending to the European part of Russia and Ural.

Wholesale market of electric power in Russia is divided in two sectors, i.e. regulable (the Sate fixes the tariffs) and competitive, whose participants may sell at the free price to 15% of the outputted energy.

The 1st May 2005 the competitive sector of wholesale market of electric power was launched in Siberia.

14 affiliated companies of RAO " UES of Russia " took part in the first tenders in competitive sector of the wholesale market of the electric power on the territory of Siberia. The operator of competitive sector of the wholesale market of the electric power in Siberia is the Not-profit partnership « Administrator of trade system ».

The Board of Directors of the RAO "UES of Russia" approved the project on the JSC "Kuzbassenergo" reforming dd. 24.06.2005 and made changes in their decision dd. 23.04.2004 having approved the new configuration of the territory generating companies (in part of FGC-11 and FGC-12): FGC-11 should be formed on the ground of the generating assets of the JSC "Tomskenergo" and "Omskenergo"; FGC-12 should be formed due to the generating assets of the JSC "Altayenergo" and JSC "Kuzbassenergo" (except generating capacity being subject to split-off).

The JSC "Kuzbassenergo" contains 8 heat power stations of the fixed capacity 4,7 millions kw.

The JSC "Kuzbassenergo" reforming process will be carried out according to the base variant by the way of reorganization in form of segregation of the following societies together with a save of a structure of the stock capital:

JSC "Kuzbass regional electric power network company" - will fulfill functions on electric power transfer and distribution from the source to the consumers.

JSC "Kuzbass power supply company" – electric power sale and purchase. Also it is possible to endow with a guarantee supplier duties.

JSC "Main power lines Kuzbassenergo", whose assets will be the objects of power complex related to the Unique national power lines. It will carry out electric power transfer through the networks belonging to the Unique national (all-Russian) electric power lines.

The project provides saving generating assets and main heat power lines in the structure of the JSC "Kuzbassenergo" property.

The Companies must be formed and work independently since the 1st of July 2006 in accordance with their duties.

Taking into account the monopolistic situation of the JSC "Kuzbassenergo" at the forming power market, the Board of Directors reckoned as reasonable sale of generating assets of the JSC "Kuzbassenergo" -West-Siberian TETs and South Kuzbass GRES, and entrusted the Company's Board to submit to the meeting of the Board of Directors a decision on the terms and ways of sale of the aforementioned generating assets of the JSC "Kuzbassenergo" coordinated with all the ministries and authorities, minority joint stock companies of the JSC "Kuzbassenergo".

Further, generating assets of the "Kuzbassenergo" together with generation of the JSC 'Altayenergo" will be in the structure of the FGC-12.

The Board of Directors of the JSC "Kuzbassenergo" accepted a decision on the committee on reforming creation.

3 representatives of the RAO "UES of Russia", 2 representatives of the JSC "Siberian power company", 2 representatives of the JSC "Kuzbassenergo" and 1 representative of the JSC "Altayenergo" were involved in this committee.

The Committee's duties are: elaboration of all questions concerned the FGC-12 reforming process and their preparing to the Board of Directors of the JSC "Kuzbassenergo" consideration.

In accordance with the resolution of the Board of Directors of the RAO "UES of Russia", the Board of Directors of the JSC "Kuzbassenergo" approved a schedule of actions on reorganization in form of segregation of the JSC "Kuzbassenergo":

№	Actions	*Term (not later)*
1.	The Board of Directors of the JSC "Kuzbassenergo" about the reforming start up	18.07.2005
2.	The Board of Directors of the JSC "Kuzbassenergo" on convocation of the extraordinary general meeting of shareholders on the issue of reorganization	14.11.2005
3.	Extraordinary general meeting of shareholders of the JSC "Kuzbassenergo" on reorganization	30.12.2005

4.	General meeting of shareholders of the newly created joint stock companies on the Charters approval and election of management bodies of the each newly created company.	18.05.2006
5.	State Registration of the newly created joint stock companies	01.07.2006
6.	The Board of Directors of the newly created companies under the JSC 'Kuzbassenergo" reorganization on the results of the entrance balances forming.	20.10.2006

The Board of Directors of the JSC "Kuzbassenergo" defined the reforming as one of the priority trends of activity and approved the substantial reforming conditions in the 12 of July 2005.

By this present time the following actions have been hold: the extended inventory of property and financial liabilities within the limits of preparatory work of the dividing balance (DB) of the JSC 'Kuzbassenergo" as for a date of 30.06.2005, also dividing balance of the JSC 'Kuzbassenergo" submitted to the Working Group on drawing-up of DB of the RAO "UES of Russia".

A competitive pick of independent valuating institution among the registered valuators at the JSC RAO "UES of Russia" was spent to define a market value of stocks to redemption under the reorganization of the JSC "Kuzbassenergo".

The Board of Directors of the JSC "Kuzbassenergo" had elected as an independent valuator the Ltd. "Institute of property and financial activity valuation" (Tomsk). Independent valuator of the company prepared his report on the market value of stocks owned by the JSC "Kuzbassenergo" as for a date of 30.06.2005.

V. Detailed information about members of the issuer's administrative bodies, its units of control over its financial and economic activities; brief information about the issuer's personnel (employees)

5.1. Information about the structure and competence of the issuer's regulatory bodies

The Company's regulatory bodies are represented by:

- General Meeting of the Company's shareholders
- Board of Directors
- Management Board
- General Director

The Company is determined by the Articles of Association and by the internal documents of the Company, i.e.:

- ***Provision on the order of preparation and conducting of General meeting of Shareholders of JSC "Kuzbassenergo" approved by the Annual General meeting of shareholders of JSC 'Kuzbassenergo" dd. 02.06.2003.,***
- ***Provision on convocation and conducting of meetings spend by the Board of Directors of JSC 'Kuzbassenergo" approved by the Annual General meeting of shareholders of JSC 'Kuzbassenergo" dd. 21.06.2002, with amendments and modifications approved by the Annual General meeting of shareholders of JSC 'Kuzbassenergo" dd. 27.06.2005.***
- ***Provision on the Management Board of JSC "Kuzbassenergo" approved by the Annual General meeting of shareholders of JSC 'Kuzbassenergo" dd. 21.06.2002.***

Competence of the General meeting of shareholders, of the General Director and of the Management Board is determined by the Articles of Association approved by the Annual general meeting of shareholders dd. 21.06.2002 including the following modifications and amendments to the Articles of Association:

- ***modifications and amendments to the Articles of Association of JSC 'Kuzbassenergo" approved by the Board of Directors 02.06.2003;***
- ***modifications and amendments to the Articles of Association of JSC 'Kuzbassenergo" approved by the Annual general meeting of shareholders 02.06.2003;***
- ***modifications and amendments to the Articles of Association of JSC 'Kuzbassenergo" approved by the Board of Directors 01.07.2003;***
- ***modifications and amendments to the Articles of Association of JSC 'Kuzbassenergo" approved by the Board of Directors 26.09.2003;***
- ***modifications and amendments to the Articles of Association of JSC 'Kuzbassenergo" approved by the Board of Directors 04.11. 2003;***
- ***modifications and amendments to the Articles of Association of JSC 'Kuzbassenergo" approved by the Board of Directors 30.04.2004;***
- ***modifications and amendments to the Articles of Association of JSC 'Kuzbassenergo" approved by the Board of Directors 22.06.2004;***
- ***modifications and amendments to the Articles of Association of JSC 'Kuzbassenergo" approved by the Annual general meeting of shareholders 24.06.2004;***
- ***modifications and amendments to the Articles of Association of JSC 'Kuzbassenergo" approved by the Board of Directors 25.03.2005***

Articles of Association of the company including modifications and amendments, also internal documents regulating daily activity of the issuer's authorities are shown on the Web-page of the Company: http://www.kuzbassenergo.ru/ ***in paragraph "To Shareholders and investors" on the page « http://www.kuzbassenergo.ru/inf/ustav/index.shtml***

Competence of the General meeting of shareholders of JSC 'Kuzbassenergo":

In accordance with paragraph 10.2 of the article 10 of the Articles of Association, the competence of the General meeting of shareholders includes:

1) alteration and amendment of the Company's Articles of Association or adoption of the Company's Articles of Association in a new edition;
2) reorganization of the Company;
3) liquidation of the Company, appointment of a liquidation committee and adoption of the intermediate and final liquidation balance sheets;
4) determination of number, nominal value, category (type) of the declared stocks and rights granted by these shares;
5) increase of the authorized capital of the Company through an increase of the nominal value of shares or through an additional placement of shares;
6) decrease in the authorized capital through a decrease in the nominal value of shares, through an acquisition by the Company of a part of the shares in an effort to decrease their total amount, and also through redemption of these shares acquired and bought out by the Company;
7) splitting and consolidation of the company's shares;
8) adoption of a decision on placing by the Company of bonds subject to convert into shares and others issuing securities subject to convert into shares;
9) election of members of the Board of Directors and early termination of their powers;
10) election of members of the revision committee of the Company and early termination of their powers;
11) approval of the Auditor of the Company:
12) adoption of a decision on powers transfer of the Corporate executive body to the management company (manager);
13) approval of annual reports, annual accounting statements including the Company's profit and loss accounts, as well as distribution of profits (including payment (announcement) of dividends except for profit distributed as dividends based on the results of the first quarter, six months, nine months of the fiscal year) and losses of the Company in the fiscal year;
13.1.) payment (announcement) of dividends based on the results of the first quarter, six months, nine months of the fiscal year;
14) determination of the procedure of the General Meeting of Shareholders;
15) making decisions about approval of transactions in the cases provided by art. 83 of the Federal law "On joint stock companies";
16) making decisions about approval of major transactions in the cases provided by art. 79 of the Federal law "On joint stock companies";
17) making decisions on participation in holding companies, financial and industrial groups, associations and other consolidated business entities;
18) adoption of internal documents regulating activities of the Company's authorities;
19) making decisions on payment to the members of the Revision Committee of the Company of remuneration and / or reimbursement ;
20) making decisions on payment to the members of the Board of directors of the Company of remuneration and / or reimbursement ;
21) making decisions on the other questions provided by the federal Law " On Joint stock companies".

Competence of the Board of Directors of JSC "Kuzbassenergo" " :

In accordance with paragraph 15.1 of the article 15 of the Company's Articles of Association the following issues are within the competence of the Board of Directors of the Company:

1) prioritizing business directions of the Company;
2) convening regular (annual) and extraordinary Meetings of the shareholders of the Company's unless otherwise provided by clause 14.8 of the article 14 this present Articles of Association and announcement on the date of conducting of the new general meeting of shareholders of the company instead of frustrated due to lack of quorum.
3) approval of the agenda of the General Meeting of Shareholders of the Company;
4) appointment of the secretary of the General Meeting of Shareholders of the Company:

5) deciding on the date of drawing a list of persons that are entitled to participate in the General Meeting of Shareholders and other issues that are related to preparation and holding of the General Meeting of Shareholders;

6) submitting issues envisaged by subparagraphs 2, 5, 7, 8, 12-19 of the paragraph 10.2 of the article 10 of this present Articles of Association for discussion of the General meeting of shareholders;

7) deciding on placement of bonds and other issued securities by the Company except the cases provided by the Federal Law "On Joint Stock Companies" and by the Articles of Association;

- ***constructions;;***
- ***working and power machines and equipment;***
- ***measuring and adjustment devices and equipment;***
- ***computer techniques;***
- ***transport;***
- ***instruments;***
- ***production and household equipment and items;***
- ***plough, productive and pedigree cattle;***
- ***perennial plantations;***
- ***interfarm roads;***
- ***other fixed assets;***
- ***capital investments on radical improvement of the grounds;***
- ***capital investments in the rented objects of the fixed assets;***
- ***lands, plots, objects of nature management (being in the property of the company).***

To define composition and classification of the fixed assets it's necessary to guide the All-Russian classifier of fixed assets (OK-013-94) approved by Resolution of the State Committee of RF on standards, metrology and certification dd. 26.12.94 №359.

Drawing up of acceptance of the fixed assets in the composition of the Company is under authority of acceptance committees created:

- ***in the executive apparatus by the Order "On acceptance's order of the fixed assets to the balance in the executive apparatus of JSC 'Kuzbassenergo" dd. 30.12.2003 №711;***
- ***in the subsidiaries – by the same Orders.***

Fixed assets acquired with a purpose to further sale shall be accounted on the account 41 'Goods".

5.1.2. Inventory object shall be regarded as a unit of accounting of the fixed assets that is the object with all adjustments and accessories or separate constructively detached object subject to some single functions fulfillment, or separate complex of constructively jointed objects as an integration subject to the defined work fulfillment (par. 6 PBU 6/01 of Provisions on accounting "Fixed assets accounting" (Order of MF RF №26n dd.30.03.2001).

Inventory cost of the fixed asset's objects, i.e. computers shall be determined as a sum of the price of all devices (system block, monitor, printer, keyboard, mouse etc.) subject to work. Components and peripherals devices purchased as a change of the worn out shall be accounted as spare parts on the corresponding sub account of the account 10 "Materials".

5.2. Fixed assets valuation's ways

5.2.on acceptance to accounting objects of the fixed assets are valuated by the next ways:

a) purchase of the fixed assets for a payment - at a rate of actual expenses of the company for the purchase, defined according to par. 8 PBU 6/01 " the Fixed assets accounting " and gathered preliminary on the account 08 " Investments in non circulating assets ", the sub account " Purchase of separate objects of the fixed assets";

b) construction of the fixed assets by the contract organizations and own-account construction - at a rate of actual expenses for the finished and putted out capital construction according to Provisions on accounting of long-term investments, authorized by the Order of MF of Russian Federation dd. 30, 12. 1993 № 160, gathered preliminary on the account 08 " Investments in non-circulating assets " by one object the subaccount " Construction of separate objects of the fixed assets ";

b) earning of the fixed assets as investments in the authorized (cumulative) capital – in monetary valuation approved by the incorporators (participants) if otherwise is not stipulated by the legislation of the Russian Federation (par. 9 PBU 6/01). The note in the debit of account 08 "Investments in non-circulating assets", subaccount "Acquisition of separate objects of the fixed assets" in the correspondence with an account 75 "Payments with incorporators" is necessary. On the debit of account 08 "Investments in non-circulating assets", subaccount "Acquisition of separate objects of the fixed assets" expenses (including transport and other delivery works) concerned the fixed assets earnings in the authorized capital shall be reflected;

d) gratuitous acquisition of the fixed assets from the legal entities and natural persons also on posting of the fixed assets revealed as surplus over the results of privatization at the market price as for the date of posting. On gratuities acquisition the note in the debit of account 08 "Investments in non-circulating assets", subaccount "Acquisition of separate objects of the fixed assets" from the credit of the account 98 "Further incomes" is made according to corresponding analytics.

On the debit of account 08 "Investments in non-circulating assets " the subaccount " Acquisition of separate objects of the fixed assets " the expenses (including transport and other delivery works, registration fees and other expenses) concerned the gratuitous receipt of the fixed assets also are reflected. In process of amortization charge at the gratuitously acquired fixed assets, simultaneously, at a rate of charged amortization, records on the debit of account 98 " Further Incomes " according to corresponding analytics and to the credit of account 91 " Other profits and losses" in the composition of extraordinary incomes are made;

On surplus posting over results of inventory the record on the debit of account 01 "Fixed assets" from the credit of account 91 "Other profits and losses" is made.

Not accounted real estate revealed in the process of inventory shall be charged in the composition of the fixed assets after the documents submittal to the State registration.

Information on prices in force as for a date of accounting acceptance shall be approved by the documents or by way of expertise (par. 29 Methodical recommendations on the fixed assets accounting (Order of MF RF №91n dd. 13.10.2003).

e) acquisition of the fixed assets under the contracts providing execution of liabilities (payment) by nonmonetary assets at the cost of values transferred or subject to transfer to the Company according to the price which in comparable circumstances the Company usually determines cost of the similar values (par. 11 PBU 6/01);

f) Contract value shall be recognized as the value of the fixed assets acquired under exchange contracts which fixes the contract value of the exchange property;

5.2.2.Expenses on loans and credits (interests etc.) due to the fixed assets acquisition shall be included in the initial value of the fixed assets in accordance with par. 23, 31 of Accounting Provisions "Accounting of loans and credits, also their performance expenses" PBU 15/01 (Order of MF №60n dd.2.08.2001).

5.2.3Expenses (profits) on acquisition of the objects of the fixed assets arisen after its acceptance to accounting

(cost and price difference, nonreimbursable taxes etc.) shall be accounted on the account 91 "Other profits and losses" in composition of extraordinary expenses (incomes) according to the corresponding analytics.

5.2.4.Changes in initial cost of the fixed assets shall be only in cases of completion, after equipment, reconstruction and modernization, partial liquidation and revaluation of the fixed assets.

5.2.5. Complex and partial revaluation of groups of similar objects of the fixed assets over the current (replacement cost) by way of indexation or direct converting according to documentary approved market costs is carried out one a year (as for the 1 January of the reporting year) on the ground of the single Order to the Company, and further is carried out regularly (one time in three year).

Revaluation sum of the fixed asset's object resulted to revaluation shall be charged on the account 83"additional capital" in amount charged minus its discount fulfilled the previous reporting periods and transferred to the account of profits and losses as operational expenses.

Revaluation sum of the fixed asset's object equal to the sum of its discount fulfilled the last previous periods and transferred to the account of profits and losses as expenses shall be transferred to account 91 "Other profits and losses" in composition of operational profits.

Discount sum of the object of the fixed assets shall be referred to the additional capital decreasing composed due to revaluation's sum of this object in the previous reporting periods (par. 15 PBU 6/01, ed. 18.05.2002). Excess of the discount sum of the object of the fixed assets over the sum of its discount related to the additional capital resulted the revaluation spent the previous periods shall be referred to the account 84 "Non distributed profits (uncovered loss)".

5.2.6. Sum of revaluation (discount) arose from revaluation of the fixed assets of the subsidiaries shall be transferred to the executive body of the Company on debit (credit) of account 79 "Intraeconomic payments" on subaccount " Payments on allotted property".

5.2.7. If the object of the fixed assets withdrew the sum of its revaluation shall be transferred from the account 83 "additional capital" to the account 84 "Non distributed profits (uncovered loss)" in composition of profit of the reporting period (par. 15 PBU 6/01, ed. 18.05.2002).

5.2.8. Valuation of the fixed asset's object which cost under acquisition is expressed in foreign exchange shall be realized by way of the sum conversion according to the rate in force of Central Bank of Russia by the date of the object charge to account 01 "Fixed assets".

Furthermore the rate difference shall be accounted on debit (credit) of account 08 "Investments in noncirculated assets" in the credit (debit) of account 91 "other profits and losses" in composition of the extraordinary expenses (profits) (par. 16 PBU 6/01).

5.2.9. Gratuitous transfer and sale of the fixed assets to the third-party companies and natural persons, charge-off of underamortization fixed assets from the balance due to their unfitness to use, also deficient fixed assets revealed under inventory or stolen shall be carried out according to the written resolution prepared by the Department on capital management of the executive body together with visas of corresponding services.

The document shall be subscribed by Deputies general director to the proper place:

- *fixed assets of nonindustrial activities (Housing and communal services, catering, autotransport etc.) – by the first deputy general director on common problems;*
- *industrial fixed assets – by the deputy general director, technical director;*
- *charge-off from the balance of amortized fixed assets due to their unfitness to use, also partial liquidation of the fixed assets shall be carried out on resolution of director of subsidiary or representative office.*

In the process of charging-off from the balance of underamortized fixed assets VAT falling at the underamortized part without revaluations shall be restored.

Stocks of materials and capital equipment remained due to discount of unfit to reconstruction and further use of the fixed assets shall be debited at the market price as for the date of the fixed assets object's discount together with transfer to account 91 "Other profits and losses" in composition of operating profits.

5.2.10. Depreciated cost of the retired object of the fixed assets from the credit of account 01 "Fixed assets" shall be withdraw to the debit of corresponding subaccount of account 91 "Other profits and losses":

- *in composition of operating expenses in case of the fixed asset's retire due to sale, charge-off in case of moral or material depreciation;*
- *in composition of extraordinary expenses in case of the fixed asset's retire due to gratuitous transfer.*

Retire of object of the fixed assets transferred on account of investments in the authorized (composed) capital, pay fund in amount of its depreciated cost shall be reflected on debit of account of expenses accounting and credit of account of he foxed assets accounting.

If the object of the fixed assets has not depreciated cost (fully amortized), amount of the conditional value shall be reflected in bookkeeping as operating profits in the line 09010 of the form 2 "Report on profits and losses".

5.2.11. Expenses on the fixed assets charge-off due to accidents, natural disasters and others emergency situations shall be reflected in bookkeeping of reporting period in composition of emergency expenses.

5.3. Amortization of the fixed assets

5.3.1. The method of amortization of the objects of fixed assets is linear, reasoning from the dates of the effective use of these objects. The amortization of the objects of fixed assets, taken on accounting before 01.01.2002, is accrued in accordance with the Regulation of the USSR Council of Ministers from 22.10.1990 № 1072 "About the unified standards of amortization charges for the complete reconstruction of fixed assets of the economy of the USSR". The amortization of the objects of fixed assets, taken on accounting since 01.01.2002, is accrued in accordance with the Regulation of the Government of RF from 01.01.2002 № 1 "About the classification of fixed assets included in the amortization groups".

5.3.2. The amortization of the objects of real estate property, capital investments of which are completed, all primary acceptance instruments are drawn up, the documentation is handed over the state registration and practically put into operation, is accrued in accordance with the established procedure – since the first day of the month, following the month of setting the object into operation. The objects are regarded as the objects of fixed assets.

5.3.3. The objects of fixed assets at the cost of up to RUR 10 000 per unit are charged off according to the item "Amortization" as far as they are put into production or operation. This operation is mentioned in accounting on debit of accounts of inputs account (selling costs) and account credit 01 "Fixed assets" and drawn up by the Act of charging off according to MB-8 form. Such objects are reckoned in the record keeping at the cost of 0. In case of modernization (reconstruction) of these objects, the modernization (reconstruction) expenses are charged to the increase of the cost of the object and amortized in accordance with the established procedure.

The executive body, affiliated companies and the representative office control the movement of these objects in order to ensure their safety in the process of production and operation. Records management of these objects in places of their operation is kept in "The bill of assets at the cost of up to RUR 10 000, put into operation" according to the suggested form, apart from the fixed assets, depreciated in accordance with the established procedure (Appendix 2 to the present Regulation). Accounts department and persons in charge control the correspondence between the records in the bill and inventory sheets.

The retirement of the objects at the cost of up to RUR 10 000 is drawn up by "The Act of retirement of fixed assets at the cost of up to RUR 10 000", according to the suggested form (Appendix 2 to the present Regulation).

5.3.3. The objects of fixed assets at the cost of up to RUR 10 000 per unit are charged off according to the item "Amortization" as far as they are put into production or operation. This operation is mentioned in accounting on debit of accounts of inputs account (selling costs) and account credit 01 "Fixed assets" and drawn up by the Act of charging off according to MB-8 form. Such objects are reckoned in the record keeping at the cost of 0. In case of modernization (reconstruction) of these objects, the modernization (reconstruction) expenses are charged to the increase of the cost of the object and amortized in accordance with the established procedure.

The executive body, affiliated companies and the representative office control the movement of these objects in order to ensure their safety in the process of production and operation. Records management of these objects in places of their operation is kept in "The bill of assets at the cost of up to RUR 10 000, put into operation" according to the suggested form, apart from the fixed assets, depreciated in accordance with the established procedure (Appendix 2 to the present Regulation). Accounts department and persons in charge control the correspondence between the records in the bill and inventory sheets.

The retirement of the objects at the cost of up to RUR 10 000 is drawn up by "The Act of retirement of fixed assets at the cost of up to RUR 10 000", according to the suggested form (Appendix 2 to the present Regulation).

5.3.4. Amortization of the following objects is not accrued:

- housing resources (par.17 PBU 6/01);

- objects of external accomplishment (par.17 PBU 6/01);

- productive cattle (par.17 PBU 6/01);

- perennial plantations (par.17 PBU 6/01);
- lands (par.17 PBU 6/01);
- objects of nature management (par.17 PBU 6/01);
- fixed assets, received before 01.01.2000 under contracts of donation and gratis in the process of privatization;
- books, brochures and other editions.

5.3.5. The process of amortization accrual can be interrupted by the decision of the director of the affiliated company in the period of restoration (repair, modernization, reconstruction) of the objects of fixed assets, that lasts more than 12 months, and in case of their temporary closing-down for the period of more than 3 months under the order of the JSC "Kuzbassenergo" (par.23 PBU 6/01).

5.3.6. Accrued amortization of the objects of fixed assets of production purposes under the account credit 02 "Depreciation of fixed assets" control account "Accrued amortization" is sent to finance capital investments of production purposes as a record in debit of account 02 "Amortization of fixed assets" control account "Accrued depreciation" from credit 02 "Amortization of fixed assets" control account "Amortization of capital investments".
The off-balance account with the acceptance (transfer) of the funding source among the affiliated companies under off-balance aviso is kept, when nesting at the cost of inter-branch amortization redistribution

5.4. Procedure of accounting and financing of the fixed assets repair

5.4.1. For a current fiscal year the reserve for repair work is created on account 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes" at the rate established by the estimate of expenses of the annual standard of repair cost, including it into production costs monthly (accounts 23, 25, 26) at the rate of 1/12 of annual estimate. The reserve is created to include expenses for all types of repair work of fixed assets of production purposes into production costs.

At year end the adjustment of the repair reserve is performed :

- extra reserved money for the repair of fixed assets (as a result of inventory taking) is reversed an entry.
- in case of stress of reserve money for repair of fixed assets, extra charge takes place under debit of accounts of the records of production costs and on account credit 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes".

Account of repair expenses is carried out separately according to the types of repair (thorough repairs and current repairs) and methods of carrying out (contract and household).

All the expenses for repair of fixed assets of production purposes, carried out with the help of:

- household method – are accounted object by object on account 23 "Auxiliary processes" under control accounts "Thorough repairs of fixed assets using the household method" and "Current repairs of fixed assets using the household method". Later they will be put in corpore into debit of account 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes" every month.
- contract method – are put in corpore from account credit 60 "Settling with suppliers and contractors" on the corresponding control accounts into debit of account 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes"
In case of stress of reserve money for repair of fixed assets (including leasehold assets) of production purposes, debit balance on account 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes" is mentioned in the line of the balance "Other production costs and resource" at the end of month

Expenses for repair of fixed assets of non-production purposes are charged off from the credit of corresponding control accounts of account 23 "Auxiliary processes" or account 60 "Settling with suppliers and contractors" into debit of account 29 "Attendant production and households", without fund creation .

5.5. Account of intangible assets.

5.5.1. Intangible assets include the objects of intellectual property under all implemented terms, mentioned in par.3 PBU 14/2000 " Account of intangible assets"(The Order of Ministry of Finance of the RF from 16.10.2000

№ 91n).

5.5.2. To be taken on accounting the objects of intangible assets are valued in the following ways:

a) intangible assets acquisition subject to payment – at the rate of actual expenses of the Company for the acquisition of the assets, defined in accordance with par.6 PBU 14/2000 " Account of intangible assets"(The Order of Ministry of Finance of the RF from 16.10.2000 № 91n), collected preliminarily on account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets";

b) creation of intangible assets by the Company itself – at the rate of actual expenses for creation and production except for value added tax and other refundable taxes, collected preliminarily on account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets"(par.7 PBU 14/2000);

c) deposition of intangible assets in the authorized (polled) capital – in pecuniary valuation, coordinated by founders (members), if nothing else is provided by the Legislation of RF (par.9 PBU 14/2000).A preliminary record is made in debit of account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets" in correspondence with account 75 "Settling with founders". The expenses connected with deposition of intangible assets in chartered capital are mentioned as well on debit of account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets";

d) non-repayable donation of intangible assets from legal and natural persons - at the common rate at the date of posting. A record in debit of account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets" from account credit 98 "Revenue of next periods" is made. The expenses connected with non-repayable donation of intangible assets are mentioned as well on debit of account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets". The information about the prices, established at the date of taking on accounting, is confirmed authentically or by examining.

By amortization accrual of such intangible assets at the same time at the rate of accrued amortization the records are made on debit of account 98 "Revenue of next periods" in corresponding analytics and account credit 91"Other profits and losses" in non-disposal revenue;

e) acquisition of intangible assets under the contracts, providing for discharge of obligations (payment) with non-monetary funds – at the cost of values, transferred or being subject to transfer by the Company, set reasoning from the price that is fixed by the Company for similar values in similar circumstances (par.11 PBU 14/2000);

f) the cost of intangible assets is the contract value; the assets received under contracts of exchange which fix the contract value of exchanged property;

5.5.3. Amortization of all groups of intangible assets is carried out with the linear method, based on the standards calculated on the basis of the period of the effective use of the objects of intangible assets, using account 05 "Amortization of intangible assets" (par.15, 16, 21 PBU 14/2000).

5.5.4. The period of the effective use of intangible assets is defined independently when the object is taken on accounting, reasoning from the expected period of use of an object, when it is possible to collect revenue. The expected period of the effective use should not exceed the period of validity of a patent, a licence and other legal documents and limits on the use of the objects of intellectual property according the present legislation of Russian Federation (par.17 PBU 14/2000).

If it is impossible to define the period of the effective use of intangible assets, the standards of amortization charges are set counting on 20 years (but it should not exceed the period of functioning of the Company).

5.6. Lease of fixed assets

5.6.1. The leased property is mentioned apart in accounting. All the leased property expenses are carried out on account 90 "Selling". Depreciation of leased property is mentioned on account credit 02 "Depreciation of fixed

assets" and debit of account 90 "Selling".

Full payback of the objects (including local taxes: acre-shot, tax on property, etc.) should be provided in lease contracts.

5.6.2. Account of leased fixed assets is kept on off-balance account 001 "Leased fixed assets" according to the valuation, fixed in lease contracts. Analytic account is kept regarding lessors and every object of leased fixed assets.

5.6.3. Lease contract defines the period of leasing of fixed assets, the amount of rental fee, the terms of the keeping and repair work, valuation changes as a result of thorough repairs, and procedure of settlements.

5.6.4. The property, purchased for leasing and profit earning, is mentioned in accounting on account 03 "Income investments in stocks of materials and capital equipment".

5.7. Account characteristics of the investments in non-circulating assets.

5.7.1. Running expenditures on the CCO (capital construction objects) ((wage cost, travel expenses) are covered at the expense of the funds, aimed at financing of capital construction and included in the inventory cost of exploited objects (par.1.4. of the Regulation on accounting of long-term investments, confirmed by the Order of the Ministry of Finance of RF from 30.12.93 №160).

5.7.2. Every month running CCO expenditures of the executive body are distributed among the affiliated companies pro rata average monthly expenditures (AME) volume of affiliated companies in accordance with the coefficient, calculated as in the ratio of AME volume of an affiliated company for the reporting month and total AME volume of the Company for this month.

5.7.3 Capital construction expenses are included in inventory cost of objects of capital investments at taking them on accounting. They are classified by par.3.1.7. of the Regulation on accounting of long-term investments, confirmed by the Order of the Ministry of Finance of RF from 30.12.93 №160 as the expenses not leading to the increase in the cost of fixed assets.

5.7.4. If the Company has shares when the construction is under way, the transfer of monetary funds or property to the chief builder on the basis of share holding is reflected as a accounts receivable of this construction by the record in debit of corresponding control account of account 76 "Settling with various debtors and creditors" in correspondence with accounts of accountability of monetary funds or property.

When the construction (or it's part) comes to an end the corresponding expenses are taken on account by the record from account credit of the corresponding control account 76 "Settling with various debtors and creditors" in debit of account 08 "Investments in non-circulating assets", control account "Construction of the objects of fixed assets".

5.7.5. If the Company is the chief builder, the money, received from the builders who have shares, is mentioned as money for purpose financing on debit of account 86 "Purpose financing" in correspondence with accounts of accountability of monetary funds or property.

5.7.6. Account of NIOKR in the Company is carried out in accordance with the Regulation on accounting "Account of expenses for research engineering, development and technological activity" (PBU 17/02).

The expenses for research engineering, development and technological activity are recognized in accounting if:

- *The sum of the expense can be defined and confirmed;*
- *There is documentation that proves execution phase;*
- *The results of the activity used in production and operation will lead to revenue in future;*
- *The use of results of research engineering, development and technological activity can be demonstrated.*

The expenses for NIOKR are mentioned in accounting on account 08 "Investments in non-circulating assets" (par.5 PBU 17/02).

The expenses for NIOKR, which results are subject to legal safeguard and drawn up in accordance with legislation order (patents, licenses and other documentation are received to attest the exclusive right of the

Company to possess the results of NIOKR), can be considered intangible assets.

The expenses for NIOKR , which results are not drawn up in accordance with established procedure, are charged off from account credit 08 "Investments in non-circulating assets" for the expenses for usual activities using the linear method during the fixed period (par. 11 PBU 17/02).

The period of charging off the expenses for NIOKR is set within 3 years.

The expenses for NIOKR, which results were not satisfactory, and the results of NIOKR which use was stopped, are drawn up by the decision of PTO of an affiliated company.

The decision can be viewed by the service of PTO of the executive body and with the written permission of the technical director. The expenses are charged off at a time in non-disposal expenses of the reporting period.

5.7.7. The objects of incompleted capital construction, which construction was stopped and won't be carried out because of lack of funds in future, exposed to revaluation, the cost of revaluation is transferred from account credit 84 "Surplus earnings (dead loss)" in debit of account 83 "Surplus capital" and as a record from account credit 08 "Investments in non-circulating assets" in debit of account 91 "Other receipts and expenditures" in the sum of actual expenses incurred.

The charge off the objects of incompleted construction is carried out on the basis of the regulatory document (order, instruction, etc.), prepared by OKS of the executive body with the explanation of the reasons for charging off on the basis of the letter of inquiry of the affiliated company about charging off and inventory carried out.

5.8. Inventory accountability

5.8.1. Inventory includes assets:

- *for being used as raw material, materials, etc. in the process of production, in execution phase and rendering of service, repair work of fixed assets, building and assembly jobs, cultural and educational needs;*
- *aimed at being sold (finished commodity);*
- *aimed at being used as means of labour during the 12-month period;*
- *aimed at being used by the Company for meeting its administrative needs.*

5.8.2. Inventory, tools and household fixings used less than for 1 year-period are included in inventory on account 10 "Materials".

5.8.3. The stock-list number, worked out for a definite name of inventory, is taken as an accounting unit.

5.8.4. Taking on accounting of the inventory, its valuation is carried out in the following ways:

- *acquisition subject to payment – the sum of actual expenses for acquisition except value added tax and other taxes compensated from the budget, defined in accordance with par.6, 11 PBU 5/01 ("Inventory accounting") approved by the Order of the Ministry of Finance of RF from 09.06.2001 № 44n), with the glance of the regulations of par.15 PBU 15/01 "Account of loans and lending and the expenses for their operation" with the glance of interests and other expenses for borrowed current assets (approve by the Order of the Ministry of Finance of RF from 02.08.2001 № 60n);*
- *making by own strength – reasoning from actual expenses, connected with the production of the inventory. Account and formation of inventory expenses is carried out in the order, established to define the net cost of applicable types of production (par.7 PBU 5/01);*

- invested in chartered capital – reasoning from pecuniary valuation, coordinated by founders (members), if nothing else is provided by the Legislation of RF , with the glance of actual expenses for the delivery of the inventory and putting it in conditions for operation, according to par.6,8, 11 PBU 5/01);

- received gratis or under the contract of donation, left from retirement of fixed assets and other property and posting of the inventory, revealed as surplus as a result of inventory taking – reasoning from current market cost considering the posting date with the glance of actual expenses for the delivery of the inventory and putting it in conditions for operation (par.9, 11 PBU 5/01).

- received under the contracts, providing for discharge of obligations (payment) with non-monetary funds – at

the cost of values, transferred or subject to transfer to the Company, fixed reasoning from the price that is fixed by the Company for similar values in similar circumstances. If it is impossible to define the cost of assets, transferred or subject to transfer to the Company, the cost of the inventory, received by the Company under the contracts, providing for discharge of obligations (payment) with non-monetary fund, is defined reasoning from the price, that is more suitable for acquisition of similar inventory in similar circumstances. The actual cost price of the inventory includes actual expenses for the delivery of the inventory and putting it in conditions for operation in accordance with par.6, 10, 11 PBU 5/01;

- The cost of the inventory, received under the contracts of exchange, which fix the contract value of the exchanged property, is the fixed contract value.

5.8.5. The evaluation of the inventory, which cost is evaluated in foreign currency at the moment of acquisition, is estimated in rubles at the rate of exchange fixed by the Central Bank of RF on the day of taking the inventory on accounting.(par.15 PBU 5/01).

5.8.6. The inventory received by the Company without calculated-paid documents (non-invoiced deliver) are taken on discount at the price fixed in the contract. If the price is not fixed in the contract, in order to fix it and the amount of payment or account payable, the price, used by the Company in similar circumstances with similar inventory, is tagged (par.6.1. PBU 10/99). After calculated-paid documents are received, the difference between the actual cost of inventory and its valuation at the moment of taking on discount is included in the same expenses accounts the inventory was charged off, and in the balance of the inventory at the store pro rata its volume.

If calculated documents of non-invoiced delivers were received a year later after the annual accounting had been performed, it means that:

a) account cost of the inventory is not changed;

b) the rate of value added tax is used in accounting in accordance with established procedure;

c) settling with a supplier is being adjusted, the difference between account cost of the inventory and its actual cost is charged off in the month, when the calculated documents were received:

- cost decrease of the inventory is mentioned on debit of account 60 "Settling with suppliers and contractors" and account credit 91 "Other expenses";

- cost increase of the inventory is mentioned on debit of account 91 "Other expenses" and account credit 60 "Settling with suppliers and contractors" (par.41 of Methodical Instructions on the inventory accounting (confirmed by the Order of the Ministry of Finance of RF from 28.12.2001 № 119n).

5.8.7. Merchandise bought for sale by retail are accounted at the value of sales on account 42 "Trading extra charge" (par.13 PBU 5/01). The amount of extra charge, falling at the remains of unrealised products, is fixed reasoning from the percentage of the cost of retired products to the cost of the accounted ones.

5.8.8. Merchandise bought for selling in wholesale are accounted at the acquisition cost with the glance of the expenses for provision and delivery of the products to the stores (bases) till the moment they come into the market (par.13 PBU 5/01).

5.8.9. The inventory, owned by the Company, but being delivered, or transferred to a customer to pawn, is taken on discount in value, fixed in the contract with sequential adjustment of actual cost (par.26 PBU 5/01).

5.8.10. The account of purchased fuel for energy generation is carried out at actual cost and includes: the fuel cost according to the bills of suppliers, including discounts (extra charge) because of poor (good) quality, the payment for other services provided by the supplier and commodity exchange, railway rate quotation of fuel from the shipment place to the station of destination and from the station of destination to discharge arrangements, other expenses according to par.6, 11 PBU 5/01, except the expenses of fuel- shipping department.

The expenses of fuel supply workshop for unloading, warehousing and intraoffice transference of fuel from the stores and fuel delivery for meeting technological needs are not included in the net cost. They are referred to the expenses for power generation of TTTS (par.4.7. of Methodical Instructions on fuel account at heat power plants RD 34.09.105-96).

5.8.11. On putting the inventory (except the products accounted at value of sales) in production and other type of retirement the valuation is appraised at average net cost of each type of inventory.

The average valuation of actual cost of the materials released in production or charged off for other purposes, is estimated by the defining of the actual cost of the material at the moment of its release (sliding valuation).

5.8.12. The putting into production (operation) of the inventory holdings is drawn up as a blading according to form M-11 for intraoffice transference (from one advance holder to another one).

The charging off the inventory in production, except for construction materials, is carried out on the basis of the act of charging off the equipment and other types of the inventory in suggested form (Appendix № 2 to the present Regulation).

The charging off the inventory in production is carried out on the basis of the act of charging off the inventory in suggested form with simultaneous drawing up the blading according to form M-11 for putting in production (Appendix № 2 to the present Regulation).

5.8.13. The account of special tools, special devices, special equipment and working clothes is carried out in the Company in accordance with the Methodical Instructions on accounting of special tools, special devices, special equipment and working clothes, confirmed by the Order of the Ministry of Finance of RF from 26.12.2002 № 135n.

The list of the means of labour accounted as special tools, special devices, special equipment, used for carrying out non-standard operations (par.2 of the Methodical Instructions), is defined by the affiliated company independently reasoning from the peculiarities of the engineering procedure.

When defining the composition and groups of special equipment one should take into account the All-Russian classifier of fixed assets OK-013-94 (confirmed by the Resolution of the State Committee on standards, metrology and inspection certification from 26.12.94 № 359), and the All-Russian classifier of types of economic activity, production and services OK-004-93(confirmed by the Resolution of the Government standard of RF from 06.08.93 № 17).

Special equipment, working clothes and other means of man-to-man defense, regardless of their cost and the period of effective use, is referred to the means put into circulation (par.50 "The Regulation on bookkeeping of RF", confirmed by the Order of the Ministry of Finance of RF from 29.03.2000). These means are mentioned in control accounts 10.10 "Special equipment and working clothes at the store" and 10.11 "Special equipment and working clothes in use", open to the balance account 10 "Materials".

Bedding, tools aimed at carrying out the standard types of production (par.4 of the Methodical Instructions) and other inventory included in the means put into circulation are mentioned in account 10.9 "Inventory and household equipment"

Working clothes and other means of man-to-man defense, special equipment which can be used up to 12 months, according to the standards, are charged off in debit of accounts of expenses for production at the moment of its transference to the workers of the Company (par.21 of the Methodical Instructions)

The charge off the given working clothes, other means of man-to-man defence etc. is carried out on the basis of the act on charging off according to form MB-8 with simultaneous drawing up the blading according to form M-11 for putting in production.

If the period of operation is more than 12 months, the cost of working clothes and other means of man-to-man defense etc. is covered with the linear method reasoning from the periods of the effective use (par.26 of the Methodical Instructions).

To get working clothes, other means of man-to-man defense etc. aimed at long-term use, a worker must sign in worker's personal card (form MB-2) and in the list accounting the issue of the working clothes, other means of man-to-man defense etc. (form MB-7).

The cost of special equipment is covered with the linear method reasoning from the actual cost of the object and standards reasoning from the periods of the effective use of the object (par.24 of the Methodical Instructions). The period of the effective use of special equipment in affiliated companies is set by the permanent Commission individually for each type of special equipment.

The charge off the special equipment and working clothes is carried out in case of actual retirement (obsolescence, depreciation, selling, gratuitous assignment, investment in authorized capital of other companies, disposition in case of an emergency etc.).

5.8.14. The charge off the inventory delivered under the contract of donation or gratis is carried out on the basis of the basic document on the release of materials (the blading on the release of materials, of form M-15, the instructions on the release of materials or the order on the release of materials and "the Act of gratuitous reception- assignment of the inventory" (Appendix № 2 to the present Regulation). The materials are charged off in accordance with par.5.8.11 of the present Regulation. The cost of the donative materials is referred to the finance results of non-realized expenses (par.12 PBU 10/99 "The expenses of the Company" from 06.05.1999 № 33n, par.132 of "The Methodical Instructions on the inventory accounting" from 28.12.2001 № 119n (version of 23.04.2002).

5.8.15. Actual reserves of coal, mazut and other stock of materials are created according to the standards, confirmed by the directors of the Company. It is connected with the seasonal nature of production and energy supply.

5.8.16. The inventory, unloaded by the supplier and had not been delivered at the stores of the Company, which became the property of the Company (regardless of the fact of payment), is mentioned as the inventory that was not delivered at the end of the month.

5.8.17. The reception and posting of the materials is carried out by putting on the documents of the supplier a stamp with essential elements of the posting order (account, blading) (par.49 of "the Methodical Instructions on the inventory accounting" from 28.12.2001 №119n (version of 23.04.2002) and not by the drawing up the posting order (form M-4) if there is no discrepancy between the data of the supplier and actual data (quality and quantity).

5.8.18. The reception, storing, control and issue of ethyl alcohol is carried out in order provided by " Instruction on reception, issue, transportation and control over ethyl alcohol", confirmed by the Ministry of food industry of the USSR 25.09.85 (from here- Instruction). This Instruction covers all the types and kinds of ethyl alcohol regardless of the way of its purchase and the purpose of further use.

The reception and posting of ethyl alcohol is carried out in anhydrous calculus (in decalitres) on the basis of the Act of the form № P-24 "About the shipping and acceptance of ethyl alcohol" (Appendix № 7 to the Instruction) with the glance of data about the actual quantity of ethyl alcohol, received as a result of measuring conducted by the company officials and mentioned in the section of the Act.

The issue of ethyl alcohol to production departments and laboratories is carried out in accordance with par.2.1. of the Instruction and drawn up as a requisition according to form № P-29 to the Instruction).

The results of acceptance and issue of ethyl alcohol carried out on the basis of corresponding posting and expenses documents are fixed in the log book of the measuring of ethyl alcohol according to form № P-23 (Appendix №4 of the Instruction), conducted by the official who is responsible for the acceptance, issue and storing of ethyl alcohol.

In accordance with the requirements of par. 2.6. of the Instruction production departments and laboratories keep records of supply and consumption of ethyl alcohol every day in the book where they fix the name and the number of industrial operations and analysis, the quantity of consumed ethyl alcohol for each operation and for a day.

The rest of ethyl alcohol at the beginning and at the end of the month is shown according to the inventory taking, that is conducted in accordance with section 6 of the Instruction on the first day of each month. The results of the inventory taking are drawn up as the acts according to form №P-27 (Appendix № 21 to the Instruction).

The declarations "About the volume of output and circulation of ethyl alcohol out of food raw material" are shown quarterly by the Company to the rating authorities and executive authorities, granted a license of this type activity, according to appendixes 2 and 7 to the Resolution of the Government of RF from 25.05.99 № 564 "About the approval of the Regulation on avowal of the production and circulation of ethyl alcohol, alcoholic and spirit-based products".

5.9. Account of financial investments.

5.9.1. The account of financial investments in the Company is carried out in accordance with PBU 19/02 "Account of financial investments", **confirmed by the** *Order of the Ministry of Finance of RF from 10.12.2002 № 126n.*

5.9.2. The financial investments of the Company include (par.3 PBU 19/02):

- *state and municipal securities, securities belonging to other companies, including debt securities which fix the date and the cost of acquittance (bonds, bill of credits);*
- *investments in authorized capitals of other companies (including subsidiaries and dependent companies);*
- *loans granted to other companies;*
- *deposit investments in lending agencies;*
- *accounts receivable acquired on the basis of assignment;*
- *investments under the contracts of joint adventure etc.*

5.9.3. Accounting of financial investments is carried out on account 58 "Financial investments" with the division of the investments on short-term and long-term, according to the application date (maturity date) and the intentions:

- long-term investments, when the schedule data of the application (maturity) date is more than one year or the investments are made to collect revenue for more than a year;

- short-term investments, when the schedule data of the application (maturity) date is less than one year or the investments are made without the intention to collect revenue for less than a year;

5.9.4. Financial investments are taken on accounting at original cost. The original cost of financial investments, purchased subject to payment, is the sum of actual expenses of the Company for their acquisition, except for value added tax and other compensated taxes (except cases provided by the Legislation of RF about taxes and tallage).

Actual expenses for acquisition of assets in the capacity of financial investments are:

- *the sums paid to a salesman in accordance with the contract;*
- *the sums paid to the companies and other persons for information and consultation services connected with the acquisition of the mentioned assets;*
- *the bonuses paid to mediator companies or another person through whom the assets were bought in the capacity of financial investments;*
- *the expenses of the received loans and lending, made before financial investments are taken on account, at the acquisition of financial investments at the expense of borrowed current assets (par.15 PBU 15/01 "Account of loans and lending and the expenses for their operation" confirmed by the Order of the Ministry of Finance of RF from 02.08.2001 № 60n);*
- *other expenses connected with the acquisition of the assets in the capacity of financial investments.*

Actual expenses for the acquisition of the assets in the capacity of financial investments are defined according to the differences in sums if the payment is in rubles and makes the sum equivalent to the sum in foreign currency, before the assets in the capacity of financial investments are taken to the account.

5.9.5. The original cost of finance investments made in the authorized capital of other companies is the pecuniary valuation, coordinated among the founders (members) of the companies, if nothing else is provided by the Legislation of RF.

At payment of the deposition in the authorized capital with non-monetary funds on account 58 "Financial investments" the depreciated cost of transferred objects is mentioned. At the reception of the deposition in the authorized capital with non-monetary funds on account 80 "Authorized capital" the pecuniary valuation of the transferred objects coordinated by the founders is mentioned; account 58 "Financial investments" of the founder and account 80 "Authorized capital" of the receiving party will have different cost valuation.

5.9.6. The original cost of the loans given to other companies is the sum of actual transferred monitory funds or the book cost of the property, if the loan presents the property (non-monitory funds).

5.9.7. The original cost of the financial investments, deposition under the contract of joint adventure is the

pecuniary valuation coordinated by the partners of the joint adventure.

5.9.8. The original cost of the financial investments acquired under the contracts providing for discharge of obligations (payment) with non-monetary funds is the cost of assets, transferred or being subject to transfer by the Company.

The cost of the assets , transferred or being subject to transfer by the Company, is set reasoning from the price that is fixed by the Company for setting similar costs in similar circumstances.

If it is impossible to set the cost of the assets transferred or being subject to transfer by the Company, the cost of the finance investments received by the Company under the contracts providing for discharge of obligations (payment) with non-monetary funds is set reasoning from the cost of acquisition of similar finance investments in similar circumstances.

5.9.9. The original cost of the financial investments received gratis such as securities is:

- the ***current market cost on the day of the taking on account. The current market cost of securities is their market price calculated in accordance with established procedure by the trade organizer at the equity market;***
- ***the sum of pecuniary valuation that can be received as a result of received securities sale on the day of their taking on account – for the securities which are not taken into account when the trade organizer at the equity market does not calculated the market price.***

5.9.10. The finance investment which help to set in accordance with established procedure the current market cost are mentioned in accounting at the end of fiscal year at the current market cost by the adjustment of their valuation on the previous fiscal date. The mentioned adjustment is carried out quarterly.

The difference between financial investments valuation at the current market cost on the fiscal date and the previous financial investments valuation is referred to the financial results (composed of operational receipts and expenditures).

Financial investments which do not set the current market cost are mentioned in accounting on the fiscal date at the original cost.

If on the fiscal date the current market cost of the object of financial investments, earlier valuated at the current market cost, the current market cost is not set, such an object of financial investments is mentioned in accounting at the cost of its last valuation.

5.9.11. The original market cost of debt securities which do not set the current market cost is not made into the principal value (par.22 PBU 19/02 "Account of financial investments" from 10.12.2002 № 126n).

5.9.12. On the retirement of the asset, taken on accounting in the capacity of financial investments, that does not set the current market cost its cost is defined reasoning from the original cost of each unit of the accounting of financial investments (par.26 PBU 19/02).

5.9.13. On the retirement of the assets taken on accounting in the capacity of financial investments, which define the current market cost, their cost is defined reasoning from the last valuation.

5.9.14. The valuation of financial investments at the end of the fiscal period is carried out at the original cost of each unit of the accounting of financial investments and at the current market cost (par.32 PBU 19/02).

5.9.15. According to par.6 PBU 19/02 in the analytical account the following information about state securities taken on accounting and securities belonging to other companies is given:

- ***name of the Issuer (Company);***
- ***name of the securities;***
- ***number, series etc.;***
- ***nominal price;***
- ***buying price;***
- ***expenses for the acquisition of securities;***
- ***total amount;***
- ***date of purchase;***

-date of sale and other retirement;

- storing place.

5.10. Account of the foreign currency transactions and payments in conventional units.

5.10.1. The property and liabilities which cost is expressed in a foreign currency, are taken on accounting in ruble valuation converted according to the rate of exchange of the Central Bank of RF on the date of the conducting of a transaction; for drawing up of the accounting – according to the rate of exchange of the latest in the accounting period quotation of rate of the Central Bank of RF (par.3, 6 PBU3/2000).

5.10.2. The ruble valuation of the property (fixed assets, intangible assets, long-term securities, inventory) purchased at foreign currency and posted at the original cost or at the sum of actual expenses for the purchasing (par.9 PBU 14/2000) is not counted over at the drawing up of the accounting.

5.10.3. The differences in rates of exchange arisen as the difference between the ruble valuation of the property or the liability which cost is expressed in a foreign currency calculated at the rate of exchange of the Central Bank of RF on the date of the discharge of liabilities of payment or on the reporting date of the drawing up of the accounting for the reporting period, and the ruble valuation of the property or the liability calculated at the rate of exchange of the Central Bank of RF on the date of the taking them on accounting in the reporting period or on the reporting date of the drawing up of the accounting for the previous reporting period, are referred to on account 91 "Other receipts and expenditures" in the list of non-disposal revenue (expenses) as far as they appear (par.13 PBU 3/2000).

5.10.4. The differences in sums arisen at the settlement for the inventory, performed work, services rendered which cost is expressed in conventional units are included in the expenses for purchasing of the mentioned assets and reflected on the accounts of the inventory and expenses account till the moment of their posting. The differences in sums arisen after the posting of the inventory, performed work, services rendered are referred to on account 91"Other receipts and expenditures" in non-disposal revenue (expenses) as far as they appear.

5.10.5. The differences in sums arisen at the settlement with the banks at the purchase (sale) of a foreign currency at the rate of exchange different from the rate of the Central Bank of RF is referred to on account 91"Other receipts and expenditures" in non-disposal revenue (expenses) as far as they appear.

5.10.6. The differences in sums arisen at other taking (fines, penalties, forfeits), connected with the implementation of the economic contracts, are referred to on account 91 "Other receipts and expenditures" in non-disposal revenue (expenses) as far as they appear".

5.11. The account of the transactions on the settlement accounts.

5.11.1. The settling with debtors and creditors is reflected in the accounting in the sums from the entries and acknowledged by the Company as the correct ones (par.73 of the Regulation on the bookkeeping of RF (the Order of the Ministry of Finance from 29.07.1998 №34n).

The sums on the settling with the banks and the budget are coordinated with the applicable companies, the reservation of the undetermined sums on the balance is not admitted (par.74 of the Regulation on the bookkeeping of RF (the Order of the Ministry of Finance of RF from 29.07.1998 №34n).

5.11.2. The settling with debtors and creditors is reflected on the applicable accounts provided by the Unified work plan of the accounts of bookkeeping of the Company in accordance with the requirements of timeliness and comprehensiveness of the accounting.

5.11.3. In accordance with the admission of time certainty of economical activity facts, the accounts receivable and the bill payable are created in the current accounting in the reporting period when the applicable facts of the economical activity took place, regardless of the actual time of intake or pay-out of the monetary funds connected with these facts (par.6 of the Regulation on the accounting "Account policy of the Company" PBU 1/98 (the Order of the Ministry of Finance of RF from 09.12.1998 № 60n).

5.11.4. The sums received from the customers in the form of Available Funds are reflected on account credit of the applicable control of account 62 "Settling with buyers and customers".
Discharge of liabilities by the discount of the counter claim, including the transient supply, is reflected according to debit of account or account credit of the applicable expenses account.

5.11.5. The discharge by the discount of the counter claim (art.410 of CC of RF) is defalked on the following terms:
- ***the actual existence of counter debts, admitted and unchallenged by the parties;***
- ***the uniformity of the counter claims, that means the comparability of the debts and the possibility of bringing them to the equivalent (pecuniary valuation);***
- ***the date of the discharge of liabilities has come, or it is not indicated or fixed by the moment of claiming;***
- ***the absence in the text of the contract of the term about the inadmissibility of the discount sequential from this contract.***

5.11.6. The discount of the mutual claims is defalked both by the agreement of the parties and on the unilateral basis with informing of the other party, after the revise of the mutual debts and drawing up of the act of the account revise (in the optional form specifying all the requisites needed for the mutual discounts), signed by the plenipotentiaries of the parties.
If the amounts of counter debts differ, the debt which amount is bigger is discharged only in an applicable part, all the rest remains without changes.

5.11.7. Reasoning from par.5.11.5, 5.11.6. of the present Regulation the suppliers liabilities discounts which are not grounded by calculated-paid documents (non-invoiced delivery) are not defalked till calculated-paid documents are received and the factual rate of the bill payable is defined on their basis.

5.11.8. The discounts are not defalked if by the application of the alter the term of actional prescription is subject to the claim and this term is expired (art.411 of CC of RF).

5.11.9. The change of the persons in the liability under the assignment contracts is reflected in the accounting in the following way:
- ***on the assignment of debt to the Company and affiliated companies, for example of the debtors-energy consumers to the affiliated company Energosbyt, the original debtor is substituted for a new debtor if the Company agreed to assign the debt with the reference to the requisites of the principal contract and the requisites of the assignment agreement (par.1 art.391 of CC of RF). The energy debt is reckoned in corpore in the new debtor account, it means that the original liability is not considered to be fulfilled;***
- ***on the assignment of debts by the Company to the other person, the Company debt to the creditor is cut off. The Company debt to the creditors is written off if the creditor agrees to assign the debt to the new debtor with the reference to the requisites of the principal contract and the requisites of the assignment agreement;***
- ***on the assignment of debt of the Company or its affiliated companies to the new creditor, it's reflected in the accounting only after the debt notification of the assignment of debt of the original creditor to the new creditor had been received. The bill payable to the new creditor is still reckoned in corpore in the account of the Company, it means that the original liability is not considered to be fulfilled;***
- ***on the assignment of debts by the Company to the other person, the accounts receivable to the Company are cut off. In the account the accounts receivable on the interests are reflected as a record on debit of the applicable control account of account 62 ""Settling with buyers and customers" in the correspondence with the applicable control account of account 91 "Other receipts and expenditures". The debt of the previous debtor is written off from the balance of the Company at the assignment in accordance with the terms of the assignment contract as a record on debit of the applicable control account of account 91 "Other receipts and expenditures" with the simultaneous charge of VAT to be paid in the budget (ch.21 art.167 par.3 of IRC of RF; art.382 par.2 of CC of RF).***

5.11.10. The own, bank and third party's bills of credit are used in the accounts only through the executive body of the Company.

5.11.11. The drawn own bills are reflected in the accounting on account 60 "Settling with suppliers and contractors" in the applicable analytics in the inner correspondence or in the correspondence with debit of account "Internal accounts on current transactions" of the affiliated company, that received the bill to meet the bill payable.

On getting the aviso of the executive body about the bill drawing the affiliated company withdraws a bill payable, the applicable sums of VAT (except for VAT on capital investments) are transferred from account 19 "Value added tax on acquired values" to the balance of the executive body of the Company:

- ***to deduction at computation in the part of expenses accepted for profit tax computation in the same month (par.1 art.170 of IRC of RF);***
- ***In the part of expenses for capital investments – from the moment of depreciation of the commissioned object (par.5 art.172 of IRC of RF) with the copies of invoices and acts of objects commissioning attached, certified in accordance with established procedure.***

The acceptance to deduction of VAT sums on the acquired values, the bill was transferred to pay for, is carried out in the executive body at the moment of the payment of the own bill with monetary funds.

The handing over of the own bills in pawn to discharge a liability to the creditors is reckoned on the off-balance account 009 "Discharge of liabilities and payment security" with the analytical breakdown of the pawnbrokers.

5.11.12. The acquired bills (own debtors' bills) are reckoned in the accounting at bill sum with a glance of the interests owed according to the issue of bill terms under debit of account 62 "Settling with buyers and customers" in the applicable analytics in the inner correspondence or in the correspondence with account 79 "Internal accounts on current transactions" of the affiliated company, that received the bill to meet the accounts receivable. On getting the aviso of the executive body about the bill acquisition to pay the accounts receivable the affiliated company withdraws the accounts receivable, the applicable sums of VAT on shipment are transferred to the balance of the executive body of the Company:

VAT, owed to be paid in the budget, is reflected in the accounting of the executive body at the moment of payment of a bill with monetary funds or transfer of goods (execution phase, rendering of services) on account of the payment of this bill (par.41.4 of the Methodical recommendations on use ch.21 "Value added tax" of IRC of RF from 20.12.2000, № BG-3-03/447, version of 26.12.2003).

5.11.13. The handing over of the acquired bills (own debtors' bills) to pay the bill payable is reflected in the accounting as a sale of rights of property by a record on debit of account 62 "Settling with buyers and customers" of the applicable control account in the correspondence with account 91 "Other receipts and expenditures" of the applicable control account. The accounts receivable to the Company or its affiliated companies, the bill was acquired to pay for, is written off from the balance by the record on account credit 91 "Other receipts and expenditures" of the applicable control account with simultaneous VAT charge owed to be paid in the budget.

5.11.14.. The acquired bills , including the bills acquired under the endorsement (bank and third party's bills) are reckoned at the rate of actual expenses for acquirement (acquisition) defined in accordance with par.5.9.4. of the present Regulation under debit of account 58 "Financial investments" on the applicable control account in the correspondence with the applicable control account of account 76 "Settling with various debtors and creditors".

If the bill is received to pay the accounts receivable to the Company or its affiliated companies, the accounts receivable is liquidated by the record on the applicable control account of account of the accounts receivable in the correspondence with debit of account 76 "Settling with various debtors and creditors" which reckons the bill payable for the received bill with simultaneous VAT charge owed to be paid in the budget.

If such a bill pays the accounts receivable of the affiliated company, the record is made on debit of control account of account 76 "Settling with various debtors and creditors" which reckons the bill payable for the received bill in the correspondence with account 79 "Internal accounts". On getting the aviso the affiliated company withdraws the accounts receivable by the record on account credit of the account of the accounts receivable in the correspondence with account 79 "Internal accounts", with simultaneous VAT charge owed to be paid in the budget.

5.11.15. The handling over of the bank bill or the third party's bill to pay the bill payable is reflected in the accounting as the property sale by the record on debit of account 62 "Settling with buyers and customers" of the applicable control account in the correspondence with the applicable control account of account 91 "Other receipts and expenditures" (Letters of the Ministry of Finance of RF from 24.06.1997 № 04-02-13, from 07.08.1998 № 04-03-05, from 30.10.1992 № 16-05/4).

The withdrawal of the bill payable is carried out by the record on debit of accounts of the account of the bill payable in the correspondence with the applicable control account 62 "Settling with buyers and customers" with simultaneous acceptance to deduction of VAT sums in accordance with procedure provided by par.2 art.172 of IRC of RF.

If such a bill pays the bill payable of the affiliated company, the record is made on debit of account 79 "Internal accounts" in the correspondence with the applicable control account of account 62"Settling with buyers and customers" which reckons the accounts receivable for the handled over bill. On getting the aviso the affiliated company withdraws the bill payable by the record on debit of account of the applicable accounts of the accounting of bill payable in the correspondence with account 79 "Internal accounts", with simultaneous acceptance to deduction of VAT sums in accordance with procedure provided by par.2 art.172 of IRC of RF.

5.11.16. The retirement of the bank bills and third party's bills from the balance at their submission to the maker for payment is reflected in the accounting under account credit 91 "Other receipts and expenditures" of the applicable control account in the correspondence with the applicable control account of account 76 "Settling with various debtors and creditors".

5.11.17. The accounts receivable with the expired term of actional prescription as well as other debts, unreal for the collection, are written off from the balance.

The unreal for the collection are:

1. The accounts receivable with the expired term of actional prescription;

2. The discharged debts in accordance with art.416, 417,418,419 of CC of RF.

3. The shortage of the property or its anientisement in excess of planned rate, as well as embezzlement loss, if guilty persons are not identified (the fact must be proved by the authorized state authority) or the court refused the recovery of damages.

4.The debts which recovery is impossible on the basis of the Federal Law of RF "About executive production".

Debt amortization is carried out on the basis of the act of debt inventory taking, the written reasoning, the order of the director of the Company on each liability at the expense of the present reserve of the shady debts, if it's not enough it is referred to the list of non-disposal expenses (par.12 PBU 10/99 confirmed by the Order of the Ministry of Finance of RF from 06.05.1999 №33n).

The written debt reasoning includes the index of the ground and the sum of the debt with the reference to the basic account documents; the ground for the debt amortization with the reference to the rules of law with the vouchers attached:

- ***the copies of the basic account documents;***
- ***at the settlement of a debtor:***

a) of a legal person – the extract from the unified state list of legal persons;

b) of a citizen – the death certificate;

c) other documents proving the impossibility of debt collection (the act of state authority etc.).

Debt amortization in sum up to RUR 1500 according to one liability with all necessary documents present, is carried out under the order of the director of the affiliated company.

The accounts receivable written off in view of debtor's insolvency are reflected in the balance sheet during 5 years since the moment of amortization to observe the possibility of its collection in case of debtor property status change.

The terms of actional prescription are fixed on the basis of art.195-208 of CC of RF. The term of actional prescription is interrupted by the filing of a claim in accordance with established procedure as well as by the actions of the person under obligation which prove the acknowledgement of debt. After the break the term of actional prescription opens again, the time before the break is not included in the new term.

The agreement of the parties, the acknowledgement of debt out of the terms of actional prescription as well as the change of persons under obligation can not be the ground for the change of the term of actional prescription

and the procedure of its calculation.

The account of accounts receivable is organized according to the terms of actional prescription to observe par.5 art 167 of IRC of RF.

5.11.18. The amortization from the balance of the unclaimed bill payable and depositor debt with the expired term of actional prescription and under other grounds is carried out at the written permission of the director of the affiliated company according to the standards art.195-208 of CC of RF.

The sums of the bill payable written off are referred to account credit 91 "Other receipts and expenditures" in the list of non-disposal revenues.

The sums of VAT on the bill payable written off are reckoned in the accounting and referred to debit of account 91 "Other receipts and expenditures" in the list of non-disposal expenses.

5.12. Calculation of expenditures on production.

5.12.1. Calculation of expenditures on production shall be carried out in accordance with issue II of Provisions on accounting "Company's expenses" (PBU 10/99 (Order of MF of RF № 33n dd. 06.05.1999.

5.12.2. Calculation of expenditures and calculation of the outputted energy net cost shall be carried out in separate electric plants, electric networks and in energy system as whole.

Full net cost of energy is formed by way of summation of net cost of production by electric plants, net cost of transfer and distribution in electric and power networks, cost of purchased electric power and expenses on the executive body's maintenance including expenses on management of technological process and maintenance of the separate subdivisions on energy selling.

Full net cost of effective output of electric and heat energy to consumers is an object for electric and heat energy net cost calculation.

Calculation units are 1 kw/h and 1Gcal of the effectively outputted electric and heat energy.

5.12.3. Calculation of expenditures on production and calculation of real net cost of production shall be carried out by traditional calculation way with direct expenditure accounts (20, 23,29) and indirect (25, 26). Calculation of indirect expense's accounts shall be closed in debit of accounts 20 (23) with further calculation of full real production net cost of the produced items every month.

5.12.4. Expenditures accounted on account 25 "Common production expense" shall be charged-off fully on account 20 "General production" and on account 23 "Auxiliary process" to the proper with their simultaneous distribution between the calculation's objects at the end of month:

- ***at the power stations proportionally to the standard fuel level, here expenditures of the plants participated in output of only one type of energy shall be fully referred to this type of energy;***
- ***calculation of net cost of production of auxiliary productions - proportionally to the basic salary of employees.***

Common economic expenses (except abonent payment for RAO network's using) on maintenance of the executive body including expenses on maintenance of Energy supply shall be distributed between electric and heat energy proportionally to production expenditures of electric plants and networks.

Expenditures accounted by the subsidiaries on account 26 "Common economic expenses" shall be referred to account 20 "General production", also to account 23 "Auxiliary process" and to account 29 "Auxiliary process and economy" at the end of month in cases of manufacture or production, services and works fulfillment abroad or to other subsidiaries simultaneously their distribution between the objects of calculation:

- ***calculating of net cost of production of auxiliary processes shall be referred proportionally to the shop cost of production, works and services. Thus the sum of common economy expenses accounted for production, works and services of the auxiliary and service shops (production) shall be defined due to this share of common economy expenses related to their direct production;***
- ***rest part of common economy expenses shall be refereed fully to net cost of general manufacture production (expenses on maintenance of design, technological departments and background of department's manufacture, expenses on maintenance of production laboratories, cost of different tests, researches and***

experiments subject to general manufacture; expenses concerned rationalization and research on general production; expenses concerned the employee's training and further training for general production; expenses concerned maintenance of watch and fire prevention; expenses concerned payment of land tax, non productive expenses concerned manufacture and supply of general production and other same expenses). Common economy expenses shall be distributed between electric and heat power proportionally to their shop net cost;

- common economy expenses on services rendered by auxiliary process and auxiliary production and economy) internal consumption by the subsidiary) are not referred.

5.12.5. Net cost of electric power transfer (transit) through the corresponding voltage range shall be defined by product of actual net cost of electric power transfer on corresponding voltage thought electric power plants and Energy Supply and by volume ratio of outputted energy under the transit contract on corresponding voltage to the total volume of corresponding voltage output through the network (except overflow balance to other plants) including electric power outputted under the transit contract in accordance with actual balance of electric power in the networks BH, CH1, CH2, HH.

5.12.6. Finished product (account 43) shall be reflected in accounting on actual production cost.

5.12.7. Expenses concerned production supply accounted on account 44 "Expenses on sale" shall be charged-off fully on account 90 "Sales" in reporting period (par. 9 PBU 10/99).

5.12.8. Expenses incurred in the reporting period but concerned the further reporting periods shall be reflected as future expenses (account 97):

- *holiday pays charge to the next month:*
- *subscription publication's expenditures;*
- *insurance payment charge;*
- *other expenses and payments with further equal charge-off in the related period.*

5.12.9. Expenditures on usual activity shall be classified as in articles , as in elements (par. 8 PBU 10/99).

5.12.10. Expenditures of department on stuff training of the Stuff management department shall be accounted on account 26 "Common economy expenses" separately with further transfer to subsidiaries through account 79 "Intraeconomic payments" in amount of actual expenditures distributed proportionally the volume of rendered works and services.

5.12.11.Expenses on equipment of sanitary-accommodation premises, medical premises, rooms for repose and psychological relaxation, creation of sanitary posts furnished with medicine chests composed of medicine sets subject to initial care etc., provided by the legislation in force, shall be accounted on account 25 "Common productive expenses" according to the fixed norms.

5.12.12. Expenses on preparation and holding of civil defense actions shall be accounted on account 26 "Common economic expenses" (Provisions of the Government №227 dd. 16.03.2000

5.12.13. Accounting of expenses on energy transfer at the energy plants shall be carried out apart of accounting of expenses on energy output on the separate subaccount 20.5 "Expenses on heat energy transporting".

Calculation of the transfer net cost shall be accounted apart of electric and heat power production as the separate activity.

5.12.14. Division into the Company activities shall be carried out according the single issued Order and Provisions on separate accounting over the activities.

5.13. Features of the Company's profits and losses forming

5.13.1. The Company's profits on usual activities are the following:

- *proceeds from electric and heat power sale;*

- *proceeds from increased pay to the rate on reactive power compensation (tangent Fe);*
- *proceeds received for nonrecoverable condensate;*
- *proceeds from makeup and chemical treated water sales;*
- *proceeds from other finished production of auxiliary process sales;*
- *proceeds from agricultural production sales;*
- *proceeds from rendered works (services) of industrial nature (including transit);*
- *proceeds from nonindustrial works (services) sales including profit on sale of medical services to the third parties, profit on sale of tickets in the own medical institutions (sanatorium-preventoriums) to the third parties and to own employees; profit on housing services (rent), services of preschool institution (payment for children keeping), other services of nonindustrial nature (payment for weekend tickets in the sanatorium-preventoriums, rest in tourist centers, in the pioneer camps etc.);*
- *proceeds from good's sale including retail trade (through the stores against cash, also instalment selling against salary), also wholesale trade (profit of inventory holdings sale abroad), foreign trade (export trade);*
- *proceeds from catering goods sale;*
- *earnings concerned temporary use of the Company's assets under the Lease contracts against payment (temporary use and possession).*

5.13.2. Profits on usual activity shall be defined as difference between the earnings on sale of goods, products, works and services according to the current costs and rates on electric and heat power except VAT and expenses on their production and sale approved by REC.

5.13.3. Extraordinary profits of the Company shall be declared the following types of penalties, fines and forfeits against the violation of the contract's terms and provisions;

- *electric power capacity excess;*
- *energy consumption contracted size's excess;*
- *energy consumption contracted size's underexploitation;*
- *unauthorized electrical installation's launching;*
- *nonrecover of condensate;*
- *excess of the fixed by the contract maximum hourly demand of heat energy;*
- *unauthorized water pumping;*
- *excess of the contacted volume of heat energy consumption;*
- *temperature excess of return delivery water;*
- *underexploitation of the contracted volume of heat energy consumption*

shall be reflected on account 91 "other profits and losses" in the moment of profit acceptance.

5.13.4. Social oriented expenses, i.e. additional payment to pensions, incentive pays, expenses on health-improving measures, compationate activity, maintenance of objects of social sphere and other similar expenses shall be deemed as other extraordinary expenses and shall be reflected on account 91 "Other profits and losses".

5.13.5. Sum differences over the payments with debtors-buyers arose this reporting period shall be referred to the earning increasing due to sale.

Sum differences arose after the reporting period shall be deemed as profits (losses) of the last years revealed in the reporting period in the result of re-calculations with counteragents and shall be reflected in composition of other extraordinary profits (losses) on account 91 "Other profits and losses".

5.13.6. Interests on the commercial credit granted to the buyer (customer) by the Company on terms of delay of payment including collateral note received from the customer shall be deemed as other extraordinary profits and shall be reflected on account 91 "Other profits and losses".

5.13.7. By results of inventory of accounts receivable spent at the end of fiscal year the reserves on dubious debts over the payments with debtors with the debtors and the sums of created reserves shall be refereed to the debit of account 91 "the profits and losses" in composition of operative expenses in correspondence with account 63 "Reserves on the dubious debts" (par. 11 Provisions on accounting "Company's expenses" PBU 10/99 (ed. 30.03.2001).

The reserve's size shall be defined separately by each dubious debt depending on the debtor's financial situation and appraisal of probability of a debt repayment fully or partially, also shall be limited by the Company's financial abilities.

Any debtor's debt shall be deemed as dubious debt if this debt was not paid in terms prescribed by the contract and was not ensured with mortgage, voucher of bank guaranty.

Accrued reserve shall be aimed at coverage of losses incurred due to bad debts.

The bad debt is a debt which limitation period has expired or in case of discharge owing to impossibility of its execution on the ground of the act of the State body or of the company's liquidation.

Unused reserve sum of bad debts in the fiscal year shall be added to the profits of the fiscal year together with a record in the credit of account 91 "Other profits and losses" in composition of operative expenses in correspondence with account 63 "Reserves on bad debts".

5.13.8. Energy output to the needs of plants and networks shall be reflected in accounting in appraisal of:

- output to the technological and economy needs of the main and auxiliary processes according to the specially fixed rate without reflection in the sale's volume;

- output to own capital construction and to the non industrial economy according to the fixed rates including reflection in the sale's volume.

Electric and heat power consumed by economic needs shall be included in the sale's volume but shall be transfer in aviso through account 79 "Intraeconomy payments" to subsidiaries without invoicing.

According to the "Standard instruction on electric power accounting under its production, transfer and distribution RD 34.09.101-94 (approved by General State Energy supervision department of Russia (Glavgosenergonadzor of Russia) dd. 02.09.1994), the category of economic needs of energy system involves electric power consumption by auxiliary and non industrial processes being on the balance of electric plants and electric network enterprises obligatory to main production maintenance but not tied directly with technological processes of heat and electric power production at the electric plants, also transfer and distribution of electric power (nomenclature of energy consumption's elements to the economy needs of electric plants and electric networks is defined by the Letter of the Minenergo of USSR №B-6023 dd. 24.04.1980).

Electric power consumption to economic needs of energy system shall be included in the effective output subject to accounting as separate line in form of static report 46-ec "Effective output of electric and heat power" and shall be transferred to subsidiaries according to the special fixed rate.

Electric power consumption to heating, water supply and lighting of dwelling houses, canteens (if these expenses are reflected on b/account 29 "Auxiliary processes and economies"), hostels, hotels, clubs, tourist centers, preventoriums etc. shall not be included in economic needs of energy system.

Also consumers operated from the needs of plants and substations (sub-abonents)are not referred to the economic needs of energy system.

Energy consumed by windings of synchronous condensers and glaze fusion are not referred to the energy consumption to the economic needs of energy system. Aforementioned types of energy consumption form energy losses in electric networks.

Every month according to the reports of PTO of subsidiaries, Energosbyt (Energy supply) shall correct sale's volume on economic need's sum and hand over information on electric and heat power consumed by subsidiaries to economic needs in accordance with approved form "Appendix 2 to this present Provisions) to accounting department of the executive body:

Executive body shall transfer through aviso electric and heat power consumption to the economic needs to the subsidiaries every month. Sum received by the subsidiaries shall be reflected on expenditure accounts (Debit 20,23,25,26; Credit 79).

Heat power (makeup water and unreturned condensate (in tn.) shall be transferred to the subsidiaries through aviso with invoicing by Energosbyt (Energy Supply).

Coordination of parameters with the branch statistical report under the form 46-ES is not provided In the current annual and intermediate accounting. There is a reference to explanation of a reason of data divergence on sales volume with the accounting reporting in the statistical branch report.

5.14. Disposition of profits

5.14.1. Disposition of net profits in the Company shall be approved by the general meeting of shareholders and shall be hold in accordance with Law "On Joint Stock Companies" and with standard documents on book keeping.

8.8. Description of the order of taxation of revenues from the issuer's issued securities placed and in floatation

Order of taxation of revenues from the issuer's issued securities (dividends- on shares, interests – on bonds) shall be adjusted by the Tax Code of Russian Federation.

Table 1: Taxation of legal entities profit tax on the floated securities (subject to floatation) in form of dividends in accordance with legislation if force as for a date 2005:

№№	Category of securities owners	
	Legal entities – tax residents of RF	Foreign legal entities – (non-residents), getting profits from the sources located in RF
1.Profit's name on the floated securities	**Dividends**	
2. Security tax	Profit tax	
3. Tax rate	9 %	15 %
4.Order and terms of tax payment	Profit tax in form of dividends shall be collected from the source of such tax payment and shall be transferred to the budget by tax agent exercised this payment within 10 days form the date of tax payment.	Amount of the tax withheld from the foreign organizations shall be paid to the budget by tax agent at the same time with profit payment in a currency of this profit payment or in a currency of RF at the official rate of Central Bank as for a date of payments.
5. Features of taxation order for this category of securities owners	The total sum of the tax from the sum of dividends is defined as product of tax rate and a difference between the sum of the dividends subject to distribution between shareholders (participants) in the current tax period, reduced on the sums of dividends subject to payment by the tax agent in the current tax period, and the sum of the dividends received by the tax agent in the current accounting (tax) period and the previous accounting (tax) period if the given sums did not participate in calculation under definition of the taxable income as dividends earlier. In case the received difference is negative, the duty on tax payment does not arise also compensation from the budget is not made	Elimination of double taxation. For exemption of taxation or application of a preferential taxation regime the tax payer (foreign organization) should confirm to the tax agent paying the profit before date of the profit payment that he is a resident of the state, with which Russian Federation has the international contract (agreement) adjusting taxation issues. Such confirmation should be certified by the authorized body of the corresponding foreign state. In a case non confirmation before the date of profit payment the tax agent is to obliged to withhold the profit tax of foreign organization. In accordance with par. 2 of art. 312 of Tax Code of RF (part 2) foreign profit recipient has right to reimburse the early withheld profit tax paid by him earlier within 3 years from the date of tax period termination when the profit tax was paid off under condition of granting by the foreign addressee of the income in the tax body according the place of registration of the tax agent of corresponding documents (list is in art. 312 of the Tax Code of RF (part 2). Repayment of early withheld and paid tax shall be fulfilled within the month from the date of application and aforementioned documents.
6. Legislative and standard acts regulating the order of taxation of the aforementioned profits	Chapter 25 "Profit tax of organizations" of the Tax code of RF (part 2).	

Table 2. Taxation of profits of natural persons on the floated securities in form of dividends in accordance with legislation in force as for a date 2005.

№№	Category of securities owners	
	Legal entities – tax residents of RF	Foreign legal entities – (non-residents), getting profits from the sources located in RF
1. Profit's name on the floated securities	**Dividends**	
2. Profits' name on securities	Tax on the natural person's profits	
3. Tax rate	9 %	30 %
4. Order and terms of tax payment	Liability to withhold from the tax payer's income an amount of the tax and to pay it to the corresponding budget shall be entrusted to Russian organization as the source of income of tax payer in form of dividends (tax agent). Charged amount of tax shall be withheld directly from the tax payer's income under its actual payment. Tax agents shall to pay amounts of the accrued and withheld tax not later the date of actual money receipt to tax payment in bank, also the date of income transfer from the accounts of tax agents to accounts of tax payer or on his behalf to the third party's bank accounts.	

The Kuzbass Joint stock Company of energetics and electrification
Tax payer identification number

5. Features of taxation order for this category of securities owners	Total sum of tax on the dividend amount shall be defined as of as product of the rate of the tax and a difference between the sum of the dividends subject to distribution between shareholders (participants) in the current tax period, reduced on the sums of dividends subject to payment by the tax agent in the current tax period, and the sum of the dividends received by the tax agent in the current accounting (tax) period and the previous accounting (tax) period if the given sums did not participate in calculation at definition of the taxable income as dividends earlier. In case the received difference is negative, the duty on tax payment does not arise also compensation from the budget is not made.	Elimination of double taxation. For exemption of taxation, reception of tax charge-off and other tax preferences the tax payer is to submit to the fiscal bodies official approval of his being the resident of the country concluded with the Russian Federation an agreement in force during the corresponding tax period (or its part) on avoiding a double taxation, and also a document on the received income and its payment abroad of Russian Federation approved by the tax body of the corresponding foreign country. Approval may be submitted as before the tax payment, also within one year after the date of termination of tax period under which results the tax payer pretends to elimination of tax payment, set-off, tax deductions and preferences.
6. Legislative and standard acts regulating the order of taxation of the aforementioned profits	Chapter 23 «Profit tax of natural persons" of the Tax Code of RF (part 2), art. 275 of the chapter 25 "Profit tax of organizations", Tax Code RF.	

Таблица 3. Taxation of legal entities profit subject to sale of allocated and subject to allocation securities, also interests from the bonds of the issuer in accordance with legislation in force as for the date 2005.

№№	Category of securities owners	
	Legal entities – tax residents of RF	Foreign legal entities – (non-residents), getting profits from the sources located in RF
Profit's name on the floated securities	**Profits from operations on securities sale, also percents on the issuer's bonds.**	**Profits from Russian organization's shares sale , whose assets more then 50% composed of real estates located on the RF territory, also percents on the issuer's bonds.**
2. Profits' name on securities	Profit tax	
3. Tax rate	24 %, where 6,5% shall be charged off to the federal budget, 17,5% - to the budgets of subject of RF. Tax arte of the tax subject to charge –off to the RF budgets may be decreased for some categories of tax payers according to the legislation of RF subjects. Thus tax rate may not be lower then 13,5%.	20 %

Fax*: (384-2)29-37-77.*

II. General information on the financial and economic situation of the issuer

2.1. Figures of financial and economic activity of the issuer

Figure's name	Calculation procedure	2quarter 2005
Value of the net assets of the issuer, RUR	In accordance with the Order of the Ministry of Finances of Russian Federation and of Federal commission on securities market dd. 29.01.2003 №10n, 003-6/pz "On approval of a procedure of the JSC net assets cost valuation".	27 329 231 000
Relation of a sum of the debt assets to the capital and fund, %	(F.№1 L..590 + F.№1 L. 690 - F.№1 L. 650 - F.№1 L. 640)/(F.№1 L.490 + F.№1 L.650 + F.№1 L. 640)*100	28,46
Relation of a sum of the short-term liabilities to the capital and fund, %	(F.№1 L. 690 - F.№1 L. 650 - F.№1 L. 640)/(F.№1 L.490 + F.№1 L.650 + F.№1 L. 640)*100	15,97
Discharge of payments on debt service, %	(F.№2 L 190 + depreciation - dividends) / (F.№1 L. 620 + F.№1 L. 610 + F. №2. L.070)	-0,12
Level of past-due debt, %	Past-due account payable / (F.№1 L.590 + F.№1 L. 690 -F.№1 L . 650)*100	0,00
Accounts receivable turnover, times	F. №2 L. 010 / (F. №1 L. 230 + F. №1 L. 240 - F. №1 L. 244)	1,16
Dividend's share in profit, %		Dividends were not accrued
Labour productivity, RUR/man	F. №2 L. 010 / average number of personnel	422774

Amount of the net assets is the initial figure of a stability of the financial situation of the company.

As a result of the financial and economic activity of the Company in the 2nd quarter of the year 2005 the net assets were reduced by RUR 475 667 thousands (cost of the net assets in the 1st quarter of the year 2005 amounted RUR 27 804 898 thousands). Such reducing resulted caused mainly by the reducing in the 2nd quarter of:

depreciated cost of the fixed assets by RUR 366 591 thousands;
cash balance on the settlement accounts of the Company by RUR 382 058 thousands,
accounts receivable by RUR 377 234 thousands.

Liabilities excepted from the asset's cost increased by RUR 96 962 thousands during the period under examination.

During the II quarter of the year 2005 the Company suffered net losses amounted RUR 512 583 thousands that affected renewal of owned sources of the Company's assets forming, as his financial ability to cover the external debts.

Turnover of the accounts receivable in the 2nd quarter of the year 2005 as compare with the previous period decreased by 0,02 turns accordingly.

The past due account payable is at the low level (RUR 29 002 thousands) and proves the Company's possibility to pay off his liabilities except the important delay.

2.2. Market capitalization of the Issuer

Trade of the ordinary stocks of the Issuer is carried out at the following trade areas:

Full names and abbreviations of the sale organizers: ***Non commercial partnership " Stock exchange "Russian trade System", NP "Stock Exchange RTS";***

Closed Joint stock Company "Moscow Interbank Currency Exchange", ZAO "MMVB (MICE)".

Non commercial partnership "Stock Exchange "RTS": ***ordinary stock of the JSC "Kuzbassenergo" is bargain in the system "Classic market, stocks". Ordinary stocks 23.06.1997 were included in the list of "RTS-2"; and were excluded from the list of "RTS-2" 04.01.2000 and were included in the list "Classic market of stocks".***

Closed Joint Stock Company "Moscow Interbank Stock exchange": ***ordinary stock of the JSC "Kuzbassenergo" was included in the out list securities since 23.07.2003 s. There were not any bargains with the stocks in the years 2003-2004.***

Market capitalization at the outcome of the year 2000 was calculated by 10 the largest bargains made at the RTS in the month December 2000 and was equal to USD 49 438 720.

Market capitalization at the outcome of the year 2001 was calculated by 10 the largest bargains made at the RTS during the 3 last months of the year 2001 and was equal to USD 72 460 821.

During the year 2001, 129 bargains were made at the RTS, including 3 bargains made in December, 6 bargains within the last 3 months, i.e. the Issuer's market capitalization in the year 2002 was calculated at the cost of share purchase at the stock exchange RTS by 31.12.2002 (0,19 $ x 606163800= 115 171 122 $).

In the year 2003, 55 bargains with the JSC "Kuzbassenergo" shares in a volume of trade equal to USD 1 320 834 or 4 910 139 pieces were registered, calculation of the market capitalization of the issuer was made at the cost of share purchase at the stock exchange RTS by 31.12.2003. Thus, the market capitalization of the issuer in the year 2003 amounted 0,48 $ x 606163800 = 290 958 624 $.

In the year 2004, 48 bargains with a volume of trade USD 1 980 647 or 2 987 610 pieces were registered at the RTS, including 6 bargains in the 4th quarter. Thus the market capitalization need to calculate at the cost of share purchase as for a date of 31.12.2004 (0,681 $ x 606163800 =412 797 548 $).

Information on the market capitalization in the 2nd quarter of the year 2005.
(in accordance with the Stock exchange RTS calculations).

Settling month	Cost over 10 the largest bargains	Period of calculation	Bargain's number for the month	Bargain's number for 3 months	Stock's number	Capitalization, USD
March, 2005	0,69854	3 months	5	> = 10	606 163 800	423 429 661
May, 2005	0,68418	3 months	0	> = 10	606 163 800	414 725 149

Bargains contracted during the II quarter of the year 2005 subject to the capitalization' calculation

Time	Price, USD	Bargain's volume, pieces.	Bargain's volume, USD

Credit portfolio of the JSC "Kuzbassenergo" as for a date of the 01.01.2005 amounted RUR 1 671 535

thousands, including main debt on the credit liabilities amounted RUR 1 666 000 thousands, debt on the accrued but passed percents for credit assets using amounted RUR 5,535 thousands caused by the credit contracts terms. Short term credits attracted with a purpose to increase the circulating assets to pay off the current liabilities of the company.

JSC "Kuzbassenergo" did not make the credit contracts and loan contracts in force by 01.01.2005 the sum of the principal debt under which amounts 10 and more percents of the net assets value.

Credit policy of the JSC "Kuzbassenergo" aims at an attraction of credit resources on more gainful terms of crediting, at a reducing of an interest rate for credit resources using. Borrowed current assets are attracted by the Company at the rate that is lower than the refinancing rate fixed by the Central Bank of RF.

Provisions on the credit policy of the Company were approved by the Board of Directors at the general meeting spent the 28 of December 2004. These Provisions determine the order of fixation of Limits of a debt position and the Limit on cost parameters of loan, the order of the control over their observance, and also measures on reduction of the Debt position according to the fixed Limits in case of their excess aimed at the financial stability and minimization of a risk of insolvency of the Company guarantying.

As for a date of 30.06.2005 the share of the cost of the borrowed assets increased from 6,91 to 8,1 (i.e. by 1,19 percent points) as compare with the 01.04.2005. It was caused by the growth of the Company's credit portfolio in the 2 quarter 2005 by 195 000 thousands roubles, also the growth of a sum of the credit liabilities guarantee in form of own bills of the JSC "Kuzbassenergo" by RUR 45 962 thousands.

Figure's name	As for a date of 30.06.2005.
Value of the net assets by the end of the reporting period, RUR	27 329 231 000
Borrowed assets, total, RUR.	2 213 270 000
Share of the borrowed assets in the value of the net assets, %	8,10

JSC "Kuzbassenergo" did not make the credit contracts and loan contracts in force by 01.01.2005 the sum of the principal debt under which amounts 10 and more percents of the net assets value.

For the III quarter of the year 2005 the Board of directors approved by their decision a credit plan providing:
a) Attraction of the credit assets in amount RUR 1549 millions at the rate not exceeding that in 1,1 time more the rate of refinancing of the Central Bank RF against the security provided by the credit policy of the Company, in the following banks:
- AC SB RF – RUR 200,0 millions;
- JSC "Alemar" - RUR 15,0 millions;
- ACB "MDM" – RUR 954,0 millions;
- JSC "Vneshtorgbank" – RUR 200,0 millions;
- JSC 'Promstroybank" – RUR 150,0 millions;;
- JSC "Alfa-Bank" – RUR 30,0 millions;.
b) Pay off the debt under the credits amounted RUR 1449 millions in the following banks:
- ACB "Kuzbassugolbank" - RUR 87,0 millions;
- JSC "Ural-Siberian Bank" - RUR 100,0 millions;
- AC SB of RF - RUR 200,0 millions;
- JSC "Zenit" – RUR 60,0 млн. рублей;
- JSC "Alemar" – RUR 15,0 millions;
- ACB "MDM " – RUR 700,0 millions;
- JSC 'Promstroybank" – RUR 150,0 millions;

- JSC "Alfa-Bank" – RUR 137,0 millions;

subject to maintenance of a maximal size of lump loan debt on the credits taken by the Company:

by 01.07.05 in a volume not exceed RUR 1600,0 millions;

by 01.10.05 in a volume not exceed RUR 1700,0 millions.

2. Change of the bank-creditor is allowed in case of more advantageous conditions in crediting without changing of the total sum of the taken credit by them.

3. To commit the General director of the JSC "Kuzbassenergo" to ensure observance of a maximal size of the lump loan debt on the credit taken by the company in amount not exceeded RUR 1400,0 millions as for a date of 01.01.2006.

There was not the bound's issue during the reporting quarter.

2.3.3. The issuer's liabilities against the third parties guarantee

In accordance with the reference in the values availability accounted on the off-balance accounts (lines 950-960), included in the Company's accounting report, the total sum of liabilities of the JSC "Kuzbassenergo" by the 30.06.2005 amounted accordingly:

- *guarantee of liabilities and payments received (line 950) RUR 88 608 thousands.*
- *Guarantee of liabilities and payments issued (line 960) RUR 935 832 thousands.*

There were not any liabilities of the issuer against the security given to the third parties, including a pledge or a guarantee amounted not less then 5 per cent of the issuer's assets balance price during the reporting period.

2.3.4. Other liabilities of the Issuer

There are no any agreements including the bargains on term not reflected in the accounting balance and may affect essentially the Issuer's financial situation, also his liquidity, source of finance and their using conditions, activity results and expenses.

2.4. The purpose of the issue and direction of the assets using resulted to distribution of the issuing securities

Issuer did not spent the issue aimed to the assets attraction by the way of the distribution of securities during the reporting period.

2.5. Risks related with acquisition of the distributing (distributed) issuing securities

2.5.1. Branch risks

JSC "Kuzbassenergo" spend its activity only at the internal Russian market in accordance with area character therefore there are no risks related with possible change of a price for the issuer's production at the foreign markets.

The risk of nonfulfilment by the issuer of his liabilities before the owners of the issuing securities as a result of the branch conjuncture change is not subject of this present report because of absence of any liabilities on the dividend payment by the issuer before the owners of the preference stocks and the percents payment off and retirement of bonds.

The Company has no any risks related to the possible change of a cost of raw material, goods subject to using in production and that may affect negatively its activity.

The following factors may be related to the other branch risks:

- Possibility of the exit of large consumers of electric power to the wholesales power (capacity) market. Today there are two segments of power market are in force in our county: Federal wholesales electric power (capacity) market (FOREM) divided in the three isolated zones: European, Siberian and Far Eastern, - and

the sector of free trade "5-15' of the wholesales power market. Activity of the first is strictly regulated and adjusted by the Federal energy committee of Russia (FEC),the second was launched in the 1st of November 2003 as a transition stage of a transfer from the adjustable market to the competitive .

As against the FOREM it is the new sector of free power trade functioning according to the principles of competitiveness and free pricing. Now only the subjects located in the western part of Russia may participated in such sector.

Exit of the enterprises to the FOREM may affect negatively to the JSC "Kuzbassenergo" production output.

- Change of structure of energy consumption at the groups of consumers from the planned at the expense of production volume reduction of a range of industrial enterprises, may lead to reduction of energy output volume in money terms.

- Bankruptcy of enterprises may lead to the impossibility to recover a debt for consummated energy.

- Decreasing of living standard of some groups of population of Kemerovo region will led inevitably to reduction of payment's level of this type of population.

Expectations of the Stock market's participants concerned to the reforming course of energy market.

2.5.2. Country and regional risks

JSC "Kuzbassenergo" is a registered in Russian Federation company carrying out its activity in Kemerovo region, thus some common changes in the State and other regional developments affect on its activity importantly.

Overwhelming majority of economic factors are out of control of the Issuer.

It's impossible to guarantee that some recent tendencies of Russian economic including increasing of Gross National Product , relative stability of RUR and decreasing of the inflation rates will be kept in future. Besides global fluctuations of oil and gas prices, RUR fortification in the real term concerning USD Dollar, also some consequences of liberalization of a monetary and credit policy and other factors may affect negatively Russian economics and business of the issuer.

Russian economics is not protected against market recessions and delay in economic development in different countries of the world. As it was in the past, financial problems or sensitive perception of the risks related to the investments in the countries with developing economy may reduce a volume of foreign investments to Russia and affect negatively Russian economics.

Ecological factors inseparably linked with general activity of the issuer as a production process, transfer and distribution of heat and electric power demands large quantity of natural sources that call environmental pollution. As significant capital investments are necessary to purchase nature-conservative equipment to remove ecological factors of risk , and payments for natural sources consumption.

There are regional risks related with reforming of JSC "Kuzbassenergo". The management of JSC "Kuzbassenergo" spend active consultations with the government of regional and city Administration over the questions of the Company's reforming to reduce such risks.

Such need is due to existence of the Provisions of Kemerovo regional Administration №54 dd. 26.04.2002 "On reforming of JSC "Kuzbassenergo" and №49 dd. 28.03.2003 "On the project of reforming of JSC "Kuzbassenergo" and social protection of employees of energy system in Kemerovo region" where regional authorities raised the range of demands to the management of the Company under the project coordination.

The 20th of September 2004 a trilateral agreement was completed between JSC RAO "UES of Russia", JSC "Kuzbassenergo" and Kemerovo regional Administration which regulates particularly the questions on the future implementation of the program on the JSC "Kuzbassenergo" reforming.

Over the terms of the Agreement the regional Administration will be assist in the reforming process of the energy company, especially under its segregation from the structure of supplying, managing, power and heat networking companies.

Risks depending on the regional geographical peculiarity, i.e.:

- *Damnification risks because of emergency situations of natural factors: periodical floods, earthquake on the territory of Kemerovo region.*
- *According to the long-term forecast made by the Ministry on Emergency Situations of Russia for the period 2005, there will be most possible such man-caused emergency situations of federal and regional level on the territory of Kemerovo region as.*

In the structure of man-caused emergency situation of territorial and superior levels the accidents at the power systems of life support will be prevail (50-525 % of the total number of ES and accidents at the not power systems (15-17%).

Besides, Kemerovo region is characterized by the menace of buildings and constructions failure.

According to the short-term forecasts of emergency situations in the Kemerovo region , the most probable emergency situations of complex of dangerous meteorological phenomena (mudflow, landslide, stone falls), also caused by built-up area underflooding, flooodwatert erosion of roads, bridges and dams caused by ring flood.

Increasing of household fires in the private sector is forecasted because of temperature decreasing and using of electric heaters, and also wiring inflammation. Accidents in the networks of heat and water supply, outage of heating systems of buildings and constructions are possible.

Besides, it is forecasted emergency situations of man-caused nature resulting from the complex of dangerous meteorological phenomena (heavy atmospheric precipitation, force wing, sleet adhering) forecasted in Kemerovo region.

The prediction of the risk of open military conflict also the risk of national emergency are minimal possible on a national level as ethnic and social tension in the region does not bear critical nature. However there is a risk of terrorist acts to fight with the security measures at the strategic objects of JSC "Kuzbassenergo" were considerably toughened.

Under the special control were took electric plants, large electric substations, pump houses, combustive-lubricating production's storages and other category objects.

Admission regime for motor transport and employees was toughened including using of manual and fixed metal detectors at the enterprises.

Artificial barriers were mounted that stop unofficial passage of motor transport on the territory of enterprises.

Car parks were transferred at the safe distance from energy object guards, also active interaction between security of JSC 'Kuzbassenergo" and Motor licensing and inspection department, duty departments of MIA and MES was organized.

Around-the-clock work for vide control and patrol were organized at the most important and the farthest object of energy system.

2.5.3. Financial risks

Variation of interest rates may affect financial and economic activity of the issuer as the enterprise uses borrowed current assets in its activity but its will not have significant effect on the financial showings of the company.

Credit policy of the issuer aimed on attraction of credit resources on more favorable credit conditions.

The company attracted borrowed current assets lower then the rate of refinancing fixed by the Central Bank RF (13%).

Weighted average interest rate for the using of credit resources by the company was 11,42% by the 01.07.2005, i.e. by 0, 13 per cent's points lower then by the 01.04.2005.

Inflation effect: Over the forecast made by the International Currency Reserves the inflation in Russia over the results if the year 2005 will be amount 11-11,5%. Particularly the salary depends on the general standard of price in Russia.

The salary is indexed by the issuer. As a whole the effect of inflation factors on the financial stability of the

issuer does not seem significant in future and is subject to predict in business-planning of the company.

In the tariff forming there is a risk that the Kemerovo Regional Energy Committee will fix the tariff rate not covering industrial costs and drop-out income because of reducing of profit volume.

So, the Regional Energy Committee fixed an average electric power rate at the level amounted 65,8 copecks, as heat power rate amounted 310 roubles /Gcal fro the year 2005.

It corresponds to the upper limit level of growth determined by the Federal rate service (FRS), i.e. electric power – 12,2%, and heat power – 10,8% accordingly.

Moreover, fuel purchase expenditures amounted RUR 400 millions were not included in the rate base. REC did not accounted repair expense amounted approximately RUR 300 millions in the year 2005.

Also the company's insurance expensed were not taken into account fully , thus the production assets may be insured less than for a half year , the rest calendar time such a type of financial defense of property against the unexpected developments will not be valid.

The issuer does not bear any exchange rate risks as he is carrying out his activity only at the internal market.

There are the financial risks of the issuer concerned the future reforming of the issuer (reorganization by the way of segregation):

- risk that the creditors of JSC "Kuzbassenergo" having received the notification on adopted decision on reorganization , will demand the advanced repayment of account payable, execution of corresponding liabilities and payment of damages sustained under the Company's reorganization in form of segregation (par. 6 of art. 15 of FL "On Joint Stock Companies"). Creditors having restructured debts for long-time period may act as initiators: JSC RAO " UES of Russia", Tax Ministry, Out budget Funds. Approximate amount of commercial restructured debts subject to demand amounts RUR 3014,4 millions;

- risk that the shareholders having voted against the reorganization or not took participation in the voting will demand the redemption of all or part of the stocks of JSC "Kuzbassenergo" belonging to them and possibility of loss to 10 % of a price of net assets because of satisfaction off the shareholder's demands of the stocks redemption under the reorganization of the companies in form of segregation (art. 75, 76 of FL "On Joint Stock Companies"). Approximate volume of assets subject to redemption of stocks amounts RUR 587,979 million.

2.5.4. Legal risks

There are some legal risks concerned the change of exchange regulation, modification of tax legislation, change of regulations of the customs supervision and fees, modification of requirements on licensing, court practice that may affect negatively on the activity's results of the issuer also results of the current legal trials subject of participation of the issuer.

- Modification of tax legislation in part of increasing of tax rates or change in the order and terms of tax calculation and payment may led to decreasing of net income of the issuer that may led to reducing of amount of the dividends subject to payment.

- Change in requirements on licensing of main activity of the issuer may led to increasing of a period for document preparation obligatory to extend a term of duration of the license, also necessity of accordance of the issuer with the produced requirements. However as a whole this risk should be deemed as insufficient except the cases when to extend the duration of the license or to exercise an activity subject to licensing some requirements will be provided that the issuer will not may correspond with or when the corresponding with these requirements will be caused with excess costs that may led to the issuer's activity termination.

- There were not any modification of the court practice related with the issuer's activity that might affect negatively on the results of his activity during the reporting period.

2.5.5. Risks related with the issuer's activity.

In the reporting period there were not such suits that may lead to the issuer's liquidation.
Some cases on tax and fees debt recover to the budget and off-budget funds are under examination in different institutions, but the issuer does not avow them as substantial cases.
Their admission by the issuer or juridically levy may not lead to the Company's liquidation, bankruptcy acknowledgement, as to lead to the negative consequences for the Company.

The Issuer has no the risk concerned the lack of possibility to prolong the period of validity of the Issuer's license to the specified activity.

Other essential risks proper to the issuer are absent.

III. Detailed information about the issuer

3.1. Information about the issuer's establishment and development

3.1.1. Information about the issuer's company name

full company name and abbreviation:

Kuzbass Joint stock Company of energetics and electrification
(JSC «Kuzbassenergo»).
Before the privatization – Kuzbass industrial institution of energetics and electrification ("IIEE "Kuzbassenergo")
Kuzbass Open Joint Stock Company of energetics and electrification (OJSC "Kuzbassenergo")
Introduced: ***30.12.1993***
Kuzbass open joint stock company of energetics and electrification (JSC "Kuzbassenergo")
Introduced: ***15.05.1996***

3.1.2. Information about state registration of the issuer

Date of state registration of the issuer: 30.12.1993
Number of state registration's certificate (other document ratified the state registration of the issuer): 1901
Name of registration authority: Kemerovo Administration
In accordance with Federal Law "On State registration of legal entities" the corresponding record under the state registration number 1024200678260 was made in the Uniform State Register of Legal Entities the 23rd of July 2002 (certificate: series 42 №001926135 issued by Administration of the Russian Ministry of Taxation in Kemerovo, Kemerovo region).

3.1.3. Information about the issuer's establishment and development.

The issuer was established in accordance with a privatization schedule of the Kuzbass industrial institution of energy and electrification (IIEE "Kuzbassenergo").

In pursuance of the Decrees issued by the President of the Russian Federation, i.e. № 923 dd. August, 15, 1992 « About the organization of management system of the electric-power complex of the Russian Federation during privatization », № 1334 dd. November, 3, 1992 « About realization in the electric- power industry of the Decree issued by the President of the Russian Federation dd. August, 14, 1992, № 922 « About features of transfer of the state enterprises, institutions, organizations of fuel and energy complex into the joint-stock companies », № 721 dd. July, 1, 1992 « About organizational measures in the transfer of the state enterprises, voluntary associations of the state enterprises into the joint-stock companies », the Committee on administration of the state property of Kemerovo region has made the Decision № 330 « On privatization and transfer of IIEE "Kuzbassenergo" into the Kuzbass open joint-stock company of energy and electrification » dd. 21.09.1993.
The Order № 345 « About registration of open joint-stock company "Kuzbassenergo" was approved by Kemerovo Administration the 30th. 12.1993.
The common purpose of the privatized companies was increasing of the efficiency of energy system of the country and transfer from the planned economic to the market relations.

JSC "Kuzbassenergo" was established for and indefinite period of time.

The main purpose of the JSC "Kuzbassenergo" activity is the profit earning.
Activities of the JSC "Kuzbassenergo" are as follows:

- ***electricity and heat energy production;***
- ***electricity and heat energy transmission;***
- ***electricity and heat energy supply (trade) according to the fixed tariffs in accordance with the dispatcher's schedules of electric and heat demands;***

renders the following services:

- ***energy supply to energy saving enterprises;***
- ***communication facilities, including telecommunications;***

carries out:

- ***capital repairs***
- ***technical reequipment;***
- ***reconstruction and development of regional energy system;***
- ***mounting, arrangement and repair of energy objects; electric and heat energy equipment;***

3.2. Principal economic activities of the issuer
3.2.1. Industrial affiliation of the issuer

OKVED (All-Russia classifier of types of economic activity) codes :
40.10.11 –Production of electric power by heat plants
40.10.2 – Energy transmission
40.30.2 – Steam and hot water transmission (heat energy)
51.56.4 – Wholesales of electric and heat power (without its transmission and distribution)
74.60 –Investigations and protection
74.14 – Consulting over the questions on commerce and management.

3.2.2. Principal economic activities of the issuer

The principal activities of the JSC "Kuzbassenergo" are • production, transfer and distribution of electric and heat energy.
JSC "Kuzbassenergo" is a subject of natural monopoly working in the sphere of services on transmission of electric and heat energy on the territory of Kemerovo region.

Share of profit of the main activity in the total volume of profit of the JSC "Kuzbassenergo"»

Period :	2 quarter 2005	2 quarter 2004	1 quarter 2005
Aggregate profit, RUR thousands	4 825 352	3 919 409	6 218 325
Profit of the main activity, RUR thousands	4 141 062	3 567 981	5 524 753
Share of profit of the main activity in the aggregate profit %	85,82	91,04	88,85

As the aggregate profit of the Issuer it means the sum of sales proceeds, operational and extraordinary profits – according to the data of the form № 2 "Profit and losses report" (line 010 + line 060 + line 080 +

line090 + line 120).

Share of profit of the main activity in the total volume of profit reduced by 3,3% during the reporting period as compare with the same period of the previous year.

Share of profit of the JSC "Kuzbassenergo" of the main activity

Production	Share of profit, %		
	2 quarter 2005	2 quarter 2004	1 quarter 2005
Electric power	73,24	77,05	62,27
Heat power	12,58	13,99	26,58
Total:	85,82	91,04	88,85

In the reporting period as compare with the same period of the previous year the share of profit of the electric power output reduced by 3,81%, but as compare with the previous quarter it increased by 10,97%;
Share of heat power output reduced by 1,41% as compare with the same period of the previous year, and by 14,00% - as compare with the previous quarter
Electric and heat power production have a season nature, i.e. heat power output reducing took place that have effect to the share of profit of the principal activity.

3.2.3. Principal types of products (operations, services)

Principal types of products of the JSC "Kuzbassenergo" are of electric and heat energy.

Figure's name	1 quarter 2005	2 quarter 2005
Proceeds from the production sale (work, services), RUR - electric power - heat power	3 872 180 000 1 652 573 000	3 534 293 000 606 769 000
Share of the aggregate proceeds volume, % - electric power - heat power	 68,10 29,06	 81,2 13,9

Share of the aggregate proceeds volume, % was calculated by formula: (part of the line 010 №2 falling at the principal activity type) / line 010 of the form №2.

Total structure of the net cost of the Issuer

Outlays items	By the 30.06.2005
Raw materials and soft goods, %	1,6
Purchased components , prepared raw materials, %	-
Work and services of industrial nature fulfilled by the third-party firms, %	1,3
Fuel, %	41,6
Electric power, %	3,7
Remuneration of labour , %	7,0
Credit interests , %	-
Rent, %	-
Assignments to the social needs, %	1,8
The fixed assets depreciation, %	11,4
Taxation included in the production net cost, , %	4,3

Other outlay (explain), % - abonent payment for the RAO UES of Russia networks exploitation, % - intangible assets depreciation, % - remuneration of the rationalization proposals, % - obligatory insurance payments, % - representative needs outlay, % other, %	 12,0 15,3
Total: outlay on production and sale of products (work, services), (net cost) ,%	100,00
Proceeds of the products sale (works, services) ,%	116,5

Record keeping of the net cost is in accordance with the Tax Code of Russian Federation, part II dd. 05.08.2000 №117-FL and with the Accounting policy of the JSC "Kuzbassenergo" not stipulated a separate accounting at the products(work, services) types.

3.2.4. Raw materials and suppliers of the issuer.

Principal raw material used by the JSC "Kuzbassenergo" is a fuel. Kuznetsky coal and its cleaning rejects are used as the principal fuel at the power plants of JSC "Kuzbassenergo".
Fuel oil is used as starting fuel and meant for maintenance of burning during low quality coal firing, and as the principal type of fuel at the Zaiskitimskaya water-heating boiler plant.

The Major suppliers of coal are(not less than 19% of all supply): Trade House of the Joint Stock Company Coal Company " Kuzbassrazrezugol" (Kemerovo); Joint Stock company "Siberian Coal And Energy Company (Moscow).

The issuer's suppliers whose share is about 20 and more percents of all supplies of inventory holdings, including their share in the total volume of supply.

Coal suppliers	location	2 quarter 2005
TH JSC Coal company "Kuzbassrazrezugol"	4a, Pionersky boulevard, Kemerovo,650000	40,02 %
JSC "SUEC"	7, stroenye 22, Derbenevskaya naberezhnaya, Moscow, 115114	29,87 %

Purchase price per one ton of coal within the reporting period increased by 20-40% as compare with the corresponding period of the previous fiscal year.
By the beginning of the III quarter 2005 the stocks of coal amounted 1 million 51 thousand tons at the warehouses of electric plants of the JSC "Kuzbassenergo" against the target task of the JSC RAO UES of Russia amounted 920 thousands ton).
Mazut was filled up by 16 thousands ton – 100% of the target task of the JSC RAO 'UES of Russia".
As for the winter fuel stocks does not create the Company's anxiety.

3.2.5. Markets for products (work, services) of the issuer

Power industry is practically the unique industry whose products and services consumers are all industries and private sector. There are two markets for energy distribution in Russia: wholesales and retail trade. Heat energy distribution is only at the retail market.

Kemerovo region is the principal market where the JSC "Kuzbassenergo" carries out his activity.

The Kemerovo region is located in the south-east of the West Siberia at the joint of the West-Siberian plain and the mountains of the South Siberia. It is located at almost equal distance from western and eastern borders of the Russian Federation. It is in the 6th time zone.

Output of electric power to the consumers is according to the contracted "Agreements about output and using of electric power".

Composition of consumers of electricity and heat energy at the retail market is in the table stated above by an example of a scheme illustrating electricity and heat energy distribution

Structure of electric and heat power sale by the branches

	output to own consumers	
	electricity (thousand kw)	electricity (thousand kw)
Total in power system	5 435 351	2 010 224
I. Industry	3 913 346	632 067
Specific weight (%)	**72,0**	**31,4**
1. Fuel, total	1 272 139	13 090
Specific weight (%)	**23,4**	**0,7**
2. Ferrous metallurgy	2 059 441	121 639
Specific weight (%)	**37,9**	**6,1**
3.Non-ferrous metallurgy	5 168	36 568
Specific weight (%)	**0,1**	**1,8**
4. Chemistry and petrochemistry	346 326	401 303
Specific weight (%)	**6,4**	**20,0**
2. Agriculture	52 011	25 550
Specific weight (%)	**1,0**	**1,3**
3. Transport and telecommunications	322 679	15 441
Specific weight (%)	**5,9**	**0,8**
4. Construction	13 094	6 899
Specific weight (%)	**0,2**	**0,3**
5. Housing and communal services	104 120	1 216 382
Specific weight (%)	**1,9**	**60,5**
6. Population	56 791	1576
Specific weight (%)	**1,0**	**0,1**
7. Other industries	972 874	112 162
Specific weight (%)	**17,9**	**5,6**

According to this table, the largest consumers of electricity at the retail market are industrial enterprises, i.e. 72,0 %.

In the I quarter 2005 share of industrial enterprises amounted 66,1%.

In the industrial sector the leaders on power consumption are the enterprises of ferrous metallurgy, their share amounts 37,9% (in the I quarter of the year 2005 – 34,4%).

In the structure of heat energy output enterprises of housing and communal services (more 60% of consumption) and industry (more 30%).Chemical and petrochemical enterprises are the leaders on heat energy consumption in the structure of industry (20,0%).

Factors which may adversely affect the distribution of the Issuer's products (operations, services) and possible measures of the Issuer to reduce such impact:

The following factors may adversely affect the volume of electricity and heat energy distribution:

- JSC "Electric network" send us an application on their desire to make an electric power transit contract with a purpose to enter to the wholesales power (capacity) market. This consumer meets the requirements by

the number of installed capacity (272MBA). In case if the power accounting system to bring to conformity with the market requirements and exit to the free trade market the lost profit of the JSC "Kuzbassenergo" will be amounted RUR 8 699 thousands in a year.

- Ltd. "Topky cement" and JSC PO "Khimprom" (total installed capacity - 378 MBA) whose AIIS answer requirements of the market bylaws have a technical possibility to cover their power consumption due to purchase of electric power at the adjusted sector of wholesales market. The lost profit of the JSC "Kuzbassenergo" in such a case will be amounted RUR 98 132 thousands a year.

- also due to launching of the second price zone of the wholesales power (capacity) market of a transition period on the territory of Siberia since the 01.05.2005 the consumers whose power receiving devices answer the standard requirements to receive a status of a member of the free-trade market (aggregate installed capacity is more than 20 MBA, installed capacity of the each GTP is more than 4MBA) has a possibility to purchase in the free trade market of the wholesales market au to 15% of the own scheduled consumption.

35 consumers of the JSC "Kuzbassenergo" answer the aforementioned criteria (total installed capacity – 11 569 MBA). In case of an exit of these consumers to the wholesales power (capacity) market and purchase in the FTM up to 15% of the own scheduled consumption the amount of the lost profit of the JSC "Kuzbassenergo" will be amounted RUR 318 339 thousands a year.

To prevent such a situation, "Enrgosbyt" acting as an affiliated company of the JSC "Kuzbassenergo" grant to the aforementioned consumers the preferential contract terms (payment period, penalties etc.).

The following factor of a consumption's reducing, especially of heat power consumption, is an implementation of energy saving technologies , also launching and capacity increasing of the own heat power sources at the industrial enterprises. Besides, a stable work of the industries lets to use in full volume their own secondary power sources.

Also more late and early termination of the heating season by the companies , against the previous periods, affect the heat power consumption reducing. JSC "Kuzbassenergo" can net effect such facts.

Insufficiency of limits and delay in financing of charges on payment of heat and electric energy for budget consumers.

To prevent delay in financing of budget consumers , JSC "Kuzbassenergo" subscribes every month Agreements on payment s for consummated energy with Kemerovo regional Administration, General Financial Department of region, Heads of the cities and districts.

Kemerovo regional Administration spend conferences with obligatory presence of the city and district Administration in the person of their Heads, also Managers of the territorial financial authorities, managers of enterprises of housing and communal services and city electric networks.

Joint activity is since the 28.10.2001

3.3. Future plans of the issuer

Purposes of the JSC "Kuzbassenergo" for the year 2005.
Principal purpose of the company for the year 2005 will by reliable and regular electric and heat energy supply to the consumers, providing profit earning, increasing of the company's capitalization and increasing of its investment appeal during the reforming process of energy industry in Russian Federation.
Principal production purposes of the company for the year 2005 will be the following:
1. reliable and regular electric and heat energy supply to the consumers of the region especially in autumn and winter periods with proper maximum load;

2. fulfillment of the program of repair of the equipment of power stations, electric and heat networks;,

3. fulfillment of the task of JSC RAO "UES of Russia" on creation of fuel reserve in the warehouses by 01.01.2006;

4. Fulfillment of the investment program of the Company.

Thus the following production works will be priority:

Putting into service the boiler of station № 16 ТП-87М-type with steam capacity of 420 t/h at the Kemerovskaya GRES;

- reconstruction of the boiler of station № 8, ТП-10-type with the purpose of reduction of NOx emission at the Tom-Usinskaya GRES;
- modernization of electric precipitators of the boiler of station № 14 at the Kemerovskaya GRES;
- introduction of three-stage fuel burning in the boiler of station № 11 with the purpose of reduction of NOx emission at the Kemerovskaya TETS;
- reconstruction of ash-catching installations of the boiler of station № 8 at the Novo-Kemerovskaya TETS;
- installation of the fire-extinguishing system of fuel feeder at the Tom-Usinskaya GRES, Belovskaya GRES, the Thouth-Kuzbass GRES, Kemerovskaya GRES, the Western-Siberian TETS, the Kuznetskaya TETS;
- reconstruction of SS Pashkovsk 35/10 KWt with replacement of oil circuit breakers for electrogas ones in the Western electrical networks;
- installation of ASDU system of the tidal electric station in the Northern electrical networks;
- replacement of the transformer of 32 MVA for 40 MVA at SS Tyrgansk in the Central electrical networks;
- reconstruction of ZRU of 6 kV with replacement of oil circuit breakers and PZA SS of 356 kV at SS Abashevsk 1/2","Severnaya" in the Southern electrical networks;
- above-ground laying of the head section of heat pipeline 2 Du 600 mm of the Kuznetskaya TETS from TK-1 up to TK-2 with a bridge system above the railway in the thermal networks;
- introduction of the automated informational-measuring system of the commercial accounting in the Energosbyt;

In part of financial activity the following activities will be priority for the company in 2005:

1. Fulfillment of the expenses reduction program including by way of future development of the competitive system on purchase of goods, works and services;

2. Fulfillment of the Amicable agreement's terms with the Company's creditors as a guarantee of successful reforming;

3. determination of economic based tariffs for the Company;

4. Increasing of financial stability of the Company, decreasing of a distance between the accounts receivable and account payable;

5. Guarantee of the investment appeal of the Company.

To further reforming of the company in the year 2005 the following tasks will be priority:

1. The company's reforming project coordination with the largest shareholders, state authorities and management;

2. Full termination of the preliminary stage on the Company's reforming in part of split-off all not profile activity types and not profile property;

3. training of a stuff reserve of managers and leading specialists to form the newly creating companies;

4. perfection of forms and methods of the corporate governance, maximum transparency of the company as a public company playing an important role in the regional life.

In accordance with the program of technical development of the company for the years 2001-2011 aimed to ensure reliable work of the plants and timely change of the used technological equipment in the year 2006

the Company needs:

- not to stop in searching of contracting organizations and suppliers for construction, reconstruction and technical reequipment of objects on a competitive basis;

- to define their priorities in forming of investment program for 2-3 years for incompleted construction objects and adoption of cardinal decisions;

- to tie investment program of the Company with the sources of financing, also timely putting into operation of the objects;

- to continuer the ash-damp dams extending and to start construction of new ash-damp dams where the reserves for slash warehousing are limited for the possible filling.

For the next 3-5 years it is necessary to fulfill the following works affecting the total power system security :

- Reconstruction and putting into operation of a turboset of st. №8 at Novokemerovskaya TETs of a type PTR-80-130(RUR 500 millions) in 2006;

- Putting into operation of a turboset of st. №3 of a type R-12-29 at the Kuznetskaya TETs in 206 to cover a deficit in extracted steam for makeup water heating and increasing of electric power output due to thermal input;

- Putting into operation of a turboset of st. №15 of a type T-115-130 at the Novo-Kemerovskaya TETs capacity 115 Mwt with investments volume equal to RUR 900 millions (including ASU TP) in 2008;

- To proceed with designing and approval of a starting complex of stem boiler of st. №5 at the Kuzbass TETS capacity 160t/h with launching in 2007;

- To replace the turbine of st. №9 of a type r-35-130 by the turbine of a type T-120-12,8 at the Kemerovo GRES in a value of RUR 600 millions;

-To reconstruct a turboset of st. №11 and 12 on a type R-12-90/31 at the Kuznetskaya TETs in a value of RUR 200 millions;

-To reconstruct electrical filters of boilers of type TP-87 to gain standard dustiness of smoke fumes and to fulfill norms of maximum ashes emissions; to reconstruct electrical filters together with increasing of ash collecting up to 99% at the West Siberian TETs;

- To fulfill the directives and prescriptions of the State supervision authorities in the all affiliated companies in amount equal to RUR 60 millions.

- To change electric equipment in the affiliated companies in amount equal to RUR 100 millions.

3.4. The Issuer's participation in industrial, bank and financial groups, holdings, trusts and associations

JSC "Kuzbassenergo" does not participate in industrial, bank and financial groups, holdings, trusts and associations

According to the Order of the President of RF "On additional measures to ensure governance of power complex of Russia " dd. the 3rd of March 1998 the force of the paragraph 3 of the Temporary Provisions on the holding companies created under the State enterprises reforming into the joint stock companies approved by the Order of the President of RF dd. 16 of November 1992 №1392 "On the measures on the production policy layout under the privatization of the state enterprises" is not spread to the Russian joint stock company "UES of Russia".

JSC "Kuzbassenergo" is a subsidiary of Holding company RAO "UES of Russia" according to the art. 2.3. of the Articles of Association.

3.5. Subsidiaries and affiliated business divisions of the issuer

JSC "Kuzbassenergo" has 12 subsidiaries.

These companies are regarded as subsidiaries according to the Civil code of Russian federation (art. 105 and 106) and Federal law "On Joint Stock Companies" (art.6).

Profitability of production (sales), %	F. №2 L. 050 / F. №2 L. 010 * 100	1,64
Sum of the uncovered loss by the reporting date, RUR	F. №1 L. 465 + F. №1 L. 475	0
Ratio of the uncovered loss at the reporting date and the balance currency	F. №1 L. 475 / F. №1 L. 300	0,00

During the reporting quarter the proceeds from sales of the commodity output amounted RUR 4 353 728 thousands, i.e. lower by 1332 607 thousands roubles as compare with the 1st quarter of the year 2005 .

Due to termination of a heating period, profit on power sale in the 2quarter 2005 as compare with the previous period decreased by RUR 1 383 691 thousands or by 24,4%, proceeds from other activity increased by RUR 51 084 thousands or by 31,6% during the 2nd quarter.

During the period under examination the net cost of commodity foods reduced by RUR 58 088 thousands or by 1,3% , also power production and transfer expenditures reduced by RUR 86 444 thousands by 2%. Gross profit in the II quarter 2005 amounted RUR 73 644 thousands, i.e. by RUR 1274599 thousands lower than in the previous quarter, and by RUR 169 731 thousands higher than in the same period of the last year.

According to the results of financial and economic activity the Company suffered net loss amounted RUR 512 583 thousands in the reporting period. It's important that as a whole the JSC "Kuzbassenergo" took the net profit amounted RUR 193 286 thousands in the 1st half year 2005.

The management bodies of the Issuer regarding to the given analysis of a profitability and unprofitableness agree in their opinion.

4.1.2. Factors affecting the change of the gain amount from the sales by the issuer of goods, products, services and profit (loss) of the major activity of the issuer

Factors affecting the change of the gain amount are not presented due to its small changing during the reporting period, according to the opinion of the management bodies of the issuer .

4.2. Issuer's liquidity, adequacy of the capital and circulating assets

Figure's name	Calculation's methodic	at the end of reporting period
Own circulating assets, RUR	F. №1 L. 490 + F №1 L. 640 + F.№1 L. 650 - F. №1 L. 450 - F. №1 L. 190 - F. №1 L. 230	-3 206 979 000
Ratio of financial dependence	(F.№1 L.590 + F.№1 L. 690 - F.№1 L. 650 - F.№1 L. 640) / (F. №1 L. 490 + F. №1 L. 640 + F. №1 L. 650 - F. №1 L. 450)	0,28
Ratio of the owned assets autonomy	(F. №1 L. 490 + F. №1 L. 640 +F. №1 L. 650 - F. №1 L. 450) / F. №1 L. 300	0,78
Reserve ensure by the owned circulating assets	(F. №1 L. 490 + F. №1 L. 640 + F. №1 L. 650 - F. №1 L. 450 - F. №1 L. 190 - F. №1 L. 230) / (F. №1 L. 210 – F. №1 L. 216)	-2,87
Index of the fixed asset	(F. №1 L. 190 + F. №1 L. 230) / (F. №1 L. 490 + F. №1 L. 640 + F. №1 L. 650 - F. №1 L. 450)	1,12
Ratio of the current liquidity	(F. №1 L. 290 - F. №1 L. 230) / (F. №1 L. 690 - F. №1 L. 640 - F. №1 L. 650)	1,05
Ratio of the quick liquidity	(F. №1 L. 290 - F. №1 L. 210 - F. №1 L. 220 - F. №1 L. 230) / (F. №1 L. 690 - F. №1 L. 640 - F. №1 L. 650)	0,64

As compare with the previous period, change in the Company's ratio of liquidity took place in the II quarter of the reporting period .

Ratio of financial dependence increased by 0,01 points, but its meaning is within the norm.

As compare with the 1st quarter of the year 2005, meanings of ratio of the current and quick liquidity decreased by 0,17 and 0,23 accordingly:

- ***ratio of the current liquidity characterizes the Company's paying capacity under the complete mobilization of the circulating assets (sale of all the reserves, full settlement of the debtor having the debts with a maturity date less then 1 year). Ratio of the current liquidity of the JSC "Kuzbassenergo" amounted 1,06 by the 30.06.2005. i.e. having mobilized all the circulating assets the Company will be able to pay back 100% of their short-term liabilities;***
- ***ration of the quick liquidity characterizes the Company's paying capacity under the timely settlement of the debtors. Analysis of a ratio of quick liquidity shows that the JSC "Kuzbassenergo" will be able to pay back 64% of their short-term liabilities by the 30.06.2005 subject to 100% liquidity of the short-term accounts receivable (maturity date is within one year).***

The company's resources are fully formed due to the borrowed assets. As for a date of 30.06.2005 lak of the own resources of the circulating assets forming amounted RUR 3 206 979 thousands against RUR 2 809 054 thousands as compare with the 31.03.2005.

The Company's own assets are the source of financing of the circulating assets. Owned capital is enough for the company to cover a principal need of the Company in the resources providing production continuity and sale, also to cover the current liabilities.

Figure's name	as for a date of 30.06.2005.
Owned capital at the end of the reporting period, RUR.	26 993 064 000
Circulating assets at the end of the reporting period, RUR	5 661 293 000
Average transaction costs, RUR.	75 335 889

Policy of the Company concerning the circulating capital aimed to ensure an acceptable volume and structure of the Company's circulating assets subject to increase the assets liquidity.

Work with the buyers and customers is underway on the accounts receivable decreasing, also supervision of the payable accounts, as recover of the past-due accounts receivable.

The management bodies of the Issuer regarding the aforementioned information agree in their opinion.

4.3. Amount and structure of the issuer's capital and circulating assets

4.3.1. Amount and structure of the issuer's capital and circulating assets

a) in accordance with the Articles of Association the chartered capital amounts RUR 606 163 800 (six hundred six millions one hundred sixty three thousands and eight hundred roubles);
b) Information on forming and using of the reserve fund is shown in the paragraph 8.1.3. of this present report.

Index	2 квартал 2005 г.
a) Amount of the chartered capital, RUR	606 163 800
b) Total cost of the issuer's stock bought out by the issuer for the further resale	did not redeem
c) Amount of the capital reserves of the issuer, RUR	16 858 000
d) Amount of the additional capital, RUR	24 904 067 000
e) Amount of the unappropriated balance of the previous years, RUR	1 272 689 000
f) amount of the Issue's target investment assets, RUR	0
g) total amount of the Issuer's capital, RUR	26 993 064 000

The Structure of the owned capital is not changed in the II quarter of the year 2005: i.e. chartered capital, additional capital, capital reserves. The major share of the own assets falls at the additional capital (92,26%). The chartered capital is equal to 2,24 %, capital reserves – 0,06 % and unappropriated balance of the previous years – 4,71 %.

Information on the other financial investments (investments in the chartered capitals of the limited liability companies) are not available because they come to less than 10 % of JSC "Kuzbassenergo" full investments by the end of the II quarter 2005 first quarter.

4.3.3. The issuer's intangible assets

The Company exclusive rights to the trade mark are displayed in the intangible assets structure.

Intangible assets amortization is charged due to the linear device, reasoning from the following beneficial use period:

Trade mark rights – 10 years.

In the accounts the intangible assets are shown through the original cost minus amortization, saved up during the usage period.

№№	Intangible assets group's name	Overall cost, RUR thousands	Amortization charged amount, rubles.
1.	Trade mark	4,0	3,0
	Total, RUR	4,0	3,0

The intangible assets accounting is carried out according to PBU 14/2000 "The intangible assets accounting " approved by the Order of the Ministry of Finance № 91 dd. 16.10.2000.

4.4. Information about the issuer's policy and expenditures in the sphere of scientific and technological progress, in respect of licenses and patents, new research and development

Account of NIOKR (Research, developmental and technological works) in the Company is carried out according to the Accounting Regulations "Account of charges on research, developmental and technological works " (PBU 17/02).

4.5. Overview of the new trends in the sector of the issuer's core business

Electroenergetics is one of the leading industries of Russian economic.

Russian power industry is at the fourth place in the world over the installed capacities and production volumes.

In the December 2000, Russian Federation Government examined the offers made by the Ministry of economic development , Minatom of Russia, also the State Concern "Rosenergoatom" on power industry reforming and the project on the main trends of the Russian Federation State politics on power industry reforming as a ground for further elaboration proposed by the Ministry of economic development of Russia. The " Power industry development conception up to the year 2010" was revised in the year 2000.

This conception was recognized by the Regional Energy Committee of Kemerovo region (Decision №23 dd. 13.06.2000) as necessary and well-timed, also aimed to maintain and save existing generating capacity, achieved production volumes.

RAO "UES of Russia" approved the Conception as a program of minimum maintaining of equipment working capacity. This Conception provides power system development up to the year 2010 , also poses fundamentally new problems and their solving approaches:

- economic substantiation of necessity in the power system's object building and reequipment.

- launching of new technologies including advances in the domestic science and foreign experience.

- maximum electric power output by the own equipment subject to maximum covering of power consumption load in the region.

- workflow automation.

- application of modern methods of equipment diagnostics.

At the outcome of the year 2001, level of payments by the money terms for electric and heat power consumption increased by 20% and amounted 103% including the earlier accumulated debt pay back at the companies composed the RAO "UES of Russia" holding.

Due to implementation of the program aimed to reduce expenses in the affiliated companies and subsidiaries of the holding allowed to reduce expenditures by RUR 12,3 milliards.

Altogether, 25 turbosets with a total power 1330,2Mwt , also 1819,5km of power lines with a voltage equal to 35kw and higher were launched.

RAO "UES of Russia" together with a group of independents international consultants elaborated a program "5000mw" aimed to attract foreign and Russian investors in more perspective generating capacities construction.

On July, 11, 2001 the Decision № 526 « On reforming of power industry of Russian Federation » was approved by the Government. It directs to divide monopolistic activity from the other activity, also to keep single record at the enterprises of power system.

Decree of the Government of RF №1040-p approved the Schedule of activities for the primary stage of reforming was adopted as development of this present Decision.

In August, 2001 the Committee on reforming has been established at Board of directors of RAO " UES of Russia ". Its composition included representatives of minority shareholders, potential investors, the State and RAO " UES of Russia ". On December, 21 the Government of Russian Federation has approved the Decision № 881 " On the criteria of transfer of the main transmission lines and objects of the power network economy to the Unique (all-Russian) power network "

In accordance with the Resolution of the RF Government dd. 11.07.2001 the JSC "FSC UES" (Federal network company managing the unique national (all –Russian) power network) and JSC "SO-TsDU UES"

(System administrator dispatching the unique electric power network of Russia) were created.

Principal facts of the year 2002 in the sphere of reforming were the following:

- adoption by the State Duma of RF in its first regarding a pack of the bills devoted to energy power reforming;

- spending of auctions of electric power in the imitation mode by the NP "ATS" together with JSC "SO-TsDU UES";

- creation of infrastructural institutions in the branch, i.e. the Federal Network Company and the Sysop;

- preparation of a strategy for reforming of RAO "UES of Russia";

- termination of a preparatory stage of reforming of RAO "UES of Russia";

- development and adoption of the basic variant of reforming of JS-energo;

- preparation to implementation of the pilot projects of reforming of JS-energo;

- spending of the first stages of reforming of the scientific and designing complex of RAO "UES of Russia", also of energyreparing and service activities.

By the Resolution of the Government of Russian federation №226 dd. 2 of April 2002 "On the pricing regarding to electric and heat power" the new "Pricing principles" and "Regulations of the State regulation and application of the tariffs on electric and heat power in Russian Federation" were implemented. The Corporate Governance Code was approved by RAO "UES of Russia".

In September 2002 the not- profit partnership "Administrator of trade system"(NP "ATS" began auctions of electric power in imitation mode. One of the positive tendencies of the year 2002 was approaching of the tariffs to the economic valid, otherwise the level of the cross financing between the groups of consumers reduced.

The Board of Directors of RAO "UES of Russia" approved the base variant for reforming of regional energy systems, i.e. the RAO "UES of Russia" subsidiaries, also the exit of enterprises belonging to the Holding Company RAO "UES of Russia" from the non profile assets aimed to the expenses minimization relate to the ownership. The Board of Directors of RAO "UES of Russia" has approved the decision on termination of participation of RAO "UES pf Russia" in ZAO "TsDR FOREM" by way of selling of 75% holding of stock belonging to ZAO "TsDR FOREM" to the Non commercial partnership "ATS".

The leading production costs growth rate as compare with the profit growth rates (29.4% and 23,8% accordingly) in whole in the SDC of RAO "UES of Russia" leaded to decreasing of the gross profit in the year 2003 as compare with the rate of the year 2991. Gross profit of the JSC –energo got in the year 2002 was lower than the profit got in the year 2001 by RUR 4,6 milliards, as the gross profit in the JSC-power plants reduced by RUR 4,5 milliards/

On the night of April, 1, 2003 the function of operative - dispatching administration of the Unified Energy System of Russia were transferred from regional dispatching administrations (RDA) of JS –energo to the regional dispatching administrations (RDA), i.e. to the subsidiaries of JSC " System operator – Central Dispatching Administration of Unified Energy System (CDA UES").

In April 2003 the pack of legislative acts on electric power reforming came into the force including such federal laws as:

- "On electric power";

- "On the features of electric power functioning during the transition period and on the modifications in some legal acts of Russian Federation, and on recognition as invalid some legal acts of Russian Federation due to adoption of Federal Law "On electric power";

- "On modifications and amendments to the Federal Law "On the Sate regulation of tariffs on electric and heat power in Russian Federation";

- "On modifications and amendments to the Federal Law "On the Natural monopoly";

- «On modifications and amendments to the second part of the Civil Code of Russian Federation";

- "On modifications of the Federal Law "On energy power saving".

Working group on modification of the Strategy of JSC RAO" UES of Russia " for the years 2003 - 2008 "5+5" created at Board of Directors of RAO " UES of Russia " has examined the Program of the Concept

of the Strategy of RAO " UES of Russia " for the years 2003 - 2008" 5+5 taking into account the remarks and offers.

In the I half-year 2003 the process on enhancement and development of the mechanisms for competitive trade within the regulated wholesale market of electric power (capacity) proceeds. According to the existing normative legal documents monthly auctions of the above-planned electric power were spent, the volume of electric power subjects to selling at the auctions amounted 3;1% of the volume of supply to the home market.

Together with JSC"SO-CDU YES of Russia" (System operator – Central Dispatching Administration of Unified Energy System) in the I six months 2003 the trade of electric power over the scheme "Energopul" proceeds, the share of sale for the reporting period increased twice and amounted 1,3% of the total volume of the supply to the FOREM (home market).

The 31st of October 2003 the Board of Directors of RAO "UES of Russia" at the ordinary meeting heard information on the possibility of creation of the territorial generating companies (TGC) by way of co-incorporation by several JS-energo.

Variant of creation of TGC by way of co-incorporation is implicate its creation as a large operational company at the first stage of JS-Energo reforming. TGC shall be co-incorporated by several JS-energo by way of entering of their generating assets to the authorized capital of the newly created company. Thus it's a possibility at the early stage to create a large operational company whose shareholders will be incorporated it JS-energo .

According to the Resolution of the Government of RF №643 dd. 24.10.this present year "On the rules of the electric power (capacity) market during the transition period", since November, 1, 2003 at the same time with the regulated sector of the wholesale electric power market (existing Federal wholesale electric power (capacity) market) the competitive sector supposing the trade in hourly volumes of the electric power on free prices is started.

Thus in the free sector each manufacturer may offer up to 15 % from the fixed capacity, and each consumer can declare purchase up to 30 % from own scheduled consumption. Economic benefit of the free sector of the wholesale electric power market launching is obvious. Densities of electric power supply by heat power plants with rather low industrial expenses has increased, while the supply by "expensive" generating capacities, on the contrary reduced.

The Board of Directors of the JSC RAO "UES of Russia" approved the following principles to carry out the auctions in the UGC:

- ***absolute rights of shareholders of the JSC RAO "USE of Russia" to proportional stocks distribution;***
- ***UGC's stock market value defining;***
- ***Openness of information on the actual profit receivers from the auctions participants and on the purchasers of large –scale (more than 25%) of the UGC 's share holdings;***

- maximum transparency and simplicity of mechanisms;

- JSC RAO "UES of Russia" shareholder's rights security and interests protection.

The Issuer's activity in the power system mainly conditioned by the industry-wide trends.

Power system conflicted as with the problems of nonpayment peculiar to economic sphere at the macrolevel, as especially regional problems mainly in their relations with the Regional energy committee.

A year 2003 was the year of large starting objects having important meaning not only for power system, but for the whole Kuzbass. High voltage transmission line BJI-35 was successfully putted into operation in august month in the South Electric networks to electrify the distant village of the Gornaya Shoria of the Ust-Kabyrza being the largest in the district.

In March 2004 the segregation of repairing activity was finished in accordance with the Project on repairing activity reforming in the JSC "Kuzbassenergo" approved by the Project Group on reforming of repairing activity and optimization of technological services market in the JSC "RAO "UES of Russia" dd. 01.07.2003.

Also 3 affiliated companies with a 100% market share of the JSC "Kuzbassenergo" were founded and started their activity:

- JSC "Kuzbassetremont" – competitive energy repairing company, carries out its activity in electric power lines. Registered 04.03.2004.

- JSC "Engineering and analytical centre "Kuzbasstechenergo" – competitive engineering company. Registered 09.03.04.

- JSC "Kuzbass energy repairing company" – competitive energy repairing company carries out current and capital repair of power plant equipment. Registered 01.03.2004.

The companies were created on the base of the JSC "Kuzbassenergo" property with its own personnel participation.

JSC "Kuzbassenergoservice" (100% SDC established on the base of property and personnel participation of the liquidated affiliated company RP "Kuzbassenergoremont") carries out current repair of boilers, turbines, transformers, also works in capital construction and technical reequipment, produces spare parts.

Subsidiary named "Maghistralnye electric networks" (Main-line electric networks) was created within the activity on reforming of electric network complex on the ground of the property complex on trunk transmission lines related to the Unique national electric network.

The Board of Directors approved an independent valuator to define a market value of propery.

Agency contract between the JSC "Kuzbassenergo", MMSC "Sibeia" and JSC "FSC UES" was made and satisfied, also a market evaluation of a cost of electric power system property together with ZAO "ENPI Consult".

Right- institutive documents over the all object forming was completed.

In February 2005 the Board of Directors of RAO "UES of Russia" adopted a decision on modification of the scheme of allocation of the main-line transmission lines of JS –energo. New order of electric network complex reforming provided:

transfer in the main-line network companies (MNC) over the divided balance of the objects of UNUS and monetary to the expenses compensation ;

payment of stocks belonging to JSC RAO "UES of Russia" to MNC allocated under the reorganization of JS-energo in the authorized capital of JSC"FNC UES";

joining of MNC as its segregation from the composition of JS-energo to one MMNC "Centre", which also the others MMNC simultaneously join.

The Board of Directors of the JSC "Kuzbassenergo" approved a program on technical reequipment of the company and its reconstruction for the year 2005 together with the fixed assets input equal to RUR 549,15 millions. The priority projects in the list of objects of the program for the year 2005 are the following: putting into operation of a boiler №16 at the Kemerovskaya GRES, reconstruction of the boiler №8 at the Tom-Usinskaya GRES aimed to reduce NOx, launching of the system of tree-level fuel burning at the boiler №11 at the Kemerovskaya TETS, mounting of sprinklers at some power plants of JSC.

Within the electric power reforming on the territory of Siberia the competitive sector of wholesale market was created which is till now extending to the European part of Russia and Ural.

Wholesale market of electric power in Russia is divided in two sectors, i.e. regulable (the Sate fixes the tariffs) and competitive, whose participants may sell at the free price to 15% of the outputted energy.

The 1st May 2005 the competitive sector of wholesale market of electric power was launched in Siberia.

14 affiliated companies of RAO " UES of Russia " took part in the first tenders in competitive sector of the wholesale market of the electric power on the territory of Siberia. The operator of competitive sector of the wholesale market of the electric power in Siberia is the Not-profit partnership « Administrator of trade system ».

The JSC "Kuzbassenergo" contains 8 heat power stations of the fixed capacity 4,7 millions kw.

During the reforming process it was planned to divide the JSC "Kuzbassenergo" into the FGC №11 and FGC№12. The Board of Directors of the RAO "UES of Russia" approved the project on the JSC "Kuzbassenergo" reforming dd. 24.06.2005 and made changes in their decision dd. 23.04.2004 having approved the new configuration of the territory generating companies (in part of FGC-11 and FGC-12): FGC-11 should be formed on the ground of the generating assets of the JSC "Tomskenergo" and "Omskenergo"; FGC-12 should be formed due to the generating assets of the JSC "Altayenergo" and JSC "Kuzbassenergo" (except generating capacity being subject to split-off).

The JSC "Kuzbassenergo" will be carried out according to the base variant by the way of reorganization in form of segregation of the following societies together with a save of a structure of the stock capital:

JSC "Kuzbass regional electric power network company" - will fulfill functions on electric power transfer and distribution from the source to the consumers.

JSC "Kuzbass power supply company" – electric power sale and purchase. Also it is possible to endow with a guarantee supplier duties.

JSC "Main power lines Kuzbassenergo", whose assets will be the objects of power complex related to the Unique national power lines. It will carry out electric power transfer through the networks belonging to the Unique national (all-Russian) electric power lines.

The project provides saving generating assets and main heat power lines in the structure of the JSC "Kuzbassenergo" property.

5.1.2. Inventory object shall be regarded as a unit of accounting of the fixed assets that is the object with all adjustments and accessories or separate constructively detached object subject to some single functions fulfillment, or separate complex of constructively jointed objects as an integration subject to the defined work fulfillment (par. 6 PBU 6/01 of Provisions on accounting "Fixed assets accounting" (Order of MF RF №26n dd.30.03.2001).

Inventory cost of the fixed asset's objects, i.e. computers shall be determined as a sum of the price of all devices (system block, monitor, printer, keyboard, mouse etc.) subject to work. Components and peripherals devices purchased as a change of the worn out shall be accounted as spare parts on the corresponding sub account of the account 10 "Materials".

5.2. Fixed assets valuation's ways

5.2.on acceptance to accounting objects of the fixed assets are valuated by the next ways:

a) purchase of the fixed assets for a payment - at a rate of actual expenses of the company for the purchase, defined according to par. 8 PBU 6/01 " the Fixed assets accounting " and gathered preliminary on the account 08 " Investments in non circulating assets ", the sub account " Purchase of separate objects of the fixed assets ";

b) construction of the fixed assets by the contract organizations and own-account construction - at a rate of actual expenses for the finished and putted out capital construction according to Provisions on accounting of long-term investments, authorized by the Order of MF of Russian Federation dd. 30, 12. 1993 № 160, gathered preliminary on the account 08 " Investments in non-circulating assets " by one object the subaccount " Construction of separate objects of the fixed assets ";

b) earning of the fixed assets as investments in the authorized (cumulative) capital – in monetary valuation approved by the incorporators (participants) if otherwise is not stipulated by the legislation of the Russian Federation (par. 9 PBU 6/01). The note in the debit of account 08 "Investments in non-circulating assets", subaccount "Acquisition of separate objects of the fixed assets" in the correspondence with an account 75 "Payments with incorporators" is necessary. On the debit of account 08 "Investments in non-circulating assets", subaccount "Acquisition of separate objects of the fixed assets" expenses (including transport and other delivery works) concerned the fixed assets earnings in the authorized capital shall be reflected;

d) gratuitous acquisition of the fixed assets from the legal entities and natural persons also on posting of the fixed assets revealed as surplus over the results of privatization at the market price as for the date of posting. On gratuities acquisition the note in the debit of account 08 "Investments in non-circulating assets", subaccount "Acquisition of separate objects of the fixed assets" from the credit of the account 98 "Further incomes" is made according to corresponding analytics.

On the debit of account 08 "Investments in non-circulating assets " the subaccount " Acquisition of separate objects of the fixed assets " the expenses (including transport and other delivery works, registration fees and other expenses) concerned the gratuitous receipt of the fixed assets also are reflected. In process of amortization charge at the gratuitously acquired fixed assets, simultaneously, at a rate of charged amortization, records on the debit of account 98 " Further Incomes " according to corresponding analytics and to the credit of account 91 " Other profits and losses" in the composition of extraordinary incomes are made;

On surplus posting over results of inventory the record on the debit of account 01 "Fixed assets" from the credit of account 91 "Other profits and losses" is made.

Not accounted real estate revealed in the process of inventory shall be charged in the composition of the fixed assets after the documents submittal to the State registration.

Information on prices in force as for a date of accounting acceptance shall be approved by the documents or by way of expertise (par. 29 Methodical recommendations on the fixed assets accounting (Order of MF RF №91n dd. 13.10.2003).

e) acquisition of the fixed assets under the contracts providing execution of liabilities (payment) by nonmonetary assets at the cost of values transferred or subject to transfer to the Company according to the price which in comparable circumstances the Company usually determines cost of the similar values (par. 11 PBU 6/01);

f) Contract value shall be recognized as the value of the fixed assets acquired under exchange contracts which fixes the contract value of the exchange property;

5.2.2.Expenses on loans and credits (interests etc.) due to the fixed assets acquisition shall be included in the initial value of the fixed assets in accordance with par. 23, 31 of Accounting Provisions "Accounting of loans and credits, also their performance expenses" PBU 15/01 (Order of MF №60n dd.2.09.2001).

5.2.3Expenses (profits) on acquisition of the objects of the fixed assets arisen after its acceptance to accounting (cost and price difference, nonreimbursable taxes etc.) shall be accounted on the account 91 "Other profits and losses" in composition of extraordinary expenses (incomes) according to the corresponding analytics.

5.2.4.Changes in initial cost of the fixed assets shall be only in cases of completion, after equipment, reconstruction and modernization, partial liquidation and revaluation of the fixed assets.

5.2.5. Complex and partial revaluation of groups of similar objects of the fixed assets over the current (replacement cost) by way of indexation or direct converting according to documentary approved market costs is carried out one a year (as for the 1 January of the reporting year) on the ground of the single Order to the Company, and further is carried out regularly (one time in three year.

Revaluation sum of the fixed asset's object resulted to revaluation shall be charged on the account 83"additional capital" in amount charged minus its discount fulfilled the previous reporting periods and transferred to the account of profits and losses as operational expenses.

Revaluation sum of the fixed asset's object equal to the sum of its discount fulfilled the last previous periods and transferred to the account of profits and losses as expenses shall be transferred to account 91 "Other profits and losses" in composition of operational profits.

Discount sum of the object of the fixed assets shall be referred to the additional capital decreasing composed due to revaluation's sum of this object in the previous reporting periods (par. 15 PBU 6/01, ed. 18.05.2002). Excess of the discount sum of the object of the fixed assets over the sum of its discount related to the additional capital resulted the revaluation spent the previous periods shall be referred to the account 84 "Non distributed profits (uncovered loss)".

5.2.6. Sum of revaluation (discount) arose from revaluation of the fixed assets of the subsidiaries shall be transferred to the executive body of the Company on debit (credit) of account 79 "Intraeconomic payments" on subaccount " Payments on allotted property".

5.2.7. If the object of the fixed assets withdrew the sum of its revaluation shall be transferred from the account 83 "additional capital" to the account 84 "Non distributed profits (uncovered loss)" in composition of profit of the reporting period (par. 15 PBU 6/01, ed. 18.05.2002).

5.2.8. Valuation of the fixed asset's object which cost under acquisition is expressed in foreign exchange shall be realized by way of the sum conversion according to the rate in force of Central Bank of Russia by the date of the object charge to account 01 "Fixed assets".

Furthermore the rate difference shall be accounted on debit (credit) of account 08 "Investments in

noncirculated assets" in the credit (debit) of account 91 "other profits and losses" in composition of the extraordinary expenses (profits) (par. 16 PBU 6/01).

5.2.9. Gratuitous transfer and sale of the fixed assets to the third-party companies and natural persons, charge-off of underamortization fixed assets from the balance due to their unfitness to use, also deficient fixed assets revealed under inventory or stolen shall be carried out according to the written resolution prepared by the Department on capital management of the executive body together with visas of corresponding services.

The document shall be subscribed by Deputies general director to the proper place:

- ***fixed assets of nonindustrial activities (Housing and communal services, catering, autotransport etc.) – by the first deputy general director on common problems;***
- ***industrial fixed assets – by the deputy general director, technical director;***
- ***charge-off from the balance of amortized fixed assets due to their unfitness to use, also partial liquidation of the fixed assets shall be carried out on resolution of director of subsidiary or representative office.***

In the process of charging-off from the balance of underamortized fixed assets VAT falling at the underamortized part without revaluations shall be restored.

Stocks of materials and capital equipment remained due to discount of unfit to reconstruction and further use of the fixed assets shall be debited at the market price as for the date of the fixed assets object's discount together with transfer to account 91 "Other profits and losses" in composition of operating profits.

5.2.10. Depreciated cost of the retired object of the fixed assets from the credit of account 01 "Fixed assets" shall be withdraw to the debit of corresponding subaccount of account 91 "Other profits and losses":

- ***in composition of operating expenses in case of the fixed asset's retire due to sale, charge-off in case of moral or material depreciation;***
- ***in composition of extraordinary expenses in case of the fixed asset's retire due to gratuitous transfer.***

Retire of object of the fixed assets transferred on account of investments in the authorized (composed) capital, pay fund in amount of its depreciated cost shall be reflected on debit of account of expenses accounting and credit of account of he foxed assets accounting.

If the object of the fixed assets has not depreciated cost (fully amortized), amount of the conditional value shall be reflected in bookkeeping as operating profits in the line 09010 of the form 2 "Report on profits and losses".

5.2.11. Expenses on the fixed assets charge-off due to accidents, natural disasters and others emergency situations shall be reflected in bookkeeping of reporting period in composition of emergency expenses.

5.3. Amortization of the fixed assets

5.3.1. The method of amortization of the objects of fixed assets is linear, reasoning from the dates of the effective use of these objects. The amortization of the objects of fixed assets, taken on accounting before 01.01.2002, is accrued in accordance with the Regulation of the USSR Council of Ministers from 22.10.1990 № 1072 "About the unified standards of amortization charges for the complete reconstruction of fixed assets of the economy of the USSR". The amortization of the objects of fixed assets, taken on accounting since 01.01.2002, is accrued in accordance with the Regulation of the Government of RF from 01.01.2002 № 1 "About the classification of fixed assets included in the amortization groups".

5.3.2. The amortization of the objects of real estate property, capital investments of which are completed, all primary acceptance instruments are drawn up, the documentation is handed over the state registration and practically put into operation, is accrued in accordance with the established procedure – since the first day of the month, following the month of setting the object into operation. The objects are regarded as the objects of fixed assets.

5.3.3. The objects of fixed assets at the cost of up to RUR 10 000 per unit are charged off according to the

item "Amortization" as far as they are put into production or operation. This operation is mentioned in accounting on debit of accounts of inputs account (selling costs) and account credit 01 "Fixed assets" and drawn up by the Act of charging off according to MB-8 form. Such objects are reckoned in the record keeping at the cost of 0. In case of modernization (reconstruction) of these objects, the modernization (reconstruction) expenses are charged to the increase of the cost of the object and amortized in accordance with the established procedure.

The executive body, affiliated companies and the representative office control the movement of these objects in order to ensure their safety in the process of production and operation. Records management of these objects in places of their operation is kept in "The bill of assets at the cost of up to RUR 10 000, put into operation" according to the suggested form, apart from the fixed assets, depreciated in accordance with the established procedure (Appendix 2 to the present Regulation). Accounts department and persons in charge control the correspondence between the records in the bill and inventory sheets.

The retirement of the objects at the cost of up to RUR 10 000 is drawn up by "The Act of retirement of fixed assets at the cost of up to RUR 10 000", according to the suggested form (Appendix 2 to the present Regulation).

5.3.3. The objects of fixed assets at the cost of up to RUR 10 000 per unit are charged off according to the item "Amortization" as far as they are put into production or operation. This operation is mentioned in accounting on debit of accounts of inputs account (selling costs) and account credit 01 "Fixed assets" and drawn up by the Act of charging off according to MB-8 form. Such objects are reckoned in the record keeping at the cost of 0. In case of modernization (reconstruction) of these objects, the modernization (reconstruction) expenses are charged to the increase of the cost of the object and amortized in accordance with the established procedure.

The executive body, affiliated companies and the representative office control the movement of these objects in order to ensure their safety in the process of production and operation. Records management of these objects in places of their operation is kept in "The bill of assets at the cost of up to RUR 10 000, put into operation" according to the suggested form, apart from the fixed assets, depreciated in accordance with the established procedure (Appendix 2 to the present Regulation). Accounts department and persons in charge control the correspondence between the records in the bill and inventory sheets.

The retirement of the objects at the cost of up to RUR 10 000 is drawn up by "The Act of retirement of fixed assets at the cost of up to RUR 10 000", according to the suggested form (Appendix 2 to the present Regulation).

5.3.4. Amortization of the following objects is not accrued:

- housing resources (par.17 PBU 6/01);

- objects of external accomplishment (par.17 PBU 6/01);

- productive cattle (par.17 PBU 6/01);

- perennial plantations (par.17 PBU 6/01);

- lands (par.17 PBU 6/01);

- objects of nature management (par.17 PBU 6/01);

- fixed assets, received before 01.01.2000 under contracts of donation and gratis in the process of privatization;

- books, brochures and other editions.

5.3.5. The process of amortization accrual can be interrupted by the decision of the director of the affiliated company in the period of restoration (repair, modernization, reconstruction) of the objects of fixed assets, that lasts more than 12 months, and in case of their temporary closing-down for the period of more than 3 months under the order of the JSC "Kuzbassenergo" (par.23 PBU 6/01).

5.3.6. Accrued amortization of the objects of fixed assets of production purposes under the account credit 02 "Depreciation of fixed assets" control account "Accrued amortization" is sent to finance capital investments of production purposes as a record in debit of account 02 "Amortization of fixed assets" control account "Accrued depreciation" from credit 02 "Amortization of fixed assets" control account "Amortization of capital investments".

The off-balance account with the acceptance (transfer) of the funding source among the affiliated companies under off-balance aviso is kept, when nesting at the cost of inter-branch amortization redistribution

5.4. The procedure of accounting and financing of the repair of fixed assets.

5.4.1. For a current fiscal year the reserve for repair work is created on account 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes" at the rate established by the estimate of expenses of the annual standard of repair cost, including it into production costs monthly (accounts 23, 25, 26) at the rate of 1/12 of annual estimate. The reserve is created to include expenses for all types of repair work of fixed assets of production purposes into production costs.

At year end the adjustment of the repair reserve is performed:

- extra reserved money for the repair of fixed assets (as a result of inventory taking) is reversed an entry.

- in case of stress of reserve money for repair of fixed assets, extra charge takes place under debit of accounts of the records of production costs and on account credit 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes".

Account of repair expenses is carried out separately according to the types of repair (thorough repairs and current repairs) and methods of carrying out (contract and household).

All the expenses for repair of fixed assets of production purposes, carried out with the help of:

- household method – are accounted object by object on account 23 "Auxiliary processes" under control accounts "Thorough repairs of fixed assets using the household method" and "Current repairs of fixed assets using the household method". Later they will be put in corpore into debit of account 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes" every month.

- contract method – are put in corpore from account credit 60 "Settling with suppliers and contractors" on the corresponding control accounts into debit of account 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes"

In case of stress of reserve money for repair of fixed assets (including leasehold assets) of production purposes, debit balance on account 96 "Forthcoming expenses reserves", control account "Reserve for repair of fixed assets (including leasehold assets) of production purposes" is mentioned in the line of the balance "Other production costs and resource" at the end of month

Expenses for repair of fixed assets of non-production purposes are charged off from the credit of corresponding control accounts of account 23 "Auxiliary processes" or account 60 "Settling with suppliers and contractors" into debit of account 29 "Attendant production and households".

с поставщиками и подрядчиками" по мере проведения ремонта без создания резерва.

5.5. Account of intangible assets.

5.5.1. Intangible assets include the objects of intellectual property under all implemented terms, mentioned in par.3 PBU 14/2000 " Account of intangible assets"(The Order of Ministry of Finance of the RF from 16.10.2000 № 91n)

5.5.2.To be taken on accounting the objects of intangible assets are valued in the following ways:

a) intangible assets acquisition subject to payment – at the rate of actual expenses of the Company for the acquisition of the assets, defined in accordance with par.6 PBU 14/2000 " Account of intangible assets"(The Order of Ministry of Finance of the RF from 16.10.2000 № 91n), collected preliminarily on account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets";

b) creation of intangible assets by the Company itself – at the rate of actual expenses for creation and production except for value added tax and other refundable taxes, collected preliminarily on account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets"(par.7 PBU 14/2000);

c) deposition of intangible assets in authorized capital – in pecuniary valuation, coordinated by founders (members), if nothing else is provided by the Legislation of RF (par.9 PBU 14/2000).A preliminary record is made in debit of account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets" in correspondence with account 75 "Settling with founders". The expenses connected with deposition of intangible assets in authorized capital are mentioned as well on debit of account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets";

d) non-repayable donation of intangible assets from legal and natural persons - at the common rate at the date of posting. A record in debit of account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets" from account credit 98 "Revenue of next periods" is made. The expenses connected with non-repayable donation of intangible assets are mentioned as well on debit of account 08 "Investments in non-circulating assets", control account "Acquisition and creation of intangible assets". The information about the prices, established at the date of taking on accounting, is confirmed authentically or by examining.

By depreciation accrual of such intangible assets at the same time at the rate of accrued depreciation the records are made on debit of account 98 "Revenue of next periods" in corresponding analytics and account credit 91"Other receipts and expenditures" in non-disposal revenue;

e) acquisition of intangible assets under the contracts, providing for discharge of obligations (payment) with non-monetary funds – at the cost of values, transferred or being subject to transfer by the Company, set reasoning from the price that is fixed by the Company for similar values in similar circumstances (par.11 PBU 14/2000);

f) the cost of intangible assets is the contract value; the assets received under contracts of exchange which fix the contract value of exchanged property;

5.5.3.Depreciation of all groups of intangible assets is carried out with the linear method, based on the standards calculated on the basis of the period of the effective use of the objects of intangible assets, using account 05 "Depreciation of intangible assets" (par.15, 16, 21 PBU 14/2000).

5.5.4. The period of the effective use of intangible assets is defined independently when the object is taken on accounting, reasoning from the expected period of use of an object, when it is possible to collect revenue. The expected period of the effective use should not exceed the period of validity of a patent, a licence and other legal documents and limits on the use of the objects of intellectual property according the present legislation of Russian Federation (par.17 PBU 14/2000).

If it is impossible to define the period of the effective use of intangible assets, the standards of depreciation charges are set counting on 20 years (but it should not exceed the period of functioning of the Company).

5.6. Lease of fixed assets

5.6.1. The leased property is mentioned apart in accounting. All the leased property expenses are carried out on account 90 "Selling". Depreciation of leased property is mentioned on account credit 02 "Depreciation of fixed assets" and debit of account 90 "Selling".

Full payback of the objects (including local taxes: acre-shot, tax on property, etc.) should be provided in lease contracts.

5.6.2. Account of leased fixed assets is kept on off-balance account 001 "Leased fixed assets" according to the valuation, fixed in lease contracts. Analytic account is kept regarding lessors and every object of leased fixed assets.

5.6.3. Lease contract defines the period of leasing of fixed assets, the amount of rental fee, the terms of the keeping and repair work, valuation changes as a result of thorough repairs, and procedure of settlements.

5.6.4. The property, purchased for leasing and profit earning, is mentioned in accounting on account 03 "Income investments in stocks of materials and capital equipment".

5.7. Account characteristics of the investments in non-circulating assets.

5.7.1. Running expenditures on the CCO capital construction objects) ((wage cost, travel expenses) are covered at the expense of the funds, aimed at financing of capital construction and included in the inventory cost of exploited objects (par.1.4. of the Regulation on accounting of long-term investments, confirmed by the Order of the Ministry of Finance of RF from 30.12.93 №160).

5.7.2. Every month running CCO expenditures of the executive body are distributed among the affiliated companies pro rata average monthly expenditures (AME) volume of affiliated companies in accordance with the coefficient, calculated as in the ratio of AME volume of an affiliated company for the reporting month and total AME volume of the Company for this month.

5.7.3 Capital construction expenses are included in inventory cost of objects of capital investments at taking them on accounting. They are classified by par.3.1.7. of the Regulation on accounting of long-term investments, confirmed by the Order of the Ministry of Finance of RF from 30.12.93 №160 as the expenses not leading to the increase in the cost of fixed assets.

5.7.4. If the Company has shares when the construction is under way, the transfer of monetary funds or property to the chief builder on the basis of share holding is reflected as a accounts receivable of this construction by the record in debit of corresponding control account of account 76 "Settling with various debtors and creditors" in correspondence with accounts of accountability of monetary funds or property.

When the construction (or it's part) comes to an end the corresponding expenses are taken on account by the record from account credit of the corresponding control account 76 "Settling with various debtors and creditors" in debit of account 08 "Investments in non-circulating assets", control account "Construction of the objects of fixed assets".

5.7.5. If the Company is the chief builder, the money, received from the builders who have shares, is mentioned as money for purpose financing on debit of account 86 "Purpose financing" in correspondence with accounts of accountability of monetary funds or property.

55.7.6. Account of NIOKR in the Company is carried out in accordance with the Regulation on accounting "Account of expenses for research engineering, development and technological activity" (PBU 17/02).

The expenses for research engineering, development and technological activity are recognized in accounting if:

- *The sum of the expense can be defined and confirmed;*
- *There is documentation that proves execution phase;*
- *The results of the activity used in production and operation will lead to revenue in future;*
- *The use of results of research engineering, development and technological activity can be demonstrated.*

The expenses for NIOKR are mentioned in accounting on account 08 "Investments in non-circulating assets" (par.5 PBU 17/02).

The expenses for NIOKR, which results are subject to legal safeguard and drawn up in accordance with legislation order (patents, licenses and other documentation are received to attest the exclusive right of the Company to possess the results of NIOKR), can be considered intangible assets at the account 04 'Intangible assets" (par. 4 PBU 14/2000).

The expenses for NIOKR , which results are not drawn up in accordance with established procedure, are charged off from account credit 08 "Investments in non-circulating assets" for the expenses for usual activities using the linear method during the fixed period (par. 11 PBU 17/02).

The period of charging off the expenses for NIOKR is set within 3 years.

The expenses for NIOKR, which results were not satisfactory, and the results of NIOKR which use was stopped, are drawn up by the decision of PTO of an affiliated company.

The decision can be viewed by the service of PTO of the executive body and with the written permission of the technical director. The expenses are charged off at a time in non-disposal expenses of the reporting period.

5.7.7. The objects of incompleted capital construction, which construction was stopped and won't be carried out because of lack of funds in future, exposed to revaluation, the cost of revaluation is transferred from account credit 84 "Surplus earnings (dead loss)" in debit of account 83 "Surplus capital" and as a record from account credit 08 "Investments in non-circulating assets" in debit of account 91 "Other receipts and expenditures" in the sum of actual expenses incurred.

The charge off the objects of incompleted construction is carried out on the basis of the regulatory document (order, instruction, etc.), prepared by OKS of the executive body with the explanation of the reasons for charging off on the basis of the letter of inquiry of the affiliated company about charging off and inventory carried out.

5.8. Inventory accountability

5.8.1. Inventory includes assets:

- *for being used as raw material, materials, etc. in the process of production, in execution phase and rendering of service, repair work of fixed assets, building and assembly jobs, cultural and educational needs;*
- *aimed at being sold (finished commodity);*
- *aimed at being used as means of labour during the 12-month period;*
- *aimed at being used by the Company for meeting its administrative needs.*

5.8.2.Inventory, tools and household fixings used less than for 1 year-period are included in inventory on account 10 "Materials".

5.8.3. The stock-list number, worked out for a definite name of inventory, is taken as an accounting unit.

5.8.4. Taking on accounting of the inventory, its valuation is carried out in the following ways:

- *acquisition subject to payment – the sum of actual expenses for acquisition except value added tax and other taxes compensated from the budget, defined in accordance with par.6, 11 PBU 5/01 (the Order of the Ministry of Finance of RF from 09.06.2001 № 44n), with the glance of the regulations of par.15 PBU 15/01 "Account of loans and lending and the expenses for their operation" with the glance of interests and other expenses for borrowed current assets;*
- *making by own strength – reasoning from actual expenses, connected with the production of the inventory. Account and formation of inventory expenses is carried out in the order, established to define the net cost of applicable types of production (par.7 PBU 5/01);*
- *invested in authorized capital – reasoning from pecuniary valuation, coordinated by founders (members), if nothing else is provided by the Legislation of RF , with the glance of actual expenses for the delivery of the inventory and putting it in conditions for operation, according to par.6 PBU 5/01 (par.8, 11 PBU 5/01);*
- *received gratis or under the contract of donation, left from retirement of fixed assets and other property and posting of the inventory, revealed as surplus as a result of inventory taking – reasoning from current market cost considering the posting date with the glance of actual expenses for the delivery of the inventory and putting it in conditions for operation (par.9, 11 PBU 5/01).*
- *received under the contracts, providing for discharge of obligations (payment) with non-monetary funds – at the cost of values, transferred or subject to transfer to the Company, fixed reasoning from the price that is fixed by the Company for similar values in similar circumstances. If it is impossible to define the cost of assets, transferred or subject to transfer to the Company, the cost of the inventory, received by the Company under the contracts, providing for discharge of obligations (payment) with non-monetary fund, is defined reasoning from the price, that is more suitable for acquisition of similar inventory in similar circumstances. The actual cost price of the inventory includes actual expenses for the delivery of the inventory and putting it in conditions for operation in accordance with par.6, 10, 11 PBU 5/01;*
- *The cost of the inventory, received under the contracts of exchange, which fix the contract value of the exchanged property, is the fixed contract value.*

5.8.5. The evaluation of the inventory, which cost is evaluated in foreign currency at the moment of acquisition, is estimated in rubles at the rate of exchange fixed by the Central Bank of RF on the day of taking the inventory on accounting.(par.15 PBU 5/01).

5.8.6. The inventory received by the Company without calculated-paid documents (non-invoiced deliver) are taken on discount at the price fixed in the contract. If the price is not fixed in the contract, in order to fix it and the amount of payment or account payable, the price, used by the Company in similar circumstances with similar inventory, is tagged (par.6.1. PBU 10/99). After calculated-paid documents are received, the difference between the actual cost of inventory and its valuation at the moment of taking on discount is included in the same expenses accounts the inventory was charged off, and in the balance of the inventory at the store pro rata its volume.

If calculated documents of non-invoiced delivers were received a year later after the annual accounting had been performed, it means that:

a) account cost of the inventory is not changed;

b) the rate of value added tax is used in accounting in accordance with established procedure;

c) settling with a supplier is being adjusted, the difference between account cost of the inventory and its actual cost is charged off in the month, when the calculated documents were received:

- cost decrease of the inventory is mentioned on debit of account 60 "Settling with suppliers and contractors" and account credit 91 "Other expenses";

- cost increase of the inventory is mentioned on debit of account 91 "Other expenses" and account credit 60 "Settling with suppliers and contractors" (par.41 of Methodical Instructions on the inventory accounting (confirmed by the Order of the Ministry of Finance of RF from 28.12.2001 № 119n).

5.8.7. Merchandise bought for sale by retail are accounted at the value of sales on account 42 "Trading extra charge" (par.13 PBU 5/01). The amount of extra charge, falling at the remains of unrealised products, is fixed reasoning from the percentage of the cost of retired products to the cost of the accounted ones.

5.8.8. Merchandise bought for selling in wholesale are accounted at the acquisition cost with the glance of the expenses for provision and delivery of the products to the stores (bases) till the moment they come into the market (par.13 PBU 5/01).

5.8.9. The inventory, owned by the Company, but being delivered, or transferred to a customer to pawn, is taken on discount in value, fixed in the contract with sequential adjustment of actual cost (par.26 PBU 5/01).

5.8.10. The account of purchased fuel for energy generation is carried out at actual cost and includes: the fuel cost according to the bills of suppliers, including discounts (extra charge) because of poor (good) quality, the payment for other services provided by the supplier and commodity exchange, railway rate quotation of fuel from the shipment place to the station of destination and from the station of destination to discharge arrangements, other expenses according to par.6, 11 PBU 5/01, except the expenses of fuel-shipping department.

The expenses of fuel supply workshop for unloading, warehousing and intraoffice transference of fuel from the stores and fuel delivery for meeting technological needs are not included in the net cost. They are referred to the expenses for power generation of TTTS (par.4.7. of Methodical Instructions on fuel account at heat power plants RD 34.09.105-96).

5.8.11. On putting the inventory (except the products accounted at value of sales) in production and other type of retirement the valuation is appraised at average net cost of each type of inventory.

The average valuation of actual cost of the materials released in production or charged off for other purposes, is estimated by the defining of the actual cost of the material at the moment of its release (sliding valuation).

5.8.12. The putting into production (operation) of the inventory holdings is drawn up as a blading according to form M-11 for intraoffice transference (from one advance holder to another one).

The charging off the inventory in production, except for construction materials, is carried out on the

basis of the act of charging off the equipment and other types of the inventory in suggested form (Appendix № 2 to the present Regulation).

The charging off the inventory in production is carried out on the basis of the act of charging off the inventory in suggested form with simultaneous drawing up the blading according to form M-11 for putting in production (Appendix № 2 to the present Regulation).

5.8.13. The account of special tools, special devices, special equipment and working clothes is carried out in the Company in accordance with the Methodical Instructions on accounting of special tools, special devices, special equipment and working clothes, confirmed by the Order of the Ministry of Finance of RF from 26.12.2002 № 135n..

The list of the means of labour accounted as special tools, special devices, special equipment, used for carrying out non-standard operations (par.2 of the Methodical Instructions), is defined by the affiliated company independently reasoning from the peculiarities of the engineering procedure.

When defining the composition and groups of special equipment one should take into account the All-Russian classifier of fixed assets OK-013-94 (confirmed by the Resolution of the State Committee on standards, metrology and inspection certification from 26.12.94 № 359), and the All-Russian classifier of types of economic activity, production and services OK-004-93(confirmed by the Resolution of the Government standard of RF from 06.08.93 № 17).

Special equipment, working clothes and other means of man-to-man defense, regardless of their cost and the period of effective use, is referred to the means put into circulation (par.50 "The Regulation on bookkeeping of RF", confirmed by the Order of the Ministry of Finance of RF from 29.03.2000). These means are mentioned in control accounts 10.10 "Special equipment and working clothes at the store" and 10.11 "Special equipment and working clothes in use", open to the balance account 10 "Materials".

Bedding, tools aimed at carrying out the standard types of production (par.4 of the Methodical Instructions) and other inventory included in the means put into circulation are mentioned in account 10.9 "Inventory and household equipment"

Working clothes and other means of man-to-man defense, special equipment which can be used up to 12 months, according to the standards, are charged off in debit of accounts of expenses for production at the moment of its transference to the workers of the Company (par.21 of the Methodical Instructions)

The charge off the given working clothes, other means of man-to-man defence etc. is carried out on the basis of the act on charging off according to form MB-8 with simultaneous drawing up the blading according to form M-11 for putting in production.

If the period of operation is more than 12 months, the cost of working clothes and other means of man-to-man defense etc. is covered with the linear method reasoning from the periods of the effective use (par.26 of the Methodical Instructions).

To get working clothes, other means of man-to-man defense etc. aimed at long-term use, a worker must sign in worker's personal card (form MB-2) and in the list accounting the issue of the working clothes, other means of man-to-man defense etc. (form MB-7).

The cost of special equipment is covered with the linear method reasoning from the actual cost of the object and standards reasoning from the periods of the effective use of the object (par.24 of the Methodical Instructions). The period of the effective use of special equipment in affiliated companies is set by the permanent Commission individually for each type of special equipment.

The charge off the special equipment and working clothes is carried out in case of actual retirement (obsolescence, depreciation, selling, gratuitous assignment, investment in authorized capital of other companies, disposition in case of an emergency etc.).

5.8.14. The charge off the inventory delivered under the contract of donation or gratis is carried out on the basis of the basic document on the release of materials (the blading on the release of materials, of form M-15, the instructions on the release of materials or the order on the release of materials and "the Act of gratuitous reception- assignment of the inventory" (Appendix № 2 to the present Regulation). The materials are charged off in accordance with par.5.8.11 of the present Regulation. The cost of the donative materials is referred to the finance results of non-realized expenses (par.12 PBU 10/99 "The expenses of the Company" from 06.05.1999 № 33n, par.132 of "The Methodical Instructions on the inventory accounting" from 28.12.2001 № 119n (version of 23.04.2002).

5.8.15. Actual reserves of coal, mazut and other stock of materials are created according to the standards, confirmed by the directors of the Company. It is connected with the seasonal nature of production and energy supply.

5.8.16. The inventory, unloaded by the supplier and had not been delivered at the stores of the Company, which became the property of the Company (regardless of the fact of payment), is mentioned as the inventory that was not delivered at the end of the month.

5.8.17. The reception and posting of the materials is carried out by putting on the documents of the supplier a stamp with essential elements of the posting order (account, blading) (par.49 of "the Methodical Instructions on the inventory accounting" from 28.12.2001 №119n (version of 23.04.2002) and not by the drawing up the posting order (form M-4) if there is no discrepancy between the data of the supplier and actual data (quality and quantity).

5.8.18. The reception, storing, control and issue of ethyl alcohol is carried out in order provided by " Instruction on reception, issue, transportation and control over ethyl alcohol", confirmed by the Ministry of food industry of the USSR 25.09.85 (from here- Instruction). This Instruction covers all the types and kinds of ethyl alcohol regardless of the way of its purchase and the purpose of further use.

The reception and posting of ethyl alcohol is carried out in anhydrous calculus (in decalitres) on the basis of the Act of the form № P-24 "About the shipping and acceptance of ethyl alcohol" (Appendix № 7 to the Instruction) with the glance of data about the actual quantity of ethyl alcohol, received as a result of measuring conducted by the company officials and mentioned in the section of the Act.

The issue of ethyl alcohol to production departments and laboratories is carried out in accordance with par.2.1. of the Instruction and drawn up as a requisition according to form № P-29 to the Instruction).

The results of acceptance and issue of ethyl alcohol carried out on the basis of corresponding posting and expenses documents are fixed in the log book of the measuring of ethyl alcohol according to form № P-23 (Appendix №4 of the Instruction), conducted by the official who is responsible for the acceptance, issue and storing of ethyl alcohol.

In accordance with the requirements of par. 2.6. of the Instruction production departments and laboratories keep records of supply and consumption of ethyl alcohol every day in the book where they fix the name and the number of industrial operations and analysis, the quantity of consumed ethyl alcohol for each operation and for a day.

The rest of ethyl alcohol at the beginning and at the end of the month is shown according to the inventory taking, that is conducted in accordance with section 6 of the Instruction on the first day of each month. The results of the inventory taking are drawn up as the acts according to form №P-27 (Appendix № 21 to the Instruction).

The declarations "About the volume of output and circulation of ethyl alcohol out of food raw material" are shown quarterly by the Company to the rating authorities and executive authorities, granted a license of this type activity, according to appendixes 2 and 7 to the Resolution of the Government of RF from 25.05.99 № 564 "About the approval of the Regulation on avowal of the production and circulation of ethyl alcohol, alcoholic and spirit-based products".

5.9. Account of financial investments.

5.9.1. The account of financial investments in the Company is carried out in accordance with PBU 19/02 "Account of financial investments", confirmed by the Order of the Ministry of Finance of RF from 10.12.2002 № 126n.

5.9.2. The financial investments of the Company include (par.3 PBU 19/02):

- ***state and municipal securities, securities belonging to other companies, including debt securities which fix the date and the cost of acquittance (bonds, bill of credits);***
- ***investments in authorized capitals of other companies (including subsidiaries and dependent companies);***
- ***loans granted to other companies;***

- *deposit investments in lending agencies;*
- *accounts receivable acquired on the basis of assignment;*
- *investments under the contracts of joint adventure etc.*

5.9.3. Accounting of financial investments is carried out on account 58 "Financial investments" with the division of the investments on short-term and long-term, according to the application date (maturity date) and the intentions:

- long-term investments, when the schedule data of the application (maturity) date is more than one year or the investments are made to collect revenue for more than a year;

- short-term investments, when the schedule data of the application (maturity) date is less than one year or the investments are made without the intention to collect revenue for less than a year;

5.9.4. Financial investments are taken on accounting at original cost. The original cost of financial investments, purchased subject to payment, is the sum of actual expenses of the Company for their acquisition, except for value added tax and other compensated taxes (except cases provided by the Legislation of RF about taxes and tallage).

Actual expenses for acquisition of assets in the capacity of financial investments are:

- *the sums paid to a saller in accordance with the contract;*
- *the sums paid to the companies and other persons for information and consultation services connected with the acquisition of the mentioned assets;*
- *the bonuses paid to mediator companies or another person through whom the assets were bought in the capacity of financial investments;*
- *the expenses of the received loans and lending, made before financial investments are taken on account, at the acquisition of financial investments at the expense of borrowed current assets (par.15 PBU 15/01 "Account of loans and lending and the expenses for their operation" confirmed by the Order of the Ministry of Finance of RF from 02.08.2001 № 60n);*
- *other expenses connected with the acquisition of the assets in the capacity of financial investments.*

Actual expenses for the acquisition of the assets in the capacity of financial investments are defined according to the differences in sums if the payment is in rubles and makes the sum equivalent to the sum in foreign currency, before the assets in the capacity of financial investments are taken to the account.

5.9.5. The original cost of finance investments made in the authorized capital of other companies is the pecuniary valuation, coordinated among the founders (members) of the companies, if nothing else is provided by the Legislation of RF.

At payment of the deposition in the authorized capital with non-monetary funds on account 58 "Financial investments" the depreciated cost of transferred objects is mentioned. At the reception of the deposition in the authorized capital with non-monetary funds on account 80 "Authorized capital" the pecuniary valuation of the transferred objects coordinated by the founders is mentioned; account 58 "Financial investments" of the founder and account 80 "Authorized capital" of the receiving party will have different cost valuation.

5.9.6. The original cost of the loans given to other companies is the sum of actual transferred monitory funds or the book cost of the property, if the loan presents the property (non-monitory funds).

5.9.7. The original cost of the financial investments, deposition under the contract of joint adventure is the pecuniary valuation coordinated by the partners of the joint adventure.

5.9.8. The original cost of the financial investments acquired under the contracts providing for discharge of obligations (payment) with non-monetary funds is the cost of assets, transferred or being subject to transfer by the Company.

The cost of the assets , transferred or being subject to transfer by the Company, is set reasoning from the price that is fixed by the Company for setting similar costs in similar circumstances.

If it is impossible to set the cost of the assets transferred or being subject to transfer by the Company, the cost of the finance investments received by the Company under the contracts providing for discharge of obligations (payment) with non-monetary funds is set reasoning from the cost of acquisition of similar finance investments in similar circumstances.

5.9.9. The original cost of the financial investments received gratis such as securities is:

- the current market cost on the day of the taking on account. The current market cost of securities is their market price calculated in accordance with established procedure by the trade organizer at the equity market;

- the sum of pecuniary valuation that can be received as a result of received securities sale on the day of their taking on account – for the securities which are not taken into account when the trade organizer at the equity market does not calculated the market price.

5.9.10. The finance investment which help to set in accordance with established procedure the current market cost are mentioned in accounting at the end of fiscal year at the current market cost by the adjustment of their valuation on the previous fiscal date. The mentioned adjustment is carried out quarterly.

The difference between financial investments valuation at the current market cost on the fiscal date and the previous financial investments valuation is referred to the financial results (composed of operational receipts and expenditures).

Financial investments which do not set the current market cost are mentioned in accounting on the fiscal date at the original cost.

If on the fiscal date the current market cost of the object of financial investments, earlier valuated at the current market cost, the current market cost is not set, such an object of financial investments is mentioned in accounting at the cost of its last valuation.

5.9.11. The original market cost of debt securities which do not set the current market cost is not made into the principal value (par.22 PBU 19/02 "Account of financial investments" from 10.12.2002 № 126n).

5.9.12. On the retirement of the asset, taken on accounting in the capacity of financial investments, that does not set the current market cost its cost is defined reasoning from the original cost of each unit of the accounting of financial investments (par.26 PBU 19/02).

5.9.13. On the retirement of the assets taken on accounting in the capacity of financial investments, which define the current market cost, their cost is defined reasoning from the last valuation.

5.9.14. The valuation of financial investments at the end of the fiscal period is carried out at the original cost of each unit of the accounting of financial investments and at the current market cost (par.32 PBU 19/02).

5.9.15. According to par.6 PBU 19/02 in the analytical account the following information about state securities taken on accounting and securities belonging to other companies is given:

- name of the Issuer (Company);
- name of the securities;
- number, series etc.;
- nominal price;
- buying price;
- expenses for the acquisition of securities;
- total amount;
- date of purchase;
-date of sale and other retirement;
- storing place.

5.10. Account of the foreign currency transactions and payments in conventional units.

5.10.1. The property and liabilities which cost is expressed in a foreign currency, are taken on accounting in ruble valuation converted according to the rate of exchange of the Central Bank of RF on the date of the conducting of a transaction; for drawing up of the accounting – according to the rate of exchange of the latest in the accounting period quotation of rate of the Central Bank of RF (par.3, 6 PBU3/2000).

5.10.2. The ruble valuation of the property (fixed assets, intangible assets, long-term securities, inventory)

purchased at foreign currency and posted at the original cost or at the sum of actual expenses for the purchasing (par.9 PBU 14/2000) is not counted over at the drawing up of the accounting.

5.10.3. The differences in rates of exchange arisen as the difference between the ruble valuation of the property or the liability which cost is expressed in a foreign currency calculated at the rate of exchange of the Central Bank of RF on the date of the discharge of liabilities of payment or on the reporting date of the drawing up of the accounting for the reporting period, and the ruble valuation of the property or the liability calculated at the rate of exchange of the Central Bank of RF on the date of the taking them on accounting in the reporting period or on the reporting date of the drawing up of the accounting for the previous reporting period, are referred to on account 91 "Other receipts and expenditures" in the list of non-disposal revenue (expenses) as far as they appear (par.13 PBU 3/2000).

5.10.4. The differences in sums arisen at the settlement for the inventory, performed work, services rendered which cost is expressed in conventional units are included in the expenses for purchasing of the mentioned assets and reflected on the accounts of the inventory and expenses account till the moment of their posting. The differences in sums arisen after the posting of the inventory, performed work, services rendered are referred to on account 91"Other receipts and expenditures" in non-disposal revenue (expenses) as far as they appear.

5.10.5. The differences in sums arisen at the settlement with the banks at the purchase (sale) of a foreign currency at the rate of exchange different from the rate of the Central Bank of RF is referred to on account 91"Other receipts and expenditures" in non-disposal revenue (expenses) as far as they appear.

5.10.6. The differences in sums arisen at other taking (fines, penalties, forfeits), connected with the implementation of the economic contracts, are referred to on account 91 "Other receipts and expenditures" in non-disposal revenue (expenses) as far as they appear".

5.11. The account of the transactions on the settlement accounts.

5.11.1. The settling with debtors and creditors is reflected in the accounting in the sums from the entries and acknowledged by the Company as the correct ones (par.73 of the Regulation on the bookkeeping of RF (the Order of the Ministry of Finance from 29.07.1998 №34n).

The sums on the settling with the banks and the budget are coordinated with the applicable companies, the reservation of the undetermined sums on the balance is not admitted (par.74 of the Regulation on the bookkeeping of RF (the Order of the Ministry of Finance of RF from 29.07.1998 №34n).

5.11.2. The settling with debtors and creditors is reflected on the applicable accounts provided by the Unified work plan of the accounts of bookkeeping of the Company in accordance with the requirements of timeliness and comprehensiveness of the accounting.

5.11.3. In accordance with the admission of time certainty of economical activity facts, the accounts receivable and the bill payable are created in the current accounting in the reporting period when the applicable facts of the economical activity took place, regardless of the actual time of intake or pay-out of the monetary funds connected with these facts (par.6 of the Regulation on the accounting "Account policy of the Company" PBU 1/98 (the Order of the Ministry of Finance of RF from 09.12.1998 № 60n).

5.11.4. The sums received from the customers in the form of Available Funds are reflected on account credit of the applicable control of account 62 "Settling with buyers and customers".
Discharge of liabilities by the discount of the counter claim, including the transient supply, is reflected according to debit of account or account credit of the applicable expenses account.

5.11.5. The discharge by the discount of the counter claim (art.410 of CC of RF) is defalked on the following terms:

- *the actual existence of counter debts, admitted and unchallenged by the parties;*

- *the uniformity of the counter claims, that means the comparability of the debts and the possibility of bringing them to the equivalent (pecuniary valuation);*
- *the date of the discharge of liabilities has come, or it is not indicated or fixed by the moment of claiming;*
- *the absence in the text of the contract of the term about the inadmissibility of the discount sequential from this contract.*

5.11.6. The discount of the mutual claims is defalked both by the agreement of the parties and on the unilateral basis with informing of the other party, after the revise of the mutual debts and drawing up of the act of the account revise (in the optional form specifying all the requisites needed for the mutual discounts), signed by the plenipotentiaries of the parties.

If the amounts of counter debts differ, the debt which amount is bigger is discharged only in an applicable part, all the rest remains without changes.

5.11.7. Reasoning from par.5.11.5, 5.11.6. of the present Regulation the suppliers liabilities discounts which are not grounded by calculated-paid documents (non-invoiced delivery) are not defalked till calculated-paid documents are received and the factual rate of the bill payable is defined on their basis.

5.11.8. The discounts are not defalked if by the application of the alter the term of actional prescription is subject to the claim and this term is expired (art.411 of CC of RF).

5.11.9. The change of the persons in the liability under the assignment contracts is reflected in the accounting in the following way:

- *on the assignment of debt to the Company and affiliated companies, for example of the debtors-energy consumers to the affiliated company Energosbyt, the original debtor is substituted for a new debtor if the Company agreed to assign the debt with the reference to the requisites of the principal contract and the requisites of the assignment agreement (par.1 art.391 of CC of RF). The energy debt is reckoned in corpore in the new debtor account, it means that the original liability is not considered to be fulfilled;*
- *on the assignment of debts by the Company to the other person, the Company debt to the creditor is cut off. The Company debt to the creditors is written off if the creditor agrees to assign the debt to the new debtor with the reference to the requisites of the principal contract and the requisites of the assignment agreement;*
- *on the assignment of debt of the Company or its affiliated companies to the new creditor, it's reflected in the accounting only after the debt notification of the assignment of debt of the original creditor to the new creditor had been received. The bill payable to the new creditor is still reckoned in corpore in the account of the Company; it means that the original liability is not considered to be fulfilled;*
- *on the assignment of debts by the Company to the other person, the accounts receivable to the Company are cut off. In the account the accounts receivable on the interests are reflected as a record on debit of the applicable control account of account 62 ""Settling with buyers and customers" in the correspondence with the applicable control account of account 91 "Other receipts and expenditures". The debt of the previous debtor is written off from the balance of the Company at the assignment in accordance with the terms of the assignment contract as a record on debit of the applicable control account of account 91 "Other receipts and expenditures" with the simultaneous charge of VAT to be paid in the budget (ch.21 art.167 par.3 of IRC of RF; art.382 par.2 of CC of RF).*

5.11.10. The own, bank and third party's bills of credit are used in the accounts only through the executive body of the Company.

5.11.11. The drawn own bills are reflected in the accounting on account 60 "Settling with suppliers and contractors" in the applicable analytics in the inner correspondence or in the correspondence with debit of account "Internal accounts on current transactions" of the affiliated company, that received the bill to meet the bill payable.

On getting the aviso of the executive body about the bill drawing the affiliated company withdraws a bill payable, the applicable sums of VAT (except for VAT on capital investments) are transferred from account 19 "Value added tax on acquired values" to the balance of the executive body of the Company:

- *to deduction at computation in the part of expenses accepted for profit tax computation in the same month (par.1 art.170 of IRC of RF);*

- *In the part of expenses for capital investments – from the moment of depreciation of the commissioned object (par.5 art.172 of IRC of RF) with the copies of invoices and acts of objects commissioning attached, certified in accordance with established procedure.*

The acceptance to deduction of VAT sums on the acquired values, the bill was transferred to pay for, is carried out in the executive body at the moment of the payment of the own bill with monetary funds.

The handing over of the own bills in pawn to discharge a liability to the creditors is reckoned on the off-balance account 009 "Discharge of liabilities and payment security" with the analytical breakdown of the pawnbrokers.

5.11.12. The acquired bills (own debtors' bills) are reckoned in the accounting at bill sum with a glance of the interests owed according to the issue of bill terms under debit of account 62 "Settling with buyers and customers" in the applicable analytics in the inner correspondence or in the correspondence with account 79 "Internal accounts on current transactions" of the affiliated company, that received the bill to meet the accounts receivable. On getting the aviso of the executive body about the bill acquisition to pay the accounts receivable the affiliated company withdraws the accounts receivable, the applicable sums of VAT on shipment are transferred to the balance of the executive body of the Company:

VAT, owed to be paid in the budget, is reflected in the accounting of the executive body at the moment of payment of a bill with monetary funds or transfer of goods (execution phase, rendering of services) on account of the payment of this bill (par.41.4 of the Methodical recommendations on use ch.21 "Value added tax" of IRC of RF from 20.12.2000, № BG-3-03/447, version of 26.12.2003).

5.11.13. The handing over of the acquired bills (own debtors' bills) to pay the bill payable is reflected in the accounting as a sale of rights of property by a record on debit of account 62 "Settling with buyers and customers" of the applicable control account in the correspondence with account 91 "Other receipts and expenditures" of the applicable control account. The accounts receivable to the Company or its affiliated companies, the bill was acquired to pay for, is written off from the balance by the record on account credit 91 "Other receipts and expenditures" of the applicable control account with simultaneous VAT charge owed to be paid in the budget.

5.11.14.. The acquired bills , including the bills acquired under the endorsement (bank and third party's bills) are reckoned at the rate of actual expenses for acquirement (acquisition) defined in accordance with par.5.9.4. of the present Regulation under debit of account 58 "Financial investments" on the applicable control account in the correspondence with the applicable control account of account 76 "Settling with various debtors and creditors".

If the bill is received to pay the accounts receivable to the Company or its affiliated companies, the accounts receivable is liquidated by the record on the applicable control account of account of the accounts receivable in the correspondence with debit of account 76 "Settling with various debtors and creditors" which reckons the bill payable for the received bill with simultaneous VAT charge owed to be paid in the budget.

If such a bill pays the accounts receivable of the affiliated company, the record is made on debit of control account of account 76 "Settling with various debtors and creditors" which reckons the bill payable for the received bill in the correspondence with account 79 "Internal accounts". On getting the aviso the affiliated company withdraws the accounts receivable by the record on account credit of the account of the accounts receivable in the correspondence with account 79 "Internal accounts", with simultaneous VAT charge owed to be paid in the budget.

5.11.15. The handling over of the bank bill or the third party's bill to pay the bill payable is reflected in the accounting as the property sale by the record on debit of account 62 "Settling with buyers and customers" of the applicable control account in the correspondence with the applicable control account of account 91 "Other receipts and expenditures" (Letters of the Ministry of Finance of RF from 24.06.1997 № 04-02-13, from 07.08.1998 № 04-03-05, from 30.10.1992 № 16-05/4).

The withdrawal of the bill payable is carried out by the record on debit of accounts of the account of the bill payable in the correspondence with the applicable control account 62 "Settling with buyers and customers" with simultaneous acceptance to deduction of VAT sums in accordance with procedure provided by par.2 art.172 of IRC of RF.

If such a bill pays the bill payable of the affiliated company, the record is made on debit of account 79 "Internal accounts" in the correspondence with the applicable control account of account 62"Settling with buyers and customers" which reckons the accounts receivable for the handled over bill. On getting the aviso the affiliated company withdraws the bill payable by the record on debit of account of the applicable accounts of the accounting of bill payable in the correspondence with account 79 "Internal accounts", with simultaneous acceptance to deduction of VAT sums in accordance with procedure provided by par.2 art.172 of IRC of RF.

5.11.16. The retirement of the bank bills and third party's bills from the balance at their submission to the maker for payment is reflected in the accounting under account credit 91 "Other receipts and expenditures" of the applicable control account in the correspondence with the applicable control account of account 76 "Settling with various debtors and creditors".

5.11.17. The accounts receivable with the expired term of actional prescription as well as other debts, unreal for the collection, are written off from the balance.

The unreal for the collection are:

1. The accounts receivable with the expired term of actional prescription;

2. The discharged debts in accordance with art.416, 417,418,419 of CC of RF.

3. The shortage of the property or its anientisement in excess of planned rate, as well as embezzlement loss, if guilty persons are not identified (the fact must be proved by the authorized state authority) or the court refused the recovery of damages.

4.The debts which recovery is impossible on the basis of the Federal Law of RF "About executive production".

Debt amortization is carried out on the basis of the act of debt inventory taking, the written reasoning, the order of the director of the Company on each liability at the expense of the present reserve of the shady debts, if it's not enough it is referred to the list of non-disposal expenses (par.12 PBU 10/99 confirmed by the Order of the Ministry of Finance of RF from 06.05.1999 №33n).

The written debt reasoning includes the index of the ground and the sum of the debt with the reference to the basic account documents; the ground for the debt amortization with the reference to the rules of law with the vouchers attached:

- *the copies of the basic account documents;*
- *at the settlement of a debtor:*

a) of a legal person – the extract from the unified state list of legal persons;

b) of a citizen – the death certificate;

c) other documents proving the impossibility of debt collection (the act of state authority etc.).

Debt amortization in sum up to RUR 1500 according to one liability with all necessary documents present, is carried out under the order of the director of the affiliated company.

The accounts receivable written off in view of debtor's insolvency are reflected in the balance sheet during 5 years since the moment of amortization to observe the possibility of its collection in case of debtor property status change.

The terms of actional prescription are fixed on the basis of art.195-208 of CC of RF. The term of actional prescription is interrupted by the filing of a claim in accordance with established procedure as well as by the actions of the person under obligation which prove the acknowledgement of debt. After the break the term of actional prescription opens again, the time before the break is not included in the new term.

The agreement of the parties, the acknowledgement of debt out of the terms of actional prescription as well as the change of persons under obligation can not be the ground for the change of the term of actional prescription and the procedure of its calculation.

The account of accounts receivable is organized according to the terms of actional prescription to observe par.5 art 167 of IRC of RF.

5.11.18. The amortization from the balance of the unclaimed bill payable and depositor debt with the expired term of actional prescription and under other grounds is carried out at the written permission of the director

of the affiliated company according to the standards art.195-208 of CC of RF.

The sums of the bill payable written off are referred to account credit 91 "Other receipts and expenditures" in the list of non-disposal revenues.

The sums of VAT on the bill payable written off are reckoned in the accounting and referred to debit of account 91 "Other receipts and expenditures" in the list of non-disposal expenses.

5.12. Calculation of expenditures on production.

5.12.1. Calculation of expenditures on production shall be carried out in accordance with issue II of Provisions on accounting "Company's expenses" (PBU 10/99 (Order of MF of RF № 33n dd. 06.05.1999.

5.12.2. Calculation of expenditures and calculation of the outputted energy net cost shall be carried out in separate electric plants, electric networks and in energy system as whole.

Full net cost of energy is formed by way of summation of net cost of production by electric plants, net cost of transfer and distribution in electric and power networks, cost of purchased electric power and expenses on the executive body's maintenance including expenses on management of technological process and maintenance of the separate subdivisions on energy selling.

Full net cost of effective output of electric and heat energy to consumers is an object for electric and heat energy net cost calculation.

Calculation units are 1 kw/h and 1Gcal of the effectively outputted electric and heat energy.

5.12.3. Calculation of expenditures on production and calculation of real net cost of production shall be carried out by traditional calculation way with direct expenditure accounts (20, 23,29) and indirect (25, 26). Calculation of indirect expense's accounts shall be closed in debit of accounts 20 (23) with further calculation of full real production net cost of the produced items every month.

5.12.4. Expenditures accounted on account 25 "Common production expense" shall be charged-off fully on account 20 "General production" and on account 23 "Auxiliary process" to the proper with their simultaneous distribution between the calculation's objects at the end of month:

- *at the power stations proportionally to the standard fuel level, here expenditures of the plants participated in output of only one type of energy shall be fully referred to this type of energy;*
- *calculation of net cost of production of auxiliary productions - proportionally to the basic salary of employees.*

Common economic expenses (except abonent payment for RAO network's using) on maintenance of the executive body including expenses on maintenance of Energy supply shall be distributed between electric and heat energy proportionally to production expenditures of electric plants and networks.

Expenditures accounted by the subsidiaries on account 26 "Common economic expenses" shall be referred to account 20 "General production", also to account 23 "Auxiliary process" and to account 29 "Auxiliary process and economy" at the end of month in cases of manufacture or production, services and works fulfillment abroad or to other subsidiaries simultaneously their distribution between the objects of calculation:

- *calculating of net cost of production of auxiliary processes shall be referred proportionally to the shop cost of production, works and services. Thus the sum of common economy expenses accounted for production, works and services of the auxiliary and service shops (production) shall be defined due to this share of common economy expenses related to their direct production;*
- *rest part of common economy expenses shall be refereed fully to net cost of general manufacture production (expenses on maintenance of design, technological departments and background of department's manufacture, expenses on maintenance of production laboratories, cost of different tests, researches and experiments subject to general manufacture; expenses concerned rationalization and research on general production; expenses concerned the employee's training and further training for general production; expenses concerned maintenance of watch and fire prevention; expenses concerned payment of land tax, non productive expenses concerned manufacture and supply of general production*

and other same expenses). Common economy expenses shall be distributed between electric and heat power proportionally to their shop net cost;

- common economy expenses on services rendered by auxiliary process and auxiliary production and economy)internal consumption by the subsidiary) are not referred.

5.12.5. Net cost of electric power transfer (transit) through the corresponding voltage range shall be defined by product of actual net cost of electric power transfer on corresponding voltage thought electric power plants and Energy Supply and by volume ratio of outputted energy under the transit contract on corresponding voltage to the total volume of corresponding voltage output through the network (except overflow balance to other plants) including electric power outputted under the transit contract in accordance with actual balance of electric power in the networks BH, CH1, CH2, HH.

5.12.6. Finished product (account 43) shall be reflected in accounting on actual production cost.

5.12.7. Expenses concerned production supply accounted on account 44 "Expenses on sale" shall be charged-off fully on account 90 "Sales" in reporting period (par. 9 PBU 10/99).

5.12.8. Expenses incurred in the reporting period but concerned the further reporting periods shall be reflected as future expenses (account 97):

- *holiday pays charge to the next month:*
- *subscription publication's expenditures;*
- *insurance payment charge;*
- *other expenses and payments with further equal charge-off in the related period.*

5.12.9. Expenditures on usual activity shall be classified as in articles , as in elements (par. 8 PBU 10/99).

5.12.10. Expenditures of department on stuff training of the Stuff management department shall be accounted on account 26 "Common economy expenses" separately with further transfer to subsidiaries through account 79 "Intraeconomic payments" in amount of actual expenditures distributed proportionally the volume of rendered works and services.

5.12.11.Expenses on equipment of sanitary-accommodation premises, medical premises, rooms for repose and psychological relaxation, creation of sanitary posts furnished with medicine chests composed of medicine sets subject to initial care etc., provided by the legislation in force, shall be accounted on account 25 "Common productive expenses" according to the fixed norms.

5.12.12. Expenses on preparation and holding of civil defense actions shall be accounted on account 26 "Common economic expenses" (Provisions of the Government №227 dd. 16.03.2000

5.12.13. Accounting of expenses on energy transfer at the energy plants shall be carried out apart of accounting of expenses on energy output on the separate subaccount 20.5 "Expenses on heat energy transporting".

Calculation of the transfer net cost shall be accounted apart of electric and heat power production as the separate activity.

5.12.14. Division into the Company activities shall be carried out according the single issued Order and Provisions on separate accounting over the activities.

5.13. Features of the Company's profits and losses forming

5.13.1. The Company's profits on usual activities are the following:

- *proceeds from electric and heat power sale;*

- *proceeds from increased pay to the rate on reactive power compensation (tangent Fe);*
- *proceeds received for nonrecoverable condensate;*
- *proceeds from makeup and chemical treated water sales;*
- *proceeds from other finished production of auxiliary process sales;*
- *proceeds from agricultural production sales;*
- *proceeds from rendered works (services) of industrial nature (including transit);*
- *proceeds from nonindustrial works (services) sales including profit on sale of medical services to the third parties, profit on sale of tickets in the own medical institutions (sanatorium-preventoriums) to the third parties and to own employees; profit on housing services (rent), services of preschool institution (payment for children keeping), other services of nonindustrial nature (payment for weekend tickets in the sanatorium-preventoriums, rest in tourist centers, in the pioneer camps etc.);*
- *proceeds from good's sale including retail trade (through the stores against cash, also instalment selling against salary), also wholesale trade (profit of inventory holdings sale abroad), foreign trade (export trade);*
- *proceeds from catering goods sale;*
- *earnings concerned temporary use of the Company's assets under the Lease contracts against payment (temporary use and possession).*

5.13.2. Profits on usual activity shall be defined as difference between the earnings on sale of goods, products, works and services according to the current costs and rates on electric and heat power except VAT and expenses on their production and sale approved by REC.

5.13.3. Extraordinary profits of the Company shall be declared the following types of penalties, fines and forfeits against the violation of the contract's terms and provisions;

- *electric power capacity excess;*
- *energy consumption contracted size's excess;*
- *energy consumption contracted size's underexploitation;*
- *unauthorized electrical installation's launching;*
- *nonrecover of condensate;*
- *excess of the fixed by the contract maximum hourly demand of heat energy;*
- *unauthorized water pumping;*
- *excess of the contacted volume of heat energy consumption;*
- *temperature excess of return delivery water;*
- *underexploitation of the contracted volume of heat energy consumption*

shall be reflected on account 91 "other profits and losses" in the moment of profit acceptance.

5.13.4. Social oriented expenses, i.e. additional payment to pensions, incentive pays, expenses on health-improving measures, compationate activity, maintenance of objects of social sphere and other similar expenses shall be deemed as other extraordinary expenses and shall be reflected on account 91 "Other profits and losses".

5.13.5. Sum differences over the payments with debtors-buyers arose this reporting period shall be referred to the earning increasing due to sale.

Sum differences arose after the reporting period shall be deemed as profits (losses) of the last years revealed in the reporting period in the result of re-calculations with counteragents and shall be reflected in composition of other extraordinary profits (losses) on account 91 "Other profits and losses".

5.13.6. Interests on the commercial credit granted to the buyer (customer) by the Company on terms of delay of payment including collateral note received from the customer shall be deemed as other extraordinary profits and shall be reflected on account 91 "Other profits and losses".

5.13.7. By results of inventory of accounts receivable spent at the end of fiscal year the reserves on dubious debts over the payments with debtors with the debtors and the sums of created reserves shall be refereed to the debit of account 91 "the profits and losses" in composition of operative expenses in correspondence with account 63 "Reserves on the dubious debts" (par. 11 Provisions on accounting "Company's expenses" PBU 10/99 (ed. 30.03.2001).

The reserve's size shall be defined separately by each dubious debt depending on the debtor's financial situation and appraisal of probability of a debt repayment fully or partially, also shall be limited by the Company's financial abilities.

Any debtor's debt shall be deemed as dubious debt if this debt was not paid in terms prescribed by the contract and was not ensured with mortgage, voucher of bank guaranty.

Accrued reserve shall be aimed at coverage of losses incurred due to bad debts.

The bad debt is a debt which limitation period has expired or in case of discharge owing to impossibility of its execution on the ground of the act of the State body or of the company's liquidation.

Unused reserve sum of bad debts in the fiscal year shall be added to the profits of the fiscal year together with a record in the credit of account 91 "Other profits and losses" in composition of operative expenses in correspondence with account 63 "Reserves on bad debts".

5.13.8. Energy output to the needs of plants and networks shall be reflected in accounting in appraisal of:

- output to the technological and economy needs of the main and auxiliary processes according to the specially fixed rate without reflection in the sale's volume;

- output to own capital construction and to the non industrial economy according to the fixed rates including reflection in the sale's volume.

Electric and heat power consumed by economic needs shall be included in the sale's volume but shall be transfer in aviso through account 79 "Intraeconomy payments" to subsidiaries without invoicing.

According to the "Standard instruction on electric power accounting under its production, transfer and distribution RD 34.09.101-94 (approved by General State Energy supervision department of Russia (Glavgosenergonadzor of Russia) dd. 02.09.1994), the category of economic needs of energy system involves electric power consumption by auxiliary and non industrial processes being on the balance of electric plants and electric network enterprises obligatory to main production maintenance but not tied directly with technological processes of heat and electric power production at the electric plants, also transfer and distribution of electric power (nomenclature of energy consumption's elements to the economy needs of electric plants and electric networks is defined by the Letter of the Minenergo of USSR №B-6023 dd. 24.04.1980).

Electric power consumption to economic needs of energy system shall be included in the effective output subject to accounting as separate line in form of static report 46-ec "Effective output of electric and heat power" and shall be transferred to subsidiaries according to the special fixed rate.

Electric power consumption to heating, water supply and lighting of dwelling houses, canteens (if these expenses are reflected on b/account 29 "Auxiliary processes and economies"), hostels, hotels, clubs, tourist centers, preventoriums etc. shall not be included in economic needs of energy system.

Also consumers operated from the needs of plants and substations (sub-abonents)are not referred to the economic needs of energy system.

Energy consumed by windings of synchronous condensers and glaze fusion are not referred to the energy consumption to the economic needs of energy system. Aforementioned types of energy consumption form energy losses in electric networks.

Every month according to the reports of PTO of subsidiaries, Energosbyt (Energy supply) shall correct sale's volume on economic need's sum and hand over information on electric and heat power consumed by subsidiaries to economic needs in accordance with approved form "Appendix 2 to this present Provisions) to accounting department of the executive body:

Executive body shall transfer through aviso electric and heat power consumption to the economic needs to

the subsidiaries every month. Sum received by the subsidiaries shall be reflected on expenditure accounts (Debit 20,23,25,26; Credit 79).

Heat power (makeup water and unreturned condensate (in tn.) shall be transferred to the subsidiaries through aviso with invoicing by Energosbyt (Energy Supply).

Coordination of parameters with the branch statistical report under the form 46-ES is not provided in the current annual and intermediate accounting. There is a reference to explanation of a reason of data divergence on sales volume with the accounting reporting in the statistical branch report.

5.14. Disposition of profits

5.14.1. Disposition of net profits in the Company shall be approved by the general meeting of shareholders and shall be hold in accordance with Law "On Joint Stock Companies" and with standard documents on book keeping.

APPENDIX 2

Summary accounting report for the last completed fiscal year.

Auditor's opinion on the accounting report of the JSC "Kuzbassenergo" at the outcome of the year 2004

Audit of the accounting report of JSC "KUZBASSENERGO" (hereinafter – the Company) for the period of 2004 was made by ZAO "BDO Yunikon in accordance with the contact dd.11.08.2004 under the No. 10206-01-266/04, concluded according to resolution approved by general meeting of shareholders of the Company to elect as auditor of the Company ZAO BDO Yunikon (resolution №12 dd. 24.06.2004).

1. We have audited the accounting report for the period 2004, comprised of 65 pages, contain the following:

- balance sheet (form №1) – 6 pages ;
- Profit and losses Statement (form №2) – 3 pages;
- Statement of changes in equity (form №3) – 3 pages;
- Cash flow statement (form №4) – 3 pages;
- Appendix to the balance sheet (form №5) – 6 pages;
- Explanatory note – 44 pages.

The Executive Body of the Company is responsible for the preparation and presentation of these accounting statements in accordance with regulations fifed by Federal Law No. 129-FZ dd.21.11.1996 "About accounting" (with amendments and additions), Rules for accounting, Order of the Ministry of Finance of RF No.67н dd.22.07.2003 "About accounting statement's forms' and other regulations of RF, defined an order of accounting and accounting statements.

Mr. Mikhailov Sergey Nickolaevich as the general director of the Company is responsible for accounting organization, as observance of RF legislation under economic operations execution.

Mrs. Riumova Alevtina Nickolaevna as chief accountant of the Company is responsible for accounting policy forming, bookkeeping, timely presentation of full and reliable accounting reports.

Audit's liability is to express an opinion based on results of the audit on the truthfulness of the financial statements, in all material respect, and the compliance of the accounting procedures, in all material respects, with the legislation of the Russian Federation. The purpose of our work was not expression of opinion on full conformity of the Company's activity to the legislation of the Russian Federation and evaluation of the Company's management efficiency.

Our opinion cannot be considered by the user of the reporting as an expression of confidence of a steadiness of activity of the Society in the future.

2.The audit was conducted in accordance with Federal Law No.119-FZ dd. 07.08.2001 "On audit activities" and Federal audit rules (standards) approved by the Government of the Russian Federation No. 696 dd.23.09.2002 (with amendments and additions), other standards regulated audit, and also with company standards and audit methodic. Also we used internal rules (standards) of the accredited professional audit union IPAR.

Audit was planned and performed to obtain reasonable assurance that the financial statements of the Company are free of material misstatements. The audit included examination, on a test basis, of evidence supporting the amounts including estimates made by management, disclosures on the financial and operational activities of the Company, assessment of the accounting principles and methods, preparation of the financial statements, as well as evaluating the overall financial statements presentation. We believe that our audit provides a sufficient basis for our opinion on the truthfulness of the financial statements in all

material respects and the compliance of the accounting procedures in all material respects with the legislation of the Russian Federation.

We established, that the Company does not create a reserve on depreciate securities on financial investments in the affiliates in a stage of bankruptcy proceedings. As a result, an overstating of the line 140 "Long term investments" on 01.01.2004 by RUR 155 296 thousand took place.

3. In our opinion except for the effect on the accounting reports of the matters referred to in the preceding paragraph, the accounting statements of the Company attached to this report have been properly prepared to present, in all material respects, the financial position of the Company as at 31 December 2004 and financial results of its operations for the period from 1 January up to 31 December 2004.

4. Without further qualifying our opinion, we draw attention to information stated in the explanatory notes to the accounting report , in part " Disclosure of major reporting data. Additional share capital".
On 01.01.2004the amount of additional share capital was increased by RUR 2 200 161 million , and unappropriated balance was reduced by the same amount due to reflection in accordance with earlier standards in force, of the sum in the structure of the additional share capital of gratuitously received values and accumulation fund on the major assets putted into operation during the last periods.

Due to inventory-taking this mistake was corrected on 31.12.04.

Deputy General director Z.A. Khailo

(In-charge of the audit,
Auditor's qualification certificate for general audit № 012121 issued by Central certifying and licensing audit commission of the Ministry of Finance of RF dd.25.04.96, Since 28.03.2002 was prolonged for unlimited terms (record №104 of Central certifying and licensing audit commission of the Ministry of Finance of RF).

Auditor ***E.P. Krupnova***

(Auditor's qualification certificate for general audit of the Ministry of Finances № K017659 issued by Central certifying and licensing audit commission of the Ministry of Finance of RF dd.25.07.98, Since 05.08.2004 was prolonged for unlimited terms (record №57 of Central certifying and licensing audit commission of the Ministry of Finance of RF).

II. Major Information about Financial and Economic State of the Issuer

2.1. Figures of financial and economic activity of the Issuer

For 2000-2004:

Index	2000	2001	2002	2003	2004
Cost of the Issuer's net assets, roubles	16,681,078,000	16,666,809,000	20,847,542,000	24,851,878,000	24,389,890,000
Ratio of the amount of borrowed assets to the Company's assets and provisions, %	45.29	39.77	30.47	32.42	34.13
Ratio of the amount of short-term liabilities to the Company's assets and provisions, %	27.35	22.16	18.39	23.29	19.29
Cover of debt service payment, roubles	0.32	0.27	0.28	0.28	9.40
Rate of overdue debts, %	69.34	10.70	4.26	1.88	0.20
Net assets turnover, times	0.65	0.76	0.71	0.68	0.68
Accounts payable turnover, times	1.47	1.73	2.03	1.99	1.94
Accounts receivable turnover, times	1.84	2.38	4.52	3.58	4.48
Rate of profit tax before taxes, %	23.17	92.49	-112.47	73.37	24.25

For the 1st quarter of 2004 and the 1st quarter of 2005

Index	the 1st quarter of 2004	1st quarter of 2005
Cost of the Issuer's net assets, roubles	26,278,405,000	27,804,898,000
Ratio of the amount of borrowed assets to the Company's assets and provisions, %	27.49	27.28
Ratio of the amount of short-term liabilities to the Company's assets and provisions, %	18.74	14.39
Cover of debt service payment, roubles	Not calculated	0.17
Rate of overdue debts, %	0.00	2.30
Net assets turnover, times	0.19	0.20
Accounts payable turnover, times	0.57	0.63
Accounts receivable turnover, times	1.00	1.38
Rate of profit tax before taxes, %	31.49	24.00

Principles recommended by FCSM (Federal Commission for the Securities Market) in the Resolution of 2 February 2003 No 03-32/ps were used to calculate the highlights.

On the 31st of March 2005 positive trends in the highlights of financial and economic activity of the Company were seen. The amount of net assets is the initial highlight of the Company's stable financial state. Through the surveyed period the stable increase of net assets is seen, in 2004 the growth of this highlight towards 2002 was 146.2 %. For the 1st quarter of 2005 the net assets cost also increased that had been caused mainly by the decrease of the Company's short-term liabilities. Thus the net assets cost in the 1st quarter of 2005 increased by 1,526,439 thous. roubles as compared to the same period the previous year (at the beginning of 2005 the fixed assets revaluation was done).

For the 1st quarter of 2005 the Company's net assets value equals 705,853 thous. roubles, that influenced positively both on the replenishment of the Company's sources of assets generation and on its financial ability to repay external debts.

The turnover of the accounts receivable and payable for the 1st quarter of 2005 increased by 0.38 and 0.06 times respectively as compared to the same period in 2004.

Overdue accounts receivable are still low and indicate the Company's ability to repay its liabilities without considerable delays.

2.2. The Issuer's Market Capitalization

Trading equity shares of the Issuer is done in the following markets:
Full and abbreviated names of the trade institutors: ***Non-profit partnership "Stock Exchange RTS", NP "Stock Exchange RTS";***
Closed Joint-Stock Company "Moscow Interbank Currency Exchange", CJSC "MICE".

Non-profit partnership "Stock Exchange RTS": ***One equity share of OJSC "Kuzbassenergo" is traded in the system "Classical equity shares market". Equity shares on 23 June 1997 were put in the list "RTS-2", were excluded from the list "RTS-2" on 4 January 2000 and were put in the list "Classical equity shares market".***

Market capitalization following the results of 2002 was calculated on the basis of the largest 10 bargains settled through RTS in December 2000 and equals 49,438,720 USD.

Market capitalization following the results of 2001 was calculated on the basis of the largest 10 bargains settled through RTS for the last 3 months of 2001 and equals 72,460,821 USD.

In 2002 129 bargains were settled through RTS, including 3 bargains in December, 6 - for the last 3 months, thus the calculation of the Issuer's market capitalization for 2002 is done at the price of equity shares bought in the equity market RTS on 31 December 2002 (0.19 $ x 606,163,800 = 115,171,122 $).

In 2003 through RTS 55 bargains with equity shares of OJSC "Kuzbassenergo" were settled with the shares trading volume that was equal 1,320,834 USD or 4,910,139 pcs. thus the calculation of the Issuer's market capitalization is done at the price of equity shares bought in the equity market RTS on 31 December 2003. It means that the Issuer's market capitalization for 2003 equals 0.48 $ x 606,163,800 = 290,958,624 $.

During 2004 through RTS 48 bargains were settled with the shares trading volume that was equal 1,980,647 USD or 2,987,610 pcs. including 6 bargain for the 4th quarter. Thus the calculation of the Issuer's market capitalization is done at the price of equity shares bought on 31 December 2004 (0.681 $ x 606,163,800 = 412,797,548 $).

During the 1st quarter of 2005 through RTS 10 bargains were settled with the shares trading volume that was equal 316,440 USD or 453,000 pcs. Thus the calculation of the Issuer's market capitalization is done

at the price of one equity share rated for 3 months (0.681 $ x 606,163,800 = 412,797,548 $).

Closed Joint-Stock Company "Moscow Interbank Currency Exchange": ***One equity share of OJSC "Kuzbassenergo" in 23 July 2003 was put in non-listed stock. No bargain was settled in 2003 and 2004. In MICE, for the 1st quarter of 2005, 86 bargains were settled with the shares trading volume that was equal 7,237,903 USD or 312,000 pcs.***

2.3. The Issuer's Liabilities

2.3.1. Accounts Payable

For 2000:

Liabilities	**2000**
Short-term and long-term liabilities, in total, roubles	6,508,259,000
Accounts payable, in total, roubles	5,913,268,000
including:	
Debt to suppliers and contractors, roubles	*3,124,446,000*
Bills payable, roubles	*321,916,000*
Debt to associated and dependent companies, roubles	*22,281,000*

Creditors, whose share in the total amount of accounts payable is not less than 10%:

Creditor Name	**Location**	**Amount of Debt, roubles**	**Overdue Debt, roubles**	**Fines, Penalties, roubles**	**Whether it is an Affiliated Company**	**Participatory Share in the Issuer's Nominal Capital**
Open Joint-Stock Company RAO "UES of Russia"	Moscow	1,290,432,000	0	0	Affiliated company	49.0%

In 2004 as compared with 2003 the increase of long-term liabilities to the budget and non-budgetary funds took place that was the result of transfer of restructured debt on fines and penalties to the Company's balance accounts.

Besides, on the basis of the Amicable Agreement of 26 November 2004, ratified by the decision of the Common Court of Arbitration in OJSC RAO "UES of Russia" of 30 November 2004 (Case No. 42/2004-114), the repayment schedule of the debt to OJSC RAO "UES of Russia" was changed. The debt in the amount of 1,290,372 thous. roubles is to be repaid during the period from 2005 to 2010. Thus the debt earlier considered to be short-term debt became a long-term one in the amount of 311,627 thous. roubles. Long-term liabilities to suppliers and contractors, not including the debt to OJSC RAO "UES of Russia", were decreased by 141,762 thous. roubles.

Accounts payable (including credits and loans) of OJSC "Kuzbassenergo" in the 1st quarter of 2005 as compared with the same period the previous year increased by 118,163 thous. roubles. The main reason is the increase of the sum of pledge bills that are given in order to guarantee credit liabilities, meanwhile the Credit Portfolio of the Company as of 31 March 2005 remained the same – 1,400,000 thous. roubles.

Accounts payable not including credits and loans of OJSC "Kuzbassenergo" as of 31 March 2005 is 4,995,369 thous. roubles, that is lower by 16,669 thous. roubles as compared with the same period the previous year. The decrease of accounts payable was as follows:

- ***debt to suppliers and contractors – by 410,258 thous. roubles;***
- ***debt on a bill issued by OJSC "Kuzbassenergo" and given to suppliers and contractors for debt repayment – by 156,608 thous. roubles.***
- ***debt to associated and dependent companies – by 55,532 thous. roubles.***

The increase of debts to the budget and non-budgetary funds by 696,818 thous. roubles was the result of the transfer in December 2004 of restructured debt on fines and penalties from off-balance accounts in the amount of 1,226,791 thous. roubles.

Credit portfolio OJSC "Kuzbassenergo" for 31 December 2004 was 1,671,535 thous. roubles, including 1,666,000 thous. roubles – it is the main debt to credit liabilities, 5,535 thous. roubles – it is the debt to the accrued but not paid interests for the usage of the credit funds, that is the debt determined by the provisions of the credit contracts. Short-term credits were used in order to replenish circulating assets for the redemption of current liabilities of the Company.

OJSC "Kuzbassenergo" didn't sign any credit contracts or credit loans that are valid for 31 December 2004 and the sum of the main debt of which is 10% or more of the costs of net assets.

The credit policy of OJSC "Kuzbassenergo" is targeted at the attraction of credit resources with the most profitable terms of crediting, at the decrease of the interest rate for using credit resources. Borrowed funds are attracted by the Company at the interest rate that is lower than the refinance rate set up by the CB of the RF.

The Board of Directors at the meeting held on 28 December 2004 ratified the Statute of the Company's credit policy. This Statute determines the rules of setting Limits of Debt position and Limits of borrowings' Cost parameters, the rules of compliance control and the measures how to comply the Debt position in accordance with the Limits and in case of overdraft to ensure financial stability and to minimize the risk of the Company's non-payment.

The Board of Directors approved the credit plan for the 2nd quarter of 2005 which presupposes:
a) attraction of credit resources in the amount of 1,067.0 million roubles at the rate that exceeds the refinance rate of the CB of the RF not more than 10% for the guarantee, provided by the Company's credit policy, in the following banks:
- ***JSCB "Kuzbassugolbank" – 100.0 million roubles;***
- ***OJSC "Alfa-Bank" – 316.0 million roubles;***
- ***OJSC "Vneshtorgbank" – 60.0 million roubles;***
- ***JSCB "MDM" – 400.0 million roubles;***
- ***OJSC Bank "Ural-Sib" – 200.0 million roubles;***

b) paying off credit debts in the amount of 776.0 million roubles in the following banks:
- ***OJSC "Alfa-Bank" – 216.0 million roubles;***
- ***OJSC "Vneshtorgbank" – 60.0 million roubles;***
- ***JSCB "MDM" – 300.0 million roubles;***
- ***OJSC Bank "Ural-Sib" – 200.0 million roubles;***

Under the condition of the compliance with the maximum amount of lump-sum loan liabilities under the credits that the Company attracts:
- for 1 April 2005 in the amount not more than 1,400.0 million roubles;
- for 1 July 2005 in the amount not more than 1,700.0 million roubles;

2.3.3. The Issuer's Liabilities under the Guarantee Provided to the Third Parties

According to the certificate about the valuables availability at off-balance accounts (lines 950 and 960) that is included in the Company's accounting statement, as of 31 March 2005 the total sum of liabilities of OJSC "Kuzbassenergo" was equal correspondingly:
- Guarantees to liabilities and payments earned (line 950) 98,604 thous. roubles;
- Guarantees to liabilities and payments paid (line 960) 955,230 thous. roubles;

The Issuer's doesn't have the liabilities under the guarantee, provided during the accounting period to the third parties, including those that are in the form of pledge or bail and constitute less than 5 percent from the balance cost of assets of the Issuer for the accounting period.

2.3.4. Other Liabilities of the Issuer

Agreements – including express bargains that are not registered in the balance sheet and that may substantially influence on the financial state of the Issuer, its liquidity, funding sources and conditions of their usage, results of activity and expenses – are absent.

2.5. Risks that are Connected with the Acquisition of Issued Securities in Floatation (Placed Securities)

2.5.1. Industrial Risks

According to the territorial specific character the activity of OJSC "Kuzbassenergo" is done only in the internal Russian market.

The most significant changes in the sphere of electric energy industry for OJSC "Kuzbassenergo" the reform of OJSC RAO "UES of Russia" is in general and in particular – the reform of regional JSC-energo to which the Issuer belongs. The reform of OJSC "Kuzbassenergo" is based on the division into a set of Companies, in compliance with the proportional amount of the Companies' shares among the shareholders of OJSC "Kuzbassenergo".

Besides, the following factors may influence in the activity of the Issuer:

- The possibility of entry of large consumers of electric power into FOREM. Currently there are two segments of electric power market in the country: Federal Wholesale Market of Electric Energy and Power (FOREM), divided into three isolated price areas: European, Siberian and Far Eastern; and a market of free trade in the ratio "5-15" of the wholesale market. The activity of the first market is strictly regulated and governed by the Federal Energy Commission (FEC), the second market was launched on 1 November 2003 as a transitional period from a regulated market to a competitive one. Unlike FOREM it's quite a new sector for trading electric power, that functions basing on competitive principles and the open pricing. Only regions that are situated in the Western part of Russia may be in this market.

Enterprises' entry into FOREM negatively influences on sales and distribution of products of OJSC "Kuzbassenergo". Among the enterprises that may enter into FOREM are the following: Western-Siberian Railroad – branch of OJSC "Russian Railroads", LLC "CC Sokolovskaya", DHK KRU OJSC "Belovskoye Energoupravlenie", OJSC "Energoupravlenie Lininskugol", OJSC "Electric Networks" (Keselyovck), OJSC "Prokopjevskenergo", Kemerovo OJSC "AZOT", LLC "Topkicement", OJSC "PA Himprom", PA OJSC "Himvolokno Amtel – Kuzbass". Lost revenues that happen due to the entry of these enterprises into FOREM in current tariffs equal approximately 6.5 mlrd. roubles. At present, in order to withhold the consumers, transit contracts are not signed because the issue of cross-subsidies is not resolved yet. Possible mechanism of compensation of lost revenues is discussed at the Ministry of Economic Development of the RF and it is still not known whether it will be adopted or not.

- Changes in the structure of power consumption – from the planned structure – in consumer groups due to the reduction of production volumes of a number of industrial enterprises may lead to the reduction of the volume of energy output in monetary values.

- Enterprises bankruptcy may lead to the impossibility of debts collection for the consumed energy.

- The reduction of living standards of lower-income population of Kemerovskaya Oblast will inevitably lead to the reduction of the level of payment by this group of consumers.

- Untimely and not complete repayment of amounts under granted privileges to citizens in accordance with the Governmental Regulations.

- Risks connected with the changes in the tariffs policy for electric and heat power that may negatively influence on financial and economic state of the Issuer. It was legally accepted that the changes in power tariffs may be done only once a year at the same time actual inflation rate may exceed the rate that had been planned by the Issuer and had been included in the tariffs and that may lead to losses of the Issuer's

revenues.

2.5.2. Country and Regional Risks

The main factors that determine the appearance of political and economic risks may be the imperfection of the legislative basis that regulates economic relations as well as lack of efficiency of the judicial system, constant changes in the Tax Code, etc.

Economic factors in the majority of cases cannot be controlled by the Issuer. It's impossible to guarantee that recent tendencies of the Russian economy, including the increase of GDP, relative stability of the rouble and the decrease of the inflation rates will remain at the same level in future. Besides, the fluctuation of world prices for oil and gas, the rouble strengthening in real terms against US dollar as well as the consequences of the weakening of the monetary and credit policy or any other factor may influence negatively in future on the Russian economy and the activity of the Issuer.

Russian economy is not protected from the decrease of the market activity, the retardation of economic development in other countries of the world. As it happened in the past, financial problems or the aggravated perception of possible risks, when investing in the developing countries, may decrease the volume of foreign investments in Russia and influence negatively on the Russian economy as a whole.

Ecological factors are very closely connected with the main activity of the Issuer, because the process of generation, transmission and distribution of electric and heat power requires the consumption of a great deal of natural resources and thus causes pollution of the environment. In order to eliminate the risks from ecological factors it is necessary to invest more money in order to buy environmental equipment and to pay for the consumption of natural resources.

There are also regional risks, connected with the reforming of OJSC "Kuzbassenergo". In order to reduce these risks the managerial staff of OJSC "Kuzbassenergo" intensively consults with the Kemerovskaya Oblast Administration and with the Administration of the region's cities concerning the problems of the Company's reforming. It became necessary because there was a resolution of the Administration of Kemerovskaya Oblast No. 54 of 26 April 2002 "About the reformation of "OJSC "Kuzbassenergo" and No. 49 of 28 March 2003 "About the project of reformation of OJSC "Kuzbassenergo" and social protection of electric energy workers of Kemerovskaya Oblast " in which provisions of the project were written with a number of requirements from the Regional Authorities to the Company's authorities.

On 20 September 2004 Tripartite Agreement was written between OJSC RAO "UES of Russia", OJSC "Kuzbassenergo", the Administration of Kemerovskaya Oblast which, in particular, regulates the issues of further implementation of the program of reformation of OJSC "Kuzbassenergo". According to the Agreement the Administration of the region will contribute to the process of the energy Company's reformation, in particular, the division into retail company, governing company, electric networks and heat networks companies.

Risks that are connected with the geographical peculiarities of the region, that is:

- the risk of inflicting a damage in case of an emergency situation of natural character: the risk of floods in a high-water season, earthquakes on the territory of Kemerovskaya Oblast.

- the risk of direct military conflict as well as the risk of emergency state is assessed as almost impossible at the regional level, because ethnic and social strain in the region is not crucial. However there is a risk of acts of terrorism and in order to minimize them protective measures were stiffened at vitally important facilities of OJSC "Kuzbassenergo". Special attention is given to electric power stations, large electric sub-stations, pumping stations, storehouses of petroleum, oils, lubricants and other categorical facilities

At the enterprises the access mode of automotive transport and personnel was stiffened and it is also done with the help of manual and stationary metal finders. Artificial barriers were erected in order to prevent from unauthorised access of automotive transport on the territory of the enterprise. Car parks were moved at a safe distance from the fences of the electric energy facilities, interaction of security service of OJSC

"Kuzbassenergo" with guard-posts of State Inspectorate for Traffic Security (SITS), Department of Internal Affairs (DIA), Emergency Control Ministry (ECM). At the facilities that are the most important and remote ones, video surveillance and patrolling is done during 24 hours.

A plan of actions was developed in order to strengthen the technical security of facilities of electric power industry for 2005. The sources and volumes of financing in the amount of almost 40 million roubles were defined.

2.5.3. Financial Risks

Risks that are connected with changes of interest rates the Issuer was subjected with respect to the costs of attracted banking credits. Today a tendency of the reduction of interest rates is observed that is favourable both for the Issuer and for the Borrower. Borrowed funds were attracted by the Company at the rate that was lower than the refinance rate set up by the CB of the RF.

In the sphere of setting up tariffs there is a risk – for OJSC "Kuzbassenergo" – of setting up by the Regional Energy Commission in Kemerovskaya Oblast such tariffs that won't cover production costs and that will cause losses of revenues due to the reduction the amount of revenues. Thus for 2005 the REC set up the average tariff for electric power that was equal 65.8 kopecks per 1 kW/h and heat power tariff that was equal 310 roubles per 1 Gcal. It corresponds the uppermost level of growth, set up by the Federal Agency for Tariffs (FAT) correspondingly for electric energy – 12.2.%, for heat power – 10.8%. At the same time expenses for the purchase of fuel in the amount of 300-400 million roubles were not included in the base of tariffs. The REC didn't take into account the expenses for repair works in 2005 in the amount of approximately 300 million roubles. Expenses of the energy company for insurance – as a result production assets may be insured for the period less than half a year, after which this type of financial protection of property against unforeseeable consequences will not be valid.

The risks of current financial and economic activity are the risks connected with possible changes of prices of raw materials, fuel, services and that may influence negatively on the cost price of products and services of the Company.

The Issuer doesn't incur any currency risks.

There are financial risks that are connected with the forthcoming reformation of the Issuer (reorganization by means of detachment):

- the increase of spending that are connected with: the payment of costs for the State Registration of rights to immovable property, the attraction of advisers, the appraisal of property and property rights, the implementation of the Compensation Program for the retired (fired) employees when reformation and reorganizing the Company, the establishment of maintenance and service support departments, etc. The approximate amount of costs for the reformation according to the business plan for 2005 is 141.826 million roubles;

- the risk of claims (by the creditors' of OJSC "Kuzbassenergo" that got a notice of the made decision and reorganization): for the advanced repayment of accounts payable, for the discharge of appropriate liabilities and for the compensation payment when reorganizing the Company by means of detachment (See paragraph 6, article 15 of the FL "About joint-stock companies"). Initiators of claims may be the creditors with the restructured long-term liabilities: OJSC RAO "UES of Russia", Ministry of Taxation, Non-Budgetary Funds. The approximate amount of commercial restructured liabilities, that may be claimed, is 3,014.4 million roubles;

- the risk of claims (by the shareholders that voted against the reorganization or didn't take part in the voting): for the redemption of all or some shares of OJSC "Kuzbassenergo" that belonged to them. The approximate amount of finance for the redemption of shares is 587.979 million roubles;

2.5.4. Legal Risks

Legal risks – that are connected with the alteration of currency exchange regulations, the alteration of tax legislation, the alteration of customs control regulations and fees regulations, the alteration of licensing requirements, the alteration of judicial practice – may cause negative effect on the results of the Issuer's activity and on the results of current lawsuits in which the Issuer is involved. And such risks exist.

- The alteration of tax legislation - the increase of tax rates or the alteration of tax settlement procedure and due date for tax payment - may lead to the decrease of the Issuer's net profit and it may, in it's turn, cause the decrease of the amount of the distributed profits.

- The alteration of licensing requirements for the Issuer's primary activity may lead to the increase of the time needed to prepare the documents that are necessary for license renewal as well it as may make the Issuer comply with certain requirements. Though, in general, this type of risk should be considered as an insignificant one, except for the situation when for license renewal or for the Issuer's activity, that is to be licensed, such requirements will be set that either the Issuer won't be able to comply with them or the compliance with them will cause excess expenditures. Therefore the Issuer's primary activity may be over.

- The alteration of judicial practice that are connected with the Issuer's activity and that may cause negative effect on the results of the Issuer's activity didn't take palce.

2.5.5. Risks That Are Connected With the Issuer's Activity

For the accounting period no lawsuits that could lead to the Issuer's liquidation were commenced against the Issuer.

There are some claims – concerning the collection of taxes-and-duties to the budget and non-budgetary funds – that are currently pending in court. But these lawsuits are not considered by the Issuer to be significant ones.

And neither the adoption of the claims by the Issuer nor the recovery of taxes-and-duties through legal proceedings can lead to the Company's liquidation, declare it a bankrupt or cause other negative consequences for the Company.

In two associated Companies OJSC "Andreevskoye" (the judgement of the Arbitration Court of Kemerovskaya Oblast of 6 July 2002, the claim No, A27-2844/99-4), OJSC "Kuzbassgidroenergostroy" (the judgement of the Arbitration Court of Kemerovskaya Oblast of 1 March 2004, the claim No. A27-8466/2002-4) – bankruptcy proceeding was launched.

The Issuer is not in danger of the risk that is connected with the absence of possibility to renew the Issuer's license for conducting the certain type of activity.

Miscellaneous significant risks that are relevant only for the Issuer also don't exist.

III. Detailed Information about the Issuer

3.1. The History of the Issuer's Establishment and Development

3.1.1. Information about the Issuer's Company Name

Full and abbreviated company name of the Issuer: ***Kuzbass Open Joint-Stock Company of Energetics and Electrification (OJSC "Kuzbassenergo").***
Before the privatization – Kuzbass Production Association of Energetics and Electrification (PAEandE "Kuzbassenergo").
Kuzbass Open Type Joint-Stock Company of Energetics and Electrification (OTJSC "Kuzbassenergo").
Name appeared in: ***30 December 1993***
Kuzbass Open Joint-Stock Company of Energetics and Electrification (OJSC "Kuzbassenergo")
Name appeared in: ***15 May 1996***

3.1.2. Information about the Issuer's State Registration

Date of the Issuer's state registration: ***30 December 1993***
State Registration Certificate Number (other document that certifies the Issuer's State Registration): ***1901***
Name of registration authority: ***Kemerovo City Administration***

According to the Federal Law "About the State Legislation of Legal Entities" a record was entered into the Uniform State Register of Legal Entities on 23 July 2002 under the Main State Registration Number 1024200678260 (Certificate: Series 42 No. 001926135, granted by the Inspectorate of the Ministry of Taxation of the Russian Federation in Kemerovo, Kemerovskaya Oblast).

3.1.3. Information about the Issuer's Establishment and Development

The Issuer was established according to privatization plan of the Kuzbass Production Association of Energetics and Electrification (PAEandE "Kuzbassenergo").

In order to implement the RF President's Decrees of 15 August 1992 "About the management organization of the electric energy complex of the Russian Federation under the conditions of privatization", No. 1334 of 3 November 1992 "About the implementation in the electric-power industry of the President's Decree of 14 August 192 No. 922 "About the peculiarities of transformations of state enterprises, associations and organizations of the fuel and energy complex into the joint-stock companies", No. 721 of 1 July 1992 "About organizational steps intended to restructure state enterprises, voluntary associations of state enterprises into the joint-stock companies", the Committee of Government-Owned Property Control in Kemerovskaya Oblast made a Decision No. 330 "About the privatization and reorganization of PAEandE "Kuzbassenergo" into the Kuzbass Open Type Joint-Stock Company of Energetics and Electrification".

The Administration of Kemerovo on 30 December 1993 adopted a resolution No. 345 "About the registration of joint-stock company of open type "Kuzbassenergo".

The common objective of the creation of privatized enterprises was to increase the efficiency of the State's economic system and the transition from planned economy to market economy.

The general objective of privatized enterprises was the enhancement of efficiency of the state economic system and the transition from planned economy to market relations.

OJSC "Kuzbassenergo" was established for an indefinite period.

The primary objective of the OJSC "Kuzbassenergo" activity is to make profit.

OJSC "Kuzbassenergo" **is engaged in the following processes:**

- electric and heat power generation;

- electric and heat power transmission;

- electric and heat power distribution (realization) according to the statutory tariffs and according to operations schedules of electric and heat loads

renders services of:

- power distribution to power supply enterprises;

- communication, including electric communication;

carries out:

- complete overhaul;

- technical retooling and modernization;

- reconstruction and development of regional power system;

- assembly, adjustment and repairs of power facilities, of electric and heat power equipment;

- provision of working capacity of electric and heat power networks;

- maintenance, assembly, repairs of boilers and vessels that work under pressure, of steam line tubes and hot water line tubes;

- provision of maintenance of power equipment in accordance with requirements of relevant standards;

- carrying out timely and quality repairs of power equipment;

- technical retooling and modernization of power facilities;

- provision of workability of electric and heat networks;

- electric and heat networks maintenance activity.

OJSC "Kuzbassenergo" is one of the largest power systems in the Holding Company OJSC RAO "UES of Russia" – the energy complex of the Company takes the sixth place by the installed power and the fifth one – by the volume of energy distributed to consumers. The rate of electric power generation by electric power stations of OJSC "Kuzbassenergo" was more than 30% in the Amalgamated Power System of Siberia.

There are eight heat power stations in the power system. Their total installed electric power is 4667 MW, heat power – 6,700.5 Gcal/h. Annual generation of electric power is 26-28 mlrd. kW/h. Annual supply of heat power is 15-20 million Gcal.

There are four enterprises of electric networks in the power system that carry out the reception, transmission and distribution of electric power. There are 4,601 substations with the total installed power that equals 12,984 thous. kW. The length of electric networks is 31,117 km.

The Control Office of Heat Networks – that supply consumers with heat power – governs seven heat zones and a hot water boiling plant. The length of heat networks with diameter not more than 1,200 millimetres is 485 km. In 1994 the first in Russia information-measuring system was put into operation that provides remote metering, remote signalling, remote control and commercial account of heat output delivered to consumers.

Sales and distribution of energy is done by the enterprise – branch of "Energosbyt" that has more than 4,000 contracts for power supply to consumers.

OJSC "Kuzbassenergo" was one of the first enterprises in Siberia that built a fiber-optic communication link (FOCL) that has the length of more than 400 km. FOCL binded enterprises–branches into one data transmission digital network.

The Company's mission is in regular and reliable supply our consumers with heat and electric power thus providing the productive efficiency and the Company's investment attraction.

3.1.4. Contact Information

Location: ***Russia, Kemerovo, GSP-2, Kuznetsky Av., 30;***
Phone: ***(384-2) 29-33-59;***
Fax: ***(384-2) 29-37-77;***
E-mail: ***adm@kuzbe.elektra.ru;***
Web-site: ***www.kuzbassenergo.ru***

The decree of OJSC "Kuzbassenergo" No. 709 of 31 December 2003 ratified the organizational structure the Executive Apparatus of OJSC "Kuzbassenergo". According to the decree the Department of Corporate Governance was established to the structure of which the Sub-Department of Corporate Policy belongs, and its responsibility is to work with shareholders and investors. The Sub-Department functions since 1 January 2004. The Head of the Department is Cherepinsky Pavel Valerievich, born in 1974, higher education.

Location: ***Russia, Kemerovo, GSP-2, Kuznetsky Av., 30;***
Phone: ***(384-2) 77-70-51;***
Fax: ***(384-2) 77-70-51;***

3.2. The Issuer's major economic activity

3.2.1. Industry Classification of the Issuer

Russian Classification of Economic Activities (OKVED):
40.10.11 – Electric power generation by Heat-Electric Generating Plants
40.10.2 – Electric power transmission
40.30.2 – Steam and hot water transmission (heat power)
51.56.4 – Electric and heat power wholesale (without power transmission and distribution)

74.60 – Investigations and accident prevention
74.14 – Commercial activity and management counselling

3.2.2. The Issuer's Major Economic Activity

Major types of activity of OJSC "Kuzbassenergo" are as follows: generation, transmission and distribution of electric and heat power.
OJSC "Kuzbassenergo" is a unit of natural monopoly that conducts non-manufacturing business for transmission of electric and heat power on the territory of Kemerovskaya Oblast.

Rate of return from the major type of activity in total return of OJSC "Kuzbassenergo" for the last full 5 fiscal years and the 1st quarter of 2005.

Period	2000	2001	2002	2003	2004	the 1st quarter of 2005
Total return, thous. roubles	13,950,893	15,285,725	17,614,970	19,795,684	18,043,479	6,218,030
Return from the major type of activity, thous. roubles	8,636,784	11,913,608	14,210,479	16,486,488	16,110,323	5,524,753
Rate of return from the major type of activity in total return, %.	61.91	77.94	80.67	83.28	89.29	88.85

Total return should be understood as the sum of sales revenues, operating and non-sale expenses - according to the Form No 2 entitled "Profits-and-losses report".

Total return for surveyed period (2000-2004) has increased from 13.95 milliard to 18.04 milliard or in 1.3 times; rate of retune from the major type of activity was increasing constantly and since 2002 it constitutes more than 80% form the total sum of return of the Entity.

Rate of return from the major type of activity in total income for the 1st quarter of 2005 decreased by 1.81% as compared to the same period the previous year.

Rate of return of OJSC "Kuzbassenergo" from the major types of products

Type of products	Rate of return, %					
	2000	2001	2002	2003	2004	the 1st quarter of 2005
Electric Power	49.22	64.02	66.94	67.21	69.91	62.27
Heat Power	12.69	13.92	13.73	16.07	19.38	26.58
Total:	61.91	77.94	80.67	83.28	89.29	88.85

Rate of return from the electric power generation increases annually and if in 2002 it constituted 49.22%, then in 2004 – 69.91%, i.e. it increased by 20.69%.

For the 1st quarter of 2005 as compared to the same period the previous year the rate of return from the electric power generation decreased by 0.76% (1st quarter of 2004 – 63.03%), the heat power generation by

1.05% (1st quarter 2004 – 27.63%).

Major types of the Issuer's activity – generation, transmission and distribution of electric and thermal power – have seasonal nature. It should be noted that a decrease of the generation of electric and thermal power takes place in Summer.

3.2.3. Major Types of Products (Operations, Services)

Major types of products of OJSC "Kuzbassenergo" are electric and heat power.

Eclectic and heat power tariffs are approved by Regional Energy Commission once a year according to the Federal Law of 14 April 1995 No. 41-FL.

Index Name	2000	2001	2002	2003	2004	the 1st quarter of 2005
Production volume, - electric power, million kW/h - heat energy, thous. Gcal	26,599.8 17,745.7	26,438.0 16,320.0	27,185.0 14,403.0	24,867.0 14,654.0	22,554.273 13,352.417	6,105.568 5,433.909
Average supply tariff, - electric power, kopeck/kW/h - thermal power, rouble/Gcal	25.793 104.725	35.943 137.965	44.422 180.451	51.904 235.013	56.27 264.39	65.8 310
Sales revenues got from products - electric power - heat power	6,866,780,000 1,770,004,000	9,785,368,000 2,128,240,000	11,792,093,000 2,418,386,000	13,306,092,000 3,180,396,000	12,612,924,000 3,497,399,000	3,872,180,000 1,652,573,000
Rate from the total sales revenues, % - electric power - thermal power	63.66 16.41	77.57 16.87	79.62 1.33	78.30 18.72	75.50 20.94	68.10 29.06
Price index of electric power industry products, % (by the previous year)*	Not available	Not available	Not available	Not available	Not available	110.8 (by December 2004)

*Price index of the producers of industrial products is based on the data of State Committee for the Statistics of Russia.

The volume of electric energy output for 2004 as compared with 2003 decreased by 2,312.727 million kW/h or by 9%, and as compared with 2000 – by 15.21%. The decrease of electric energy output in 2004 as compared with 2003 is determined by:

- the large consumer's entry into FOREM since 1 October 2003;

- the purchase of excess electric power in auctions and the initiative of Systems Operator;

Average supply tariff in 2004 as compared with 2003 increased in 1.1 times and as compared with 2000 – in 2.18 times.

The amount of revenues from the sales of electric power in 2004 as compared with 2003 decreased by 693,168,000 roubles or by 5.21% that was caused by the reduction of power generation due to the entry of one of the large electric power consumers – OJSC "Novokuznetsk Aluminium Plant" – into FOREM.

Considerable changes in the supply of heat power didn't happen for the last 3 years. The decrease of useful supply of heat energy is connected with the introduction of energy-saving technologies in the process of production and putting into operation its own boiler houses at industrial enterprises of the region. Revenues from heat sales for 2004 as compared with 2003 increased by 317,003,000 roubles or 10%.

The growth of average supply tariffs for electric and heat power in 2004 as compared with 2003 happened due to the increase of tariffs for electric and heat power by the Regional Energy Commission in Kemerovskaya Oblast since 1 January 2004. (Resolution of 16 December 2003 No. 180 "About tariffs for electric power supplied by OJSC "Kuzbassenergo" in the retail (consumer) market since 1 January 2004".)

The growth of average supply tariffs for electric and heat power in the 1st quarter of 2005 happened due to the increase of tariffs for electric and heat power by the Regional Energy Commission in Kemerovskaya Oblast since 1 January 2005. (Resolution of 4 December 2004 No. 147.)

Sales pattern for main types of products:

Name of products (operations, services)	Sales pattern of products (operations, services)	2000	2001	2002	2003	2004	the 1st quarter of 2005
Electric power	Direct sales, %	100	100	100	100	100	100
	Own distribution network, %	-	-	-	-	-	-
	Controlled distribution network, %	-	-	-	-	-	-
	Other (specify), %	-	-	-	-	-	-
Heat power	Direct sales, %	100	100	100	100	100	100
	Own distribution network, %	-	-	-	-	-	-
	Controlled distribution network, %	-	-	-	-	-	-
	Other (specify), %	-	-	-	-	-	-

Sales have seasonal nature that is explained by the growth of consumption of electric and heat power in Autumn and Winter. In Spring and Summer quite a different tendency is observed: the consumption of electric power is reduced for lightning and of heat power – for heating.

The Issuer's costs structure for production and sales

Name of Cost Item	2004	the 1st quarter of 2005
Raw products and materials, %	1.6	1.6
Purchased components and semi-finished products, %	-	-
Production operations, services rendered by third-party firms	1.4	1.1
Fuel, %	38.5	45.9
Energy, %	6.2	3.2
Labour costs, %	7.7	6.7
Interest on credit,%	-	-
Rent, %	-	-
Social payments, %	2.2	1.7
Depreciation of fixed assets, %	11.9	11.3
Taxes included into production cost, %	3.5	2.1
Other expenses (specify), %	27.0	26.4
Subscription fee for using the net of RAO "UES of Russia", %	13.6	12.6
Depreciation of intellectual property assets, %	-	-
Rewards for rationalization proposals, %	-	-
Obligatory insurance contributions, %	1.0	0.4
Hospitality expenses, %	-	-
Miscellaneous, %	12.4	13.4
Total: production and sale expenses (operations, services) (production cost), %	100.0	100.0
Revenues from sale of products (operations, services), %	112.68	131.08

Net cost accounting is done in accordance with the Tax Code of the Russian Federation (part II) of 5 August 2000 No. 117-FL and Accounting Policy of OJSC "Kuzbassenergo" in which separate accounting depending on types of products (operations, services) is not supposed.

3.2.4. Suppliers of the Issuer Whose Rate in the Delivery of Inventory Supplies is 10% or More with the Indication of Their Rate in the Total Amount of Supplies.

Main suppliers of coal are: Trading House of Open Joint-Stock Company Coal Company "Kuzbassrazrezugol" (Kemerovo); Open Joint-Stock Company "Siberian Coal and Energy Company" (Moscow); Open Joint-Stock Company "Amalgamated Coal Company "Yuzhkuzbassugol" (Novokuznetsk).

Delivery of natural gas is done by the Open Joint-Stock Company "Sibirsko-Uralskaya Petrogasochemical Company".

Supplier's Name	2004	the 1st quarter of 2005
TH OJSC CC "Kuzbassrazrezugol"	45.9%	39.4%
OJSC "SCEC"	30.2%	33.7%

3.2.5. Markets of Sales and Distribution of the Issuer's Products (Operations, Services)

Electric power industry is practically the only industry the products and services of which are consumed by all industries and domestic household. There are two markets of electric power sales in Russia: the wholesale market and the retail one. Sales and distribution of heat power is done only in the retail market. Kemerovskaya Oblast is the main market of sales and distribution where OJSC "Kuzbassenergo" conducts its business. Geographically Kemerovskaya Oblast is situated in the South-East of the Western Siberia and

thus it is situated at the juncture of the Western-Siberian Plain and the mountains of the Southern Siberia. It is almost equidistant form Western and Eastern borders of the Russian Federation. It is in the sixths time zone.

Output of electric power to the customers is done in accordance with the signed contracts "Output and use of electric power".

Structure of customers that buy electric and heat power in the retail market is shown below in the table entitled "Structure of sales of electric and heat power".

Structure of sales of electric and heat power by industry in natural units

Electric Power	2000	2001	2002	2003	2004	the 1st quarter of 2005
Total in energy system, thous. kW/h	26,622,448	27,224,616	26,618,051	25,804,994	22,554,273	6,105,568
	100.0%	100.0%	100.0%	100.0%	100.00%	100.0%
1. Industry	72.9%	73.2%	72.7%	73.2%	69.5%	66.1%
1.1. Fuel industry	20.2%	20.7%	20.5%	21.4%	24.1%	22.2%
1.2. Ferrous metallurgy	25.5%	25.8%	25.2%	28.4%	35.0%	34.4%
1.3. Nonferrous metallurgy	18.1%	17.7%	18.2%	14.3%	0.2%	0.2%
1.4. Chemistry and the petroleum chemistry	5.2%	5.1%	5.2%	5.4%	6.1%	5.7%
2. Agriculture	1.6%	1.3%	1.0%	1.0%	1.0%	1.3%
3. Transport and communications	5.0%	5.3%	5.3%	5.9%	6.7%	6.8%
4. Building industry	0.2%	0.1%	0.2%	0.2%	0.2%	0.2%
5. Housing-and-utilities infrastructure	0.6%	1.3%	1.8%	2.0%	1.9%	2.2%
6. Population	0.6%	0.5%	0.6%	0.6%	0.8%	1.0%
7. Other branches	19.1%	18.2%	18.3%	17.0%	19.8%	22.5%
Heat Energy						
Total in energy system, Gcal	16,901,366	15,425,989	13,523,948	13,688,506	13,352,417	5,433,909
	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
1. Industry	38.7%	37.4%	36.0%	33.8%	32.1%	30.1%
1.1. Fuel industry	0.4%	0.4%	0.4%	0.3%	0.3%	0.7%
1.2. Ferrous metallurgy	9.8%	9.7%	9.1%	9.7%	9.3%	11.3%
1.3. Nonferrous metallurgy	1.3%	1.3%	1.4%	1.5%	1.5%	1.3%
1.4. Chemistry and the petroleum chemistry	20.8%	20.4%	20.7%	18.2%	17.0%	12.6%
2. Agriculture	2.4%	2.4%	2.4%	2.2%	1.5%	1.7%
3. Transport and communications	1.1%	0.8%	0.9%	0.9%	1.0%	1.9%
4. Building industry	0.8%	0.7%	0.7%	0.6%	0.5%	0.7%

5. Housing-and-utilities infrastructure	20.2%	52.0%	54.0%	56.4%	58.9%	59.4%
6. Population	0.2%	0.1%	0.1%	0.1%	0.1%	0.1%
7. Other branches	36.6%	6.5%	5.9%	6.0%	5.9%	6.6%

As it is seen from the table, industrial enterprises are the largest consumers of electric energy in the retail market (their share from 2000 to 2003 was more than 70%, since 2004 – about 70%).
In the 1st quarter of 2005 the share of industrial enterprises was 66.1%. From the point of view of industry the largest share of energy power consumption – 34.4% – have enterprises of iron industry.

In the output of heat energy the predominant share housing-and-utilities infrastructure has (more than 50% of consumption) and industry (more than 30%). From the point of view of industry the largest consumers enterprises of chemistry and the petroleum chemistry are.

Main consumers of products of OJSC "Kuzbassenergo":

Consumer's Name	2000	2001	2002	2003	2004	the 1st quarter of 2005
Electric Power, kW/h: Kemerovo OJSC "AZOT"	1,080,542,071	1,066,802,350	1,066,687,707	1,047,898,570	1,042,600,316	258,730,121
OJSC "Kuznetsk ferro-alloys"	1,815,358,764	1,992,163,036	1,867,709,104	1,862,508,336	2,125,180,260	555,928,260
LLC "Metallenergofinans"	-	-	-	5,052,944,133	5,579,166,873	1,511,675,059
Heat Energy, Gcal: OJSC "ZSMC"	1,587,556	1,425,901	1,169,056	1,264,188	1,173,617	583,337
Kemerovo OJSC "AZOT"	2,802,312	2,440,356	2,210,867	2,059,549	2,034,855	601,653
Novokuznetsk City Administration	2,895,311	2,984,966	2,746,945	2,928,859	2,972,131	1,247,810
Kemerovo City Administration	770,866	3,834,439	3,668,230	3,796,394	3,756,034	1,504,758

Main consumers of products of OJSC "Kuzbassenergo" with the turnover not less than 10% of total revenues gained from products sales during the 1st quarter of 2005:

Consumer's Name	Location	Share in total volume of sales, %
Electric Power Consumers: LLC "Metallenergofinans"	Kemerovskaya Oblast, Novokuznetsk	36.8
OJSC "Kuznetsk ferro-alloys"	Kemerovskaya Oblast, Novokuznetsk	14.5
OJSC "Tomusinsk Energoupravlenie"	Kemerovskaya Oblast, Mezhdurechensk	14.3
Western-Siberian Railroad – branch of OJSC "Russian Railroads"	Novosibirsk	11.9

Heat Power Consumers: Novokuznetsk City Administration	Kemerovskaya Oblast, Novokuznetsk	27.2
Kemerovo OJSC "AZOT"	Kemerovo	19.4
Kemerovo City Administration	Kemerovo	33.5
OJSC "ZSMC"	Kemerovskaya Oblast, Novokuznetsk	19.9

Factors that may influence negatively on sales and distribution of products (operations, services) by the Issuer and also possible actions of the Issuer in order to reduce such influence.

1. The factor that may influence negatively on the production distribution is the entry of enterprises into Federal Wholesale Market of Electric Energy and Power (FOREM):

- currently there is a technical possibility to cover own power consumption by means of buying electric power at the regulated sector of the wholesale market from LLC "Topkicement" and OJSC PA "Himprom" (total installed power – 378 MW) whose Automatic Measuring and Experimental Stations correspond to the requirements of the market regulations. Losses of revenues of OJSC "Kuzbassenergo" in such a case will be 98,132 thous. roubles per year.

- also due to the planned introduction – on the territory of Siberia – of the second price area in the wholesale market of electric power during the transition period, the consumers whose electric receiving installations correspond to the normative requirements for receiving the status of the participant of free trade's sector (total installed power is more than 20 MW, installed power in every gas-turbine drive is 4 MW) have the possibility to buy in the free trade's sector of the wholesale market up to 15% of own planned consumption. 36 consumers of OJSC "Kuzbassenergo" correspond to these requirements (total installed power is 11,841 MW). In case if the consumers enter into the wholesale market of the electric power and buy in the sector of free trade up to 15% of the own planned consumption, the amount of the losses of revenues of OJSC "Kuzbassenergo" will be 327,038 thous. roubles.

In order to prevent such situation, "Energosbyt" – the branch of OJSC "Kuzbassenergo" gives the consumers preferential transaction terms (terms of payment for the electric power, payment for fines, etc.)

2. The next factor of the reduction of consumption, in particular, the heat power consumption is the introduction of energy-saving technologies and putting into operation own boiling plants at industrial enterprises. Also the considerable influence on the reduction of consumption of heat power the late start and early end of a heating season at the enterprises as compared with the previous periods. OJSC "Kuzbassenergo" cannot influence on the effect of these factors.

3. The insufficiency of the dedicated limit and untimely financing of the expenses intended to pay for the electric and heat power consumption of budgetary consumers may also influence on the distribution. Each month Agreements on the payment for the consumed power are signed between the consumers and the Administration of Kemerovskaya Oblast, the Main Finance Department of the Region, the Executives of Cities and Local Areas, OJSC "Kuzbassenergo". Meetings are held in the Administration of Kemerovskaya Oblast in order to discuss the fulfilment of the aforesaid Agreements; it is obligatory for the Executives of Cities and Local Areas, the leaders of Territorial Financial Bodies, the directors of Housing-and-utilities infrastructures and Municipal Electric Networks to be present there

3.2.6. The Activity Towards Working Capital and Inventories

The Company's policy towards working capital consists in the provision of the admissible volume and structure of the circulating assets in order to increase the liquidity of the assets.

In order to reduce the accounts receivable some work with consumers and customers is done, accounts payable are controlled, some work is done so as to recover overdue accounts receivable.

In order to use the working assets effectively, to improve the management of resources, to ensure uninterrupted production process, provided that the resources are low, OJSC "Kuzbassenergo" applies the principle of normalisation of the working assets. The norm of the working assets of OJSC "Kuzbassenergo" is defined on the basis of calculations done by the branches for a number of years and it is revised according to the changes in the conditions of the production process.

In order to control the amount of inventories and the duration of circulation and turnover when accounts are reported, the corresponding coefficients are calculated:

- the inventories turnover ratio (R);

- the duration of circulation (D).

The inventories turnover ratio reflects the speed of distribution of inventories. It is calculated using the formula = production price of sold products/average value of inventories (R=form No. 2 page 20/form No. 1 (page 210 at the beginning of the accounting period + page 210 at the end of the accounting period) × 0.5).

The duration of circulation is defined as quotient that is made up due to the division of the number of days in the period by the inventories turnover ratio.

For 2000: R=13 turnover, D=28 days.

For 2001: R=9.3 turnover, D=39 days.

For 2002: R=12.8 turnover, D=28 days.

For 2003: R=13.7 turnover, D=26 days.

For 2004: R=13.1 turnover, D=28 days.

For the 1st quarter of 2005: R=5.5 turnover, D=16 days.

If compare with the 1st quarter of 2004, an increase of the turnover of the working capital by 0.7 circulation (or 3 days) is seen, mainly owing to the decrease of average remains production inventories (the 1st quarter of 2004: R=4.8 circulation, D=19 days).

3.2.7. Raw Material

Fuel is the main type of raw material that OJSC "Kuzbassenergo" uses. Kuznetsk coals and their cleaning rejects are used as the main type of fuel at electric power stations of OJSC "Kuzbassenergo".

Residual oil is used as starting fuel and to sustain combustion when low-rank coal is combusted; Zaiskitimskaya hot water boiling plant uses residual oil as the main type of fuel.

Analysis of changes of fuels' prices

Type of Fuel	Unit Measure	Supplier's Name	the 4th quarter of 2004		the 1st quarter of 2005	
			Volume of purchases in natural units	Unit price incl. VAT and quality	Volume of purchases in natural units	Unit price incl. VAT and quality
Coal	Thous. tons	Trading Company "Siberian Coal"	1,419.67	442.8	-	-
		Trading Company "Kuzbassrazrezugol"	-	-	1,126.45	556.41
		OJSC "Siberian Coal and Energy Company"	1,124.13	471.5	962.66	555.38
		OJSC "Amalgamated Coal Company "Juzhkuzbassugol"	212.01	418.4	247.87	463.90
		Coal Company "Southern Kuzbass"	10.1	487.4	0	440.00
		CJSC "Chernigovets"	78.0	493.3	87.00	622.26
		LLC " Amalgamated Coal Company " (Moscow)	81.4	389.1	85.04	464.71
		Others	302.5	404.7	224.17	453.86

Coal prices remained practically at the same level.

3.2.8. Main Business Rivals

On the territory of Kemerovskaya Oblast, where the main economic activity is conducted - non-manufacturing business for transmission of electric and heat power - OJSC "Kuzbassenergo" is a unit of natural monopoly that has no business rivals.

3.2.9. Information About the Issuer's Licenses

Number: ***3668***
Date of Licensing: ***26 December 1995***
Expiry Date: ***till 1 January 2007***
Body that granted the license: ***Ministry of Communications of the Russian Federation***
Type of activity: ***Local and intraband telephone communication services***

Number: ***00927***
Date of Licensing: ***14 June 1995***
Expiry Date: ***till 31 December 2007***
Body that granted the license: ***Kemerovskaya Oblast Natural Resources Committee***
Type of activity: ***Loam extraction in Frunzensky deposit in order to dam gold pile***

Number: ***00-EE-004012 (E)***
Date of Licensing: ***21 December 2004***
Expiry Date: ***till 21 December 2009***
Body that granted the license: ***Ministry of Energy of the RF***
Type of activity: ***Electric networks operation support***

Number: ***39-ET-001112 (K)***
Date of Licensing: ***07 December 2004***
Expiry Date: ***till 7 December 2009***
Body that granted the license: ***Ministry of Energy of the RF***
Type of activity: ***Heat networks operation support***

Number: ***077***
Date of Licensing: ***14 October 1997***
Expiry Date: ***till 1 October 2008***
Body that granted the license: ***Federal Security Service of Russia in Kemerovskaya Oblast***
Type of activity: ***Works with the information that includes state secret***

Number: ***0107***
Date of Licensing: ***12 March 1998***
Expiry Date: ***till 1 October 2008***
Body that granted the license: ***Federal Security Service of Russia in Kemerovskaya Oblast***
Type of activity: ***Works to render services of state secret protection***

3.2.10. Joint activity of the Issuer

The founders of the Affiliated Company OJSC "Prokopjevskenergo" are:

- ***OJSC "Kuzbassenergo" (60.0%);***
- ***LLC "Stroysnabservis" (Kemerovo) (14.12%);***
- ***LLC " Bills Centre "Kuzbassenergo" (13.05%).***

Type of joint activity is: to provide consumers with electric and heat power by means of acquisition, transformation, distribution, transportation and sales; repairs of electrical-type instruments, electrical equipment, electricity supply meters; operation and adjustment of lifting mechanisms and constructions; building and assembly works; vehicular, forwarding or other activity that is connected with transport process, etc.

Joint activity since 20 September 2000.

The founders of the Affiliated Company OJSC "IPA "Vodokanal" are:

- ***OJSC "Kuzbassenergo" (74.5%);***
- ***LLC "A/E Clearing" (Prokopjevsk) (25.5%).***

Type of joint activity is: to provide consumers with water and effluent water collection; operation, maintenance works, routine and emergency maintenance of external and internal water-supply and water-disposal systems; building, assembly, adjustment and fit-out works; output of technical and industrial products, etc.

Joint activity since 28 October 2001.

3.4. Plans of the Issuer's Future Activity

The objectives the OJSC "Kuzbassenergo" faces in 2005.

The main objective of the Company in 2005 will be to reliably and uninterruptedly supply consumers with electric and heat power that ensures the profits earning, the increase of the Company's capitalisation and the increase if its attractiveness in the process of electric power industry reforms in Russia.

The main productions objectives, the Company will face in 2005, will be the following:

1. ***To supply reliably consumers of the region with electric and heat power, especially in autumn and winter maximum loads.***
2. ***The implementation of the program to repair equipment of electric power stations, electric and heat networks;***
3. ***The provision of the task of RAO "UES of Russia" to create fuel stores at the stock-houses of the Company by 1 January 2006;***
4. ***The fulfilment of the Company's Investment Program.***

In accordance with the aforesaid the following production works will be prioritised:

- ***putting into operation the boiler, type TP-87M with the power 420 t/h, at the station No. 16 of Kemerovskaya Hydroelectric Power Station;***
- ***the reconstruction of the boiler, type TP-10, at the station No. 8 of Tom-Usinsk Hydroelectric Power Station in order to reduce NOx;***
- ***the modernisation of electric air filters of the boiler at the station No. 14 of Kemerovskaya Hydroelectric Power Station;***
- ***the introduction of the three-stage firing in boilers at the station No. 11 of Kemerovsky Heat-Electric Generating Plant in order to reduce NOx;***
- ***the reconstruction of dust extraction plant on boiler units at the station No. 8 of Novo-Kemerovsky Heat-Electric Generating Plant;***
- ***the assembly of a sprinkler system of fuel-handling mechanism at Tom-Usinsk Hydroelectric Power Station, Belovskaya Hydroelectric Power Station, South-Kuzbass Hydroelectric Power Station, Kemerovskaya Hydroelectric Power Station, South-Siberian Heat-Electric Generating Plant, Kuznetsk Heat-Electric Generating Plant;***
- ***the reconstruction of the station Pashkovskaya 35/10 kW and the replacement of oil-switches with electric gas switches at Eastern Electric Networks;***
- ***the assembly of the Automated System of the Supervisory Control of Electric Networks Enterprise produced by ABB in Northern Electric Networks;***
- ***the replacement of the transformer 32 mVA with 40 mVA at stations of Tyrganskaya and Central Electric Networks;***
- ***the reconstruction of Closed Distribution Device – 6 kW, the replacement of oil switch and relay protection and automatic equipment 356 kW at stations of "Abashevskaya 1/2", "Severnaya", Southern Electric Networks;***

- *the above-ground pipelining of the main sector of the heat pipeline with the diameter 600 mm at Kuznetsk Heat-Electric Generating Plant – Chemical Pharmaceutical Plant form TK-1 to TK-2 with a crosswalk above the railway at Heat Networks;*
- *the introduction of information and measuring system of the commercial accounting in "Energosbyt".*

As for the financial activity in 2005 for the Company the following trends will be prioritised:

1. *The fulfilment of the program of the costs reduction including by means of further development of the competitive system for goods, operations and services purchasing;*
2. *The fulfilment of the provisions of the Amicable Agreement with the Company's creditors as the guarantee of successful reforming;*
3. *Setting up economically feasible tariffs for the Company;*
4. *The increase of the financial solvency of the Company, the reduction of gap between accounts receivable and accounts payable;*
5. *The provision of the Company's investment attractiveness.*

For further reforming of the Company in 2005 the following objectives will be prioritised:

1. *The agreement of the Company's reforming project with the largest shareholders, bodies of the state authority and administration;*
2. *The total completion of the preliminary stage of the Company's reforming concerning all non-specialised types of activity and non-specialised assets;*
3. *Training of the personnel reserve of managers and key specialists for forming the newly established Companies;*
4. *The upgrading of forms and methods of corporate management, maximum openness of the Company as a Public Company that plays a significant role in the life of the region.*

According to the program of the Company's technical development for 2001-2011 in order to ensure the reliability of stations' functioning and timely replacement of the used-up equipment it is necessary in 2005 to do the following:

- to go on choosing contracting organizations and suppliers on competition basis for: building, reconstruction, technical retooling and modernization of facilities.

- to determine priorities when developing the Investment Program for 2 or 3 years concerning the facilities that are in the process of construction and to make fundamental decisions.

- to link the Investment Program of the Company with the funding sources taking into account that the facility will be commissioned in time.

- to continue to dam old gold piles and to begin to dam new gold piles, where the reserve capacity of ash and slag deposits are limited with possible filling.

For the nearest 3 or 5 years it is necessary to do the following jobs that influence on the overall reliability of the power system:

- Reconstruction and putting into operation in 2006 the turbine-generator set type PTR-80-130 at the station No. 8 of Novo-Kemerovsky Heat-Electric Generating Plant (500 million roubles);

- Putting the turbine-generator set type R-12-29 into operation at the station No. 3 of Kuznetsky Heat-Electric Generating Plant in order to cover the deficit of selected steam needed to heat make-up water and to increase the electric energy generation by means of heat consumption;

- Putting the turbine-generator set type T-115-130 into operation in 2008 at the station No. 15 of Novo-Kemerovsky Heat-Electric Generating Plant with power 115 MW and investment required 900 million roubles (including the Automatic Control System of the Engineering Process);

- Go on designing and ratification of starting complex of the steam boiler No. 5 of Kuznetsky Heat-Electric Generating Plant with the capacity of 160 t/hour and the work starts in 2007;

- To replace the turbine-generator set type R-35-130 with the turbine-generator set type T-120-12.8 at Kemerovskaya Hydroelectric Power Station, the cost of which is 600 million roubles;

- To reconstruct the cell of the turbine generator set type R-12-90/31M at the stations No. 11 and 12 of Kuznetsky Heat-Electric Generating Plant, the cost is 200 million roubles;

- To reconstruct electric filters of boilers type TP-87 in order to gain normative dustiness of combustion gases and to comply with the standards maximum permissible ashes emissions; to reconstruct electric filters in order to gain the efficiency of ash collecting 99% at Western-Siberian Heat-Electric Generating Plant;

- To perform the directives and instructions of State Control Authorities in all the branches in the amount

of 60 million roubles;

- To substitute the electric equipment in branches in the amount of 100 million roubles.

3.5. The Issuer's Participation in Industrial, Bank and Financial Groups, Holdings, Trusts and Associations

OJSC "Kuzbassenergo" doesn't participate in industrial, bank and financial groups, holdings, trusts and associations.

On the basis of the Decree of the RF President "About additional steps intended to provide the management of electric energy complex of Russia" of 3 March 1998, the effect of the part No. 3 of the Temporary Provision concerning holding companies that are created when restructuring state enterprises into joint-stock companies, ratified by the Decree of the RF President of 16 November 1992 No. 1392 "About the steps intended to implement industrial policy when privatizing state enterprises", is not valid for the Russian Joint-Stock Company "UES of Russia".

OJSC "Kuzbassenergo" is an Affiliated Company of the Holding RAO "UES of Russia" on the basis of the article 2.3 of the Company's Charter.

3.6. Associated and Dependent Business Companies of the Issuer

OJSC "Kuzbassenergo" has 12 Dependent Companies.

Associated Companies are considered to be such Companies according to the Civil Code of the Russian Federation (part 1, articles 104 and 106) and the Federal Law "On Joint-Stock Companies" (article 6).

Associated Company Name: ***Limited Liability Company "Bills Centre "Kuzbassenergo", LLC "Bills Centre "Kuzbassenergo"***
Location: ***650099, Kemerovskaya Oblast, Kemerovo, Kuznetsky Av., 30***
The Issuer's share in the nominal capital of the Associated Company: ***100%***
The Associated Company's share in the nominal capital of the Issuer: ***No share***
Type of Activity: ***Export and import of technical and industrial goods, national consumption goods, know-how and services; intermediary and trade business.***

Associated Company Name: ***Open Joint-Stock Company "Andreevskoe", OJSC "Andreevskoe"***
Location: **Russia, Kemerovskaya Oblast,Kemerovsky Area, Andreevsky Settlement**

The Associated Company's share in the nominal capital of the Issuer: ***No share***
Type of Activity: ***Manufacturing and selling agricultural products, livestock and crop products; technical retooling and modernisation; reconstruction and development of manufacturing capabilities; capital construction of industrial and social facilities; creation of converting-and-processing production departments – using high-end technologies – in order to produce foodstuffs, national consumption goods and to convert-and-process agricultural products.***

Associated Company Name: ***Limited Liability Company "Sbytenergo", LLC "Sbytenergo"***
Location: ***652417, Kemerovskaya Oblast, Kemerovsky Area, Metallploshchadka Settlement, Severnaya St., 14***
The Issuer's share in the nominal capital of the Associated Company: ***100%***
The Associated Company's share in the nominal capital of the Issuer: ***No share***
Type of Activity: ***Sales and distribution of electric and heat power; operation, assembling, adjusting, transmission and manual supervision of electric and heat power.***

Associated Company Name: ***Open Joint-Stock Company "Kuzbassgidroenergostroy", OJSC "KGES"***
Location: ***Russia, Kemerovskaya Oblast, Krapivinsky Area***

The Issuer's share in the nominal capital of the Associated Company: ***100%***

The amount of equity shares of the Associated Company, the Issuer owns: ***100%***

The Associated Company's share in the nominal capital of the Issuer: ***No share***

Type of Activity: ***Conduct construction and assembly works that are: building, reconstruction, technical retooling and modernization as well as repairs of industrial and civil facilities; production and distribution of building materials and constructions, goods according to the nomenclature, including those which are under supervision of the Russia's State Committee for Industrial and Mining Safety Supervision; carrying out design works.***

Associated Company Name: ***Open Joint-Stock Company "Investment and Production Association "Vodokanal", OJSC "IPA "Vodokanal"***

Location: ***Russia, Kemerovskaya Oblast, Prokopevsk, Kirpichnaya St., 3***

The Issuer's share in the nominal capital of the Associated Company: ***74.5%***

The amount of equity shares of the Associated Company, the Issuer owns: ***74.5%***

The Associated Company's share in the nominal capital of the Issuer: ***No share***

Type of Activity: ***Provision of water to consumers and effluent water collection; operation, maintenance works, routine and emergency maintenance of external and internal water-supply and water-disposal systems; building, assembly, adjustment and fit-out works; output of technical and industrial products; information support; trading, intermediary, procurement, sales and distribution activities.***

Associated Company Name: ***Open Joint-Stock Company "Prokopjevskenergo", OJSC "Prokopjevskenergo"***

Location: ***Russia, Kemerovskaya Oblast, Prokopevsk, Energeticheskaya St., 14***

The Issuer's share in the nominal capital of the Associated Company: ***60%***

The amount of equity shares of the Associated Company, the Issuer owns: ***60%***

The Associated Company's share in the nominal capital of the Issuer: ***No share***

Type of Activity: ***To provide the consumers with electric and heat power by means of its acquisition, transformation, distribution, delivery and sales; repairs of electrical-type instruments, electrical equipment, electricity supply meters; operation and adjustment of lifting mechanisms and constructions; building and assembly works; vehicular, forwarding or other activity that is connected with transport process; the building and operation of petrol stations; to conduct trade, intermediary and foreign economic activity; assistance in conducting scientific and research, experimental and developmental, design, technological and promotional works.***

Associated Company Name: ***Open Joint-Stock Company "Kuzbasskaya Energoremontnaya Companiya", OJSC "Kuzbasskaya Energoremontnaya Companiya"***

Location: ***Russia, Kemerovo, Kuznetsky Av., 30***

The Issuer's share in the nominal capital of the Associated Company: ***100%***

The amount of equity shares of the Associated Company, the Issuer owns: ***100%***

The Associated Company's share in the nominal capital of the Issuer: ***No share***

Type of Activity: ***Conduct construction and assembly works that are: building, reconstruction, technical retooling and modernization as well as repairs of industrial and civil facilities according to the nomenclature as the main contractor or subcontractor; conducting control for the quality of general construction works and the output of products needed for building including the works under the contracts for outside organisations; production and sales of building materials, construction elements and products according to the nomenclature including those which are under supervision of the Russia's State Committee for Industrial and Mining Safety Supervision; building gas supply facilities, gas regulating units and installations, gas pipe lines and gas equipment of industrial, agricultural and other enterprises that use natural gas; assembly works, adjustment and repairs of power facilities, electric power and heat power equipment and power plants of consumers.***

Associated Company Name: ***Open Joint-Stock Company Engineering and Analytic Centre***

"Kuzbasstehenergo", OJSC Engineering and Analytic Centre "Kuzbasstehenergo"
Location: ***650099, Russia, Kemerovo, Stantsionnaya St., 17***
The Issuer's share in the nominal capital of the Associated Company: ***100%***
The amount of equity shares of the Associated Company, the Issuer owns: ***100%***
The Associated Company's share in the nominal capital of the Issuer: ***No share***
Type of Activity: ***Testing and adjustment, development of normative and energy characteristics of heat-mechanic equipment (boilers, turbine generator sets, heat supply systems, auxiliary equipment); to conduct works (services) of nature conservative measures concerning the adjustment and operation of starting-up and adjustment works, operating and adjustment works at heat-mechanic sets of gas consuming enterprises, the adjustment of the automatic systems and water chemistry modes of boiler units; the production, repairs, calibration and check of measuring tools; repairs and adjustment of automatic facilities, electronic equipment; repairs and assembly of electric technical equipment and networks.***

Associated Company Name: ***Open Joint-Stock Company "Kuzbasssetremont", OJSC "Kuzbasssetremont"***
Location: ***650099, Russia, Kemerovskaya Oblast, Novokuznetsk, Nevsky St., 1***
The Issuer's share in the nominal capital of the Associated Company: ***100%***
The amount of equity shares of the Associated Company, the Issuer owns: ***100%***
The Associated Company's share in the nominal capital of the Issuer: ***No share***
Type of Activity: ***Repairs of equipment, buildings and facilities of electric networks; repairs of high-voltage lines with the voltage 0.4-20 kW; repairs of buildings and facilities at installations of electric networks; adjustment, conducting checkouts, diagnostics of the state of equipment, buildings and facilities of electric networks; assembly of equipment, buildings and facilities of electric networks; supply and sales activity.***

Associated Company Name: ***Limited Liability Company "Automobile Operating Company "Kuzbassenergo", LLC "AOC "Kuzbassenergo"***
Location: ***650099, Russia, Kemerovo, Stantsionnaya St., 4***
The Issuer's share in the nominal capital of the Associated Company: ***100%***
The amount of equity shares of the Associated Company, the Issuer owns: ***100%***
The Associated Company's share in the nominal capital of the Issuer: ***No share***
Type of Activity: ***Provision of forwarding services for juridical entities and individuals; technical maintenance and repairs of transport of juridical entities and individuals; capital construction of industrial, social and cultural facilities; the execution of design works intended to reconstruct technological buildings and facilities; the creation of converting-and-processing productions intended to produce consumer goods; the organisation of wholesale and retail trade.***

Associated Company Name: ***Closed Joint-Stock Company Medico Sanitary Unit "Health Centre "Energetik", CJSC MSU "Health Centre "Energetik"***
Location: ***650099, Russia, Kemerovo, Kuzbasskaya St., 37***
The Issuer's share in the nominal capital of the Associated Company: ***100%***
The amount of equity shares of the Associated Company, the Issuer owns: ***100%***
The Associated Company's share in the nominal capital of the Issuer: ***No share***
Type of Activity: ***Rendering skilled medical help including secondary help; ambulatory and clinical help; day patient facility; preventive activity, working proficiency check, etc.***

Associated Company Name: ***Open Joint-Stock Company "Kuzbassenergoservis", OJSC "Kuzbassenergoservis"***
Location: ***Russia, Kemerovo, N. Ostrovsky St., 12***
The Issuer's share in the nominal capital of the Associated Company: ***100%***
The amount of equity shares of the Associated Company, the Issuer owns: ***100%***
The Associated Company's share in the nominal capital of the Issuer: ***No share***
Type of Activity: ***Organisation of works according to the production profile on the principles of general contracts, organisation of works on the principle "turnkey" and act as a customer; material logistics***

including both own production and works done by outside organisation; the repairs of electric and power equipment at Heat-Electric Generating Plants, transmitting devices and buildings at other enterprises and organisations, different technological equipment, pipe lines, products pipelines, distribution electric networks, buildings and facilities, lifting facilities and devices; capital construction, technical retooling and modernisation of electric power industry enterprises and other industries, civil and social facilities.

3.7. Composition, Structure and Cost of the Issuer's Fixed Assets, Information about its Plans to Acquire, Replace, Dispose of Fixed Assets, as Well as All the Facts of Encumbrance of the Issuer's Fixed Assets

3.7.1. Fixed Assets

Land plots, buildings, mechanisms, equipment, transport facilities and other relevant items with the life cycle that is more than 12 months are included in the fixed assets.

Fixed assets facilities are taken for the business accounting by actual costs spent for the acquisition and building.

As of 1 January 2005 OJSC "Kuzbassenergo" revaluated the fixed assets on the basis of market prices, at the same time the revaluation of fixed assets is done using the direct recalculation of the cost with the help of independent valuators of LLC"ENPI Konsalt".

The objective of the valuation is to define the total replacement value of the part of the fixed assets.

The purpose of the valuation is to render adviser services concerning the revaluation issues of the part of the Company's fixed assets.

The valuation was done on the basis of the business accounting, technical characteristics of the items of fixed assets that were given by the specialists of OJSC "Kuzbassenergo", interview with the managers and key specialists of services and departments of OJSC "Kuzbassenergo".

The valuation was done in accordance with the Federal Law No. 135-FL of 29 July 1998 "About the valuation activity in the Russian Federation", the standards of valuation that are necessary to be applied by the bodies that do the valuation activity (the Resolution of the Government of the RF No.159 of 6 July 2001), basic principles, laid down in the International Valuation Standards IVS01-IVS04, the Professional Practice Standards and the Ethics Code of the Russian Association of Valuators.

The linear method of calculating depreciation of fixed assets and intangible assets, based on useful life of the facilities is applied. For the fixed assets facilities taken for the business accounting before 1 January 2002 the depreciation is calculated in accordance with the Resolution of the Council of Ministers of the USSR of 22 October 1990 No. 1072 "About the norms of depreciation costs for the complete restoration of the fixed assets of the USSR national economy". As for the fixed assets facilities taken for the business accounting starting with 1 January 2002 the depreciation is calculated in accordance with the Resolution of the Government of the RF of 1 January 2002 No. 1 "About the classification of fixed assets facilities included in the depreciation groups".

Since 1999 OJSC "Kuzbassenergo" performs the revaluation of fixed assets recruiting specialists and experts of Limited Liability Company "ENPI Konsalt" (LLC"ENPI Konsalt") (TIN 7737017200, 113191, Moscow, Duhovsky Av., 14) on the basis of license No. 000031 – that allows to conduct valuation activity – granted on 6 August 2001 by the Ministry of Property of the RF. In accordance with the technical task, the revaluation of the fixed assets is done using the indexing method and the method of direct recalculation of full replacement value of the fixed assets. All information is given in the form of a written report as well as it is saved on magnetic mediums.

Principles recommended by FCSM (Federal Commission for the Securities Market) of the RF in the Resolution of 2 June 2003 No 03-32/ps were used to calculate the highlights.

The results of financial and economic activity of OJSC "Kuzbassenergo" for 2000-2004 are characterised by the following dynamics of the financial highlights:

The revenues increased almost 1.5 times, gross profit – 1.6 times.

In 2004 the revenues as compared with the previous year decreased by 288,513 thous. roubles or by 1.7% (from 16,993,144 thous. roubles to 16,704,631 thous. roubles). Revenues got from sales of power equalled 16,110,323 thous. roubles or 96.4% from the total revenues, revenues got from sales of other products, operations, services – 594,308 thous. roubles or 3,6%.

For 2004 14,459,621 thous. roubles or 97.54% from the total costs were spent for power generation (for the previous year 14,936,563 thous. roubles or 97.46% correspondingly). Expenditures for other types of activity that were not connected with the power generation and transmission equalled 365,382 thous. roubles.

The decrease of revenues is caused by the reduction of power generation due to the entry of one of the large electric power consumers – OJSC "Novokuznetsk Aluminium Plant" – into FOREM. Some changes in the structure of the revenues were also caused by the same reason: the reduction of the revenues rate

from electric power sales is observed while the increase of the revenues rate from heat power sales takes place.

Gross profit as compared with 2003 increased by 212,245 thous. roubles.

For 2004 the growth rate of revenues got from the sales of main products of OJSC "Kuzbassenergo" exceeded the growth rate of expenditures in the main type of activity; and that influenced positively on the amount of profits gained from the sales of products, operations, services of the Company as a whole. Thus, for example, for 2004 revenues from sales equalled 1,878,687 thous. roubles when it increased as compared with 2003 by 230,539 thous. roubles or 14%.

The profitability of assets shows what profit was got from every rouble, invested into assets and the highest ratio was in 2000.

The sales profitability shows what profit was got from every rouble of products sales. For the analysed period this ratio either increased or decreased. At the end of the annual work in 2004 the sales profitability was 11.2% (for 2003 – 9.7%).

For the 1st quarter of 2005 the revenues from marketable products sales was 5,686,335 thous. roubles, that is 772,520 thous. roubles more than in the 1st quarter of 2004.

Net profit earned by the Company in the accounting period is 263,026 thous. roubles more than in the 1st quarter of 2004.

Profitability analysis also confirms the improvement of financial results gained by the Company for the accounting period: as compared with the 1st quarter of the previous year, assets profitability increased by 0.67%, the Company's working capital – by 0.85%, products profitability – by 3.27%.

The opinion of the Company's Authorities concerning the aforesaid profitability and unprofitability analysis coincide.

4.1.2. Factors Which Affected the Change in the Amount of Revenues from Sales of the Issuer's Goods, Products, Operations, Services, and Profits (Losses) from the Main Activity

Factors which affected the change in the amount of revenues from sales are not listed here because the Issuer's Authorities considered the amount of revenues having changed insignificantly during the accounting quarter.

4.2. The Issuer's Liquidity

Current liquidity ratio	1.47	1.21	1.14	0.98	0.98
Quick liquidity ratio	1.15	0.72	0.66	0.61	0.58

Principles recommended by FCSM of the RF in the Resolution of 2 June 2003 No 03-32/ps were used to calculate the highlights.

Owned circulating assets are negative and it means that capital investments are financed by borrowed current assets.

For borrowed current assets the Financial dependency ratio means the degree at which the assets are financed at the expense of loans. The analysis of the Financial dependency ratio shows that its value from 2000 to 2004 is not more than the optimal value for this highlight (80%). The owned assets autonomy ratio shows the share of owned capital in the assets and characterises the degree of financial dependency from the creditors. If this ratio is more than 50% then the risk of creditors is minimised, i.e. the Company may repay all its debt liabilities if it sells the half of the property even if the second half in which the borrowed current assets were invested. For the analysed period the value of the Owned assets autonomy ratio was more than the normative value and on 31 December 2004 its value was 74%.

The Company's inventories were completely formed at the expense of borrowed current assets. For the accounting period a slight negative dynamics in formation of owned sources of working assets and the strengthening of influence of borrowed current assets was seen.

The permanent asset index (recommended value of which is <=0.9) for the analyzed period (2000-2004) was more than 1.0.

The current liquidity ratio (R cliq) characterises payment possibilities of the Company when all circulating assets are raised (all inventories are sold, total repayment of debtors that have the liability less than 1 year). The analysis of the current liquidity ratio (normative 1.0-2.0) shows that the financial state of the Company partially demonstrates the characteristics of insolvency. R cliq on 31 December 2004 was 0.97, that is if the Company raises all its circulating assets it will be able to repay 97% of its short-term liabilities.

The quick liquidity ratio (R qliq) is a more strict assessment of the Company's liquidity. Optival value for this highlight is R qliq = 0.8 – 1.0.

The analysis of the quick liquidity ratio shows that on 31 December 2004 OJSC "Kuzbassenergo" may repay only 58% of its short-term liabilities on the stipulation that short-term accounts receivable have 100% liquidity (with the repayment period that is less than a year).

Highlights	the 1st quarter of 2004	the 1st quarter of 2005
Working capital, roubles	-1,840,044,000	- 2,809,054,000
Financial leverage ratio	0.27	0.27
Owned assets autonomy ratio	0.78	0.79
Inventories available due to working capital	-2.24	-3.56
Permanent asset index	1.07	1.10
Current liquidity ratio	1.10	1.22
Quick liquidity ratio	0,78	0,87

In the 1st quarter of 2005 as compared with the same period the previous year a rate of the Company's solvency increased that was proved by the growth of liquidity ratios.

The financial leverage ratio is at the same level; its value is within norms.

In comparison with the first quarter of 2004 a growth of values of current and quick liquidity ratios values happened by 0.12 and 0.09 correspondingly:

The current liquidity ratio on 31 March 2005 was 1.22, i.e. if the Company raises all its assets it will be able to repay 100% of short-term liabilities and also long-term liabilities partially;

The analysis of the quick liquidity ratio shows that on 31 March 2005 OJSC "Kuzbassenergo" may repay 87% of its short-term liabilities on the stipulation that short-term accounts receivable have 100% liquidity (with the repayment period that is less than a year). The Company's inventories are completely formed at the expense of borrowed sources. As of 31 March 2005 the lack of owned financing sources for the formation of circulating assets was 2,809,054 thous. roubles and it was 1,840,044 thous. roubles as of 31

On the basis of the results one may deduce the following:
- in the structure of the property's sources the owned sources still prevail.
- the reduction of the solvency is the result of insufficient financing of the power system by the tariffs basis. The lack of monetary funds is compensated by borrowed sources – the increase of the credit portfolio.
The opinions of the Issuer's Authorities concerning the aforesaid information coincide.

4.3. Amount, Structure and Adequacy of the Issuer's Capital and Circulating Assets

4.3.1. Amount and Structure of the Issuer's Capital and Circulating Assets

a) according to the Charter of the Company the chartered capital is 606,163,800 (six hundred and six million one hundred and sixty three thousand eight hundred) roubles;
b) the information about the formation and usage of the reserve capital is given in paragraph 8.1.3. of the Report.

Highlight	2000	2001	2002	2003	2004	the 1st quarter of 2005
a) Amount of chartered capital, roubles	606,163,800	606,163,800	606,163,800	606,163,800	606,163,800	606,163,800
b) Total cost of the Issuer's stock bought out by the Issuer for further resale	Didn't buy out	Didn't buy out	Didn't buy out	Didn't buy out	Didn't buy out	Didn't buy out
c) The amount of the Issuer's reserve capital, roubles	13,841,000	13,841,000	16,818,000	16,818,000	16,858,000	16,858,000
d) The amount of the Issuer's additional capital, roubles	12,385,315,000	14,849,065,000	19,781,299,000	23,605,222,000	22,236,879,000	24,911,321,000
e) Retained profit for the past years, roubles	457,426,000	911,561,000	906,288,000	562,711,000	1,655,553,000	1,265,451,000
f) The amount of the Issuer's target financing assets, roubles	0	0	0	0	0	0
g) Total amount of the Issuer's capital	14,340,301,000	16,600,640,000	20,778,963,000	24,791,705,000	24,124,874,000	27,505,647,000

The amount of additional capital for the analysed period (2000-2004) increased from 12,385,315 thous. roubles to 22,236,879 thous. roubles or by 79.5%. As of 31 March 2005 the amount of the additional capital was 24,911,321 thous. roubles and increased for a year by 360,231 thous. roubles. Additional capital may be used by the Company to do the following:
- ***the repayment of the decrease of the fixed assets cost as a result of their revaluation***
- ***the increase of the chartered capital***
- ***the repayment of losses, seen at the end of the Company's accounting year results***
- ***the distribution of profits among the members of the Company.***

The retained profit for the past years is the growth of owned capital on the basis of internal accumulation and it may be used in order to increase the chartered capital and to repay the accumulated losses.

For 2000-2004 the owned capital of the Company increased by 9,784,573 thous. roubles or by 68.2% (from 14,340,301 thous. roubles to 24,124,874 thous. roubles).
Thus the accumulation of the owned capital of the Company is the evidence of the growth of financial

independency.

The structure of the owned capital didn't change and in the 1st quarter of 2005 it remained at the same level: the chartered capital is 2.20%, the reserve capital – 0.06%, the retained profit for the past years – 4.60%.

The structure and amount of the circulating assets (thous. roubles)

Circulating asstes	for 1 January 2005.	for 31 March 2005
Inventories	1,162,236	822,304
Including: Raw, materials and other relevant valuables	1,124,797	785,119
Animals bred and fed	0	0
Costs of goods in process	0	0
Finished products and goods for the resale	2,297	2,312
Goods loaded	2,659	2,003
Deferred charges	32,483	32,870
Other inventories and costs	0	0
Value added tax for the vested valuables	685,019	558,971
Accounts receivable (that are to be paid 12 months later after the reporting date)	1,269,457	1,194,839
Including: buyers and customers	441,634	365,365
Accounts receivable (that are to be paid within 12 months after the reporting date)	2,456,687	2,930,375
Including: buyers and customers	1,115,042	1,485,207
Short-term financial investments	29,340	90,849
Monetary funds	262,702	472,536
Other circulating assets	-	-
Total:	5,865,441	6,069,874

The sources for the financing circulating assets are owned assets of the Company. Owned capital of the Company is enough for covering the major Company's necessity in assets and that necessity ensures the continuity of the production and sales of products as well it covers current liabilities.

The Company's policy concerning the working capital lies in the provision of acceptable volume and structure of the Company's working assets in order to increase the assets' liquidity. So as to decrease the accounts receivable some work is done with buyers and customers, accounts payable are controlled, some work is done so as to recover overdue accounts receivable.

4.3.2. Adequacy of the Capital and Circulating Assets of the Issuer

The Company has the adequacy of owned capital and circulating assets for settling short-term liabilities and covering current operational expenses.

Highlight	For 31 December 2004	For 31 March 2005
Owned capital at the end of the period, roubles	24,124,874,000	27,505,647,000
Circulating assets, roubles	5,865,441,000	6,069,874,000
Short-term liabilities at the end of the accounting period	4,970,151,000	4,388,387,000
Operational expenses, roubles	1,842,815,000	676,465,000
Average operational expenses per day, roubles	71,260,467	71,078,867

4.3.3. Monetary Funds

Highlights of Cash Flows (CF) of the Company are approved by the Board of Directors of the Company every quarter.

The planned requirement of the Company in monetary funds for the 2nd quarter 2005 is 710,541 thous. roubles.

Accounts payable gathered in a bank's card index are absent

4.3.4. Financial Investments of the Issuer

Financial Investments, according to the Russian Accounting Standards (RAS) No. 4/99 "Financial Statements" should be understood as:

- ***Investments into Affiliated Companies;***
- ***Investments into Dependent Companies;***
- ***Investments into other Companies;***
- ***Loans given for more then 12 months;***
- ***Loans given for less then 12 months;***
- ***Owned shares, bought from shareholders;***
- ***Other financial investments.***

Highlight	Amount of Investments for 31 March 2005, roubles		
	Short-term (less than 1 year)	Long-term (more than 1 year)	Total
Loans given to Companies for less then 12 months	-	-	-
Loans given to Companies for more then 12 months	-	-	-
Owned shares, bought from shareholders	-	-	-
Investments into other Companies	-	647,000	647,000
Investments into Affiliated Companies	-	482,923,000	482,923,000
Investments into Dependent Companies	-	-	-
Other financial investments	90,849,000	-	90,849,000

Financial investments are accounted at the balance account 58 according to the RAS No. 19/02 "Accounting financial investments", ratified by the instruction of the Ministry of Finance of 10 December 2002 No. 126n.

1. Investments into securities:

Type of security	Full and abbreviated company name, location	Date and registration number the securities' issue	Number of securities the Issuer owns	Total nominal value of the securities the Issuer owns, thous. roubles	Total balance value of the securities the Issuer owns, thous. roubles	Efficiency of investments	Supposed losses in current year, thous. roubles

Following the results of work in 2004 the profit constituted 319 thous. roubles.	0

Information about other financial investments (deposits into authorised capital of the limited liabilities companies) is not given here, because it constitutes less than 10% of all financial investments of OJSC "Kuzbassenergo" at the end of the 1st quarter of 2005.

4.3.5. Intangible Assets of the Issuer

In intangible assets exceptional rights of the Company for the trade mark are included.
The depreciation of intangible assets is calculated using the linear method taking into consideration the following useful lives.

Rights for the trade mark are 10 years.

In the accounts the Company's intangible assets are shown at the initial cost not including the depreciation that has been accrued during the utilisation time

No.	Name of group of intangible assets	Total cost	Amount of the accrual depreciation
1.	Trade mark	3774 roubles 73 kop.	601 roubles 20 kop.
	Total, roubles	3774 roubles 73 kop.	601 roubles 20 kop.

Accounting intangible assets is done according to the RAS No. 14/2000 "Accounting intangible assets", ratified by the instruction of the Ministry of Finance of 16 October 2000 No. 91n.

4.4. Information about the Issuer's Policy and Expenditures in the Sphere of Scientific and Technological Progress, in Respect of Licenses and Patents, New Researches and Developments

Accounting Scientific Research and Experimental Design Work (SREDW) at OJSC "Kuzbassenergo" is done according to the RAS No. 17/02 "Accounting expenses for Scientific Research and Experimental Design Work".

As of 1 April 2005 expenditures for Scientific Research and Experimental Design Work constituted:
- conducting SREDW – 1,932 thous. roubles.

4.5. The Analysis of the Trends of the Development in the Sphere of the Main Activity of the Issuer

Electric power industry is one of the key industries of the Russian economy.
The share of the power industry constitutes approximately 10% of the country's GDP. Russian power industry occupies the fourth place in the world according to the installed power and to the volumes of production.

In 2000 the increase in the consumption of electric power was seen that had been caused by the economic upturn and also by the increase in the electric power generation. In the same year 25 new turbine-generator sets were put into operation with the total power of 665.8 MW, then the Russia's first steam-gas power unit at the North-Western Heat-Electric Generating Plant in Petersburg with the power of 450 MW was put into testing operation. At the session of the Government of the Russian Federation in December 2000 the proposals of the Ministry of Economic Development of Russia, the Ministry of Atomic Energy of Russia, the State Trust "Rosenergoatom" concerning the reformation of the electric power industry were discussed and the project of the basic trends of the State Policy concerning the reformation of electric power industry of the Russian Federation, which had been proposed by the Ministry of Economic Development of Russia, was taken as the basis for further studies. The instruction of the Government of the Russian Federation No. 1072 "The plan of the RF Government's actions in the sphere of social policy and modernization of the economy during 2000-2001", that determines priority objectives in the sphere of reforming the natural monopolies was accepted.

According to the results of 2001 at the enterprises of the Holding OJSC RAO "UES of Russia" the level of payment with the monetary funds for the consumed electric and heat power grew by 20% and constituted 103% taking into account the repayment of the previously accumulated debts. The implementation of the programs of reduction of the expenses in the Affiliated and Dependent Companies (ADC) of the Holding allowed to reduce the expenditures for 12.3 mlrd. roubles. Altogether 25 turbine-generator sets with the total power of 1330.2 MW and 1819.5 km of electric power lines with the voltage 35 kV and more were put into operation. RAO "UES of Russia" together with the group of the independent international consultants developed the program "5000 MW". Its purpose was the attraction of Western and Russian investors into the sphere of building of the most promising power generating facilities. The Government adopted the

Resolution No. 526 of 11 July 2001 "About the reformation of electric power industry of the Russian Federation". The separation of the monopolistic types of activity from other types is prescribed there as well as the introduction of separate accounting at the enterprises of power industry. In order to develop this decision the instruction of the Government of the RF N1040-r was accepted, which approved the Plan of actions at the first stage of the reformation. During August 2001 the Committee on the Reformation – attached to the Board of Directors of RAO "UES of Russia" – was created. The representatives of: the minority shareholders, the potential investors, the state, RAO "UES of Russia" entered the Committee. On 21 December the Government of the Russian Federation adopted the Resolution No. 881 "About the criteria of the ascription of the main electric power lines and objects of electric networks to the united (all-Russian) electric network". In accordance with the Resolution of the RF Governments of 11 July of 2001 OJSC "FNC UES" (Federal Network Company that manages the united national (all-Russian) electric network) and OJSC "SO-CSC UES" (System Operator that accomplishes the Supervisory Control of the united electric network of Russia).

The main events of 2002 in the sphere of the reformation were the following:

- the adoption by the State Duma of the RF in first reading of the package of the bills, dedicated to the reformation of the electric power industry;

- Non-Commercial Partnership "ACS" altogether with OJSC "SO-CSC UES" conducting the trading of the electric power in the imitation regime;

- the creation of infrastructural organizations in this sphere, that is the Federal Network Company and the System Operator;

- the preparation of the Strategy of the reformation of RAO "UES of Russia";

- the completion of the preparatory stage of the reformation of RAO "UES of Russia";

- the development and the adoption of the basic version of the reformation of JSC-energo;

- the preparation for the realization of the early trial projects of the reformation of JSC-energo;

- the conducting the first stages of the reformation of scientific and design complex of RAO "UES of Russia" and also the power maintenance and service forms of activity.

The Resolution of the Government of the Russian Federation No. 226 of 2 April 2002, "About the price formation with respect to electrical and heat power" put into operation the new "Principles of price formation" and "Rules of government control and use of tariffs for electrical and heat power in the Russian Federation". RAO "UES of Russia" adopted "The code of corporate management".

In September 2002 Non-Commercial Partnership "Administrator of Commercial System" (NCP "ACS") began conducting trading of electric power in the imitation regime. The approximation of tariffs to those that are economically justified became one of the positive tendencies of 2002, i.e. the level of cross subsidizing between the groups of consumers reduced. The Board of Directors of RAO "UES of Russia" approved the basic version of the reformation of the regional power systems - the Affiliated Companies of RAO "UES of Russia", and also the exit of the enterprises of the Holding RAO "UES of Russia" out of the non-specialised active assets for purposes in order to minimize the expenses, connected with the possession of them. The Board of Directors of RAO "UES of Russia" made a decision about the termination of the participation of RAO "UES of Russia" in CJSC "CSC FOREM" by means of sales to the Non-Commercial Partnership "ACS" 75% of the shares of CJSC "CSC FOREM".

The anticipating growth rates of the expenditures for production in comparison with the growth rates of revenues (29.4% and 23.8% correspondingly) as a whole for the Affiliated and Dependent Companies of RAO "UES of Russia" led to the reduction of the gross profit in 2002 in comparison with 2001. Gross profit of JSC-energo, obtained in 2002, is lower than the profit, obtained in 2001 by 4.6 mlrd. roubles, for the JSC-electric power stations the gross profit was reduced by 4.5 mlrd. roubles.

On the night 31 March - 1 April 2003, in ten regions of Russia the functions of immediate supervisory control of the United Power System of Russia were transmitted from the Regional Supervisory Controls (RSC) of JSC-energo to RSC branches OJSC "System Operator CSC UES".

In April 2003 the package of the legislative acts about the reformation of electric power industry came into force and includes the following Federal Laws:

- "About electric power industry";

- "About the special features of the functioning of the electric power industry in the transition period and about the introduction of changes in some legislative acts of the Russian Federation and the acknowledgment of the fact that some legislative acts of the Russian Federation expired due to the adoption of the Federal Law "About electric power industry";

- "About the introduction of changes and amendments into the Federal Law "About the Government control of tariffs for electric and heat power in the Russian Federation";

- "About the introduction of changes and amendments into the Federal Law "About the natural monopolies";

- "About the introduction of changes and amendments into the second part of the Civil Code of the Russian Federation";

- "About the introduction of changes into the Federal Law "About the energy-saving".

The working group assigned to modify the strategy of RAO "UES of Russia" for 2003 – 2008 in the framework "5+5" in the presence of the Board of Directors of RAO "UES of Russia" discussed the Project of the Concept of the Strategy of OJSC RAO "UES of Russia" for 2003 – 2008 in the framework "5+5" taking into account the outspoken remarks and proposals.

In the 1st half of 2003 the process of improvement and development of the mechanisms of the competitive trade within the framework of the regulated wholesale market of electric power. In accordance with the existing normative and legal documents monthly trading of above-plan electric power were done, the volume of the sold electric power on the trading was 3,1% of the volume of delivery of the electric power into the domestic market. Together with OJSC "SO-CSC UES" in the 1st half of 2003 trading of electric power continued according to the framework "Energopul", the share of sales for the accounting period increased almost twice and constituted 1,3% of the total volume of delivery into "FOREM" (the domestic market).

The formation of the United National Electric Network is done on the basis of the current legislation of the Russian Federation and under the supervision of the Federal Net Company, to the balance of which more than 45 thous. km of main electric networks and 126 substations and system of technological control were given.

On 31 October 2003 the Board of Directors of RAO "UES of Russia" at the regular session listened to the information about the possibility of creation of Regional Generating Companies (RGC) by means of establishment of several JSC-energo. The concept of the creation of RGC by means of establishment presupposes its formation as a large operating company even at the first stage of the reformation of JSC-energo. RGC is co-established by several JSC -energo by means of inclusion of their generating assets into chartered capital of the newly founded company. Thus there is the possibility at already the early stage to form a large operating company, shareholders of which the founders of JSC-energo are.

According to the Resolution of the RF government No. 643 of 24 October 2003 "About the rules of the wholesale market of electric power of the transition period", since 1 November 2003 altogether with the controllable sector of the wholesale market of electric power (the existing Federal wholesale market of electric power) the competitive sector is launched, which presupposes trading of the hourly volumes of electric power at free prices. In this case, in the free sector each producer can offer up to 15% of its installed power, and each user will be able to declare a purchase up to 30% of its own planned consumption. The sector is just available for the European part of the RF and the Urals.

Economic effect achieved from the work of the free sector of the wholesale market of electric power is obvious from the very beginning. The amount of deliveries of electric power by heat power plants with the relatively low production costs increased, while the deliveries from "expensive" generating plants, on the contrary, decreased.

The profit of the group RAO UES from the main activity in 2003 was 64.5 mlrd. roubles that is in 3.5 times more than in 2002. This is explained by the expenses restraining policy of RAO, which (expenses) grew more slowly than the revenues from sales. At the same time net profit of the group RAO UES was reduced by 9 mlrd. roubles and it reached 27 mlrd. roubles. The decrease occurred due to the fact that in 2003 the payment of part of profit tax was tansferred because of the scaled revaluation of the fixed assets.

At the beginning of 2004 the electric power industry of Russia, in contrast to the majority of other

industries, was characterised by negative dynamics, which mainly is connected with the climatic factor, namely, with higher temperatures in January 2004 as compared with January 2003. As a result, in January 2004 the decrease in the production as a whole in the industry constituted 1.6%. In this case, it is connected to the greatest degree with reduction of the heat power production.

In January 2004 a traditional increase of prices - at the beginning of a year - for the products of electric power industry occurred; however, it was comparatively low. At least, in gas and petroleum industry the increase of prices was much higher. The substantial rise in the cost of gas, with a much lower increase of tariffs for the electric power, can negatively influence on the financial state of the enterprises of electric power industry in 2004.

At the beginning 2004 the competitive market of electric power continued to grow. Contracts of joining the trading system of the wholesale market 95 clients signed, out of which 25 are not the affiliated or dependent organizations of RAO "UES of Russia".

The share of the free sector of the market in June constitutes 8.0% of the overall volume of the electric power consumption on the territory of the European part of Russia and the Urals, in May this highlight was 7.4%.

On 26 March, 2004, the Board of Directors of RAO "UES of Russia" approved the principles of the formation of a new organisational structure of the executive body of the holding RAO "UES of Russia".

The new organisational structure of RAO "UES of Russia" presupposes the existence of three significant blocks: the Corporate Centre (CC), the Reform Control Centre (RCC) and Business Units (BU).

The Corporate Centre is believed to fulfil the central administrative functions of RAO "UES of Russia", the Reform Control Centre (a number of project teams with a single control unit) – to work at the reformation of electric power industry. The Business Units are the subdivision of the executive body of RAO with their own budgets and responsibilities for conducting this or that type of activity (in this structure the Federal Net Company and the System Operator separate juridical entities, others are not). The Corporate Centre will fulfil such functions that guarantee the interaction with the shareholders, the government bodies, the mass communication media, strategy and control (for example, strategic trend, monitoring of financial results), the Reform Control Centre will carry out strategy and will implement the reform, the Business Units will create new companies in accordance with the reform, will control their activity, will propagate culture, control standards and main business processes.

OJSC "Kuzbassenergo" is the part of the united power system of Russia and the affiliated joint-stock company of RAO "UES of Russia". Power system provides population and industrial sector of Kemerovskaya Oblast - located in the South-East of West Siberia, at the juncture of the Western-Siberian Plain and the mountains of the Southern Siberia - with electric and heat power. Kemerovskaya Oblast extends from the North to the South at almost 500 km, from the West to the East – 300 km. The population of the region as of 1 January 2004 is 97.4 thous. people.

After the entry of the large consumers of electric power of OJSC "Kuzbassenergo" into FOREM, the power system earlier considered to be experiencing shortages of power then became the one that has extra power. The competitive sector of the market in the framework "5-15" in Siberia will be launched not earlier than in the middle of 2005. For the surplus power systems when the decision to let the entry into FOREM is made the weighted average tariff is taken into consideration, which as of 2004 for the regional power company was 29.6 kopecks.

Using this approach of calculation the price for one kilowatt-hour, the surplus power of Kuzbass power system proved to be too expensive; therefore the FEC didn't included it in the balance of the power service area of Siberia and UES of Russia for 2004. The results of this decision are as follows: the reduction of its own electric power generation in the amount of 2.5 mlrd. kWh per year and the conservation of the equipment for approximately 400 mW. This leads to the direct reduction of revenues, further decrease of sources for the production and social programs. Moreover, the analysis of the operating mode OJSC"Kuzbassenergo" in October 2003 according to the balances affirmed by FEC for the 4th quarter (with "zero" net flows of electric power) demonstrated another number of serious technological problems, connected with the optimisation of the equipment workload at power stations and the fulfilment of contract

liabilities in FOREM in Autumn and Winter.

Within the tight schedule "The substantiation of the technological delivery of electric power into FOREM" was prepared, in which all computations and calculations demonstrated the need for the power company to sale during this period up to 70 mln. kWh of electric power per month. After all discussions the proposals of Kuzbass power engineering specialists were taken into account by the FEC. In November 2003 the power system delivered the electric power into FOREM in the amount of 34 mln. kWh for the sum of 9 million roubles. For the 1st quarter of *2004 OJSC "Kuzbassenergo" was included in the consolidated balance sheet of electric power of UES of Russia as the supplier with the sales volume 160 million kWh. Entry into FOREM as the supplier became a large economic and technological breakthrough for the regional power system.*

The Issuer's activity in power industry is caused mainly by industrywide tendencies. Power system was confronted with the problems of non payment proper to the economic sphere s at the macro level , as the regional problems mainly in their relations with the Regional Power Committee.

In the year 2000 the "Conception of power system development till the year 2010 " was revised. This present Conception was recognized by the Regional Power Committee of Kemerovo region (Decision №23 dd. 13.06.2000) as necessary and timely, aimed to maintain and keep having generating capacities, achieved production volumes.

RAO "UES of Russia" approved the Conception as a program of minimum maintaining of equipment working capacity. This Conception provides power system development up to the year 2010 , also poses fundamentally new problems and their solving approaches:

- economic substantiation of necessity in the power system's object building and reequipment.

- launching of new technologies including advances in the domestic science and foreign experience.

- maximum electric power output by the own equipment subject to maximum covering of power consumption load in the region.

- workflow automation.

- application of modern methods of equipment diagnostics.

In the year 2002 the power system worked strictly and in accordance with production balance approved by the Federal power committee and schedules defined by the UES of Siberia working regimes.

Irreproachable work of the Company ensured safe and systematic supply to the solvent consumers for heat and electric power, power resources, also stable course of winter period.
In the year 2002 figure of physical volumes in the Company was higher than during the all past years.
All scheduled repair works was realized in the past year, also program of technical reequipment was realized in spite of imbalance of rate formation in the region.

During the year 2002 the program on reforming financial management and control system was carried out, also the system of budgeting, strict control over the budget fulfillment was implemented together with accounts receivable.
Spent work assisted in reduce of account payable by RUR 3000 million in power system.
Together with deciding financial, economic and production, also technical tasks, the Company proceeded to reforming in accordance with the major trends of power branch reforming in the current year.
Power commodity output is increasing due to electric power consumption increase and stable power rate growth during the last 5 years.

Percent of sale has tendency to growth during these years and for the last 3 years sales exceeded commodity output.
That is decrease of accounts receivable on the power system.
Change in the structure of power payments towards increase of money component took place the last years.

A year 2003 was the year of large starting objects having important meaning not only for power system, but for the whole Kuzbass. High voltage transmission line ВЛ-35 was successfully putted into operation in august month in the South Electric networks to electrify the distant village of the Gornaya Shoria of the Ust-Kabyrza being the largest in the district.

Turbine P-12-90/30M (of capacity equal to 12MW) and boiler set №4 with a steam capacity equal to 160t/h with a boiler set were launched in industrial exploitation the 4th of December 2003 at the Kuznetskaya TETS. Unique turbine at the vibro-bearing T-115-8,8 (115 Mw) with generator TF-110-2UZ being the unique for Siberia were launched at the South-Kuzbass GRES the 19th of December 2003.
JSC "Kuzbassenergo" for his outstanding contribution to the historical development of Russian Federation were awarded with the honorary title "Prize "Russian National Olympus" laureate" in the "Fuel-power complex" nomination at the outcome of the year.
"Russian National Olympus" is a major Russian prize reflected the principal advances in social and economic also scientific and cultural spheres of Russia.
Great launching of turbo set №4 of a type PTR-30-2,9 took place at the Kemerovskaya TETs the 8th of October 2004. This turbine (30MW) aimed to replacement of the used-up body resource and retired turbo sets №5 and №6. Such a start up provided by the Conception of regional power system development till the year 2010 had been coordinated with the RAO "UES of Russia" and approved by the Kemerovo regional administration.

AS for a date of the 31st of March of the year 2004 the Board of Directors of the RAO "UES of Russia" approved 49 projects on JSC-energo reforming from the 70 liable to approval by the management bodies of the JSC RAO "UES of Russia".
Also realization of reforming projects was started in 41 JS-Energo. The project group "Remonty " (Repairs) had approved the projects of repair isolating of 70 JS-energo and 32 JS plants. It was not provided to spend repair activity isolation at the 11 JS-plants.
The Board of Directors of the RAO 'UES o f Russia" also approved the projects on repair activity isolation of 52 JS-energo and 20 JS-plants.

In March 2004 the segregation of repairing activity was finished in accordance with the Project on repairing activity reforming in the JSC "Kuzbassenergo" approved by the Project Group on reforming of repairing activity and optimization of technological services market in the JSC "RAO "UES of Russia" dd. 01.07.2003.
Also 3 affiliated companies with a 100% market share of the JSC "Kuzbassenergo" were founded and started their activity:
- JSC "Kuzbassetremont" – competitive energy repairing company, carries out its activity in electric power lines. Registered 04.03.2004.
- JSC "Engineering and analytical centre "Kuzbasstechenergo" – competitive engineering company. Registered 09.03.04.
- JSC "Kuzbass energy repairing company" – competitive energy repairing company carries out current and capital repair of power plant equipment . Registered 01.03.2004 .

The companies were created on the base of the JSC "Kuzbassenergo" property with its own personnel participation.
JSC "Kuzbassenergoservice" (100% SDC established on the base of property and personnel participation of the liquidated affiliated company RP "Kuzbassenergoremont") carries out current repair of boilers, turbines, transformers, also works in capital construction and technical reequipment, produces spare parts.

20 of September 2004 the Agreement on relation between the JSC RAO "UES of Russia", Kemerovo regional Administration and JSC " Kuzbassenergo" for the years 204-2006 was signed.
According to this Agreement, JSCRAO " UES of Russia" under reforming of the JSC "Kuzbassenergo" will take into consideration position of the Kemerovo regional authorities who are against dividing of power system generating capacities.

Besides, in the aforementioned Agreement, the agreement on the by-level termination of cross financing has been reached, also on assistance in establishment of the grounded capacity price at the FOREM and on the other issues.

The JSC "Kuzbassenergo" contains 8 heat power stations of the fixed capacity 4,7 million kw.
During the reforming process it was planned to divide the JSC "Kuzbassenergo" into the FGC №11 and

FGC№12, but the JSC "Siberian Coal Company" and Kemerovo regional authorities spoke against such a split-off. Thus an offer to save JSC 'Kuzbassenergo" as the united power system and to sell one or some station was resulted.

Federal antimonopolistic service spoke for such a sale of the largest plants of power system, making this a term as obligatory under any scheme of restructuring to remove possible branch monopolization.

Subsidiary named "Maghistralnye electric networks" (Main-line electric networks) was created within the activity on reforming of electric network complex on the ground of the property complex on trunk transmission lines related to the Unique national electric network.

In the performance of the decision of the Board of Directors dd. 20.07.2004 and of the order of the JSC "Kuzbassenergo" "On the start-up of realization of actions on transfer of the power complex objects of the JSC 'Kuzbassenergo" being in the structure of the United National (All-Russian) electric power line to the JSC "interregional Main power company "Siberia" (hereinafter JSC "MMSC – Siberia") the schedule of actions on input of the objects being in the structure of the UNES in the payment of additional stocks of the JSC "MMSC – Siberia" in the year 2004.

Market valuation of the UNES objects was spent in October 2004.

18.04.2005 The Project on reforming of the JSC "Kuzbassenergo" provided dividing into competitive and monopolistic activity types in accordance with the base variant of reforming had been elaborated and submitted for consideration of the Management Board of the RAO "UES of Russia".

Reorganization will be carried out on form of segregation.

Company under reorganization will keep the functions of generating company.

The Project examination was reserved to the future.

V. Detailed information about members of the issuer's administrative bodies, its units of control over its financial and economic activities; brief information about the issuer's personnel (employees)

5.1. Information about the structure and competence of the issuer's regulatory bodies

The Company's regulatory bodies are represented by:

- General Meeting of the Company's shareholders being the supreme management body of the JSC 'Kuzbassenergo"
- Board of Directors
- Management Board
- General Director

Competence of the General meeting of shareholders of JSC 'Kuzbassenergo" :
In accordance with paragraph 10.2 of the article 10 of the Articles of Association, the competence of the General meeting of shareholders includes:

1) alteration and amendment of the Company's Articles of Association or adoption of the Company's Articles of Association in a new edition;
2) reorganization of the Company;
3) liquidation of the Company, appointment of a liquidation committee and adoption of the intermediate and final liquidation balance sheets;
4) determination of number, nominal value, category (type) of the declared stocks and rights granted by these shares;
5) increase of the authorized capital of the Company through an increase of the nominal value of shares or through an additional placement of shares;
6) decrease in the authorized capital through a decrease in the nominal value of shares, through an acquisition by the Company of a part of the shares in an effort to decrease their total amount, and also through redemption of these shares acquired and bought out by the Company;
7) splitting and consolidation of the company's shares;
8) adoption of a decision on placing by the Company of bonds subject to convert into shares and others issuing securities subject to convert into shares;
9) election of members of the Board of Directors and early termination of their powers;
10) election of members of the revision committee of the Company and early termination of their powers;
11) approval of the Auditor of the Company:
12) adoption of a decision on powers transfer of the Corporate executive body to the management company (manager);
13) approval of annual reports, annual accounting statements including the Company's profit and loss accounts, as well as distribution of profits (including payment (announcement) of dividends except for profit distributed as dividends based on the results of the first quarter, six months, nine months of the fiscal year) and losses of the Company in the fiscal year;
13.1.) payment (announcement) of dividends based on the results of the first quarter, six months, nine months of the fiscal year;
14) determination of the procedure of the General Meeting of Shareholders;
15) making decisions about approval of transactions in the cases provided by art. 83 of the Federal law "On joint stock companies";
16) making decisions about approval of major transactions in the cases provided by art. 79 of the Federal law "On joint stock companies";
17) making decisions on participation in holding companies, financial and industrial groups, associations and other consolidated business entities;
18) adoption of internal documents regulating activities of the Company's authorities;
19) making decisions on payment to the members of the Revision Committee of the Company of remuneration and / or reimbursement ;
20) making decisions on payment to the members of the Board of directors of the Company of remuneration and / or reimbursement ;
21) making decisions on the other questions provided by the federal Law " On Joint stock companies".

Competence of the Board of Directors of JSC "Kuzbassenergo" " :
In accordance with paragraph 15.1 of the article 15 of the Company's Articles of Association the following issues are within the competence of the Board of Directors of the Company:

1) prioritizing business directions of the Company;
2) convening regular (annual) and extraordinary Meetings of the shareholders of the Company's unless

otherwise provided by clause 14.8 of the article 14 this present Articles of Association and announcement on the date of conducting of the new general meeting of shareholders of the company instead of frustrated due to lack of quorum.

3) approval of the agenda of the General Meeting of Shareholders of the Company;

4) appointment of the secretary of the General Meeting of Shareholders of the Company:

5) deciding on the date of drawing a list of persons that are entitled to participate in the General Meeting of Shareholders and other issues that are related to preparation and holding of the General Meeting of Shareholders;

6) submitting issues envisaged by subparagraphs 2, 5, 7, 8, 12-19 of the paragraph 10.2 of the article 10 of this present Articles of Association for discussion of the General meeting of shareholders;

7) deciding on placement of bonds and other issued securities by the Company except the cases provided by the Federal Law "On Joint Stock Companies" and by the Articles of Association;

8) endorse decisions to issue securities, securities issue prospectuses, securities issue summary reports, securities issuer's quarterly reports; approve a share acquisition summary report;

9) determine the value (money valuation) of property, placement and buy-out price of issue securities in the cases specified by the Federal Law on Joint-Stock Companies, also in the cases provided by the subparagraphs 21,39 of the paragraph 15.1 of the present Articles of Association;

10) acquire shares, bonds and other issue securities placed by the Company, in the cases specified by the Federal Law "On Joint-Stock Companies";

11) alienation (disposal) of the Company's shares at the Company's dispose due to their purchase or buy-out from the shareholders by the company;

12) appointment of General Director and early termination of his powers;

13) election of members of the Management board of the Company and early termination of their powers; making decisions on payment to the members of the Management board of the Company of remuneration and / or reimbursement

14) making recommendations to the General Meeting of Shareholders concerning the size of remunerations and compensations to be paid to the members of the Company's Revision Committee; setting the size of the auditor's fees for his services;

15) make recommendations as to the size of dividends for shares and procedure of dividend payment;

16) approval of the Company's internal documents determined a procedure of forming and using the Company's funds;

17) decision making on the company's funds using; approval of the budget for the assets using over the special funds; examination of the budget fulfillment on the assets using over the special funds;

18) endorse the Company's internal documents, except for internal documents which are to be endorsed by the general meeting of shareholders of the Company also the other internal documents which are to be endorsed by the executive bodies of the Company.

19) approval of annual (quarterly) business-plan and of report on its lay-out, also approval (correction) of the control features cashflow (budget) of the Company and /or approval (correction) of cashflow (budget) of the Company;

20) creation of subsidiaries, opening of representation offices and their liquidation

20.1) making respective changes in the Company's Articles of Association concerning creation of the subsidiaries, opening of the representative offices of the Company (including changes of information on full company's name and location of subsidiaries and representative offices of the Company) and their liquidation;

21) deciding on the Company's participation in other organizations (including co-ordination of the chartered documents and candidates to the management bodies of the newly creating companies), market share changing (share's number, share size), charge of shares and stocks, termination of the Company's participation in other organizations.

22) defining a credit policy of the Company concerning the granting of loans, credits, guarantees and bails, liabilities under the bills (issue of promissory note and transfer note), transfer of the property to the pledge and

decision making on the Company's transactions in the cases when the procedure of decision making is not provided by the credit policy of the Company;

23) endorse major deals in the cases provided by Chapter X, Federal Law "On Joint Stock Companies";
24) endorse transactions in the cases provided by Chapter XI, Federal Law "On Joint Stock Companies";
25) approval of the Company's registrar and terms and conditions of the contract with him, also cancellation of the contract with him;
26) election of the Chairman of the Board of Directors of the Company and early termination of his powers;

27) election of the deputy Chairman of the Board of Directors of the Company and early termination of his powers;
28) election of the Secretary of the Board of Directors and early termination of his powers;

29) preliminary approval of resolutions on the Company entering into deals connected with the gratuitous alienation of the property of the Company or interests (demands) to itself or to the third parties; deals connected with exemption from the property liabilities before himself or before the third party; deals connected with gratuities rendering of services (works) by the Company to the third parties in the cases (amounts) determined by a separate procedure established by the Board of Directors, decision making on the transactions subject to making by the Company in the case when the aforementioned cases (amounts) are not defined;

30) decision making on the powers termination of the management company (manager);
31) decision making on appointment of the Acting as General Director and Members of the Management Board in the cases provided by paragraphs 19.11 and 19.12 of the Articles of Association;
32) bringing to disciplinary liability of the General Director of the Company and members of the Management Board, also their incentive according to the labor code of Russian Federation;

33) examination of the General Director's reports on the Company's activity (including fulfillment of his duties) , also fulfillment of the decisions adopted by the General meeting of Shareholders and by the Board of Directors of the Company;

34) approval of the cooperation of the Company with the organizations where the company is interested;

35) positioning of the Company(Company's representatives) on the following agenda of the general meeting of shareholders (members) and meetings of the Boards of Directors of subsidiaries and affiliated and dependent companies (hereinafter SDC), including instructions to take or not to take participation in voting over the agenda, also to vote "For", "Against", "Abstain".

a) on determining the agenda of a general shareholders meeting (Members) of a SDC;
b on reorganizing, liquidating a SDC;
c) on determining the number of directors on the Board of Directors of a SDC, nominating and electing its members and early termination of their terms of office;

d) on determining the quantity, nominal value, class (type) of the declared shares of SDC and rights conferred by these shares;
e) on increasing the authorized capital of a SDC by increasing the nominal value of shares or placing additional shares
f) on placing SDC securities convertible into ordinary shares;
g) on splitting, consolidating the shares of a SDC;
h) on approving major deals made by SDCs;
i) on participation of SDC s in other organizations (on joining an operating organization or establishing a new organization) as well as on acquiring, alienating or encumbering shares and units in the authorized capitals of organizations in which a SDC is a member, and on changing the unit in the authorized capital of the respective organization;
j) on making deals by a SDC (including several related deals) connected with the alienation or a possibility of alienation of the property that constitutes fixed assets, incorporeal assets and construction in progress items intended for production, transmission, dispatching, and distribution of electricity and heat in the instances

(amounts) defined by the procedure for the Company interaction with business companies whose shares and units are held by the Company, as approved by the Board of Directors of the Company;
k) on making changes and amendments to the chartered documents of SDC;
l) on determining the procedure for remuneration's payment to the members of the Board of Directors and Revision Committee of SDC;

36) positioning of the Company(Company's representatives) on the following agenda of the general meeting of shareholders (members) and meetings of the Boards of Directors of subsidiaries and affiliated and dependent companies (hereinafter SDC), including instructions to take or not to take participation in voting over the agenda, also to vote "For", "Against", "Abstain":

a) on determining the position of SDC representatives on items of agendas of general shareholders meeting (Members) and meetings of the Boards of Directors of companies that are subsidiaries and associated companies of SDCs, concerning the making (approval) of deals (including several related deals) connected with the alienation or a possibility of alienation of the property that constitutes fixed assets, incorporeal assets and construction in progress items intended for production, transmission, dispatching, and distribution of electricity and heat in the instances (amounts) defined by the procedure for the Company interaction with business companies whose shares and units are held by the Company, as approved by the Board of Directors of the Company;

b) on determining the position of SDCs representatives on items of agendas of general shareholders meetings of (Members) and meetings of the Boards of Directors of companies that are subsidiaries and associated companies of SDCs that are engaged in the production, transmission, dispatching, distribution and sale of electricity and heat, on reorganization, liquidation, and increase of the authorized capital of such companies by increasing the nominal value of the shares or by placing additional shares, and placing of securities convertible in ordinary shares

37) preliminary approval of decisions of resolutions on the Company entering into:
a) deals with the Company's non-circulating assets constituting 10 to 25% of the balance sheet value of those assets as of the date of the decision to make such a deal;

b) deals (including several related deals) connected with the alienation or a possibility of alienation of the property that constitutes fixed assets, incorporeal assets and construction in progress items intended for production, transmission, dispatching, and distribution of electricity and heat in the instances (amounts) determined by a separate procedure established by the Board of Directors of the Company;

38) decision making on the Company entering into deals that constitutes fixed assets or incorporeal assets of the Company constituting 5-25% of the balance sheet value of the fixed assets of the Company as for the date of the decision to make such a deal;

39) approval of nominees subject to election to the post of Sole executive body, other management bodies, supervision bodies, also candidate of the auditor of the companies, whose shares and units are held by the Company, intended to production, , transmission, dispatching, and distribution of electricity and heat , also repair and maintenance;

40) defining of insurance guarantees including approval of the Insurer of the Company;

41) approval of the independent valuator (valuators) of the company intended to define the value of shares, property and other fixed assets of the company in the cases provided by the Federal Law "on Joit Stock Companies, by the Articles of Association, also by separate decisions of the Board of Directors of the Company;

42) preliminary approval of collective agreement and other agreements made by the Company within the social-labor relations regulating;
43)approval of a candidate of the Financial consultant whose attraction is obligatory according to the Federal Law "On securities market".

Competence of the Sole and Corporate Executive Bodies of JSC "Kuzbassenergo":

Management of the current activity of the Company is in the competence of the Sole executive Body , i.e. General Director and of the Corporate Executive Body, i.e. Management Board of the Company.

The following issues are in the competence of the Management Board of the Company (according to the par. 20.2 of the art. 20 of the Articles of Association):

Competence of the Sole and Corporate Executive Bodies of JSC "Kuzbassenergo":

Management of the current activity of the Company is in the competence of the Sole executive Body , i.e. General Director and of the Corporate Executive Body, i.e. Management Board of the Company.

The following issues are in the competence of the Management Board of the Company (according to the par. 20.2 of the art. 20 of the Articles of Association):

- decision making on the issues related to the competence of the superior management bodies of the SDC 100% (one hundred) of the authorized capital in which is owned by the Company (according to the subparagraphs 37 and 38 of the paragraph 15.1 of the Articles of Association);

- preparation and submitting for consideration of the Board of Directors the reports on financial and economic activity of SDC, 100% (one hundred) of the authorized capital in which is owned by the Company;

- development and submitting for consideration to the Board of Directors the long-term plan of the main activity areas of the Company;

- preparation of annual (quarterly) business-plan and report on its lay-out, also approval (correction) the cashflow (budget) of the Company, in case if the Board of Directors of the Company did not approve the cashflow (budget) of the Company;

- preparation of report on financial and economic activity of the Company, on fulfillment by the Management Board of resolutions adopted by the General meeting of shareholders and by the Board of Directors of the Company;

- approval of education and professional development plans and actions for the labor staff of the Company;

- making decision on the entering into deals which subject are the property, works and services with constituting 1 to 5% of the balance sheet value of the fixed assets of the Company defined as for the date of such a decision making (except for the cases provided by the subparagraphs 39, 40 pf the paragraph 15.1 of the Articles of Association);

examination of reports on the results of the approved plans lay-out, also the programs, directions, report's examination, documents and other information on the company's activity and its subsidiaries and affiliated companies made by the deputies general directors, heads of the organization departments of the company;

- decision making on other issues concerning daily activity of the Company in accordance with resolutions of the General meeting of the Company, the Board of Directors, also the issues submitted for consideration to the Management Board by the General Director of the Company.

To the competence of the General director of the Company includes all issues of daily activity management of the Company except for related to the competence of the General Meeting of Shareholders of the Company , the Board of Directors and the Management Board of the Company.

The General Director acts without a power of attorney on behalf of the Company with those limitations provided by the legislation in force, by the Articles of Association and by the resolutions of the Board of Directors and performs the following actions on behalf of the Company:

- provides fulfillment of the activity plans of the Company obligatory to its tasks decision;

- organizes accounting process and reporting in the company;

- disposes of the Company's property, enters into the deals on behalf of the Company, grants powers of attorney , opens settlement accounts and other accounts of the Company in banks, other credit institutions (also in the cases provided by the current legislation in the institutions whish are the professional participants s of the securities market);

- issues orders, approves (accepts) instructions, local normative acts and other internal documents of the Company over the issues under his competence, gives instructions which are compulsory for execution by all the Company's staff;

- approves the Provisions on the subsidiaries and representative offices of the Company;

- approves the principal composition of the executive body of the Company;

- according to the principal composition of the executive body of the Company approves the staff list and official salary of the Company's labor staff;

- accomplishes his rights and duties as employer toward the labor staff of the Company provided by the labor legislation in force;

- carries out the functions of the Chairman of the Management board of the Company;

- distributes duties between the deputies General Director;

- submits for consideration of the Board of Directors the reports on financial and economic activity of subsidiaries and affiliated companies which shares (units) are in the property of the Company; also information on other companies where the Company has his interest except for the cases provided by the subparagraph 2) , paragraph 20.2 , article 20 of the Articles of Association;

- not later than forty-five (45) days before the date of the annual general shareholders meeting of the Company, submits the Company's annual report, balance of accounts, profit and loss statement, profit and loss distribution for the consideration of the Company's Board of Directors;

- makes decisions on other issues related to the current daily activity of the Company except the issued within the competence of General meeting of shareholders of the Company, the Board of Directors and the Management Board of the Company.

The Corporate Behavior (Governance) Code was not approved in the JSC "Kuzbassenergo", thus in its relations with the shareholders the JSC "Kuzbassenergo" is guided by the Corporate Governance Code of JSC RAO "UES of Russia" approved by the resolution of the Board of Directors of JSC RAO "UES of Russia" (minutes №104 dd. 09.11.2001).

The Company's Charter with all the amendments and modifications is placed on the Internet page:
www.kuzbassenenergo.ru/inf/zak.shtml

JSC "Kuzbassenergo" did not issue the bonds

8.10. Other information

There is no other information on the issuer and his securities

APPENDIX 1

Annual accounting report (without affiliated)

Auditor's opinion on the accounting report of the JSC "Kuzbassenergo" at the outcome of the year 2004

Audit of the accounting report of JSC "KUZBASSENERGO" (hereinafter – the Company) for the period of 2004 was made by ZAO "BDO Yunikon in accordance with the contact dd.11.08.2004 under the No. 10206-01-266/04, concluded according to resolution approved by general meeting of shareholders of the Company to elect as auditor of the Company ZAO BDO Yunikon (resolution №12 dd. 24.06.2004).

1. We have audited the accounting report for the period 2004, comprised of 65 pages, contain the following:

- balance sheet (form №1) – 6 pages ;
- Profit and losses Statement (form №2) – 3 pages;
- Statement of changes in equity (form №3) – 3 pages;
- Cash flow statement (form №4) – 3 pages;
- Appendix to the balance sheet (form №5) – 6 pages;
- Explanatory note – 44 pages.

The Executive Body of the Company is responsible for the preparation and presentation of these accounting statements in accordance with regulations fifed by Federal Law No. 129-FZ dd.21.11.1996 "About accounting" (with amendments and additions), Rules for accounting, Order of the Ministry of Finance of RF No.67н dd.22.07.2003 "About accounting statement's forms' and other regulations of RF, defined an order of accounting and accounting statements.

Mr. Mikhailov Sergey Nickolaevich as the general director of the Company is responsible for accounting organization, as observance of RF legislation under economic operations execution.

Mrs. Riumova Alevtina Nickolaevna as chief accountant of the Company is responsible for accounting policy forming, bookkeeping, timely presentation of full and reliable accounting reports.

Audit's liability is to express an opinion based on results of the audit on the truthfulness of the financial statements, in all material respect, and the compliance of the accounting procedures, in all material respects, with the legislation of the Russian Federation. The purpose of our work was not expression of opinion on full conformity of the Company's activity to the legislation of the Russian Federation and evaluation of the Company's management efficiency.

Our opinion cannot be considered by the user of the reporting as an expression of confidence of a steadiness of activity of the Society in the future.

2. The audit was conducted in accordance with Federal Law No.119-FZ dd. 07.08.2001 "On audit activities" and Federal audit rules (standards) approved by the Government of the Russian Federation No. 696 dd.23.09.2002 (with amendments and additions), other standards regulated audit, and also with company standards and audit methodic. Also we used internal rules (standards) of the accredited professional audit union IPAR.

Audit was planned and performed to obtain reasonable assurance that the financial statements of the Company are free of material misstatements. The audit included examination, on a test basis, of evidence supporting the amounts including estimates made by management, disclosures on the financial and operational activities of the Company, assessment of the accounting principles and methods, preparation of the financial statements, as well as evaluating the overall financial statements presentation. We believe that our audit provides a sufficient basis for our opinion on the truthfulness of the financial statements in all

material respects and the compliance of the accounting procedures in all material respects with the legislation of the Russian Federation.

We established, that the Company does not create a reserve on depreciate securities on financial investments in the affiliates in a stage of bankruptcy proceedings. As a result, an overstating of the line 140 "Long term investments" as for a date of 01.01.2004 and 31.12.2004 by RUR 155 296 thousand took place.

3. In our opinion except for the effect on the accounting reports of the matters referred to in the preceding paragraph, the accounting statements of the Company attached to this report have been properly prepared to present, in all material respects, the financial position of the Company as at 31 December 2004 and financial results of its operations for the period from 1 January up to 31 December 2004.

4. Without further qualifying our opinion, we draw attention to information stated in the explanatory notes to the accounting report , in part " Disclosure of major reporting data. Additional share capital".
On 01.01.2004 the amount of additional share capital was increased by RUR 2 200 161 million , and unappropriated balance was reduced by the same amount due to reflection in accordance with earlier standards in force, of the sum in the structure of the additional share capital of gratuitously received values and accumulation fund on the major assets putted into operation during the last periods.

Due to inventory-taking this mistake was corrected on 31.12.04.

"03" of march 2004.

Deputy General director Z.A. Khailo

1.3. Information on issuer's auditor

Full and brief trade name: ***Closed Joint stock company "BDO Unikon", JSC "BDO Unikon".***

JSC "BDO Unikon" was registered by the Ministry of RF for taxation inspectorate # 26 at South administrative district of Moscow.
Certificate of registration at the Unified state register of legal entities of 17.09.2003 series 77 № 006871546, primary state registration number 1037739271701.

Location*: 125 Varshavskoye highway, Moscow, Russia, 117545*
Tel.*: (095) 319-72-90, 319-56-90, 797-56-65;*
Fax*: (095)319-59-09, 797-56-60;*
E-mail address*: reception@bdo.ru*

Information on the auditor's licenses:
License number*: E 000547 for accomplishment of auditing*
Date of issue: *25.06.2002*
Period of validity*: until 24.06.2007*
License issuing body*: Ministry of Finance of the Russian Federation.*

JSC "BDO Unikon" carried out auditing of summary accounting of JSC ""Kuzbassenergo" for year 2003. Auditing was carried out in accordance with FS of 07.08.2001 . № 119-FS "On auditing" and federal rules (standards) of auditing activity approved by the resolution of RF Government of 23.09.2002 № 696 (in redaction of following modifications and addenda), other standard acts regulating auditing activity, as well as the company's internal standards and methods of auditing.

Issuer's auditor selection procedure:
In accordance with article 10 of the Statute of the Company auditors candidature is approved by the General meeting of shareholders of the Company.

The Federal law "On joint stock companies" does not specify the date and the procedure of nomination of a candidate of an auditor for including him/her into the list of voting on the issue of approval of the Company's auditor, neither does the abovementioned law provide shareholders the right to nominate a candidature for an auditor.

In tits connection the candidature of an auditor for set approval at the annual general meeting of shareholders at the outcome of year 2003 was determined by the Board of directors of the Company in the framework of determination of issues of preparation and holding an annual general meeting of shareholders of the Company.

The auditor is independent from the Issuer.
The factors of independency of the auditor: According to article 12 of Federal law "On auditing" № 119-FL of 07.02.2001 the auditing may not be carried out by:

1) ***auditors being founders (participants) of the audited entities, their managers, accountants or other persons bearing responsibility for the company and for the accounting, for working out financial (accounting) reports;***
2) ***auditors closely related (parents, spouses, brothers, sisters, children, or spouse's brothers, sisters, parents and children) to the founders (participants) of the audited entities, their functionaries, accountants or other persons bearing responsibility for the company and for the accounting, for working out financial (accounting) reports;***
3) ***auditing organizations managers or other functionaries of which are founders (participants) of the audited entities, their functionaries, accountants or other persons bearing responsibility for the organization and accounting and drawing up financial (accounting) reports;***

4) ***auditing organizations managers or other functionaries of which are closely related (parents, spouses, brothers, sisters, children or spouse's brothers, sisters, parents or children) to the founders (participants) of the audited entities, their functionaries, accountants and other persons bearing responsibility for the organization and for accounting and making up financial (accounting) reports;***
5) ***auditing organizations in respect of the audited entities being their founders (participants)m with respect of the audited entities being the audited entities' founders (participants);, with respect of the fellow subsidiary, branch offices and representatives of the specified audited entities, and with respect of organizations having common founders (participants) with the abovementioned auditing organization;***
6) ***auditing organizations and individual auditors who provided auditing services, services of accounting data recovery or accounting services, as well as services of making up financial (accounting) reports for natural persons or legal entities within the preceding three years before the auditing procedure, with respect of these entities.***

There are no material interests between the auditor (auditor's functionaries) and the issuer (issuer's functionaries).

There is no market share of the auditor in the issuer's capital.

The issuer did not provide the auditor with any borrowed funds.

There are no close business interrelations or relationship.

The issuer's functionaries are not the auditor's functionaries..

The amount of payment for the Auditor's services is determined by the Board of directors of the Company, there are no deferred payment or late payment for the services earlier provided by the auditor.

The auditor of the Company carries out auditing of financial and economic activity of the Company in accordance with the requirements of the legislation of the Russian Federation and on the basis of the contract signed by him/her.

In the upshot of revision of financial and economic activity of the Company the Auditor of the Company draws up a conclusion which must contain:
- ***confirmation of authenticity of the data contained in the Company's reports and other financial documents;***
- ***information of facts of violation of accounting procedure and provision of accounting determined by legal acts of the RF by the Company, or legal acts of the RF at carrying out financial and economic activity.***

1.4. Information on the issuer's estimator

Full and brief trade name: ***Closed joint stock company "ENPI Comsult" (JSC "ENPI Consult")..***
Location: ***14 Dukhovsky pereulok. Moscow, 115191.***
Telephone/fax: ***(095) 952-1041/(095) 954-4408.***
E-mail address: ***npg@npg.ru***

Information on the estimator's licenses:
License number: ***000031***
Date of issue: ***06.08.2001***

Period of validity: ***do 06.08.2007***
License issuing body: ***Ministry of Privity of the Russian Federation.***

Information on estimation services provided by the estimator:

Determination of replacement value of part of fixed assets as of 01.01.2000, provision of consulting services concerning issues of revaluation of part of fixed assets;

Determination of replacement value of part of fixed assets as of 01.01.2001, provision of consulting services concerning issues of revaluation of part of fixed assets;

Determination of replacement value of part of fixed assets as of 01.01.2002, provision of consulting services concerning issues of revaluation of part of fixed assets;

Determination of overall replacement value of part of fixed assets as of 01.01.2003, provision of consulting services concerning issues of revaluation of part of fixed assets of the organization in accordance with the Regulation on accounting "Registration of fixed assets" (PBU 6/01).

Determination of overall replacement value of part of field assets registered on the books of JSC "Kuzbassenergo" as of 01.1.2001, provision of consulting services concerning issues of revaluation of fixed assets of the organization in accordance with Regulation on accounting "Registration of fixed assets" PBU # 6/01.

Calculation of overall replacement value of estimation objects was carried out on the basis of the Estimator's analysis of comprehensive inventory tables, accounting documentation and estimation order, information on technical characteristics of objects provided by JSC "Kuzbassenergo".

The estimation was carried out in accordance with FL # 135-FL of 29.07.1998 "On estimation activities in the Russian Federation", Estimation Standards which are obligatory by the subjects of estimation activities (Resolution of the Government of the RF #519 of 06.07.2001), basic principles stated in International Estimation Standards MSO1-MSO4, Standards of professional practice and the Code of Ethics of the Russian estimators' association.

Determination of overall replacement value of part of fixed assets as of 01.01.2005, provision of consulting services concerning issues of revaluation of fixed assets of the organization in accordance with the Regulation on accounting "Registration of fixed assets" PBU 6/01..

The estimator was not engaged by the issuer in emission of shares (in 1995).

1.5. Information on consultants of the issuer

Neither financial consultants nor other consultants working with securities were engaged in emission of securities by the issuer.

1.6. Information on other persons who signed the quarterly report

Chief accountant – ***Alevtina Nikolaevna Ryumova.***
Telephone:(***384-2)29-33-58***
Fax: ***(384-2)29-37-77.***

II. Basic information on financial and economic status of the issuer

2.1. Indices of financial and economic activity of the issuer

Information is not provided for the present reported period.

2.2. Market capitalization of the issuer

Trading of the Issuer's equities is carried out at the following grounds:
Full and brief names of trade organizators: ***Non-commercial partnership "RTS Stock Exchange", NP "RTS Stock Exchange";***
Closed joint stock company "Moscow Interbank Currency Exchange", Closed joint stock "MMVB";
Non-commercial partnership Stock Exchange "Saint Petersburg", NP Stock Exchange Saint Petersburg".

Non-commercial partmership "RTS Stock Exchange" : ***JSC's "Kuzbassenergo" equity is traded in the system "Classic market of shares". Equities as of 23.06.1997 were included in the list "RTS-2", excluded from the list "RTS-2" on 04.01.2000 and included in the list "Classic market of shares".***

Market capitalization in the end of 1999 is calculated upon 10 major deals carried out through RTS within the 3 last months of 1999 and equals 52 002 792 USD.

Market capitalization in the end of 2000 is calculated upon 10 major deals carried out through RTS in December of 2000 and equals 49 438 720 USD.

Market capitalization in the end of 2001 is calculated upon 10 major deals carried out through RTS within the last 3 months of 2001 and equals 72 460 821 USD.

In 2002 129 bargains were made through RTS, including 3 bargains in December, 6 bargains for the last 3 months, thus the calculation of market capitalization of the issuer in 2002 is done at the price of share purchase at RTS stock exchange as of 31.12.2002 (0,19 $ x 606163800= 115 171 122 $).

For the period from 01.10.2003 to 31.12.2003 one bargain was registered at RTS stock exchange with the volume of trade of 5000 shares or 2500 USD.

At "Saint Petersburg" stock exchange 3 bargains with the volume of trade of 23400 shares or 11712,56 $ were registered.

In view of less than 10 bargains of JSC's "Kuzbassenergo" equities having taken place at market exchange for the reported period, the calculation of market capitalization of the issuer is carried out at the price of purchase of shares at RTS stock exchange as of 31.12.2003. Thus, market capitalization of the issuer in 2003 equals 0,48 $ x 606163800 = 290 958 624 $.

In the 4th quarter of 2004 6 bargains with total volume of 203 200 shares or 137 570 USD were carried out through RTS stock exchange, including 4 bargains in December. Thus, market capitalization for the 4th quarter of 2004 is calculated at the price of purchase as of December, 31st: 0,68100 $ x 606 163 800 = 412 797 548 $.

2.3. Issuer's liabilities

2.3.1. Accounts payable

Information is not provided in the present reported period..

2.3.2. Credit history of the issuer

Title of characteristics	As of 31.12.2004.(live data)
Value of net wealth at the end of the reported period, RUR	24 664 360 000
Borrowed funds, total, RUR.	2 445 505 000
Share of borrowed funds in the value of net wealth, %	9,92

JSC Kuzbassenergo" does not have any credit agreements, contracts of debt, the sum of primary debt for which amounts to 10 or more per cent of the value of net wealth.

JSC's "Kuzbassenergo" credit policy is directed towards attraction of credit resources at the most profitable terms of crediting, for the reduction of interest rate for use of credit resources. Borrowed funds are attracted by the Company at an interest rate which is lower than the rate of refinancing determined by RF Central Bank.

The Board of Directors approved the Regulation of credit policy of the Company at the meeting on December 28th, 2004. The given Regulation determines the procedure of fixing the Limits of Debtor's position and the Limit on Cost parameters of borrowing, the procedure of control for their observance, as well as arrangements for bringing the Debtor's position in correspondence with the determined Limits in case of their overdrawing aimed at provision of financial stability and minimization of risk of insolvency of the Company.

2.3.3. Issuer's liabilities on securities provided to third persons

No bargains for securing liabilities for third persons were carried out by the issuer or the reported period.

2.3.4. Other liabilities of the issuer

Agreements, including bargains on term, which are not shown in the balance sheet and may substantially influence the financial state of the issuer, its liquidity, sources of financing and terms of its use, outcomes of activities and expenditures are lacking.

2.4. Purpose of the emission and assignment of draft on funds received as a result of distribution of emissive securities

No emissions with the purpose of attraction of funds by means of floatation of securities were carried out by the issuer in the reported period.

From the moment of state registration of the company two emissions of securities meeting the following requirements were carried out by the issuer:

A report on the outcomes of issue was registered.

2.5. Risks concerned with acquisition of distributed emissive securities

2.5.1. Sectoral risks

Due to territorial specifics JSC's "Kuzbassenergo" activity is carried out only at Russian home market.

For JSC "Kuzbassenergo" reformation of JSC RAO "UES of Russia" in general and regional AO-energo

of which the issuer is part, in particular, are the most significant changes in the sector of power industry. Expectations of participants of exchange market are connected with the course of reformation of the electric power market. New connected with the schedules of auctions of wholesale generating companies, principles of creation and configuration of territorial generating companies also influence the price of shares of power supply systems. JSC RAO "UES of Russia"'s shares at RTS's Classic market became were in the lead at sales and equaled - 25,86 %of overall volume of auction.

Besides, the following factors may influence the issuer's activity:

- The possibility of appearance of large-scale consumers of electric power as of FOREM estimation. Nowadays two segments of electric power market are functioning in the country: Federal wholesale market of electrical energy and power (FOREM), divided into three isolated price zones: European, Siberian and Far Eastern, and a sector of free trade "5-15" of wholesale market of electric power. The activity of the first segment is strictly regulated by the Federal energy commission of Russia (FEK), the second one was put into operation on November 1st 2003 as an intermediate stage between the regulated market and the competitive market. In contrast to FOREM tits is a brand new sector of power trade functioning on the principles of competitiveness and free piece formation. Nowadays only subjects located in the Western part of Russia may participate in it. Starting at 2000 JSC "Kuzbassenergo" regularly participates in auctions (buying) of over and above the plan electric power at FOREM. There is only one reason for that – economic expediency: participation in auctions allows to optimize the balance of electrical energy and power, thus reducing the prime cost of manufacture of own electric power.

Large consumers' (JSC "Novokuznetsk aluminium plant" and "Metallenergofinance" Ltd.) switch to FOREM put the company before difficulties. Only NKAP provided the energy system with about 17% of payload supply of electric energy. As a result of withdrawal of these companies the power supply company started getting drop out incomings. The possible mechanism of compensation of these drop out incomings is now scrutinized at the level of the Ministry of economic development of the RF and it is not certain that it will be passed by the RF Government.

- The change of structure of energy consumption by groups of consumers from the planned by means of cutting down the volume of production of a number of manufacturing enterprises may lead to reduction of volume of energy outlet in terms of money.

- Bankruptcy of enterprises may lead to impossibility of collecting debts for the consumed energy.

- Decline of standard of living of not sufficiently provided layers of population of Kemerovo region will inevitably lead to lowering of level of payment of tits category of consumers..

- Untimely and in corpore remuneration of sums for the provided benefits to citizens in accordance with the Government's decrees..

- Risks concerned with the change of tariff policy for heat and electric power which may negatively influence the financial and economic status of the issuer. It is legally adopted that the change of tariffs for power is only possible once a year, at that factual level of inflation for the year may exceed the planned one which was taken into consideration at tariff determination, thus, tits will lead to drop out incomings for the issuer.

2.5.2. Country and region dependent risks

Imperfection on legislative base regulating economic relations and lack of efficiency of judicial system, as well as ever changing tax legislation, etc. may be referred to the main factors of rise of political and economic risks.

The companies may not be fully dependent on the political situation in the society, they have to be ready to take political risks. One ought to understand that nowadays oligarchic groups are a play for high stakes in politics and great political risks.

This conflict indirectly influences some financial indicators and they inevitably influence the rate of rouble-dollar exchange, and Russian securities. From the point of view of analytical approach we may underline that the conflict leads to decrease of investments, some quotations, to rise of distrust of investors to rouble zone. These indirect actions perforce influence the manufacturers.

Thus, for example, on December 14, 2004 as a result of intensive asserts of taxation claims to cellular communications operators – Vympelcom and Megafon - RTS's index dropped by 8,5 % and closed at the rate of 545 points which was less than the level of the beginning of the year. Leaders of downfall were shares of oil companies (8-9%), Rostelecom (10%) and Norilsk Nickel (19%), surpassing the yearly minimum. Even the most stable shares of Sberbank and Gasprom didn't manage to keep their positions and lowered by 8 and 9% consequently. Thus, UKOS was not the only company exposed to power pressing of state officials, while the outlined tendency abruptly decreases the investment attractiveness of Russia and shows the presence of substantial political risks for holders of shares of Russian companies which influenced their cost right away.

Economic factors in overwhelming majority are above the Issuer's Control. It nay not be guaranteed that the recent tendencies of the Russian economy, including growth of GDP, the relative stability of rouble and reduction of rate of inflation will be preserved. Besides, fluctuation of world-wide prices for oil and gas, strengthening of rouble against US dollar in real terms, and the consequences of weakening of monetary and credit policy, as well as other factors may negatively influence Russian economy and the Issuer's business in future.

Russian economy is not protected against market recessions and deceleration of economic development of other countries of the world. As it already happened in the past, financial problems or acute perception of risks of investments in countries with developing economy may reduce the volume of foreign investments in Russia and negatively influence on Russian economy.

Ecological factors are inseparably linked with the main type of activities of the issuer, because the production process, transfer and dissemination of heat and electric energy requires consumption of a large number of natural resources and thus conditions pollution of environment. For elimination of ecological factors of risk considerate capital investments are needed for purchase of nature-conservative equipment and payments for consumption of natural resources.

There are regional risks connected with reformation of JSC "Kuzbassenergo". With the purpose of reduction of risks the management of JSC "Kuzbassenergo" carries out proactive consultations with the management of regional administration and municipal administrations on the issues of reformation of the Company. The necessity of such actions are caused by existence of Decrees of Kemerovo Regional Administration # 49 of 28.03.203 "On reformation of JSC "Kuzbassenergo"" and u # 49 of 28.03.2003 "On the plan of reformation of JSC "Kuzbassenergo" and social protection of the workers of power industry of Kemerovo Region", which make provision for setting up claims and requirements for concordance of the project from the side of regional authorities to the management of the Company.

On September 20, 2004 a tripartite agreement which, among others, regulates the issues of further realization of the program of reformation of JSC "Kuzbassenergo" was signed between JSC RAO "UES of Russia", JSC "Kuzbassenergo" and Kemerovo Regional Administration. By the terms of the agreement the Administration of the Region will contribute to the process of reformation of the energy supplying company, in particular, it will assist the allotment of the company from the membership of the selling, management, electricity supply and heat supply companies.

The risks connected with geographical peculiarities of the region, namely:

- ***The risk of damnification from force majeure situations of natural character: danger of floods in flood***

periods, earthquakes on the territory of Kemerovo Region.

The risk of open war conflict, as well as the risk of introduction of state of emergency is estimated as minimum possible at the regional level because ethnical and social tension in the region is not of critical nature. Nevertheless, there is risk of terrorist acts for minimization of which security measures at vitally important objects of JSC "Kuzbassenergo" were considerably toughened. Electric power stations, large electric substations, pump objects, storage facilities, POIs and other categorical objects were taken under special control.

Admission regime for motor transport and personnel, including use of manual and stationary metal finders was established. Artificial barriers prohibiting from unsanctioned passage of motor transport to the territory of the enterprises were erected. Parking lots were carried over to safe distance from the fence of power engineering objects, interaction of the custodial service of JSC "Kuzbassenergo" with sub-units of State Motor Vehicle Inspectorate, internal affairs board and the Ministry of extraordinary situations was made more active. At the most important and the most remote objects of the enterprises of power supply system twenty-four-hour video surveillance and patrol was organized.
Plan of activities on strengthening technical fortification of objects of power industry for the year of 2005. Sources and volumes of financing amounting at almost 40 million RUR were allotted. .

2.5.3. Financial risks

As regards to the cost of banking credits attracted the issuer is subject to risks connected with change of interest rates. The given group of risks as a factor of reduction of liquidity does not exist for the issue, because the average weighted rate on them is lower than the rates of refinancing. The situation is similar as far as inflation is concerned.

In the sphere of price formation for JSC "Kuzbassenergo" there is risk of price fixing by the Regional energy commission of Kemerovo region, which will not cover the production costs and drop out expenses and drop out incomings in connection with the reduction of the volume of earnings. The Regional energy commission determined the average tariff for electric energy at the level of 65,8 kopecks per kilowatt per hour, tariff for heat energy – 310 RUR per gigacalorie. Tits corresponds to the utmost level of growth determined by the Federal tariff service, for electric power – 12, 2% and for heat energy – 10,8%.
At the same time expenses for purchase of fuel amounting to 300-400 million RUR were not included into the tariff base. The Regional energy commission took into account the growth of salary of power engineering specialists at the level of inflation coefficient, but did not consider the growth of salaries of workers in Kemerovo region. The Regional energy commission did not take into account maintenance expenses for the year 2005 amounting to approximately 300 million RUR. Expenses for insurance of power supply companies were not fully considered, as a result production funds may only be insured for less than half a year, the rest of the calendar time tits type of financial protection of property from unexpected circumstances will not be in effect.

Risks concerning the possible change of prices for raw materials, fuel, services may also be considered as risks of current financial and economic activities, they may negatively influence the prime cost of products and services of the Company.

The issuer does not take currency risks.

There are financial risks connected with the future reformation of the issuer (reorganization through allotment):
- growth of expenditures connected with remuneration of expenditures for state registration of rights of

immovables, for attracting consultants, for valuation of property and property rights, for realization of Compensation program for disengaged (fired) employees at reformation and reorganization, for foundation of maintenance and service enterprises, etc. The approximate amount of expenditures for reformation in accordance with the business plan for year 2004 equals 118 035 thousand RUR ;

- the risk of putting in claims for pre-term payment of accounts payable, discharge of duties and remuneration of losses at reorganization by creditors of JSC "Kuzbassenergo" accepting notification on the taken decision on reorganization. Creditors of restructured long term liabilities: JSC RAO "UES of Russia", MNS, Off-budget funds may act as initiators. The approximate amount of restructured liabilities possible for claiming equals 3014,4 million RUR ;

- the risk of putting in claims of redemption of all or part of shares of the issuer by the shareholders who voted against reorganization or who did not participate in voting.

2.5.4. Legal risks

There exist legal risks connected with the change of currency regulation, change of tax legislation, change of customs supervision and customs duties, change of requirements for licensing, change of court practice, which may negatively influence the results of activities of the issue, as well as the results of current legal procedures in which the issuer participated.

- The change of tax legislation as far as growth of tax rates and change of the procedure and the terms of calculation and payment of taxes are concerned, may lead to reduction of net profit of the issuer, which in its turn will lead to the reduction of the amount of dividends paid.

- The change of requirements for licensing of main activities of the issuer may lead to increase of the period of time for preparation of documents necessary for prolongation of license, as well as the necessity of compliance of the issuer with the determined requirements. Nevertheless, as a whole, the given risk should be regarded as insignificant besides the cases when for license prolongation or for carrying out activities subject to licensing the requirements to which the issuer will not comply or the compliance to which will be connected with extraordinary expenditures will be determined, which may lead to termination of tits activity by the issuer.

- Changes of legal procedure on the issues connected with issuer's activities which may negatively influence the outcomes of its activities for the reported period did not take place..

The issuer is subject to risks connected with the change of state regulation of power rate. Since 2002 RF Government determined the maximum level of tariffs or the utmost level of growth of tariffs and for each region the Federal energy commission calculates and determines on an individual basis. Based on information provided by the state committee for statistics in 2002 the utmost level of tariffs amounted to 35% and the factual growth – to 27% and to 24%- based on information of Federal energy commission. For year 2993 the maximum levels of growth of tariffs for electric energy were set at the amount of 14% (including 19% - the tariffs of the Federal wholesale market for energy and power). By estimate of FEC, in 2004 the growth of the average tariff considering influence of federal and regional factors should have amounted to 11,1%, yet, after the open hearings with participation of regional energy commissions and AO- energo the forecasted growth of the average maximum tariff for electric power in Russia was corrected to 13,1%.

On August 27, 2004 the Federal tariff service with participation of representatives of the Regional energy commissions at its concluding meeting in Moscow examined the maximum tariff levels for years 2005-2006. Starting with year 2005 the tariffs for energy producers are set in U-clams regime: a minimum and a maximum level is determined for each region.

2.5.5. Risks connected with the issuer's activity

There are no risks connected with the issuer's activity, namely, current legal procedures in which the issuer participates (suits on liquidation of the company, alienation of the company's assets, impugnment

of rights of licenses, dispute of patent, collection of debts into the budget and into off-budget funds of considerable amounts, etc.), and the possible liability of the issuer for the debts of third persons.

Three associated companies were declared insolvent, bankruptcy proceedings were opened in closed JSC "Supervolokno" and JSC "Andreevskoye", and external control for 12 months was introduced at JSC "Kuzbasshydroenergostroy".

III. In-depth information on the issuer

3.1. Creation and development history of the issuer

3.1.1. Information on trade name of the issuer

Full and brief trade name of the issuer:
Kuzbass joint stock company for energy and electrification
(JSC "Kuzbassenergo").

3.1.2. Information on state registration of the issuer

Date of state registration of the issuer***: 30.12.1993***
Number of certificate of state registration (other document certifying state registration of the issuer: ***1901***
Body which carried out state registration: Kemerovo City Administration
In accordance with the Federal law "On state registration of legal entities" on July 2002 a record on state registration with main state registration number 1024200678260 (certificate: series 42 #001926135, issued by the Inspectorate of the Ministry of taxation of the Russian Federation at Kemerovo ciry of Kemerovo Region) was made in the Unified state register of legal entities.

3.1.3. Information on creation and development of the issuer

Kuzbass joint stock company for energy and electrification (JSC "Kuzbassenergo") was founded in accordance with Decrees of the President of the Russian Federation of August 14, 1992 # 922 "On peculiarities of reorganization of state enterprises, associations and organizations of fuel and energy complex into stockholders associations", of August 15, 1992 # 923 "On organization of management of energy and power supply complex of the Russian Federation in privatization environment", of November 05, 1992 # 1334 "On realization of the Decree of the President of the Russian Federation "On peculiarities of reorganization of state enterprises, associations and organizations of fuel and energy complex into stockholders associations" of August 14, 1992 in fuel and power complex. The company is the assignee of Kuzbass industrial association for energy and electrification - IAEaE "Kuzbassenergo".

The common purpose of creation of privatized enterprises was increase of efficiency of the economic system of the state and transfer from the planned economy to market relations.

JSC "Kuzbassenergo" was created for an uncertain time period.
Major goal of JSC's "Kuzbassenergo" activity is profit earning.
With the purpose of earning profit the Company has a right to carry out any types of activities which are not prohibited by law, including:

- ***Supplying (selling) of electric and heat power at the determined tariffs in accordance with the***

schedule of dispatching of electric and heat loads;

- *Obtaining (purchasing) of electric power from the wholesale market of electric energy (power);*
- *Obtaining (purchasing) of heat and electric power from producers;*
- *Production of electric and heat power;*
- *Transfer of electric and heat power;*
- *Dispatching management and following the regiments of energy saving and energy supplies;*
- *Provision on use of power equipment in accordance with current normative requirements, carrying out timely and qualitative maintenance of the equipment, technical re-equipment and reconstruction of energy objects, as well as development of power supply system;*
- *Use of power supply objects which are not registered on the books of the Company in accordance with the agreements with the owners of these power supply objects;*
- *Thorough repairs, technical re-equipment, reconstruction and development of regional power supply system;*
- *Mounting, debugging and repair of power supply objects, of fuel and energy power equipment and heat and energy power equipment;*
- *Use, mounting, repair of boilers and vessels working under pressure, pipelines for steam and hot water;*
- *creation and settling of new technique and technologies providing efficiency, safety and ecological compatibility of work of industrial objects of the Company, creation of conditions for the development of power supply complex as a whole, realization of branch scientific and technical and innovation programs, formation of sectoral funds of NIOKR;*
- *Provision of services of selling energy to energy saving organizations;*
- *Provision of services on collection of funds from citizens for the communal services provided;*
- *Provision of capacity for work of electric and heat networks;*
- *Activities aimed at use of electric networks;*
- *Activities aimed at use of heat networks;*
- *Engineering surveying for building and erection construction of 1st and 2nd level of responsibility in accordance with the state standard;*
- *Designing buildings and erections of 1st and 2nd level of responsibility in accordance with the state standard;*
- *Construction of buildings an erections of 1st and 2nd levels of responsibility in accordance with the state standard;*
- *Conveyance of passengers by motor transport;*
- *Conveyance of goods by motor transport;*
- *Conveyance of goods by railroad;*
- *Medical activities, including sanatoria and health resorts services;*
- *Development of communication networks and provision of communication services including electrical communication;*
- *Educational activities;*
- *Foreign-economic activities;*
- *Use of natural resources;*
- *Storage of oil and oil products;*
- *Exploitation of highly explosive manufacturing entities;*
- *Exploitation of fire-hazardous manufacturing entities;*
- *Exploitation of chemically dangerous manufacturing entities;*
- *Prospecting and mining operations necessary for carrying out construction and production of construction materials;*
- *Carrying out radiographic works with use of equipment containing radioactive components;*
- *Carrying out works on onstream maintenance of equipment and devices containing radioactive components and radioactive-component- based articles;*
- *Carrying out supervision of radiation environment;*
- *Transfer of packing materials containing radioactive components and radioactive-component-*

based articles;

- ***Storage of radioactive sources, devices and apparatuses;***
- ***Exploitation and maintenance of State technical supervision industrial entities;***
- ***Activities of hazwaste handling;***
- ***Protective activities solely within the interests of proper safety within the framework of the created Security of the Company, which is guided by the Law of the RF "On private detective and protective activities in the Russian Federation" and the legislation of the Russian Federation;***
- ***Organization and carrying out defense activities on the issues of preparedness activities, civil defense, situations of extraordinary character and protection of information treated as State secrets in accordance with the legislation of the Russian Federation;***
- ***Other types of activities which are not prohibited by the legislation of the Russian Federation.***

JSC "Kuzbassenergo" is one of the largest energy supply systems within the Holding JSC RAO "UES of Russia", the Company's energy supply complex is the sixth largest by installed capacity and fifth – by the volume of energy supplied to customers. The share of generation of electrical energy by electric power stations of "Kuzbassenergo" exceeded 30% in the balance of OEC of Siberia.

Eight thermal electrical power stations are functioning within the structure of the power supply system. Their overall installed capability – 4667 megawatt, thermal power – 6700,5 gigacalories per hour. Yearly electricity generation – 26-28 billion kilowatt per hour. Yearly thermal energy output – 15-20 million gigacalories.

Four enterprises of electric network system carrying out reception, transfer and dissemination of electric power work within the power supply system. 4601 substations with total installed capacity of 12984 thousand kilowatt are registered on the books of these enterprises. The extension of network system through electric circuit equals 31117 kilometers.

There are seven heat energy districts and a water-heating boiler house providing consumers with thermal energy under the jurisdiction of the Administration department of heat network. The extension of heat network with diameter of up to 1200 millimeters equals 485 kilometers. Since 1994 the first information-measuring complex in Russia providing thermometry, remote signaling, telecontrol and commercial registration of heat supply to consumers functioning in the Administration department of heat network.

Energy distribution is carried out by an branch office named "Energosbyt" which has got more than 4000 agreements with consumers for power supply.

An optical fiber communication line with extension of more than 400 kilometers constructed by JSC "Kuzbassenergo" was one of the first ones built in Siberia. The line connected branch offices into one digital network of data transfer.

The mission of the company is to provide uninterrupted and foolproof supply of heat and electric energy to our consumers by providing productive efficiency and attractiveness of the company for possible investors.

3.2. Principal economic activity of the issuer

3.2.1. Industrial affiliation of the issuer
All-Russian classifier of types of economic activities (OKVED):
40.10.11 – Production of electric power by heat electric power stations
40.10.2 – Transfer of electric power
40.30.2 – Transfer of steam and hot water (thermal energy)

51.56.4 – Wholesale trade of electric and heat power (without transfer and distribution)
74.60 – Carrying out investigations and provision of safety
74.14 – Consulting on issues of commercial activity and management.

3.2.2. Principal economic activity of the issuer

Production, transfer and distribution of electric and heat energy are main types of JSC's "Kuzbassenergo" activity.
JSC "Kuzbassenergo" is subject of natural monopoly carrying out its activity in the sphere of electric and heat energy transfer services on the territory of Kemerovo Region.

No information is provided for the reported period.

3.2.3. Main types of production (works, services)

JSC's "Kuzbassenergo" main types of produce are electric and hear energy. Tariffs for electric and heat energy and approved by the Regional energy commission once a year in accordance with Federal law of 14.04.1995 #41-FL.

No information is provided for the reported period.

3.2.4. Issuer's suppliers accomplishing 10 or more per cent of all supplies of inventory holdings, with indication of their share in overall supply capacity

No information is provided for the reported period.

3.2.5. Markets of issuer's production (works, services)

Power industry is almost the only field whose produce and services are consumed by all branches of industry and household sector. In Russia there are two markets for selling electric energy: wholesale and retail markets. Selling of heat energy only takes place in retail market.
The main market at which JSC "Kuzbassenergo" carries out its activity is Kemerovo region. Kemerovo region is geographically situated at South-East of Western Siberia and is located at the border of West-Siberian plain and mountains of South Siberia. It is almost equidistant from both eastern and western borders of the Russian Federation. Kemerovo region is situated in the sixth time zone.
Territory of servicing equals 95500 square kilometers, population of the region – 3086 thousand persons. Supply of electric energy to consumers is carried out in accordance with concluded "Treaties for supply and use of electric energy". The composition of purchasers of electric energy and heat energy at retail market is demonstrated at a table below by the example of structure of supply of electric and heat energy.

Structure of supply of electric and heat energy by branch in natural terms for the 4th quarter of 2004:

	Electric energy		Thermal energy	
	Payload distribution to own consumers, Thousands of kilowatt per hour	Specific gravity, %	Payload distribution to own consumers, Gigacalories	Specific gravity, %
Total for power supply system:	**6046460**	**100,0**	**4490196**	**100,0**
1. Industry	4078118	67,4	1338164	29,8

1.1. Fuel	1420007	23,5	14430	0,3
1.2. Ferrous metallurgy	2057692	34,0	472132	10,5
1.3. Non-ferrous metallurgy	10681	0,2	59348	1,3
1.4. Chemistry and petrochemistry	359629	5,9	616225	13,7
1.5. Mechanical engineering and metallurgy	71377	1,2	71933	1,6
1.6. Woodworking and pulp and paper industry	1689	0,0	1395	0,0
1.7. Industrial hardware	95990	1,6	24352	0,5
1.8. Light industry	7472	0,1	12918	0,3
1.9. Food industry	24376	0,4	10261	0,2
1.10. Other types of commercial production	29205	0,5	55170	1,2
2. Agriculture	70086	1,2	64079	1,4
3. Forestry	511	0,0	365	0,0
4. Transport and communication	419623	6,9	48170	1,1
5. Construction	13600	0,2	23507	0,5
6. Housing and communal services	125822	2,1	2726470	60,7
7. Population	51691	0,9	3552	0,1
8. Other fields	1287009	21,3	285889	6,4

As seen from the table above industrial enterprises are the largest consumers of electric energy at retail market (their share equals 67,4%).

In the structure of heat energy delivery enterprises of housing and communal servicing (60,7% of consumption) and industry (29,8%) are in the lead. In the context of industry leading consumers of thermal energy are enterprises of chemistry and petrochemistry.

\The main consumers of JSC "Kuzbassenergo" produce the turnover of which amounts to not less than 10% of overall proceeds from selling of produce for the 4th quarter of 2004 are:

Name of consumer	Location	Share in overall volume of selling, %
Electric energy consumers: Closed JSC "Metallenergofinance"	Kemerovo region, Novokuznetsk	21,0
Thermal energy consumers: Novokuznetsk city Administration	Kemerovo region, Novokuznetsk	21,0
KJSC "AZOT"	Kemerovo	16,0
JSC "ZSMK" (West Siberian Metallurgical Plant)	Novokuznetsk	13,0
Kemerovo city Administration	Kemerovo	27,0

Factors which may negatively influence issuer's marketing of its production (works, services) and possible actions of the issuer aimed at reduction of such influence:

- Outlet of enterprises to the Federal wholesale market of electric energy (power) (FOREM) may negatively influence marketing of produce. Among the enterprises which may go out to FOREM are: West-Siberian Railroad – branch office of Russian Railroad, Closed JSC "Coal Company Sokolovskaya", DHK KRU JSC "Belovskoye Energoupravleniye (Energy management"), JSC "Energoupravleniye (Energy management) Leninskugol", JSC "Electric networks" of the town of Kiselyovsk, JSC

"Prokopievskenergo", KJSC "AZOT", Closed JSC "Topkicement", JSC "Manufacturing association Himprom", Manufacturing association "Himvolokno Amtel-Kuzbass", Krasnoyarsk Railroad. The drop out incomings from outlet of the abovementioned consumers to FOREM in current tariffs equal about 6,5 billion RUR per year. Nowadays with the purpose of retention of consumers no transit agreements are signed, thus the issue of cross financing is not regulated.

- Another factor of reduction of consumption of thermal energy, for example, is high temperature of external air during the heating period. Besides, in connection with implementation of energy saving technologies and launching of boiler houses by the enterprises, reduction of thermal energy takes place. JSC "Kuzbassenergo" can not influence these factors.

- Lack of allotted limits and untimely remuneration of expenditures on payment for thermal and electric energy by budget consumers may also influence marketing. Financing agreements for the consumed energy between Kemerovo Region Authorities , Main Financial Department of the Region, Heads of towns and districts of the Region and JSC "Kuzbassenergo" are signed with budget consumers every month. Meetings on observance of the abovementioned agreements with compulsory presence of Heads of towns and districts of the Region, Heads of territorial financial bodies, heads of enterprises of housing and communal servicing and town power supply network are held at Kemerovo Region Administration.

3.2.6. Practicing activities in the case of working capital and inventory

Under the working capital floating assets (second sector of assets of balance sheet) are meant.
As far as working capital is concerned the Company's policy is aimed at provision of acceptable volume and structure of floating assets with the purpose of liquidity of assets. For the purpose of reduction of accounts receivable work with purchasers and customers is carried out, payable accounts are taken control of, work on collecting late accounts receivable are implemented.

With the purpose of increasing the efficiency of use of floating assets, perfection of resource management, provision of uninterrupted production process at minimal amount of funds of JSC "Kuzbassenergo" uses the method of regulation of floating assets.
The norm of floating assets at JSC "Kuzbassenergo" is determined on the basis of calculations made by branch offices for a number of years and is reviewed in connection to change of manufacturing environment.

For the purpose of control of the amount of inventory, the duration of circulation and turnover the following coefficients are calculated at drawing up reports:.
- coefficient of turnover of inventory (K);
- duration of circulation (D cir).

Coefficient of turnover of inventory reflects the speed of inventory marketing. It is calculated in accordance with the formula = Prime cost of produce marketed/Average amount of inventory (K = form # 2 p.020/form # 1 (p.210 for the beginning of the reported period= p. 210 for the end of the reported period)*0,5).

Duration of circulation in days is calculated as quotient in division of a number of days by coefficient of turnover of inventory.
For the 4th quarter of 2004; K = 3,1 of turnover, D cir = 29 days.

3.2.7. Raw materials

The main type of raw materials used by JSC "Kuzbassenergo" is fuel. As a main type of fuel Kouznetsk coals and wastes of coal beneficiation are used at JSC "Kuzbassenergo" electric power stations.

Reduced fuel oil is used as starting fuel and for maintenance of burning at firing coal of low quality, while at Zaiskitimskaya water-heating boiler house reduced fuel oil is the main type of fuel used..

Fuel p

rice change analysis

Types of fuel	Units	Наименование поставщика	3rd quarter of 2004		4th quarter of 2004	
			Purchase amount in natural terms	Purchasing price per unit of produce with VAT and quality	Purchase amount in natural terms	Purchasing price per unit of produce with VAT and quality
Mazut	Thousands of tons	Closed JSC "Firm "Rigeiro" (Moscow)	8,1	3950,00	9,7	2985,00
Gas	Millions of cubic meters	SIBUR (Moscow)	257,9	930,05	114,36	1152,15
Coal	Thousands of tons	Firm "Sibirskiy Ugol" (Siberian Coal)	1334,00	455,3	1419,67	442,8
		JSC "SUEK"	860,20	488,2	1124,13	471,5
		JSC «Coal Company "Yuzhjkuzbassugol"	128,20	374,7	212,01	418,4
		FPG "Prokopievskugol"	64,5	344,7	-	-
		Coal Company "Yuzhniy Kuzbass"	-	-	10,1	487,4
		JSC "Tchernigovets"	-	-	78,0	493,3
		"OUK" Ltd. (Moscow)	-	-	81,4	389,1
		Other	231,1	358,5	302,5	404,7

Prices for coal remain at previous level.

As of January 1, 2005 in stock of eight power supply stations of the regional power supply system availability of coal was equaled 1 million 446,5 thousand tons, which is 304,5 thousand tons more than was assigned by JSC RAO "UES of Russia".

Mazut resources also correspond to the plan. As of January 1, 2005 total volume of mazut at electric power stations and at Zaiskitimskaya water-heating boiler house equaled 20,7 thousand tons, while 20 thousand tons was assigned by JSC RAO "UES of Russia".

Nevertheless, power engineering specialists have serious remarks on quality of fuel supplied by closed JSC "Tchernigovets" to Kemerovskaya GRES, Novo-Kemerovskaya TETs and West-Siberian TETs. Notwithstanding the responsibilities taken tits coal production enterprise delivers adfreezed coal humidity of which equals 21% with admixture of sludge and clay for the needs of the power supply system. Tits created additional difficulties of unloading railway cars, thus extending the time of their idle time. Low quality of coal negatively influences technological functioning of main equipment of electric power stations: operating efficiency of steam generating units comes down, the level of ash-and-slad wastes and harmful atmospheric emissions rises.

3.2.8. Main competitors

JSC "Kuzbassenergo" is subject of natural monopoly carrying out its activity in the sphere of electric and thermal energy transfer servicing on the territory of Kemerovo region.

The competitive environment of the Company in the region is represented by suppliers of electric power – FOREM subjects and newly established independent electric power network and supplying companies independently selling electrical energy to final consumers (JSC "Kuzbass electric power network company" consolidating 12 enterprises of city electric power network) Its main activity – transfer and trade of electrical energy to communal infrastructure. "Severo-Kuzbasskaya (North Kuzbass) energy company" to which municipal communal electric power networks of the city of Kemerovo and the town of Beryozovskiy were leased was created in Kemerovo.

The present process of establishment of independent power supply organizations on the basis of resellers possessing network infrastructure for monopolistic access to a number of consumers has negative consequences for JSC "Kuzbassenergo" as far as tariff formation is concerned. For wholesale resellers minimal tariffs for purchase of electric power form JSC "Kuzbassenergo" are determined; these tariffs do not cover the expenses of the Company for generation, thus, redistribution of financial resources to these companies takes place.

In Novokuznetsk "Metalleneregofinance" Ltd. Affiliated with "Eurazholding" Ltd. and Novokuznetsk and West Siberian metallurgical plants managed by them made direct agreements for electric power supply. "Metallenergofinance" Ltd. was registered as power supplying organizations and registered as "main consumer - reseller" for providing electric power supply to metallurgical plants. Beginning with the 4th quarter of 2003 "Metallenergofinance" Ltd. was registered by the Federal power supply commission and obtained the status of FOREM subject.

Since October 1st, 2003 JSC's "Kuzbassenergo" top consumer JSC "Novokuznetsk aluminium plant" (NKAZ) entered FOREM. With NKAZ's entering FOREM JSC "Kuzbassenergo" turned from the deficient power supply company to an excess one.

Name	*Volume of production sold in the 4th quarter of 2004, Thousands of kilowatt per hour*	*Market share, %*
JSC "Kuzbassenergo" - issuer	6046460	79,32
FOREM	1373468	18,02

3.4. Plans for future activities of the issuer.

The following tasks are set before JSC "Kuzbassenergo" in 2005.
The main aim of the Company in 2005 is provision of paying activity and profit earning, increase of market value (capitalization) and increase of attractiveness of shares for Russian and foreign investors.

The following are considered to be the main production goals of JSC "Kuzbassenergo" in 2005:
- provision of foolproof electric and thermal power supply to consumers in the region, especially in fall and winter periods of maximum loading;
- implementation of the repair program of power station equipment, electric and heating networks;
- realization of JSC RAO "UES of Russia" task on creation of fuel reserve in stocks;
- realization of investment program on capital investments.
The below mentioned are the priority tasks:

As far as financial rehabilitation is concerned the number of tasks are set before JSC "Kuzbassenergo" for 2005:

- ***Consequent realization of the program of shortening of expenses;***
- ***Consequent realization of the terms of amicable agreement with the Company's creditors as an important requirement of reconstruction;***
- ***Determination of economically sound tariffs for JSC "Kuzbassenergo";***
- ***Reduction of liabilities before the suppliers and the contractors;***
- ***Regulation of gap between bills payable and bills receivable;***

- ***Improvement of paying capacity and financial stability of the enterprise;***
- ***Provision of stable functioning and investment attractiveness of the company.***

As far as realization of the program of reformation is concerned the following tasks are set before JSC "Kuzbassenergo" for the year of 2005:

1. To complete the activities of the preparation stage before the reorganization, including:

- ***Settling apart and termination of participation in nonspecialized (service) types of activities, including transfer of housing fund to municipal property;***
- ***Implementation of the system of contract auctions and tenders;***
- ***Improvement of cadre, training of management personnel for work in the framework of power supply market.;***

2. To start realization of the project of reformation of the Company in accordance with the main tendencies of restructurization of power supply industry:

- ***Switch to the new organizational, production and management structure; gradual formation of JSC "Kuzbassenergo" as a management company;***
- ***Implementation of new forms and methods of corporative management in accordance with the new role of the Company and providing positive final financial result of the holding company's activity.***

Trends of future development of JSC ""Kuzbassenergo" as one of the enterprises of fuel and energy complex of the country are determined, firstly, by the Fuel and Energy strategy of Russia until 2020 approved by the Decree of the Government of the Russian Federation of August 28, 2003 # 1234-r.
In accordance with the abovementioned strategy JSC "Kuzbassenergo" should develop into a qualitatively new financially stable, economically efficient and dynamically upcoming company. In accordance with tits perspectives of the Company's development will in many respects depend on successful realization of the Project of reformation after it is approved by the shareholders. According to the project of reformation five independent joint-stock companies are planned to be created on the basis of the regional fuel and energy supply company, they are: "Energosbyt" (Energy supplying company), "Kuzbass regional electricity network company", "Main electric power network of "Kuzbassenergo" and two generating companies each of which will be composed by four Kuzbass electric power stations.

3.5. Participation of the issuer in industrial, banking and financial groups, holding companies, concerns and associations

JSC "Kuzbassenergo" does not participate in any industrial, banking or financial groups, holding companies, concerns or associations.

On the basis of the Decree of the President of the RF "On additional measures of provision of fuel and energy complex of Russia management" of March 3, 1998 the effect of section 3 of the Temporary regulation on holding companies created by reorganization of state enterprises into joint-stock companies approved by the Decree of the President of the RF of November 16, 1992 # 1392 "On measures of realization of industrial policy at privatization of state enterprises" does not apply to Russian joint stock company "UES of Russia".

Based on article 2.3 of the Statute of the Company JSC "Kuzbassenergo" is an associated company of the Holding company RAO "UES of Russia".

3.6. Associated and dependent economic organizations of the issuer

JSC "Kuzbassenergo" has 13 associated organizations.

The organizations are treated as affiliated in accordance with the Civil Code of the Russian Federation (part 1, articles 104 and 106) and the Federal law "On joint stock companies" (article 6).

3.7. Composition, structure and cost of fixed assets of the issuer, information on plans concerning acquisition, substitution, retirement of fixed assets as well as on all the cases of burden of fixed assets of the issuer

3.7.1. Fixed assets

Part of property of the Company meeting the criterions of article 1 of PBU 6/01 "Registration of fixed assets" (Decree of the Ministry of Finance of RF of March 30, 2001 # 26-n (version of 18.05.2002), methodical directions on registering fixed assets (Decree of the Ministry of Finance of RF of 13.10.2003 # 91-n).

All-Russian classifier of fixed assets (OK-013-94) approved by the resolution of State committee of RF for standards, metrology and certification of 26.12.94 # 359 is used at determination of composition and grouping of fixed assets.

In accordance with the agreement made between JSC "Kuzbassenergo" and JS C"ENPI Consult" determination of full replacement cost of part of basic production assets registered on the books of JSC "Kuzbassenergo" as of 01.01.2004 was carried out by specialists of JSC "ENPI Consult".

Objective of evaluation – determination of full replacement cost of part of fixed assets.

Purpose of evaluation – provision of consulting services as far as issues of reevaluation of part of fixed assets of the company are concerned.

Taking into account restrictive terms and admissions the full replacement cost of the reevaluated property (in accordance with the Requirements specification with total book cost 29 749 727 391 RUR without deterioration provided by the Customer), as of 01.01.2004 approximately equals 33 815 298 100 (thirty three billion eight hundred fifteen million two hundred and ninety eight thousand one hundred) RUR.

The evaluation was carried out on the basis of accounting data, technical characteristics of evaluation objects provided by specialists of JSC "Kuzbassenergo", interview with managers and leading experts of departments and services of JSC "Kuzbassenergo".

The evaluation was held in accordance with Federal law #135-FL of 29.07.1998 "On evaluation activities in the Russian Federation", Standards of evaluation obligatory for use by subjects of evaluation activities (Resolution of Government of the Russian Federation # 519 of 06.05.2001), basic principles formulated in International Standards of Evaluation MSO1-MSO4, Standards of professional practice and Ethics Code of the Russian evaluators association.

In accordance with the Requirements specification for reevaluation of fixed assets of JSC "Kuzbassenergo" as of 01.01.2004, the reevaluation implies determination of current (replacement cost of fixed assets, i.e. full amount of costs which would have been taken by their owner with the purpose of their replacement (substitution) with similar new fixed assets at market price current for the date of reevaluation in accordance with the Decree of the Ministry of Finance of the Russian Federation of 30.03.2001 # 26N.

1. The following groups of fixed assets are subject for obligatory reevaluation independently of the amount of accounting deterioration:

Name of the group of fixed assets	Codes of standard norms of depreciation charges
High Voltage constructions of 220 kilowatt and more	30009, 30119-30120
Mechanisms and equipment Substations of 220 kilowatt and more; other electrotechnical power equipment and dispatch devices;	40000-40700 40701 40702 40705-42912
Carriers	50000-50302 50500-50709

2. The following groups of fixed assets, units of social and life purpose and units of nonspecialized businesses are not subject to reevaluation:

Name of the group of fixed assets	Codes of standard norms of depreciation charges
Production buildings	10000-10010
Constructions	20000-30118 (with restrictions of article 1) 30121-30124
Other groups of equipment	43000-49303
Carriers (mobile stock of motor transport)	50400-50428
Production and household equipment, Instruments	60000-70012
Workstock	80000
Perennial plants	90000-90021
Nonproduction buildings	10011-10105, 20362-20368 By name: kindergarten, preventorium, hospital, apartment house, etc:
Nonspecialized business	10011-10105, 20362-20368 By name: Agricultural enterprise, store, commercial storehouse, construction materials production enterprise, production of consumer goods, automobile service center, etc.

3. Reevaluation of enterprise #55 (Kuzbassenergosvyaz) was not carried out.

4. Reevaluation of units of unfinished construction and equipment to be installed was not carried out.

5. Reevaluation was carried out by independent evaluators through indexation and direct recalculation.

1. Cost of fixed assets, total, thousands of RUR	69 851 854	46 258 383	23 593 471
Including:			
Buildings	8 819 249	3 584 223	5 235 026
Constructions	26 115 436	17 765 586	8 349 850
Ground areas	568 759	-	568 759

Information on reevaluation of part of fixed assets as of 01.01.2004 will be available in quarterly report of the issuer for the 1st quarter of 2005.

Information on financial and economic activity of the issuer

4.1. Outcomes of financial and economic activities of the issuer

No information is provided for the reported period.

4.2. Issuer's liquidity

No information is provided for the reported period.

4.3. Amount, structure and adequacy of the capital and the floating assets of the issuer

4.3.1. Amount and structure of the capital and the floating assets of the issuer.

a) Amount of authorized capital stock: ***The authorized capital stock of the Company is composed of nominal cost of the Company's shares purchased by shareholders (floating shared). The authorized capital stock of the Company equals 606 163 800 (six hundred and six million one hundred and sixty three thousand eight hundred) RUR which corresponds to the Statute of the Company.***

b) Total cost of shares of the issuer purchased by the issuer for further reselling (transfer): ***No shares were purchased by JSC "Kuzbassenergo" in the 4th quarter of 2004.***

c) Amount of capital reserves of the issuer formed by allocations of profits of the issuer: ***The amount of surplus fund is determined by the Statute of the Company and may not equal less than 5 (five) % of the authorized capital stock of the Company. The surplus fund is formed by obligatory annual allocations until it amounts to the size prescribed by the Statute of the Company. The amount of annual allocations is determined by the Statute of the Company but it may not be less than 5 (five) per cent of the Company's net profits. Expenditure of funds of the surplus fund bears exceptionally purposeful nature. The surplus fund of the Company is meant for covering losses of the Company, for paying off bonds of the Company and for purchase of shares of the Company in case of lack of other funds. The amount of capital reserves as of 31.12.2004 amounted to 16858, 0 thousand RUR.***

d) amount of additional capital of the issuer reflecting the increment of value of assets identifiable through the results of reevaluation: ***In accordance with the bookkeeper's live data amounts to 22 309 278 000 RUR.***

e) amount of retained net profits of the issuer: ***No information is provided for the reported period.***

f) amount of purposeful financing assets: ***0.***

g) total amount of capital of the issuer: ***In accordance with the bookkeeper's live data amounts to 25 824 285 000 RUR.***

Owned assets of the Company are sources of financing of floating assets. Owned assets of the Company are adequate for covering main needs of the Company in resources providing continuity of production and selling of produce as well as for covering current liabilities of the Company.

Policy of the Company as regards to floating assets consists of provision of acceptable volume and structure of floating assets of the Company with the purpose of increase of liquidity of its assets. With the purpose of reduction of accounts receivable work is carried out with buyers and customers, control of accounts payable is carried out, work on collection of past-due accounts receivable is carried out.

The following factors may influence the change of policy of financing of floating assets:

- ***Violation of contractual and payment-and-accounts discipline by the consumers which may lead to reduction of earnings of the Company and increase of bills payable. In such case the issuer will have to***

clear its bills payable by means of attracting chargeable borrowed funds, by replacing its bills payable to the suppliers and to contractors with loan debts before banks and credit organizations. The probability of appearance of such factor is low in the judgment of the issuer;

- ***Increase of production costs and as a consequence reduction of profitability, amount of profits of the Company. The probability of appearance of such factor in the judgment of the issuer is considered low.***

The opinions of managing bodies of the issuer concerning the abovementioned factors are coincide.

4.3.2. Adequacy of the capital and the floating assets of the issuer

The company possesses adequate owned capital and floating assets for covering its current operation expenses.

Name of indicator	As of 30.09.2004	As of 31.12.2004 (Live data)
Owned capital at the end of the period, RUR.	25 330 085 000	25 824 285 000
Floating assets at the end of the period, RUR.	6 503 927 000	6 505 598 000
Short-term liabilities at the end of the reported period	5 691 933 000	5 207 081 000
Average daily current expenses, RUR	63 113 389	67 267 000

4.3.3. Cash assets

Bench marks of cash flows of the Company are approved every quarter by the Board of Directors of the Company.

The issue "On approving bench marks of cash flows of the Company for the 1st quarter of 2005" was reviewed at the meeting of the Board of Directors of JSC "Kuzbassenergo" on December 28, 2004. The following decision was taken: "To approve the bench marks of cash flows of JSC "Kuzbassenergo" for the 1st quarter of 2005 with monthly layout":

	Fulfillment of commitments for agreements of FOREM and invoices/claims	Fulfillment of engagements for agreements with JSC RAO "UES of Russia" and for the decisions of the meetings of shareholders	Service payment to JSC "SO TsDU of UES" for securing system reliability	Service payment to JSC "FSK of UES"
January	26500	108511	29428	88011
February		100698	27309	81673
March		102931	27914	83485
Total for the 1st quarter of 2005	26500	312140	84651	253169

Potential source of funds for the 1st quarter of 2005 is proceeds from selling of produce (works, services)

and the retained income of the Company.

Factors which may influence the need of the issuer in cash assets and possibility of their receipt: ***Increase of accounts receivable through delayed payment to consumers.***

There are no accounts payable gathered in the bank in card index.

4.3.4. Issuer's financial investments

In accordance with PBU 4/99 "Organization's accounting" the following is meant under financial investments:

- ***Investments in associated companies;***
- ***Investments in dependant companies;***
- ***Investments in other organizations;***
- ***Loans provided for the period of more than 12 months;***
- ***Loans provided for the period of less than 12 months;***
- ***Own shares bought out from the shareholders;***
- ***Other financial investments.***

Financial investments are registered by the Company on the books 58 in accordance with PBU # 19/02 "Registration of investments" approved by the Order of the Ministry of Finance of RF of 10.12.2002 #126-n.

1. Investments in securities:

Type of securities	Full and brief trade name of the company	Date and registration number of the issue of shares	Quantity of Securities owned by the issuer	Overall nominal value of share holdings owned by the issuer, thousands of RUR	Current status of the Company	Prospective loss in current year, thousands of RUR

Information on other investments (investments in authorized capital stocks of limited companies) is not provided as they equal less than 10 per cent of all financial investments of JSC "Kuzbassenergo" at the 4th quarter of 2004.

4.3.5. Intangible assets of the issuer

In composition of intangible assets exclusive rights of the Company for its trade mark are reflected. Amortization of intangible assets is imposed by linear method based on the following terms of wholesome use:

Right for the trade mark – 10 years.

In the reports intangible assets are shown at original cost with excluded accumulated depreciation for the period of use.

№№	Name of the group of intangible assets	Overall cost	Amount of depreciation charged
1.	Trade mark	3774 RUR 73 kipecks	601 RUR 20 kopecks
	Total, RUR	3774 RUR 73 kopecks	601 RUR 20 kopecks

Registration of intangible assets is carried out in accordance with PBU 14/2000 "Registration of intangible assets" approved by the Order of the Ministry of Finance # 91-n of 16.10.2000.

4.4. Information on issuer's policy and expenditures in the area of scientific and technical development, in the area of licenses and patents, new elaborations and research

Registration of R and D in JSC "Kuzbassenergo" is carried out in accordance with the Accounting regulation "Registration of expenditures for scientific and technical, development and technological works" (PBU 17/02).

4.5. Progress trends analysis in the sphere of issuer's main activity

Power industry is one of the leading Russian trades. Power industry constitutes about 10 % of the country's GDP. By installed capacity and volume of trade Russian power industry takes the fourth place in the world.
In 2000 growth of electric energy consumption caused by economical upturn as well as growth of generation of electrical energy was recorded. In the same year 25 new turbogenerators with total capacity of 665,8 megawatt and the first steam and gas power generating unit of North Western TETs in Petersburg with capacity of 450 megawatt were put into operation. At the session of the Government of the Russian Federation in December 2000 suggestions of the Ministry of Economic Development of Russia, the Ministry atomic energy of Russia, state concern "Rosenergoatom" on the issue of reformation of power industry were scrutinized and draft project of major trends of state policy if reformation of power industry of the Russia Federation proposed by the Ministry of Economic development of Russia was taken as a basis for further study. The Decree of the Government of the Russian Federation # 1072 "Action plan of the Government of the Russian Federation in the sphere of social policy and modernization of the economy for 2000 - 2001" determining the main objectives in the area of reformation of natural monopolies was approved.

By the end of year 2001 at the enterprises of RAO "UES of Russia" holding company the level of paid consumed volume of electric and thermal energy with cash means grew by 20 % and amounted to 103 # including the offset of earlier accumulated debt. Realization of programs of reduction of expenses at associated companies and dependant companies of the holding company allowed to reduce expenses by 12,3 billion RUR. Altogether 25 turbogenerators with total capacity of 1330,2 megawatt and 1819,5 kilometers of power lines with voltage of 35 kilowatt or more were put into operation. Program named "5000 megawatt" was elaborated by RAO "UES of Russia" conjointly with a group of independent international consultants. Its goal is to attract western and Russian investors in construction of the most promising generating capacities. The Decree of 11.07.2001 # 526 "On reformation of power industry of the Russian Federation" was approved by Russian Government. The Decree prescribes to separate monopolistic types of activity from all the rest, to introduce separate registering at enterprises of power industry. In continuation of tits Decree the Order of the Government of RF # 1040-r was passed which approved the Plan of Activities of the first stage of reformation. In August 2001 the Committee for reformation at the Board of Directors of RSO "UES of Russia" was established. It was formed of representatives of minoritary shareholders, potential investors, the State and RAO "UES of Russia". On December 21 the Government of the Russian Federation approved the Decree # 881 "On criteria of relating main electric power lines and objects of electric power economy to the "Unified (whole-Russian) energy system". In accordance with the Decree of the Government of RF of July 11, 2001 JSC "FSK UES" (Federal system company managing the unified national (all-Russian) energy system) and JSC "SO-TsDU of UES" (System operator carrying out dispatch management of the unified energy system of Russia) were established.

Major events of 2002 in the sphere of reformation were:

- ***A pack of bills devoted to reformation of power industry passed the first reading in the State Duma of the Russian Federation;***
- ***An auction of electric energy in an imitation regimen was held by NP "ATS" and JSC "SO-TsDU UES";***
- ***Creation of infrastructure organizations in the industry – Federal network company and System operator;***
- ***Preparation of the Strategy of reformation of RSO "UES of Russia";***

- *Closing of preparation stage of reformation of RSO "UES of Russia";*
- *Elaboration and approval of basic variant of reformation of AO-Energo;*
- *Preparation of carrying out of pilot projects of reformation of AO-energo;*
- *Carrying out of first stages of reformation of science and project complex of RAO "UES of Russia" and energy repair and service types of activities.*

New "Basics of price formation" and "Rules of state regulation and use of tariffs for electric and thermal energy in the Russian Federation" were introduced by the Decree of the Government of the Russian Federation # 226 of April 2, 2002. "Code of corporative management" was approved by RAO "UES of Russia".

In September 2002 non-commercial partnership "Administrator of trade system" (NP ATS) started to carry out trade of electric energy in imitation regimen. One of the positive tendencies of 2002 was that tariffs became closer to economically sound ones, i.e. the level of cross financing between the groups of consumers reduced. Basic variant of reformation of regional energy systems – associated companies of RAO "UES of Russia" and withdrawal of enterprises of the holding company RAO "UES of Russia" from non-specialized assets with the purpose of minimizing expenses connected with owning them was approved by the Board of Directors of RAO UES of Russia". The Board of Directors of RAO "UES of Russia" decided to terminate RAO "UES of Russia"'s participation in closed JSC "TsDR FOREM" through selling 75 per cent of shares of closed JSC "TsDR FOREM" to Non-commercial partnership "ATS".
Advanced terms of growth of production costs as compared to the terms of growth of proceeds (29,4% and 23,8% respectively) as a whole at DZO RAO "UES of Russia" caused reduction of gross profit in 2002 as compared to the level of 2001. Gross profit of AO-energo in 2002 was 4,6 billion RUR less than that of 2001 , as far as AO-electric stations are concerned gross profit declined by 4,5 million RUR.
On the night of March 31 and April 1, 2003 in ten Russian regions functions of operative and dispatching management of Unified energy system of Russia were transferred from regional dispatching departments (RDD) of AO-energo to RDU – branch offices of JSC "System operator – TsDU UES".

In April 2003 a set of legislative acts on reformation of power industry including state laws came into effect:

- *"On power industry";*
- *"On peculiarities of power industry functioning in the period of transition and on making alterations in some of legislative acts of the Russian Federation and on acknowledging few legislative acts of the Russian Federation stale in connection with passing a Federal law "On power industry";*
- *"On making alterations and addenda to Federal law "On state regulation of tariffs for electric and thermal energy in the Russian Federation";*
- *"On making alterations and addenda to Federal law "On natural monopolies";*
- *"On making alterations and addenda to the second part of Civil Code of the Russian Federation";*
- *"On making alterations in the Federal law "On energy saving".*

The workgroup on revision of the Strategy of JSC RAO "UES of Russia" for 2003 – 2008 "5+5" at the Board of Directors of RSO "UES of Russia" reviewed the Project of Conception of the Strategy of JSC RAO "UES of Russia" for 2003 – 2008 "5+5" taking into account the remarks and suggestions received.

In the 1st six months of 2003 process of perfection and development of mechanisms of competitive selling in the framework of regulated wholesale market of electric energy (power) actively continued. IN accordance with the existent standard legal documents monthly auctions of over and above the plan electric energy were carried out, the volume of electric energy sold at the auction equaled 3,1 % of volume of electric energy supplied to the home market. Jointly with JSC "SO-TsDU UES of Russia" in the 1st six months of 2003 trade of electric energy in accordance with the scheme of "Energy pool" continued, the volume of selling for the reported period increased almost by 2 times and equaled 1,3 % of overall volume of supplies to FOREM (home market).

Forming of Unified National Electricity Network on the basis of functioning legislation of the Russian Federation and under control of Federal network company in the books of which 45 thousands kilometers

of main electricity supply network, 126 substations and systems of technological management were registered, takes place.

On October 31, 2003 at a regular meeting of the Board of Directors of RAO "UES of Russia" information on possible creation of territorial generating companies (TGC) by means of co-founding by several AO-energo was listened. The possibility of creation of TGC by means of co-foundation presumes its formation as a large operation company even at the first stage of reformation of AO-energo. TGC is co-founded by several AO-energo by means of bringing in their generating assets to the authorized capital stock of the newly established company. Thus, the possibility of establishment of a large operation company whose shareholders will be AO-energo companies that established it, is set up.

In accordance with the Decree of the Government of RF # 643 of October 24, 2003 "On rules of wholesale market of electric energy (power) of transitional period" from November 1, 2003 concurrently with the regulated sector of wholesale market of electric energy (to the functioning Federal wholesale market of electric energy (power)a competitive sector presuming selling by-the-hour volumes of electric energy at free prices is launched).

At that, within the free sector every producer may offer up to 15 % of its installed capacity and every consumer may declare the purchase of up to 30% of its planned consumption. The saving rate of the establishment of a free sector of wholesale market of electric energy is obvious. The specific gravity of supplies of electric power by thermal stations with relatively low production costs increased, while supplies of "expensive" generating capacities reduced.

RAO UES group's profit of its main activity in 2003 equaled 64,5 billion RUR which is three and a half times more than that of the 2002. This is explained by the policy of cost containment of RAO which grew slower than the grain from selling. At the same time net profit of the group of RAO UES reduced by 9 billion RUR and amounted 27 billion RUR. The reduction took place due to postponing of payment of part of income tax in 2003 because of scale reevaluation of fixed assets.

The beginning of 2004 for power industry of Russia unlike the majority of branches of industry was marked by negative dynamics, which is mainly caused by a climatic factor – higher temperatures of January 2004 as compared to January 2003. As a result in January 2004 setback in production as a whole in the industry amounted to 1,6 %. That was mainly caused by the reduction of production of thermal energy.

In January 2004 cost increase for the production of power industry took place which is traditional for the beginning of the year, although tits increase was comparatively small. At least price increase in natural gas and petroleum industries was much greater. The substantial rise in price of gas at much slower growth of tariffs for electric energy may negatively influence the financial state of enterprises of power industry in 2004.

In the beginning of 2004 competitive market of electric power continued its development. The agreements on joining wholesale market trading system were signed by 95 clients 25 of which are not associated or dependent companies of RAO "UES of Russia".
The share of free sector of market in June was 8,0 % of aggregate volume of consumption of electric power at the territory of the European part of Russia and Ural, in May the figure was 7,4 %.

On the 26^{h} of March of 2004 the Board of Directors of RAO "UES of Russia" approved the principles of formation of a new organizational structure of the executive body of RAO "UES of Russia" holding company. The new organizational structure of RAO "UES of Russia" presumes the availability of three substantial blocks: the corporative center (CC), the center of reform management (CRM) and business units (BU). The Corporative center of RAO "UES of Russia" is made responsible for the main management functions, the Center of reform management (a number of project teams under unified management) – is made responsible for the work on reformation of power industry. Business units – subdivisions of the executive body of RAO with its own budget and liabilities is made responsible for carrying on tits or that type of business (in tits structure the Federal network company and the system operator are separate legal entities, others – are not). The Corporative center will carry out functions of

providing collaboration with shareholders, authorities, mass media, strategy and control (for example, strategical course, monitoring of financial results), the Center of reform management will work on the strategy and the realization of reforms, the block of business units will be responsible for the creation of new companies in accordance with the reform, control of its activity, propagation of culture, standards of management and main business processes.

On October 25th the Chairman of the Government of the Russian Federation Mikhail Fradkov signed the Decree # 1367-r on establishment of the 7th wholesale generating company (WGC).
The total installed capacity of power stations which will constitute the unified hydro-WGC will equal 22586 megawatt (planned production capacity of the stations constructed is excluded). In accordance with the approved configuration of WGC # 7 electric power stations of the company will take part in almost all the future cost zones of the electric power industry market of RF.
At the meeting on October 29th the Board of Directors of RAO "UES of Russia" approved the establishment of two generative companies (TGC) # 8 and # 10.

On November 26th the meeting of the Board of Directors of RAO "UES of Russia" at which the establishment of one wholesale generating company (WGC-4) and two territorial generating companies (TGC-1 and TGC-4) was approved.

In accordance with live data in 2004 electric power stations of RAO "UES of Russia" increased the production of electric power by 2,5, % as compared to 2003 – from 635, 8 to 652,0 billion kilowatt per hour.
For the past year hydroelectric stations of RAO "UES of Russia" produced 130,6 billion kilowatt per hours which is 13,3, % more than that of 2003 (115,2 billion kilowatt per hour). At the same time production of thermoelectric power stations of RAO "UES of Russia" for the year 2004 equaled 521,4 billion kilowatt per hour which can be compared to the level of year 2003 (520,6 billion kilowatt per hour). Stable and uninterrupted work of electric power stations of RAO "UES of Russia" which increased the production allowed to provide the growth of energy consumption in the country the volume of which in 2004 amounted 908,8, billion kilowatt per hour which is greater than that of year 2003 by 2,3, %.

JSC "Kuzbassenergo" is part of a unified energy supply system of Russia and an associated stock company of JSC RAO "UES of Russia". The power supply system supplies inhabitants and industry of Kemerovo Region which is situated at South East of Western Siberia and is located at borderline of West-Siberian plain and mountains of South Siberia, with electric and thermal energy.
Kemerovo Region spreads at almost 500 kilometers from North to South, 300 kilometers from West to East. The population of Kemerovo Region as of January 1st 2004 is 2897,4 thousand people. After the withdrawal of JSC's "Kuzbassenergo" large consumers of electric power to FOREM the power supply system switched its status from scarce to excess from the point of view of availability of energy. The competitive sector of the market "5-15" will be launched in Siberia not earlier than the middle of 2005. For excess energy supply systems at admission to FOREM an average weighted tariff is reviewed which amounted to 29,6 kopecks for regional energy supply company in 2004.

At such approach to calculation prices for kilowatt per hour, excess capacities of Kuzbass energy supply system turned out to be too expensive, so FEC did not register them in the balance of energy zone of Siberia and UES of Russia for the year 2004. Outcomes of such decision are: reduction of proper production of electric power in the volume of 2,5 billion of kilowatt per hour a year and conservation of equipment of 400 megawatt. Tits leads to direct reduction of income , further reduction of sources on production and social programs. Moreover, analysis of the regimen of work of JSC "Kuzbassenergo" in October 2003 on the balances of the fourth quarter (with zero balance cross flow of electric energy and power) approved by FEC revealed a number of serious technological problems connected with optimization of loading of equipment of electric power stations and with carrying out treaty commitments at FOREM at fall-winter period.
In a short period of time "Substantiation of technological distribution of electric power at FOREM" was prepared in which the necessity of selling the electric al energy in the amount of 70 million kilowatt per hour a month by the power supply company was clearly proven with all calculations and computations. After all the concordances the suggestions of Kuzbass power engineering specialists were taken into account by FEC. In November 2003 the power supply system supplied electric power to FOREM in the

amount of 34 million kilowatt per hour to the sum of 9 million RUR. In the 1st quarter of 2004 JSC "Kuzbassenergo" was included into the summary balance of electric energy at UES of Russia as a Supplier with volumes of trade equaling 160 million kilowatt per hour. Outlet to FOREM as a supplier became a great economical and technological achievement for the regional power supply system.

The issuer's activity in electric power supply sphere is in many respects conditioned by industrywide trends. The power supply system faced problems of nonpayment inherent to the economic environment at the macro level, and particularly regional problems, most of them are connected with the relations with the Regional energy commission.

In 2000 "Conception of development of power supply system until 2010".The present conception was approved by the Regional energy commission of Kemerovo Region (Resolution # 23 of 13.06.2000) and considered necessary and well-timed, aimed at support and preservation of the available generating capacities, the achieved production volumes.
RAO "UES of Russia" approved the Conception as a minimum program of maintaining the equipment's capacity for work. The present Conception stipulates the development of energy system until 2010 and poses new fundamental problems and methods of their solution:
- economic justification of the necessity of construction and technical re-equipment of the units of energy supply system;
- introduction of new technologies including achievements of native science and foreign experience. Maximum production of electric power at proper equipment with the purpose of maximum covering of loading of regional consumers;
- automation of technological processes;
- inculcation of new methods of diagnostics of the state of equipment.
In 2002 the energy supply system worked in strict accordance with the balance of production approved by the Federal energy commission and the schedules determined by the regiments of work of UEC of Siberia. Faultless service of the Company provided safe and uninterrupted supply of solvent consumers with energy resources, thermal and electric power, stable passing of fall/winter period.
In 2002 the index of fulfillment of physical volumes in the Company was higher than that of the past years. In the previous year all scheduled repair works were carried out, in spite of unbalanced tariff formation in the region the program of technical re-equipment was fulfilled.
During 2002 a program of reformation of the system of financial management and control was implemented, system of budgeting was introduced, strict control after the fulfillment of budget and the accounts receivable was introduced. The carried out work contributed to reduction of accounts payable of the energy system by 300 million RUR. In spite of the solution of financial, economic, industrial-engineering problems the Company started carrying out reorganizations in accordance with the main courses of reformation of power industry.
The allotment of energy for the past 5 years grows in connection to the increase of consumption of electric power and permanent growth of prices for energy. The per cent of selling during these years tends to growth and as far as the past 3 years are concerned, selling exceeds the allotment of energy. Thus, there's reduction of accounts receivable at the energy supply system.
During the past years change of structure of payments for the energy towards increase of money constituent took place.
2003 – the year of large starting objects having great significance not only for the energy supply system but for the whole Kuzbass. In August at South electric network system a high-voltage line VL-35 was put into commission which allowed to provide a remote village Ust-Kabyrza in Gornaya Shoriya which is one of the largest in the district with electric power.

On December 4th 2003 turbine R-12-90/30M with capacity of 12 megawatt and boiler # 4 with steam output of 160 tons per hour with boiler unit ere put into operation in Kuznetskaya TETs.
On December 19th 2003 launching of a unique for Siberia turbine at vibratory bearing T-115-8,8, capacity of 115 megawatt with generator TF-110-2UZ took place at South-Kuzbass GRES. JSC "Kuzbassenergo" was awarded an honorary title of "Prize -winner" of Russian National Olympus in nomination "Fuel and Energy Complex" for its outstanding contribution in historic development of the Russian Federation at the outcomes of the year. "Russian National Olympus" is the all-Russian prize reflecting the significant achievements in social and economic, scientific and cultural spheres of Russia.

As of Match 31, 2004 the Board of Directors of RAO "UES of Russia" approved 49 of 70 projects of reformation of AO-energo subject to approval by managing bodies JSC RAO "UES of Russia". Implementation of projects of reformation in 41 AO-energo started. Project group "Repair" approved the works of setting apart the 70 repair works of AO-energo and 32 – of AO-stations. It is not presumed to carry out isolation of repair types of activities at 11 AO-stations. The Board of Directors of RAO "UES of Russia" also approved the projects of setting apart repair types of activities of 52 AO-energo and 20 AO-stations.

In March 2004 separation of energy repair types of activities was finished in accordance with the Project of reformation of energy repair types of activities of JSC "Kuzbassenergo" approved by the Project group on reformation of energy repair types of activities and organization of a market of technological servicing of JSC RAO "UES of Russia" on 01.07.2003. 3 associated companies will 100% participation of JSC "Kuzbassenergo" were established:

- *JSC "Kuzbasssetremont" – competitive energy repair company carrying out repair works in electric network system Registered on 04.03.04.*
- *JSC "Engineering and analytical center "Kuzbasstechenergo" – competitive engineering company. Registered on 09.03.04.*
- *JSC "Kuzbass energy and repair company" – competitive energy and repair company carrying out servicing and thorough repair works of equipment of electric power stations. Registered on 01.03.04.*

The companies are created on the basis of JSC "Kuzbassenergo" property and with participation of its employees.

JSC "Kuzbassenergoservice" (100 % DZO established on the basis of property and personnel of the liquidated branch office Repair enterprise "Kuzbassenergoremont") carries out thorough repairs of boilers, turbines, transformators and carried out capital construction and technical re-equipment, produces spare parts.

Within the framework of reformation activities of electricity network complex on the basis of property complex of main circuit belonging to the United national electric power network, a branch office "Main electricity network" was established.

In pursuance of resolution of the Board of Directors of JSC "Kuzbassenergo" of 20.07.04 and the Order of JSC "Kuzbassenergo" "On beginning of implementation of activities on transfer of the units of electricity network complex of JSC "Kuzbassenergo" belonging to the United national (all-Russian) electricity network JSC "Interregional main electricity network company "Siberia" in 2004 a schedule of activities on including the units belonging to UNES to the payment of supplementary shares of JSC IMENC "Siberia".

In October 2004 market valuation of UNES objects was carried out.

The Regional energy supply commission (REC) of Kemerovo Region approved the resolution to increase the average selling price of electric power of JSC Kuzbassenergo" from January 1st, 2005 by 13,6 % which is 65,8 kopecks for 1 kilowatt per hour. In particular, for basic consumers the one-part tariff grew by 14-15 % for different enterprises and amounted to 55,7 kopecks per 1 kilowatt per hour at high voltage and 1,07 RUR per 1 kilowatt per hour at low voltage. For agricultural enterprises the one-part tariff also grew by 14-15- % and amounted to 80 kopecks per 1 kilowatt per hour, For railway transport it increased by 15 % - up to 65,8, kopecks per 1 kilowatt per hour, for budget organizations – by 13,65 up to 97,6, kopecks per 1 kilowatt per hour, for other consumers it increased by 24 % up to 83,9 kopecks for 1 kilowatt per hour at high voltage and to 1 RUR 35 kopecks for 1 kilowatt per hour for low voltage (VAT not included). Tariffs for electric power for the population of the region grew by 15,4, % - up to 75 kopecks for 1 kilowatt per hour VAT included.

The average selling price of thermal energy increased by 16,5, % - up to 310 RUR for 1 gigacalorie, VAT not included. JSC "SUEK" became an official owner 221727686 shares of JSC "Kuzbassenergo" which equals 36,58 % of authorized capital stock of the energy supply company.

As of 20.08.2004 a Project of reformation of JSC "Kuzbassenergo" which presumes the division of

competitive and monopolistic types of activity in accordance with the basic variant of reformation was elaborated and submitted for review. Reorganization will be carried out in form of segregation. Functions of the regional electricity supply network company will remain with the reorganized company.

On September 20th 2004 a Collaboration agreement of RAO "UES of Russia", Administration of Kemerovo Region and JSC "Kuzbassenergo" for 2004-2006 was signed. In accordance with the agreement RAO "UES of Russia" at reformation of "Kuzbassenergo"takes into account the position of the authorities of Kemerovo region that dispute the separation of generating capacity of the energy supply system. Besides, at the agreement an understanding on approval of the program on stage-by-stage termination of cross funding , on collaboration on the issue of determination of well-grounded price for the capacity at FOREM for JSC "Kuzbassenergo", etc. was reached.

Opinions of the managing bodies of the issuer concerning the provided information are congruent.

V Detailed information on persons forming issuer's managing bodies, on issuer's bodies carrying out control of its financial and economic activities, brief information on issuer's staff (employees)

5.3. Information on the amount of remuneration, benefits and\or expenditure compensations on each of the issuer's managing bodies

THE BOARD OF DIRECTORS:

The amount of receipts of all members of the Board of Directors of JSC "Kuzbassenergo" (General Director's receipts are not included) for 2003 equaled 643 006 (six hundred forty three thousands and six) RUR, including remuneration for participation - 643 006 RUR.

In accordance with Regulation on payment of remunerations and compensations to members of the Board of Directors of JSC "Kuzbassenergo" approved by annual general meeting of shareholders of JSC "Kuzbassenergo" on 02.06.2003, remuneration to members of the Board of Directors is paid:

1. For participation in a meeting of the Board of Directors (independently from the form of its conducting)to a member of the Board of Directors of the Company in the amount equaling fivefold minimum monthly base wage rate of a worker of first grade determined by the industrial tariff agreement at the date of holding of a meeting of the Board of Directors of the Company.

2. At decision made by the General meeting of shareholders on payment of dividends for equities of the Company at the outcomes of a fiscal year (or at the outcomes of the first quarter/half year/nine months), remuneration is paid to a member of the Board of Directors the amount of which is calculated with consideration of the announced amount of dividends of the Company for equities and with consideration of the number of meetings at which the member of the Board of Directors participated.

The amount of remuneration paid to the Chairman of the Board of Directors is increased by 50 %.

Besides, traveling expenses are remunerated by a member of the Board of Directors.

From the beginning of 2004 remuneration in the amount of 1 633 595 RUR (payments to the General Director of the Company are not included) were paid to members of the Board of Directors of JSC "Kuzbassenergo".

THE MANAGING BOARD:

The amount of receipts of all members of the Managing board (General Director's receipta are not included0 for 2003 equaled 9 469 553 (nine million four hundred and sixty nine thousand five hundred and fifty three) RUR including:

Salaries – 8 673 081 RUR

Remuneration for participation - 337 626 RUR

Property provisions – 458 846 RUR

Incomes of the members of the Managing Board in 2004 are constituted by their incomes as members of staff of JSC "Kuzbassenergo" as by their remuneration determined in accordance with the labor contract concluded with the member of the Managing Board of the Company. In accordance with "Regulation on the Managing Board of Kuzbass joint stock company for energy and electrification" approved by the annual general meeting of shareholders of JSC "Kuzbassenergo" of June 21st, 2002 the labor contract is signed by the Chairman of the Board of Directors of the Company or by a person authorized by the Board of Directors of the Company.

The terms of a labor contract are determined by the Board of Directors of the Company or by a person authorized by the Board of Directors of the Company to sign labor contracts.

Monthly remuneration in the amount of 10 % of the official salary is determined to the member of the Managing Board.

The amount of remuneration is increased by factual rise of consumer price index in accordance with the industrial tariff agreement.

Member of the Managing Board may be additionally rewarded on the basis and on terms determined by the Board of Directors of the Company.

At the outcomes of 2004 the amount of incomes of all members of the Managing Board (incomes of the General Director are not included) equaled 16 846 650 RUR including:

- ***Salaries - 7 855 206 RUR;***
- ***Premium - 7 472 826 RUR;***
- ***Remuneration - 430 679 RUR;***
- ***Compensatory expenses – 1 087 939 руб.***

5.4. Information on the structure and competence of the bodies carrying out control of the issuer's financial and economic activities

For carrying out control for financial and economic activities of the Company a Revision commission of the Company is elected by the General meeting of shareholders to function until next annual general meeting of shareholders.

The quantitative structure of the Revision commission equals 5 persons.

The following falls under the competence of the Revision commission of the Company (extract from article 22 "Revision commission and Auditor of the Company" from the Statute of JSC "Kuzbassenergo"):

- ***Approval of authenticity of information contained in an annual report, accounting balance, account of profits and losses of the Company;***
- ***Financial state analysis of the Company, revealing reserves for improving financial state of the Company and elaboration of recommendations for the managing bodies of the Company;***
- ***Control and analysis of appropriateness, quality and completeness of auditing of the Company;***
- ***Organization and implementation of control (revision) of financial and economic activities of the Company, in particular:***
- ***Control (revision0 of financial, accounting, payment and account and other types of documents of the Company connected with carrying out of financial and economic activities by the Company with the object to determine whether in complies with legislation of the Russian Federation, the Statute, internal and other documents of the Company;***
- ***Control for safety and use of fixed assets;***
- ***Control for following of the established procedure of loss write0off of liabilities of insolvent debtors of the Company;***
- ***Control for expenditure of monetary funds of the Company in accordance with the approved business plan and the budget of the Company;***
- ***Control for formation and use of reserve and other special funds of the Company;***
- ***Revision of appropriateness and timeliness of charge and payment of dividends for shares of the Company, interest for bonds, incomes on other securities;***
- ***Revision of implementation of the instructions on elimination of defects and violations given earlier,***

revealed by revisions carried out earlier ;

8.8. Description on the procedure of taxation of profits on floated and floating emissive securities of the issuer

Procedure of taxation of the issuer's securities income is regulated by the Tax Code of the Russian Federation.

Table 1. Taxation of incomes of legal entities on floated securities in the form of dividends in accordance with the legislation which was in effect in 2004.

№№	Category of securities owner	
	Legal entities – tax residents of RF	Foreign legal entities (non-residents) gaining income from sources located in RF
1.Name of income from floated securities	Dividends	
2.Name of tax on income from securities	Income tax	
3. Tax rate	6 %	15 %
4.Procedure and terms of tax payment	Tax on income in form of dividends are collected from the source of payment of these incomes and are transferred to federal budget by the fiscal agent, who carried out payment within 10 days from the date of payment of income (article 287 Chapter 25 of Tax Code of the Russian Federation (part two).	Amount of income deducted from the incomes of foreign organizations is transferred by the fiscal agent to federal budget simultaneously with payment of income or in currency of payment of income, or in currency of RF in accordance with the official course of CB of RF at the date of tax transfer (article 310 Chapter 25 of Tax Code of RF part two).

5. Peculiarities of taxation procedure for tits category of security owner	Total amount of tax from the amount of dividends is determined as product of rate, tax and difference between the sum of dividends subject to distribution between shareholders (participants) in current tax period reduced by the sum of dividends subject to payment by the fiscal agent in current reported (tax) period and the sum of dividends received by the fiscal agent in the current reported (tax) period and previous reported (tax) period in case these sums did not previously participate in calculation at determination of taxable income in form of dividends. In case the difference obtained is negative no liabilities on payment of tax arises and no remuneration from the budget takes place.	Avoidance of double taxation. For exemption from taxation or application of preference taxation procedure the tax payer (foreign organization) is to submit acknowledgement (f the date of payment of income) of the fact that he is resident of the state which the Russian Federation has international agreement regulating taxation issues to the fiscal agent who pays income. Such acknowledgement is no be authenticated by relevant authority of the foreign state. In case no acknowledgement is submitted before the date of income payment the fiscal agent is to deduct tax on income of the foreign organization. In accordance with paragraph 2 of article 312 of the Tax Code of RF (part two) the foreign recipient of income has a right of reimbursement of the previously deducted tax on income paid earlier within 3 years from the moment of termination of taxation period during which the income was paid, on the assumption of submission of the corresponding documents (list provided in article 312 of Tax Code of RF (part two) to the taxation body at the place of registration of the fiscal agent. The reimbursement of previously deducted or paid tax is carried out within a month from the date of submission of application and the abovementioned documents.
6. Legislative and standard acts regulating taxation procedure of indicated income.	Chapter 25 "Tax on income of organizations" of the Tax Code of RF (part two).	

Table 2. Taxation of income of natural persons on floated securities in form of dividends in accordance with legislation which was in effect in 2004.

№№	Category of securities owner	
	Legal entities – tax residents of RF	Natural persons gaining income from sources located in RF who are not tax residents of RF.
1.Name of income from floated securities	Dividends	
2.Name of tax on income from securities	Tax on income of natural persons	
3. Tax rate	6 %	30 %
4.Procedure and terms of tax payment	The responsibility to deduct the sum of tax from the income of taxpayer and to pay it to the corresponding budget is laid at the Russian organization being a source of income of the taxpayer in form of dividends (fiscal agent). The charged sum of tax is deducted from the taxpayer's income at factual payment of dividends. Fiscal agents must transfer the sums of computed and deducted tax not later than the date of factual receipt of cash assets for tax payment in the bank and the date of transfer of income from the accounts of fiscal agents in the bank to the accounts of taxpayer or on behalf on him to the accounts of third persons in banks (article 226 Chapter 23"Tax on income of natural persons" Tax Code of RF (part two).	
5. Peculiarities of taxation procedure for tits category of security owner	Total amount of tax from the amount of dividends is determined as product of rate, tax and difference between the sum of dividends subject to distribution between shareholders (participants) in current tax period reduced by the sum of dividends subject to payment by the fiscal agent in current reported (tax) period and the sum of dividends received by the fiscal agent in the current reported (tax) period and previous reported (tax) period in case these sums did not previously participate in calculation at determination of taxable income in form of dividends. In case the difference obtained is negative no liabilities on payment of tax arises and no remuneration from the budget takes place (article 275 of Tax Code of RF (part two).	Avoidance of double taxation. For exemption from taxation, receipt of tax deductions or other tax benefits the taxpayer is to submit to the bodies of the Ministry of Tax and Fees of the Russian Federation official acknowledgement of the fact that he is resident of the state with which the Russian Federation concluded agreement on avoidance of double taxation which is in effect during the corresponding taxation period (or its part). Such acknowledgement may be submitted before the tax payment of within one year after termination of the taxation period at the outcomes of which the taxpayer claims exemption from taxation, tax deductions and benefits (article 232 Chapter 23 of Tax Code of RF (part two).
6. Legislative and standard acts regulating taxation procedure of indicated income.	Chapter 23 "Tax on income of natural persons" of the Tax Code of RF (part two) article 275 of Tax Code of RF.	

Table 3. Taxation of legal entities of income obtained from selling floated securities and interest rates on bonds of the issuer in accordance with legislation which was in effect in 2004.

№№	Category of securities owner	
	Legal entities – tax residents of RF	Foreign legal entities (no-residents) collecting revenues from sources located in the territory of the Russian Federation
1.Name of income from floated securities	Incomes from transactions of selling securities and interest rates of the issuer's bonds	Profits from selling shares of Russian organizations more than 50 % of assets of which consists of immovables located on the territory of the Russian Federation and interest rates on the issuer's bonds
2.Name of tax on income from securities	Income tax	
3. Tax rate	24 %, 5 % of which is entered in federal budget; 17 % - in budgets of subjects of the Russian Federation, 2 % - in local budgets. Legislative acts of the subjects of RF are authorized to reduce by as much as 13 % the tax rate for certain categories of taxpayers as far as amounts of taxes put in budgets of subjects of RF.	20 %
4.Procedure and terms of tax payment	Tax subject to payment on the expiry of the taxation period is paid not later than the date stipulated by article 289 of tax Code of RF for submission of taxation declarations for the corresponding taxation period. Advance payments at the outcomes of the reported period are paid not later than the date set for submission of taxation declarations for the corresponding reported period. Monthly advance payments are paid not later than the 28th day of every month of the current reported period. Taxpayers calculating their monthly advance payments by factually obtained income pay advance payments not later than the 28th day of the month following the month at the outcomes of which the calculation of tax is carried out. At the outcomes of the reported (tax) period amounts of monthly advance payments paid within the reported (tax) period are taken into account at payment of advance payments at the outcomes of the reported period. Advance payments at the outcomes of the reported period are taken into account against payment of tax at the outcomes of the taxation period.	Russian organization or foreign organization carrying out activity in the Russian Federation through permanent representation (fiscal agents) paying income to the foreign organization deduct the amount of tax from the income of that foreign organization at every payment (transfer) of monetary funds or at receipt of income by the foreign organization. Fiscal agent is obliged to transfer the corresponding sum of tax within three days after the day of payment (transfer) of monetary funds to the foreign organization or other receipt of income by the foreign organization.
5. Peculiarities of taxation procedure for tits category of security owner		At submission of acknowledgement of the fact that the foreign organization has permanent location in the state which has international agreement with the Russian Federation regulating taxation issues as far as income for which preferred treatment of taxation in RF is stipulated, to the fiscal agent before the date of payment of income exemption of taxes from the source of payment or exemption of tax at reduced rates is carried out.
6. Legislative and standard acts regulating taxation procedure of indicated income.	Chapter 25 of the Tax Code of the Russian Federation "Tax on income of organizations"	

Table 4. Taxation of income of natural persons from selling of floated securities and interest rates on bonds of the issuer in accordance with legislation which was in effect in 2004.

№№	Category of securities owner	
	Natural persons – tax residents of RF	Natural persons gaining income from sources located in the Russian Federation which are not tax residents of RF.
1.Name of income from floated securities	The following are considered incomes from sources in RF: - Interest obtained from Russian organization and interest obtained from Russian individual entrepreneurs and (or) foreign organization as a result of activity of its permanent representation office in RF; - Income gained from selling shares or other securities and market hares in authorized capital stocks of organization in RF..	
2.Name of tax on income from securities	Tax on income of natural persons	

3. Tax rate	13 %	30 %
4.Procedure and terms of tax payment	Calculation and payment of the amount of tax are carried out by fiscal agent at termination of the taxation period (calendar year) or at carrying out payment of monetary funds of the taxpayer before the termination of recurrent taxation period. At payment of monetary funds before termination of recurrent taxation period the tax is paid based on the share of income corresponding to the factual amount of monetary funds paid.	
5. Peculiarities of taxation procedure for tits category of security owner	At lack of documentary acknowledgement of expenses the natural person is authorized to use deduction of property tax in the amount obtained at selling securities but not exceeding 125000 RUR. At selling securities owned by the taxpayer for three or more years the property tax deduction is provided in the amount obtained by the taxpayer after selling securities. At selling property which is common share ownership or common joint ownership the corresponding amount of property tax deduction is distributed amount the co-owners of that property proportionally to their share or in accord between the co-owners.	Avoidance of double taxation. For exemption from taxation, receipt of tax deductions or other tax benefits the taxpayer is to submit to the bodies of the Ministry of Tax and Fees of the Russian Federation official acknowledgement of the fact that he is resident of the state with which the Russian Federation concluded agreement on avoidance of double taxation which is in effect during the corresponding taxation period (or its part). Such acknowledgement may be submitted before the tax payment of within one year after termination of the taxation period at the outcomes of which the taxpayer claims exemption from taxation, tax deductions and benefits.
6. Legislative and standard acts regulating taxation procedure of indicated income.	Chapter 23 of Tax Code of RF "Tax on income of natural persons".	

8.9. Information on announced (accrual) and on paid dividends on issuer's shares and on issuer's bond profits

For the past 5 accomplished fiscal years JSC "Kuzbassenergo" paid dividends for equities only at the outcomes of year 2000. The decision on payment of dividends was made at annual general meeting of shareholders on June 8th, 2001 (Minutes # 8 of 08.06.2001). Dividends were imposed in the amount of 0,071 RUR for one equity of the Company in money form until 07.09.2001. The total amount of dividends: 43037 thousands RUR as of 31.12.2004, total of dividends paid: 42929 thousands RUR, including by years:

2001 - 35189 thousands RUR;

Report on results of voting at the extraordinary general meeting of shareholders of the Kuzbass open joint stock company of energy and electrification

Full company's name and location: Kuzbass open joint stock company of energy and electrification, № 30, GSP-2, Kemerovo, 650000, Russia
Type of general meeting: extraordinary
Form of meeting holding: absentee voting
Postal address where completed ballots were sent: JSC "Central Moscow Depository" , №34, stroienye 8, Bolshaya Pochtovaya str., Moscow, 105082, Russia

Agenda of general meeting:
1. **On reorganization of JSC "Kuzbassenergo" in the form of segregation, on procedure and terms of segregation, on establishment of new companies** (including JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" and JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)"), **on stock floatation of the created companies and on the procedure of floatation, on approval of divided balance.**

2. On reorganization of JSC "Kuzbassenergo" in the form of segregation, on procedure and terms of segregation, on establishment of new companies (without establishment of JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" and JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)"), **on stock floatation of the created companies and on the procedure of floatation, on approval of divided balance".**

3. On payment (announcement) of dividends for the shares of the Company at the outcome of 9 months of 2005.

In accordance with art.56 of the federal Law "On Joint Stock Companies" dd.26 of December 1995 № 208-FL, the registrator of the company, i.e. JSC "Central Moscow Depository" performed the duties of the counting board.

Location of registrator: №3 corpus B, Orlickov pereulok, Moscow, 105078

Authorized person of registrator – Volneikin Segrey Vicktorovich.

List of persons who have right to participate in the general meeting of shareholders was drew up on the condition of the shareholders register of the Company in the 14th of November 2005.

Vote's number belong to the persons included in the list of the persons who had right to participate in the general meeting of shareholders of the company for each question of agenda amounted 606 163 800.

Vote's number belong to the persons who participated in the general meeting for each question of agenda amounted 565 588 381 (quorum was completed over all the questions of agenda).

In accordance with paragraph 10.10 of the Articles of Association this is Chairman of the Board of Directors of the JSC "Kuzbassenergo" Mr. Vagner Andrey Alexandrovich acts as a chairmen of the extraordinary general meeting of shareholders. According to the resolution adopted by the Board of Directors of JSC "Kuzbassenergo" dd. 29 of November 2005, the secretary of the extraordinary general meeting of shareholders is Mr. Golofast Dmitry Yakovlevich.

General meeting of shareholders by voting on the **first question of agenda** accepted the following decision:

1. **To reorganize JSC "Kuzbassenergo" by means of segregation:**
- JSC "Kuzbassenergo – regional electricity supplying company";
- JSC "Kuzbass energy distributing company";
- JSC "Main power lines of Kuzbassenergo";
- JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)";

- JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)".

2. To establish the following procedure and terms of segregation:

2.1. Stock floatation of the created companies is carried out in the procedure and on terms prescribed by article 4 of the present resolution.

2.2. Part of property, rights and obligations of the Company are transferred to the segregated companies in accordance with the divided balance.

2.3. The procedure of preparation for and holding general meetings of shareholders of the companies created as well as the voting procedure on issues of the agenda of specified meetings of shareholders is stipulated by the given resolution (article 3) and the Statute of JSC "Kuzbassenergo".

2.4. Within 3 days after the decision on reorganization of the Company by means of segregation is taken by the General meeting of shareholders, the General director of the Company notifies the taxation authority about the decision taken.

2.5. Not later than 30 days of the date of the decision-making on the issue of reorganization in the form of segregation the general director notifies the creditors of the Company on making the decision through sending in the announcement via registered letter and publishes the announcement on reorganization of the Company in print assigned for publishing information on state registration of legal entities.

2.6. Within 30 days of the date of publishing of the announcement on the decision made or within 30 days of the date the announcement was send to them creditors of the Company have a right to demand termination or advance execution of the corresponding liabilities of the Company and repayment of damages. Based on the demands received from the creditors the Company draws up the register of demands both satisfied and being subject to satisfaction.

2.7. General director notifies employees of JSC "Kuzbassenergo" of taking the decision on reorganization of JSC "Kuzbassenergo" and carries out a complex of activities connected with formalizing labor relations in accordance with the Labor Code of the Russian Federation.

2.8. In accordance with article 1 of clause 75 of Federal Law "On joint stock companies" shareholders of the Company who voted against the decision to reorganize the Company or who did not participate in voting on the given issue have a right to demand full or partial redemption of shares held by them from the Company in the procedure prescribed by Board of Directors of the Company in accordance with the requirements of the legislation of the Russian Federation in the announcement on holding an extraordinary general meeting of shareholders of the Company.

Redemption of shares is carried out in accordance with the price stipulated by the Board of Directors of the Company in accordance with article 3 of clause 75 of Federal Law "On joint stock companies".

Bought out shares are paid off at the moment of redemption and the shares of the created companies are not subject to allocation among them.

2.9. The report on overall results of redemption of shares of the Company is approved by the Board of Directors of the Company within 5 days of the date of paying off the bought out shares.

As a result of paying off bought off shares the authorized capital stock of JSC "Kuzbassenergo" is diminished to the amount of nominal value of the shares paid off.

3. To establish the following legal entities:

- JSC "Kuzbassenergo – regional electricity supplying company";
- JSC "Kuzbass energy distributing company";
- JSC "Main power lines of Kuzbassenergo";
- JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)";
- JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)".

3.1. To determine that the quantitative composition of the board of directors of each of the created companies equals 11 persons.

To determine that the quantitative composition of the revision committee of each of the created companies equals 5 persons.

3.2. To determine that shareholders (shareholder) of JSC "Kuzbassenergo" being in the aggregate holders of 2 or more per cent of common shares of JSC "Kuzbassenergo" have a right to forward to the address of the Company suggestions on nomination of candidatures for election of members of the board of directors of each of the created companies (up to 11 candidatures for each of the created companies) and members of the revision committee of each of the created companies (up to 5 candidatures for each of the created companies), as well as candidatures for the positions of general directors of each of the created companies (not more than 1 candidature for each of the created companies). Such suggestions must be received by the company not later than March 15, 2006.

Only candidatures who were nominated in accordance with the prescribed requirements and suggestions on whom were received within the deadline prescribed by the present resolution, by the shareholders (shareholder) being in the aggregate holders of 2 or more per cent of common shares of JSC "Kuzbassenergo"at the moment of nomination are subject to inscription in voting papers for the general meetings of shareholders.

The mentioned nominations are to be inscribed in written form with indication of the name (title) of the nominating shareholders (shareholder) and the number of common shares of JSC "Kuzbassenergo" owned by them (him/her).

In case the indicated suggestions on nomination are signed by a representative of the shareholder they should be accompanied by power of attorney (copy of power of attorney attested in prescribed order), arranged in accordance with the requirements for drawing up of a power of attorney for voting of the Federal Law "On joint stock companies".

In case the indicated suggestions on nomination are signed by a shareholder (shareholders) whose share rights are taken account of in accordance with the deposit account in depositary, such suggestion should be accompanied by the extract of deposit record of the shareholder in depositary carrying out the registration of rights of the mentioned shares.

The suggestion on nomination of the indicated candidates must contain:

- name of the created company, in the bodies of which the candidates are nominated;
- last name, first name, patronymic and the principal place of business of each of the nominated candidates;
- name of the body for which the candidate is nominated.

The Board of Directors of the company must review the suggestions received and take the decision on inclusion or on the refusal to include the nominated candidatures in the list of candidates for the election in the bodies of the created company by March 20, 2006.

The nominated candidates are subject to inclusion in voting papers for the election in the corresponding body of the created companies with the exception of the following cases:

- when the nomination does not correspond to the requirements prescribed by the present article;
- when the nomination of shareholders (shareholder) is received by the Company later than March 15, 2006;
- when the shareholders (shareholder) do not in the aggregate own the necessary amount of shares of JSC "Kuzbassenergo".

Reasoned decision of the Board of Directors of the Company on refusal to include the nominated candidates in the list of candidatures for voting in the elections for the specific body of the created companies is forwarded not later then March 23, 2006 to shareholders (shareholder) who nominated the candidate.

3.3. At general meetings of shareholders of the created companies the functions of the counting commission are executed by the registrar of the Company – Joint Stock Company "Central Moscow Depositary".

3.4. It must be determined that at voting during general meetings of shareholders of the created companies on issues of approval of the Statute of the created company, of election of members of the revision commission or of election of general director, each common share of the created company subject for floatation gives the shareholder of the created company being the holder of common shares one vote.

The decision on issues of approval of the Statute of the created company, on election of the general director and members of the revision commission is taken by the general meeting of shareholders with the majority of votes of shareholders of the created company – holders of common shares participating in the general meeting of shareholders of the created company.

3.5. It must be determined that elections of members of the board of directors of the created companies are carried out by cumulative voting. At cumulative voting the number of votes of every shareholder of the created company – holder of common shares is multiplied by the number of persons to be elected in the board of directors of the company in accordance with article 3.1. of the present resolution and the shareholder of the created company owning common shares has a right to give all of his/her votes for one candidate or to distribute them among two or more candidates.

The 11 candidates collecting the largest number of votes are considered elected for the board of directors of the created company.

3.6. General meetings of shareholders of the created companies are authorized (muster a quorum) on condition that shareholders of the created companies possessing in the aggregate more than half of votes subject to floatation of common shares of the corresponding created company, participated in the elections.

Shareholders of created companies registered for participation in the general meeting and shareholders whose voting papers were received by the Company not later than two days before the date of the general meeting of shareholders of the created company are considered to have taken part in the general meeting of shareholders.

3.7. At decision-making on issues connected with holding general meetings of shareholders of the created companies which are not stipulated by the present resolution, standard acts of the Russian Federation regulating similar relations (by analogy) are to be used.

4. To establish the following procedure of floatation of shares of the created companies:

4.1. Shares of the newly established JSC "Kuzbassenergo - regional electricity supplying company", JSC "Kuzbass energy distributing company", JSC "Main power lines of Kuzbassenergo", JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)", JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" are distributed among the shareholders of JSC "Kuzbassenergo" including the shareholders who voted against or not having participated in voting on the issue of reorganization of the Company, proportionally to the number of shares of the Company owned by them.

To establish the following coefficients of distribution of common shares of JSC "Kuzbassenergo – regional electricity supplying company", JSC "Kuzbass energy distributing company", JSC "Main power lines of Kuzbassenergo", and their nominal value:

counting for every common share of JSC "Kuzbassenergo" the following are simultaneously subject to distribution:

1 (one) common share of JSC "Kuzbassenergo – regional electricity supplying company", with nominal value of 2, 9 RUR,

1 (one) common share of JSC "Kuzbass energy distributing company" with nominal value of 0,05 RUR,

1 (one) common share of JSC "Main power lines of Kuzbassenergo" with nominal value of 1 RUR,

4.2. The number of shares of JSC "Kuzbassenergo – regional electricity supplying company", JSC "Kuzbass energy distributing company", JSC "Main power lines of Kuzbassenergo" of the specific category (type) which every shareholder of JSC "Kuzbassenergo" is to receive is equal to the number of shares of "Kuzbassenergo" of the corresponding category (type) owned by him/her.

4.3. Shares of the newly established JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" are floated in the following way:

- JSC "Kuzbassenergo" purchases 303 081 901 common shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)", 303 081 091 common shares of JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" and also purchases the shares of the newly established companies in accordance with the procedure prescribed by article 4.11 of the present resolution;
- other common shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" subject to floatation are distributed among the shareholders of JSC "Kuzbassenergo" in accordance with articles 4.4., 4.5., 4.8. of the present resolution.

Nominal value of 1 (one) common share of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" – 1, 5 RUR.

Nominal value of 1 (one) common share of JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)"- 0, 9 RUR.

4.4. Every shareholder who participated in voting on the issue of reorganization of JSC "Kuzbassenergo" and didn't vote against taking the decision on reorganization is to receive shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" in the number calculated in the following way:

$$X = \frac{A}{B-C} \times D$$

Where :

X – the number of shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)", JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" to be received by the shareholder who participated in voting on the issue of reorganization of JSC "Kuzbassenergo" and didn't vote against taking the decision on reorganization;

A – the number of shares of JSC "Kuzbassenergo" owned by the shareholder at the date of state registration of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" accordingly;

B – total amount of shares of JSC "Kuzbassenergo" at the date of state registration of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" (with the deduction of the shares being the property of or being at the disposal of JSC "Kuzbassenergo");

C – total number of shares of JSC "Kuzbassenergo"owned by the shareholders who voted against taking the decision on reorganization or did not participate in voting on this issue, at the date of state registration of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" accordingly;

D – total amount of shares of the newly established company (JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)"or JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" subject to distribution among the shareholders of JSC "Kuzbassenergo" (resulted at calculation in accordance with the regulations of paragraph 1 of article 4.5. of the present resolution, minus total number of shares or the corresponding newly established company subject to purchase by JSC "Kuzbassenergo" and distribution among the shareholders of the Company who voted against taking the decision on reorganization or didn't take part in voting on this issue).

In case at calculating the number of shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)" that is to be received by the shareholders of JSC "Kuzbassenergo" at the result of distribution, the number of shares of any shareholder turns out to be fractional the fraction is not taken into consideration.

In case in the result of rounding-up a shareholder does not obtain any share of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" or JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)", such shareholder receives one share of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and one share of JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)".

4.5. The total number of shares of each of the newly established companies subject to floatation equals the number of shares of JSC "Kuzbassenergo" at the moment of taking the decision on reorganization (minus the number of shares beign the property or being at the disposal of JSC "Kuzbassenergo").

At that the total number of shares of JSC "Zapadno-Sibirskaya TETs (West Siberian Thermoelectric power station)" and JSC "Yuzhno-Kuzbasskaya GRES (South Kuzbass hydroelectric power station)"subject to floatation may be increased in case the sum of shares of the indicated companies subject to floatation, calculated in accordance with articles 4.3., 4.4. turns out to be larger than the number of shares subject to floatation in accordance with paragraph 1 of the present resolution.

4.6. The amount of the authorized capital stock of each of the newly established companies is determined through multiplication of the total number of shares of the specific company subject for floatation by the nominal value of one share.

4.7. The authorized capital stock of the newly established companies are formed at the expense of the funds of additional capital.

4.8. In accordance with paragraph 3 article 3 clause 19 of Federal Law "On joint stock companies" shares of each of the newly established companies in the number equal to the number of shares of the Company owned are subject to distribution among the shareholders of the company who voted against taking the decision on reorganization of the Company or did not participate in voting on this issue.

4.9. Common shares or the newly established companies will grant their owners the following rights:

1. to participate in the General meeting of shareholders of the company personally or through representation with the right to vote on all the issues under the competence;
2. to put forward suggestions into the agenda of the general meeting of shareholders in the procedure prescribed by the legislation of the Russian Federation and the Statutes of the company;
3. to obtain information on activities carried out by the company and to review the documentation of the Company in accordance with article 91 of the Federal Law "On joint stock companies", as well as other standard acts and the Statute of the company;
4. to collect dividends announced by the company;

5. of preferred purchase of excess shares floated through open subscription and emissive securities convertible into shares, in the number proportional to the number of shares of this category (type) owned by them;
6. in case of liquidation of the company to receive part of its property;
7. to realize other rights prescribed by the legislation of the Russian Federation and the Statute of the company.

4.10. The shares of the Company, property right for which has passed on to new owners after taking the decision on reorganization of the Company and before the moment of state registration of the newly established companies, give their owners the same scope of rights as of the shareholders who voted for taking the decision on reorganization of the Company.

4.11. The shares of the companies that were not distributed among the shareholders of the Company are declared as being purchased by JSC "Kuzbassenergo".

4.12. The shares of the newly established companies at the moment of state registration of the companies established as the result of reorganization on the basis or the data contained in the register of shareholders of JSC "Kuzbassenergo" at the corresponding date are considered floated (distributed among the shareholders of JSC "Kuzbassenergo", purchased by JSC "Kuzbassenergo").

To approve the dividing balance.

Voted: FOR: 564 168 939 (99,7490%)
AGAINST: 521 966 (0,0923%)
ABSTAIN: 430 710 (0,0762%)

General meeting of shareholders did not make decision by voting over the second question of agenda.

Voted: FOR: 1 784 961 (0,3156%)
AGAINST: 562 614 277 (99,4742%)
ABSTAIN: 551 350 (0,0975%)

General meeting of shareholders took decision by voting over the third question of agenda:

To pay dividends for the ordinary shares of the JSC "Kuzbassenergo" at the outcome of 9 months of 2005 in amount of RUR 0,670461 for one ordinary share of JSC 'Kuzbassenergo" in cash within 60 days from the date of the decision's adoption.

Voted: FOR: 565 322 381 (99,9530%)
AGAINST: 33 600 (0,0059%)
ABSTAIN: 148 400 (0,0262%)

1.3. Information about the issuer's auditor

The auditor's company name: **The Public Cooperation Company "Unicon"**

The PCC "Unicon" is registered by the inspection № 26 of the RF Ministry of Taxation of the Southern district of Moscow.

The certificate of the auditor's being reckoned in the State Register of legal entities: dd 09.17.2003, series- 77 № 006871546, state file number -1037739271701.

Location: 117545, Russia, Moscow, Varshavskoye road, 125.

Telephone number :(095) 3197290, 3195690, 7975665;

Fax: **(095) 3195909, 7975660;**

E-mail: **reception@bdo.ru**

License data:

License number: **E 000547 for auditorial practice**

Issue date: **06.25.2002**

Expiration date: **06.24.2007**

Licence body: **The RF Ministry of Treasury**

The PCC "Unicon" audited collated bookkeeping accounts of the JSC "Kuzbassenergo" for 2003. The audit was carried out according to the Federal Law №119 on auditorial practice dd 08.07.2001 and federal auditorial standards confirmed by the Government Decree № 696 dd 09.23.2002, also other legal acts regulating auditorial practice and the auditor's own standards.

Procedure of the auditor elections:

According to the article №10 of the Company's Charter the auditor's candidature is approved by the Shareholders Assembly.

The Federal Law on Joint Stock Companies does not determine term and nominating procedure, also this act does not concede a right of nominating a candidate to the shareholders.

For this reason the auditor's candidature is determined by the Board of Directors while discussing questions of preparing and holding annual shareholders meeting.

The auditor is independent from the issuer.

Factors of the auditor's independence: According to the article №12 of the Federal Law on auditorial practice dd 02.07.2001, auditorial examination cannot be carried out:

1) *by auditors presenting founders (participants) of the issuer, its administration bodies, accountants, and other persons responsible for bookkeeping and financial accountancy;*
2) *by auditors being in close relationships (parents, spouses, brothers, sisters, children, also brothers, sisters, parents and children of spouses) with founders (participants) of the issuer, its office personnel, accountants and other persons responsible for bookkeeping and financial accountancy;*
3) *by auditorial organizations whose administration and office personnel presents founders (participants) of the issuer, its office personnel, accountants and other persons responsible for bookkeeping and financial accountancy;*
4) *by auditorial organizations whose administration and office personnel is in close relationships (parents, spouses, brothers, sisters, children, also brothers, sisters, parents and children of spouses) with founders (participants) of the issuer, its office personnel, accountants and other persons responsible for bookkeeping and financial accountancy;*
5) *by auditorial organizations whose founders (participants) are presented by the issuer, by auditorial organizations being the founders (participants) of the issuer, also in respect of subsidiaries and affiliated companies of the issuer and in respect of organizations having the same founders as the auditorial organization;*
6) *by auditorial organizations and independent auditors who had been engaged in bookkeeping and financial accountancy of the issuer for 3 years preceding the auditorial examination.*

There are no serious interests connecting the auditor (the auditor's office personnel) and the issuer (the issuer's office personnel).
The auditor has no share in the issuer's authorized capital.
The issuer did not provide the auditor with credits.
There are no family or business relations between the auditor and the issuer.
The issuer's office personnel don't coincide with the auditor's one.
The payment of the auditor's services is assigned by the issuer's Board of Directors; there are no postponed or expired payments.
The auditor carries out control over the issuer's financial and economic activities under a right in the Federal Law and according to their agreement.
Concerning the results of auditorial examination the auditor makes a report including:
-acknowledged authenticity of the data presented in the issuer's financial accounts;
-information about violation of bookkeeping and accountancy procedure prescribed by the RF legal acts, also about violation of the RF laws regulating financial and economic activity.

1.4. Information about the issuer's valuator

The valuator's company name: **The Public Cooperation Company "ENPI Consult".**
Location: **115191, Moscow, Dukhovsky by-st., 14.**
Telephone number/ fax: **(095)9521041/ (095)9544408.**
E-mail: **npg@npg.ru**
License data:
License number: **000031**
Issue date: **08.06.2001**
Expiration date: **08.06.2004**
License body: **The Ministry of Property Affairs**
Information about evaluation services:
Revealing the replacement value of fixed assets with regard to 01.01.2000, consulting concerning revaluation of a part of long-term capital;
Revealing the replacement value of fixed assets with regard to 01.01.2001, consulting concerning revaluation of a part of long-term capital;
Revealing the replacement value of fixed assets with regard to 01.01.2002, consulting concerning revaluation of a part of long-term capital;

Revealing the total replacement value of fixed assets with regard to 01.01.2003, consulting concerning revaluation of the issuer's long-term capital according to The Regulations on cash management (6/01). Revealing the total replacement value of fixed assets being on balance of the JSC "Kuzbassenergo" with regard to 01.01.2004, consulting concerning revaluation of the issuer's long-term capital according to The Regulations on cash management (6/01).
Calculation of the total replacement value was carried out on the ground of the valuator's analyzing enlarged inventory tables, accountancy documents and evaluating task, also on the ground of technical condition of the objects presented by the JSC "Kuzbassenergo".
Evaluation was carried out under a right in the Federal Law №135 on evaluating practice in the Russian Federation dd 07.29.1998, also according to evaluating standards obligatory for valuators (the Government Decree №519 dd 07.06.2001), basic principals enumerated in the International Evaluating Standards (IES1-IES4), also according to the Standards for Professional Practice and the Ethic Code of the Russian Evaluating Association.
The valuator was not engaged in the issue of 1995.

1.5. Information about the issuer's consultants

Financial and other consultants of the Share Market were not engaged by the issuer.

1.6. Information about subscribers of the quarterly report
Chief Accountant-**Rumova Alevtina Nikolaevna**
Telephone number: **(384-2)293358**
Fax: **(384-2)293777**

II GENERAL INFORMATION ON THE FINANCIAL AND ECONOMIC SITUATION OF THE ISSUER

2.1. Figures of financial and economic activity of the issuer

Figures	Calculation method	End of financial period/III quarter
Net assets value, roubles	The Procedure established by the Monetary Fund of the Russian Federation and The Federal Committee for joint stocks	25524373000
Ratio of the yield assets to the authorized capital and reserves, %	(form (f)№1 page (p) 590+ f№1 p690- f№1 p650- f№1 p640)/(f№1 p490+ f№1 p650+ f№1 p640)*100	30.41
Ratio of short-term liabilities to the authorized capital and reserves, %	(f№1 p690- f№1 p650- f№1 p640)/(f№1 p490+ f№1 p650+ f№1 p640)*100	21.54
Payouts on promissory notes, roubles	(f№2 p190+repay-dividents)/(f№1 p620+ f№1 p610+ f№2 p070)	-0.07
Level of the expired account payable, %	Sum of the account payable/(f№1 p590+ f№1 p690- f№1 p650)*100	1.34
Net assets circulation	f№2 p010/sum of the net assets	0.13
Circulation of the account payable	f№2 p020/(f№1 p520+ f№1 p620+ f№1 p510+ f№1 p610)	0.49
Circulation of the account receivable	f№2 p010/(f№1 p230+ f№1 p240- f№1 p244)	0.83
Share of yield tax in total yield before taxation, %	f№2 p151/ f№2 p140*100	-6.84

By termination of financial period the value of the issuer's net assets had been reduced at 222453 rubles as compared with II quarter of 2004. The amount of the net assets with regard to 09.30.2004 was 42 times more than the Authorized capital of the Company, that speaks for its financial stability. For the financial period some figures denoting financial dependence of the Company from credits were also reduced. In III quarter the circulation of the account payable remained on the same level. A positive factor presents low level of the expired account payable and the Company's capacity to satisfy its liabilities without significant delays.

2.2. Market capitalization of the issuer

Ordinary stock trading takes place in:

Company names of trading organizers: ***The Ordinary Partnership "Stock Exchange of the Russian Trade Union (RTU)";***

The Public Cooperation Company "Moscow Interbank Foreign Exchange";

The Ordinary Partnership Stock Exchange "Saint-Petersburg".

The Ordinary Partnership "Stock Exchange of the RTU": The ordinary stock of the JSC "Kuzbassenergo" is dealt on the Classic Market System and is in the list for calculating the Index of the Stock Exchange of the RTU. The ordinary stocks were entered in the list "the Stock Exchange of the RTU -2" in 06.23.1997 and excluded in 01.04.2000 to be included in the "Classic Market List".

With regard to 1999 market capitalization is calculated on the ground of 10 most important transactions carried out by the RTU during the last 3 months and presents 52002792 USD.

With regard to 2000 market capitalization is calculated on the ground of 10 most important transactions carried out by the RTU in December, 2000 and presents 49483720 USD.

With regard to 2001 market capitalization is calculated on the ground of 10 most important transactions carried out by the RTU during the last 3 months and presents 72460821 USD.

In 2002 there were 129 transactions carried out by the RTU including 3 of them in December and 6 transactions for the last 3 months, i.e. the issuer's market capitalization for 2002 is calculated on the ground of stock buying price determined by the Stock Exchange of the RTU with regard to 12.31.2002 (0.19$*606163800=115171122$).

During the period of 10.01.2003-12.31.2003 there was registered 1 transaction in the Stock Exchange of the RTU with total sale volume of 5000 stocks or 2500 USD.

There were registered 3 transactions in the Stock Exchange "Saint-Petersburg" with total sale volume of 23400 stocks or 11712.56 USD.

As for this financial period there were registered less than 10 transactions with ordinary stocks of the JSC "Kuzbassenergo", market capitalization is calculated on the ground of stock buying price determined by the Stock Exchange of the RTU with regard to 12.31.2003 (0.48$*606163800=290958624$).

In I quarter of 2004 there were registered 3 transactions in the Stock Exchange of the RTU, market capitalization is calculated by analogy with the account of 2003 and presents 0.674$*606163800=408554401$.

In II quarter of 2004 there were registered 10 transactions in Stock Exchange of the RTU with total sale volume of 455300 stocks or 301333 USD including 1 transaction in June. Thus market capitalization for II quarter is calculated on the ground of stock buying price with regard to 06.30.: 0.6000$*606163800=363698280$.

*In III quarter of 2004 there were registered 2 transactions with total sale volume of 32440 stocks or 19997 USD including in June and 2 transactions in September. Thus market capitalization for III quarter is calculated on the ground of stock buying price with regard to 09.30.: 0.61100*606163800=370366082$.*

2.3. The issuer's liabilities

2.3.1. Account payable with regard to 09.30.2004

Creditor's company name	Location	Sum of account payable, roubles	Expired payment	Fines	Affiliated or not	Share in the issuer's Authorized capital
The Russian Stock Company "United Power Systems of the Russian Federation"	Moscow	1290372000	0	0	affiliated	49%

The account payable of the issuer (including credits and loans) is reduced at 515263 rubles in comparison with the previous period, including obligations to suppliers and contractors-at 532352 roubles, to subsidiaries and affiliated business divisions- at 37977 roubles.
The basic increase of the account payable in III quarter:
-payments to budget and non-budget funds -132789 roubles;
-payments on bills given to suppliers and contractors as repayment-127162 roubles;
-salary payments-5708 roubles.
In III quarter the share of expired account payable is reduced from 1.7% to 1.34% with its abatement of 25687 roubles in absolute value.

2.3.2. Credit history of the issuer

Figures	With regard to 09.30.2004
Net assets value with regard to the end of financial period, roubles	25524373000
Assets on loan, in all, roubles	2061026000
Assets on loan share in net assets value, %	8.07

The JSC "Kuzbassenergo" did not make credit or loan contracts with total sum of payment composing 10 and more percent of net assets value.
In September 20 the Board of Directors arrived at a decision concerning Company's Credit Policy and establishing the credit limit for IV quarter of 2004:

1. *To approve participation of the JSC "Kuzbassenergo" in replenishing circulating credit assets with total sum of about 1480 mln roubles in the following banks:*

-The Stock Investment Bank "Kuzbassugolbank": sum-about 104.0 mln roubles, term- 6 months, interest earned-11.75%, with circulating assets in pledge;
-The JSC Bank "Uralsib": sum-about 300.0 mln roubles, term- 3 months, interest earned-11.0%, with circulating assets in pledge;
-The Stock Investment Bank of the RF, Kemerovo division: sum-about 700.0 mln roubles, term- 1 year, interest earned-11.0%, with circulating assets in pledge;
-The JSC Bank "Alemar": sum-about 20.0 mln roubles, term- 3 months, interest earned-11.5%, with circulating assets in pledge;
-The JSC Bank "Zenit": sum-about 200.0 mln roubles, term- 3 months, interest earned-11.75%, with circulating assets in pledge;
-The JSC "Alfa-bank", Kemerovo division: sum-about 126.0 mln roubles, term- 3 months, interest earned-13.0%, without security;
-The JSC "Vneshtorgbank": sum-about 30.0 mln roubles, term- 3 months, interest earned-12.5%, with circulating assets in pledge;
On condition that the JSC "Kuzbassenergo" is to pay off credits with total sum of 1480 mln roubles in IV quarter.
2. Change of banks-creditors is allowed in case of more suitable credit conditions without changing total credit sum and credit terms.

2.3.3. The issuer's liabilities against the third parties security
For financial period the issuer did not carry out transactions ensuring liabilities against the third parties security.

2.3.4. Other liabilities of the issuer
The issuer did not entered into contracts, including forward deals, that are not mentioned in accounting balance sheet and that can largely influence financial situation of the issuer, its liquidity, sources of investment, results of activity and expenditures.
2.4. The purpose of the issue and direction of the assets using resulted to distribution of the issuing securities
In the financial period the issuer did not carry out the issue to involve assets resulted to distribution of the issuing securities.
Since the official registration the issuer carried out 2 issues answering the following condition: to register a report of the issue results.

Issue number: 1
Type: ordinary
Kind of securities: registered
Par nominal value of 1 security: 1
Amount of securities: 3030819
Issue volume: 3030819
Information about the official registration of the issue:
Registration date: 07.25.1994
File number: 39-1n-00734
Registration body: financial organizations
Placement way: private subscription
Placement period: 01.12.1994-01.21.1994
Current situation of the issue: placement completed
Amount of placed issuing securities according to the official report of the issue results: 3030819
Information about the official registration of the report:
Registration date: 10.25.1999
Registration body: The National Bank of the Russian Federation

Issue number: 2
Type: ordinary
Kind of securities: registered
Par nominal value of 1 security: 1
Amount of securities: 603132981
Issue volume: 603132981
Information about the official registration of the issue:
Registration date: 11.23.1995
File number: 39-1-00970
Registration body: financial organizations
Placement way: distribution among shareholders
Placement period: 11.23.1995-11.23.1995
Current situation of the issue: placement completed
Amount of placed issuing securities according to the official report of the issue results: 603132981
Information about the official registration of the report:
Registration date: 03.27.1996
Registration body: financial organizations

2.5. Risks related with acquisition of the distributing (distributed) issuing securities

2.5.1. Branch risks

According to territorial peculiarities the JSC "Kuzbassenergo" carries out its activity only within the Russian Federation. The Company considers the most important changes in electric power industry to be reforming the Supranational Russian Stock Company "United Power Systems of the Russian Federation" and in particular single area companies including itself. Reforming the JSC "Kuzbassenergo" is based on detachment of some companies but with proportional distribution of their stocks among the shareholders of the JSC "Kuzbassenergo".

Besides the following factors can influence the issuer's activity:

- ***Possible entrance of large energy consumers into the Federal Wholesale Market of Energy and Power (FWMEP). Nowadays there are 2 branches of energy market in Russia: the FWMEP divided into 3 isolated price zones: European, Siberian and Far Eastern- and independent sector "5-15". The former's activity is strictly regulated and controlled by the Federal Energy Committee of the RF (FEC); the latter is established in November 1, 2003 as intervening stage between monopolized and independent market. Unlike the FWMEP this one is absolutely new sector based on principals of competition and independent pricing. For the present, only western regions of Russia can use it. Siberian region is sure to join them not earlier than in III quarter of 2004. Since 2000 The JSC "Kuzbassenergo" takes part in excess energy trading (buying) in the FWMEP. The only reason is economic expedience: it helps strengthening the***

balance between electric energy and power then reducing the cost price of its own energy generating. In 2003 the balance brought forward of the FWEMP was 5 billions 130 mln kilowatt (kW) p. h. with regard to own energy production of 24.9 billion kW p. h., that is 70% more than volumes determined by the FEC. At the expense of over the plan buying the power system managed to reduce cost price at 170 mln rubles. Entrance of large energy consumers into the FWMEP (the JSC Novokuznetsk Aluminum Plant and the Limited Liability Company "Metalenergofinance") caused some difficulties. Just the JSC Novokuznetsk Aluminum Plant consumed about 17% of electric energy. As a result for the last year the gross profit of loss of the JSC"Kuzbassenergo" composed about 200 mln roubles and it is bound to increase to 700-800 mln roubles in 2004. Possible mechanism of compensation transaction is just submitted for consideration to the Ministry of Economic Development and in is not known whether it will be ratified or not.

- *Changes in energy consumption among the groups of consumers caused by reducing the production volume of some industrial enterprises can lead to decrease of generating energy in money equivalence.*
- *Bankruptcy can lead to impossible indemnity of arrears for consumed energy.*
- *Lowering living standards of people of low economic status can lead to lowering the level of energy payment among this group of people.*
- *Inopportune and not quite indemnity of benefits presented to people according to the Government Decree.*
- *Risks related with change of energy tariffs which can badly influence financial and economic situation of the issuer. By Law tariff change is allowed to be carried out only once a year, moreover actual inflation level can exceed the planned one (determined by tariffs), that can lead to the gross profit of loss.*

2.5.2. Country and regional risks

The main factors of political and economic risks include imperfection of law system regulating economic affairs and court system, and variable taxation law.

The majority of economic factors are out of control of the issuer. Nobody can guarantee that recent trends in Russian economy including growth of the Gross Domestic Product, relative stability of the ruble and lowering inflation rate will remain in future. Besides variation of the world oil and gas prices, strengthening the ruble with regard to the US dollar, also weakening credit policy and other factors can badly influence Russian economy and the issuer's business activity.

Russian economy is not protected from market fluctuation and delaying economic development of other countries. According to precedents, financial problems or fear to invest developing countries can lead to reducing the amount of foreign investment and badly influence Russian economy.

Ecological factors are related with the issuer's basic activity, as generating and distributing electric and heat energy demands great amounts of natural resources and leads to environment pollution. To avoid ecological risks the issuer also needs investments to buy environment-friendly equipment and to pay for use of natural resources.

There are regional risks related with reforming the JSC "Kuzbassenergo". To avoid these risks the issuer's management bodies hold consultations with Regional and City Administrations. This activity is confirmed by the Administration Decree №54 on reforming the JSC "Kuzbassenergo" dd 04.26.2002 and by the Administration Decree №49 on reforming the JSC "Kuzbassenergo" and social security in power industry dd 03.28.2003, this project is supported by the list of demands of regional administration bodies to the management bodies of the Company.

In September 20 the Supranational Russian Stock Company "United Energy Systems of the Russian Federation", the JSC "Kuzbassenergo" and the Administration of Kemerovo Region signed trilateral agreement on further reforming.

According to the agreement the Administration of Kemerovo Region is to contribute to process of reforming the JSC "Kuzbassenergo", in particular while its separation.

Risks related to geographical peculiarities of the region:

-Risk of damage caused by natural disasters: risk of floods, risk of earthquakes.

-Risk of military conflict and state of emergency is considered to be less probable as ethnic and social situation in the region is not critical. But there is risk of terrorism, to minimize it the JSC "Kuzbassenergo" intensified safety arrangements in the most important objects. Special attention is

paid to power stations, large power substations, pumping stations, stores of combustibles and lubricants and other objects of this kind. Enterprises tightened the check-point procedure for motor transport and employees including the use of hand and fixed metal-detectors. Special barriers prevent from illegal penetration of motor transport to the territory. The parking places are moved away from the energy generating objects, special attention is paid to organizing cooperation of the Security Service of the JSC "Kuzbassenergo" with the State Traffic Inspection and departments of the Board of Internal Affairs and the Ministry of Emergencies. The most important objects situated at a far distance are regulated with video and patrol supervision.

There is a plan of measures aimed at technical improving the objects of power industry for 2005. Volumes of financing are determined to be about 40 mln roubles.

2.5.3. Financial risks

Risks related with changing the interests earned can influence the issuer's activity with regard to intake bank credits, nowadays there is a tendency to reduce interests earned, that is favorable for the issuer presenting a debtor. The Company takes in assets on loan with regard to interest earned that is less than the refinancing one, determined by the National Bank of the Russian Federation. An average interest earned with regard to 10.01.2004 presents 10.83%.

Concerning tariffication, there is risk of establishing by the Regional Energy Committee of Kemerovo Region tariffs not covering costs of production and the gross profit of loss in connection with reduce of the receipts.

Risks concerned the current financial accountancy present risks related with possible changing the prices of raw materials, fuel, services and risks that can badly influence the cost price of the issuer's products and services.

The issuer is not subjected to currency risks.

There are financial risks concerned future reforming of the issuer (reorganization by means of separation):

- *growth of expenses to the official registration of the issuer's real estate, employment of consultants, evaluation of the estate, implementing compensation program for employees to be discharged while reforming and reorganizing, establishment of repairing and servicing enterprises etc. According to the business plan of 2004 the expenditure volume is to be 118035 roubles;*
- *anticipatory payout of account payable and other obligations to the creditors of the issuer, also indemnity of damage caused them by reorganization. The initiative party can be presented by the creditors with long-term liability: the Russian Stock Company "United Energy Systems of the Russian Federation", the Ministry of Taxation, non-budget funds. Approximate sum of such liability presents 3014.4 mln rubles;*
- *demand of the shareholders speaking against reorganizing or not participating in voting to buy a part or total amount of the issuer's stocks belonging to them.*

2.5.4. Legal risks

Legal risks related with changes in currency regulation, taxation laws, rules of customs control, changes in license demands and court practice can badly influence the results of the issuer's activity and also the results of current litigations with the issuer's participation.

-Changes in taxation laws concerning increase of tax rate or changing the procedure and terms of tax paying can lead to reducing the net yield of the issuer, and then to reducing the sum of stock dividends.

-Changes in license demands can lead to extending the term of preparing the documents necessary to prolong the license. But in general this risk is considered to be insignificant except for the cases when to prolong the license or to carry out activity liable to licensing the issuer should observe demands which it cannot fulfill or when such fulfillment is related with excess expenditures and leads to ceasing the issuer's activity.

-In financial period there were no changes in court practice concerning questions that could badly influence the results of the issuer's activity.

The issuer is subjected to the risks related with changes in regulating the energy tariffs. Since 2002 the RF Government establishes limiting tariff level for each region. The FEC calculates it in particular for each region. In 2002 the limiting tariff level was 35% but actual increase was 27% according to data

presented by the State Committee of Statistics, and 24% according to the FEC. In 2003 the limiting tariff level presented 14% (including tariffs established by the FWMEP-19%). By prior calculations of the FEC, in 2004 the increase of average tariff should have been 11.1%, but after meetings with regional energy committees and energy generating companies the prognosed increase of average energy tariff was corrected and presented 13.1%.
In August 27, 2004 at their final meeting in Moscow the Federal Tariff Service (FTS) and representatives of regional energy committees considered the limiting tariff levels for 2005-2006. Since 2005 the energy tariffs are established by special procedure-minimum and maximum level is determined for each region.
With regard to 2005 the minimum average tariff established for the JSC "Kuzbassenergo" is about 63.9 kopeck (kop) for kW p. h. (increase of 10.18%). The maximum level of energy tariff is 65.8 kop. (increase of 12.21%).
In Kuzbass energy tariffs for different groups of people are approved by the Regional Energy Committee of Kemerovo Region on the ground of minimum and maximum levels established by the FTS.

2.5.5. Risks concerned the issuer's activity

In the financial period the issuer was not submitted with debt enforcements that can lead to its liquidation.
Some cases of tax arrears to the budget and non-budget funds are on trial in different courts, but the issuer does not consider them to be significant, as possible complying cannot lead to liquidation or bankruptcy of the issuer.
Three subsidiaries are acknowledged to be insolvent: the Limited Liability Company "Supervolokno" and the Joint Stock Company "Andreevsky" are on contesting production, the Joint Stock Company "Kuzbasshydroenergostroy" is under external control for 12 months.

III. DETAILED INFORMATION ABOUT THE ISSUER

3.1. Information about the issuer's establishment and development

3.1.1. Information about the issuer's company name

The Kuzbass Joint Stock Company of Energetics and Electrification
(the JSC "Kuzbassenergo")
Before privatization- the Kuzbass Industrial Unit of Electrification and Power Engineering.
The Kuzbass Stock Company of Electrification and Power engineering.
Established: 11.10.1993
The Kuzbass Joint Stock Company of Electrification and Power Engineering.
Established: 05.15.1996

3.1.2. Information about the state registration of the issuer
Registration date: **12.30.1993**
File number: **1901**
Registration body: **The Administration of Kemerovo Region**
According to the Federal law on official registration of legal entities, the JSC "Kuzbassenergo" is registered in the State Register of legal entities in July 23, 2002 with the official file number - 1024200678260 (official certificate: series 42 №001926135, registered by the Inspection of the RF Ministry of Taxation in Kemerovo Region).

3.1.3. Information about the issuer's establishment and development

The Joint Stock Company "Kuzbassenergo" is established according to the Edicts of the President of the Russian Federation № 922 on reorganizing the enterprises of power industry in stock companies dd 08.14.1992, № 923 on managing the power system of the Russian Federation while privatization dd 11.05.1992, and № 1334 on operating the Edict of the President of the Russian Federation № 922 in power industry.

The Company presents the assignee of the Kuzbass Industrial Unit of Electrification and Power Engineering.

The basic purpose of establishing the privatized enterprises is enforcing the efficiency of economic system of the country and the transition from planned economy to market relations.

The JSC "Kuzbassenergo" is established for indefinite period.

The main aim of its activity is getting profit.

To achieve this aim the Company can carry out any kind of activity allowed by law including:

- *supply (sale) of heat and electric energy according to the established tariffs and dispatching schemes of heat and electric load;*
- *buying electric energy in the FWMEP;*
- *buying heat and electric energy in energy generating enterprises;*
- *generating heat and electric energy;*
- *transmission of heat and electric energy;*
- *dispatching control and complying with conditions of power supply and power consumption;*
- *exploitation of equipment according to official standards, opportune and high grade repairing,*
- *rigging with new equipment and reconstruction of energy objects, also developing the electric power system;*
- *exploitation of energy objects being out of the Company's balance according to agreement with the owners of these objects;*
- *capital repairing, rigging with new equipment, reconstruction and development of the single area electric power system;*
- *mounting and repairing the energy objects, heat power and electric power equipment;*
- *exploitation, installation and repairing power generating boilers and vessels working under pressure, steam and hot water manifold;*
- *deployment of new methods and technologies providing effective, safe and clean operating the industrial objects of the Company, conditions for developing the electric power system and implementing scientific and technological innovatory programs;*
- *realization of energy to power supplying organizations;*
- *gathering payments for public utilities;*
- *maintaining the efficiency of electric and heat supply systems;*
- *exploitation of electric supply systems;*
- *exploitation of heat supply systems;*
- *engineering researches on building constructions of I and II levels according to the official standard;*
- *designing constructions of I and II levels according to the official standard;*
- *building constructions of I and II levels according to the official standard;*
- *conveying people by motor transport;*
- *conveying loads by motor transport;*
- *conveying loads by rails;*
- *medical attendance including sanatorium-and-spa treatment;*
- *development of communications including electric communications;*
- *educational activity;*
- *foreign economic activity;*
- *use of natural resources;*
- *storing oil and its products;*
- *exploitation of explosive industrial objects;*
- *exploitation of ignitable industrial objects;*
- *exploitation of chemically dangerous industrial objects;*
- *mining minerals necessary for building activity;*
- *radiography activity with equipment containing radioactive materials;*
- *maintaining equipment containing radioactive materials and their derivatives;*
- *regulation of radioactive situation;*

- *conveying the wrappings containing radioactive materials and their derivatives;*
- *storing radioactive devices and appliances;*
- *exploitation and attendance of the objects of the State Technical Inspection;*
- *activity connected with use of dangerous wastes;*
- *defense activity carried out by the Company's Security Service and regulated by the Federal Law on independent detective and defense activity in the Russian Federation and other legal acts;*
- *organizing measures related with mobilizing, civil security, emergencies, protection of the top secret information according the RF legislation;*
- *other activity allowed by law.*

The JSC "Kuzbassenergo" is one of the largest electric power systems belonging to the Holding of the Supranational Joint Stock Company "United Energy Systems of the Russian Federation"-the energy grid of the Company presents the 6th one concerning power carrying capacity and the 5th one concerning the amount of generating energy. The share of energy generated by the JSC "Kuzbassenergo" presents more than 30% of total balance.

The Electric Power System contains 8 power stations. Their summary electric power capacity is 4667 MW, thermal power capacity is 6700.5 Gcal. p.h. Annual output of electric energy is 26-28 billions kW p.h. Annual output of heat energy is 15-20 mln. Gcal.

The Electric Power System includes 4 enterprises of supply network receiving, transmitting and distributing electric energy. On their balance there are 4601 substations with summary power-carrying capacity of 12984 kW. The length of power transmission lines is 31117 km.

Under control of the Management Department of the Heat Supply System there are 7 single area interconnected power systems and 1 boiler-house. The length of heat supply systems with diameter of 1200 mm is 485 km. In 1994 the Managing Body of the Heat Supply System established the first informational measuring system in Russia; it carries out telemetering, telesignalling, telecontrol and registration of heat distribution to consumers.

Energy sale is carried out by the affiliated company "Energosbyt", which has more than 4000 agreements on power supply with consumers.

The JSC "Kuzbassenergo" was one of the first companies in Siberia to build optical transmission line with the length of more than 400 km. It connected affiliated companies into one digital datum network.

The Company's goal is to maintain continuity of service of power system, that speaks for the effectiveness of production and investment attractiveness of the Company.

3.1.4. Contact information

Location: **Russia, Kemerovo, Kuznetsky av., 30;**
Telephone number: **(384-2)293359**
Fax: **(384-2)293777**
E-mail: **adm@kuzbe.electra.ru**
Internet address: **www.kuzbassenergo.ru**

The structure of the Executive body of the JSC "Kuzbassenergo" was confirmed by the order №709 dd 12.31.2003. On the ground of this order the Department of Corporate Management was established, it includes the Corporate Policy Department responsible for working with shareholders and investors. The Department has begun working since 01.01.2004. The head is Cherpinsky Pavel Valerjevich, 1974 with degree.

Location: **Russia, Kemerovo, Kuznetsky av., 30;**
Telephone number: **(384-2)777051**
Fax: **(384-2)777051**
E-mail: **cherpinskypv@kuzbe.electra.ru**

3.1.5. Taxpayer's identification number
4200000333
3.1.6. Affiliated companies and representative offices of the issuer

Company name: **the Tom-Usinsk Electric Power Station**

Location: **652880, Kemerovo Region, Myski-5**
Head of the company: **Glukhov Viktor Fedorovich**
Establishment date: **12.30.1993**
Assignment term: **12.31.2004**

Company name: **the Belovo Electric Power Station**
Location: **652644, Kemerovo Region, Belovo, Inskoy settl.**
Head of the company: **Artukh Valeriy Mikhailovich**
Establishment date: **12.30.1993**
Assignment term: **12.31.2004**

Company name: **the South-Kuzbass Electric Power Station**
Location: **652812, Kemerovo Region, Kaltan, Komsomolskaya st., 20**
Head of the company: **Vakhitov Kasim Bakirovich**
Establishment date: **12.30.1993**
Assignment term: **12.31.2004**

Company name: **the Kemerovo Electric Power Station**
Location: **650000, Kemerovo, Stantsyonnaya st., 15**
Head of the company: **Benedictov Aleksandr Viktorovich**
Establishment date: **12.30.1993**
Assignment term: **12.31.2004**

Company name: **the West-Siberian Thermoelectric Plant**
Location: **654040, Kemerovo Region, Novokuznetsk-40**
Head of the company: **Abramov Valery Vasilyevich**
Establishment date: **12.30.1993**
Assignment term: **12.31.2004**

Company name: **the Kuznetsk Thermoelectric Plant**
Location: **654034, Kemerovo region, Novokuznetsk-34**
Head of the company: **Kuzin Igor Viktorovich**
Establishment date: **12.30.1993**
Assignment term: **12.31.2004**

Company name: **the Novo-Kemerovo Thermoelectric Plant**
Location: **650021, Kemerovo-21, Predzavodskoy settl.**
Head of the company: **Sukhoveev Boris Ivanovich**
Establishment date: **12.30.1993**
Assignment term: **12.31.2004**

Company name: **the Kemerovo Thermoelectric Plant**
Location: **650001, Kemerovo-1**
Head of the company: **Vervain Constantine Aleksandrovich**
Establishment date: **12.30.1993**
Assignment term: **12.31.2004**

Company name: **the Northern Electric Supply Systems**
Location: **650000, Kemerovo, Ostrovsky st., 11**
Head of the company: **Vorov Yuri Leonidovich**
Establishment date: **12.30.1993**
Assignment term: **12.31.2004**

Company name: **the Eastern Electric Supply Systems**
Location: **650025, Kemerovo, Sarygin st, 11a**
Head of the company: **Tolstikov Victor Sergeyevich**
Establishment date: **12.30.1993**

Assignment term: **12.31.2004**

Company name: **the Central Electric Supply Systems**
Location: **652644, Kemerovo Region, Belovo, Inskoy settl., Fasadnaya st., 43**
Head of the company: **Dmitriyev Aleksandr Milyevich**
Establishment date: **12.30.1993**
Assignment term: **12.31.2004**

Company name: **the Southern Electric Supply Systems**
Location: **654005, Kemerovo Region, Novokuznetsk, Stroiteley av., 43**
Head of the company: **Miller Aleksandr Ivanovich**
Establishment date: **12.30.1993**
Assignment term: **12.31.2004**

Company name: **the Management Department of the Heat Supply Systems**
Location: **650070, Kemerovo, Svobody st., 10**
Head of the company: **Krumgolts Aleksandr Rudolfovich**
Establishment date: **12.30.1993**
Assignment term: **12.31.2004**

Company name: **the "Energosbyt"**
Location: **650036, Kemerovo, Lenin av., 90/4**
Head of the company: **Petrov Leonid Prokhorovich**
Establishment date: **12.30.1993**
Assignment term: **12.31.2004**

Company name: **the Management Department of the Petrovsky Thermoelectric Plant**
Location: **650000, Kemerovo, Kuznetsky av., 30**
Head of the company: **Amarelle Aleksandr Isaakovich**
Establishment date: **12.30.1993**
Assignment term: **12.31.2004**

Company name: **the "Kuzbassenergosvyaz"**
Location: **650000, Kemerovo, Kuznetsky av., 30**
Head of the company: **Aksenov Vladimir Vasilyevich**
Establishment date: **01.22.1997**
Assignment term: **12.31.2004**

Company name: **the Trunk Electric Supply Systems**
Location: **650000, Kemerovo, Kuznetsky av., 30**
Head of the company: **Antonov Yuri Vitalyevich**
Establishment date: **12.08.2003**
Assignment term: **12.31.2004**

Company name: **the Moscow Representative Office of the JSC "Kuzbassenergo"**
Location: **117261, Moscow, Leningradsky av., 70/11**
Head of the company: **Sadgyan Armen Sergeyevich**
Establishment date: **04.15.1998**
Assignment term: **12.31.2004**

3.2. Principal economic activities of the issuer
3.2.1. Industrial affiliation of the issuer

The National Classification of economic activities:
40.10.11-Energy generating by thermal power stations
40.10.2-Transmission of electric energy
40.30.2-Transmission of steam and hot water (heat energy)

51.56.4-Wholesale trading the electric and heat energy (without transmission and distribution)
74.60-Holding inquiries and maintaining security
74.14-Consultations concerning economic activity and management.

3.2.2. Basic economic activity of the issuer

Basic economic activities of the issuer are generating, transmitting and distributing electric and heat energy.

The JSC "Kuzbassenergo" presents the subject of natural monopoly operating in the sphere of public utilities transmitting the electric and heat energy in Kemerovo Region.

The share of income from basic activity in the gross yield of the issuer.

Period	With regard to 06.30.2004	With regard to 09.30.2004
Gross yield, roubles	9176618	12901349
Income from basic activity	8336720	11595463
Share ,%	90.85	89.88

The gross yield of the issuer presents sum of earnings from selling, operation and non-realization receipts – according to the form №2 "The report on receipts and expenses".

There is insignificant subsidence of the gross yield in III quarter of 2004 in comparison with II quarter (from 3916516 roubles to 3724731 roubles, i.e. 4.9%).

The income from basic activity in III quarter of 2004 is also reduced in comparison with II quarter, from 3576981 roubles to 3258743 roubles, i.e. 11.2%

This subsidence is explained by reduction of energy distribution. Generating heat energy has seasonal character that is reflected in lessening the energy realization in summer season. Generating electric energy presents incessant process, but increase of day duration in summer season causes lesser consuming.

The share of the issuer's income from major products

Major products	Income share, %	
	II quarter of 2004	III quarter of 2004
Electric energy	84.64	89.96
Heat energy	15.36	10.04
Altogether:	100.00	100.00

3.2.3. Major products (operations, services)

The major products of the issuer are electric and heat energy. The energy tariffs are established once a year by the Regional Energy Committee under a right in the Federal law №41 dd 04.14.1995.

Figures	II quarter of 2004	III quarter of 2004
Production volume, -electric energy, mln kW p.h. -heat energy, Gcal	 5305.160 2074.954	 5174.170 1237.513
Average tariff, -electric energy, cop. for kW p.h. -heat energy, roub. for Gcal	 57.246 266.591	 56.978 266.777
Sum of earnings from sale, roubles -electric energy -heat energy	 3019834000 548147000	 2931680000 327063000
Share of total sum of earnings, % -electric energy -heat energy	 81.38 14.78	 78.71 8.78
Price index of power engineering products, % (with regard to the previous year)*	100.5**	100.3**

**The price index is determined by the State Committee of Statistics*

***with regard to the previous period.*

Sale scheme of major products:

Major products	Sale scheme	III quarter of 2004
-electric energy	Direct sale, %	100
	Own sale system, %	-
	Dependent sale system, %	-
	Other ,%	-
-heat energy	Direct sale, %	100

	Own sale system, %	-
	Dependent sale system, %	-
	Other ,%	-

Sale has seasonal character, that is reflected in greater energy consumption in autumn-winter period. There is an opposite trend in spring-summer period: the level of energy consumption for lightning and heating lessens.

Scheme of production and sale expenses:

Expenses item	II quarter of 2004	III quarter of 2004
Raw materials, %	1.6	1.8
Acquired completion articles, semi-finished products, %	-	-
Fuel ,%	40.1	30.9
Energy, %	4.1	8.1
Salary expenses, %	7.2	7.6
Interests earned, %	-	-
Lease payment, %	-	-
Assignments for social needs, %	2.4	2.2
Fixed assets repay, %	12.2	12.4
Taxes included into cost price of products,%	3.4	4.7
Operations and services carried out by other organizations, %	1.2	1.4
Other expenses, % -subscription payments to the JSC "United Energy Systems of the Russian Federation" -intangible assets repay, % -remuneration for rationalization proposals, % -insurance payments, % -representative expenses, % -other, %	26.5 1 - 0.3 -	13.1 13.1 - 0.6 - 0.1 17.1
Altogether: production and sale expenses (cost price), %	100	100
Earnings from sale of products (operations, services),%	94.74	96.30

Reckoning the cost price is carried out according to the Accounting policy of the Company that excludes reckoning the separate products (operations, services).

3.2.4. Information about the issuer's suppliers providing with 10 and more % of all marketable products, also on their share in the total supply volume

The main coal suppliers are: the Firm "Siberian coal" of the JSC Coal Company "Kuzbassrazrezugol" (Kemerovo), the JSC "Siberian Coal Energy Generating Company" (Moscow), the JSC "Joint Coal Company "Yuzhkuzbassugol" (Novokuznetsk).

The natural gas is supplied by the JSC "Siberia-Ural Petrochemical Company"

Supplier company name	III quarter of 2004
The Firm "Siberian coal"	**50.95 %**
The JSC "Siberian Coal Energy Generating Company"	**32.86 %**

3.2.5. Markets for products (operations, services)

The power industry is practically the only branch whose products are used in all other industries and public sector. In Russia there are 2 markets of energy sale: wholesale and retail. Heat energy is sold only at retail.

The main market for the issuer's activity is Kemerovo Region. It is located in south-east of the Western Siberia and situated on the border of the West-Siberian Plain and mountains of the Southern Siberia. It is situated at equal distance from western and eastern borders of the Russian Federation, related to the 6th time zone. The operating territory is 95500 sq.km., the population is 3086000 people. Distribution of electric energy is carried out according to contracts on distribution and consumption of electric energy.

The list of retail energy buyers is presented in the following table.

	Electric energy		Heat energy	
	Distribution to own consumers, hundred kW p.h.	Specific gravity, %	Distribution to own consumers, Gcal	Specific gravity, %
Altogether	5174170	100.0	1237513	100.0
1.Industry	3804763	73.53	466131	37.67
1.1.Fuel industry	1303202	25.19	1305	0.11
1.2.Ferrous metallurgical engineering	1922258	37.15	35514	2.87
1.3.Non-ferrous metallurgical engineering	8410	0.16	10823	2.78
1.4.Chemical and Petrochemical industry	336724	6.51	149032	38.31
1.5.Mechanical engineering	64649	1.25	1336	0.34
1.6.Wood pulp and paper industry	691	0.01	14	0.00
1.7.Building materials	111205	2.15	10985	0.88
1.8.Light industry	71.84	0.14	29	0.00
1.9.Food industry	26970	0.52	370	0.03
1.10.Other industries	23470	0.45	13938	1.13
2.Agriculture	39371	0.76	10729	0.87
3.Forestry	295	0.01	0	0.00
4.Transport and communications	326835	6.32	2779	0.22
5.Building	14110	0.27	305	0.02
6.Public services	75297	1.46	725105	58.59
7.Population	43920	0.85	611	0.05
8.Other industries	869579	16.81	31853	2.57

As the table shows, the largest energy buyers in retail market are industrial enterprises (their share is 73.53 %).

In heat energy consumption the public services (58.59 %) and industrial enterprises (37.67 %) are dominating. In industrial sphere the leaders of heat energy consumption are chemical and petrochemical enterprises.

The main consumers of the issuer's products which provide with more than 10 % of total sale earnings regarding III quarter of 2004:

The consumer's company name	Location	Share in total sale volume, %
Electric energy consumers: The Limited Liability Company "Metalenergofinance"	Kemerovo region, Novokuznetsk	26.4
The JSC "Kuznetsk ferro-alloys"	Kemerovo region, Novokuznetsk	10.2
Heat energy consumers: The Administration Body of Novokuznetsk	Kemerovo region, Novokuznetsk	24.0
The JSC "Azot"	Kemerovo	27.7
The Administration Body of Kemerovo	Kemerovo	27.9

Factors that can badly influence the sale of the issuer's products and possible issuer's activity to avoid it.

Possible entrance of large energy consumers into the Federal Wholesale Market of Energy and Power (FWMEP) can badly influence the sale. Among them there are: the West-Siberian Railway Company, the Limited Liability Company "Sokolovskaya", the JSC " Management Department of Belovo Energy System", the JSC "Leninskugol", the JSC "Electric Supply Systems" Kiselyevsk, the JSC "Prokopyevskenergo", the Kemerovo JSC "Azot", the Limited Liability Company "Topki-cement", the JSC Industrial Union "Chimprom", the JSC Industrial Union "Chimvolokno Amtel-Kuzbass", the Krasnoyarsk Railway Company. So the gross profit of loss presents about 6.5 billion rubles per year. Nowadays in order to retain consumers the Company does not make transit contracts as problem of cross subsidizing is not solved.

One more factor can be high temperature of open air in heating period. Besides deployment of preserving technologies or start-up of own boiler-houses leads to lesser consumption of heat energy. The JSC "Kuzbassenergo" can not avoid such influence.

Also such factors include shortage of assigned limits and inopportune financing the expenditures on energy payments of budget consumers. Every month the JSC "Kuzbassenergo", the Administration of Kemerovo Region, the Major Management Department of Financing of Kemerovo Region and the heads of cities and districts sign the agreement with budget consumers on payments for consumed energy. Also there are meetings held in the Administration of Kemerovo Region concerning observance of this agreement, with obligatory participation of the heads of cities and districts, the leaders of local financial bodies, the leaders of public services and local electric supply systems.

3.2.6. Practical activity in respect of circulating assets and reserves

The Company's policy in respect of circulating assets consists of presenting sufficient amount and structure of circulating assets to increase liquidity of the assets.

In order to reduce the account receivable the issuer works with buyers and customers, controls bills to pay off, carries out activity on indemnity of expired account receivable.

For effective use of circulating assets, improvement of control over resources, maintaining incessant production the JSC "Kuzbassenergo" applies the method of limiting the circulating assets. The limit of circulating assets of the JSC "Kuzbassenergo" is determined according to calculations carried out by the subsidiaries and is reconsidered in connection with changing the conditions of production.

To control the volume of reserves, duration of circulation and circulation capacity there are special ratios determined while accounting:

-the ratio of circulation capacity (C);

-the ratio of duration (D).

The ratio of circulation capacity denotes the rate of realization of the reserves.

*It is calculated by the formulae: cost price of sold products/average amount of reserves (C=f№2 p020/f№1(p210 with regard to the beginning of financial period+p210 with regard to the end of financial period)*0.5.*

The ratio of duration is determined to be result from division of the number of days composing the period by the ratio of circulation capacity.

With regard to III quarter of 2004: C=2.6, D=35 days

In comparison with II quarter of 2004 there is some subsidence of the circulation capacity at the expense of increasing the reserves (fuel accumulation with coming heating period).

3.2.7. Raw materials

The basic raw material used by the issuer is power generating fuel. The power stations of the JSC "Kuzbassenergo" use different kinds of Kuznetsk coal and products of its cleaning.

The furnace fuel oil is used as kindle fuel to keep burning the coal of low quality, and as basic fuel in the "Zaiskitimskaya" boiler-house.

Change of fuel price

Kind of fuel	Unit of measurement	The supplier's company name	II quarter of 2004		III quarter of 2004	
			Purchase volume	Purchase price with value-added tax	Purchase volume	Purchase price with value-added tax
Fuel oil	Thousand t.	The Limited Liability	7.0	29.58		

		Company "Anteria"				
Fuel oil	Thousand t.	The Limited Liability Company Firm "Rigeyro"			8.1	3950.00
Gas	Mln.c.m.	The Management Department of Siberian Resources (Moscow)	71377.58	1161.94	257.9	930.05
Coal	Thousand t.	The Firm "Siberian coal"	1178.84	454.8	1334.00	455.3
		The JSC "Siberian Coal Energy Generating Company"	855.68	478.1	860.20	488.2
		the JSC "Yuzhkuzbassugol"	416.18	373.6	128.20	374.7
		The Coal Company "Prokopyevskugol"	61.6	337.0	64.5	344.7
		The Coal Company "Southern Kuzbass"	37.0	411.2	-	-
		The Public Cooperation Company "Chernigovets"	33.0	453.3	-	-
		the Limited Liability Company "Sokolovskaya"	-	-	-	-
		Other	244.3	333.0	231.1	358.5

Coal prices remained practically on the same level.

3.2.8. Major competitors

The JSC "Kuzbassenergo" presents the subject of natural monopoly operating in the sphere of public utilities transmitting electric and heat energy in Kemerovo Region.

Its competitors are energy suppliers-participants of the FWMRP and newly established independent energy generating companies that carry out energy realization without mediators.

With regard to the end of 2003 there were 29 organizations of wholesale buyers reselling electric energy. The share of such organizations in total sale volume of the issuer is quite significant and presents 15.9 %.

In 2003 the process of establishing companies engaged in wholesale energy reselling is enforced. So in December 2003 the single area energy generating grid the JSC "Kuzbass Energy Supply Company" was established, it combined 12 local generating enterprises. Its basic activity is transmission and sale of energy by means of communication system.

In Kemerovo there is the Limited Liability Company "Northern Kuzbass Generating Company" that rented municipal electric communications in Kemerovo and Beryezovsky. In 2004 it also plans to rent heat communications of these cities.

Such process of establishing independent sale organizations based on reselling companies which have supply infrastructure for monopoly access to some consumers negatively influences the JSC "Kuzbassenergo" with regard to tariffication. Reselling companies buy energy at minimum tariffs which do not defray the issuer's expenses of generating; as a result there is redistribution of finances in favor of these companies.

In Novokuznetsk the Limited Liability Company "Metalenergofinance" affiliated with the Limited Liability Company "Eurazholding" and its dependent companies Novokuznetsk and West-Siberian Metallurgic Industrial Complexes made direct agreements on electric energy supply. Thus the Limited Liability Company "Metalenergofinance" was registered in the list of energy supplying companies and determined as the major reselling company supplying metallurgic industrial complexes. In IV quarter of 2003 the Limited Liability Company "Metalenergofinance" was registered in the Federal Energy Committee and was declared to be the subject of the FWMEP.

In October 1, 2003 the largest consumer of the issuer's products the JSC "Novokuznetsk Aluminum Plant" entered into the FWMEP. Thus the JSC "Kuzbassenergo" turned from deficient company into the efficient one.

Company name	Total sale volume with regard to III quarter of 2004, kW p.h.	Market share
The JSC "Kuzbassenergo", the issuer	5174170	77.9
The FWMEP	1357014	20.5

3.2.9. Information about the issuer's licenses

Number: **3668**

Issue date: **12.26.1995**
Expiration date: **01.01.2007**
License body: **The RF Ministry of Communications**
Basic activity: **Local and area telecommunication services**
Number: **00927**
Issue date: **06.14.2001**
Expiration date: **12.31.2006**
License body: **The Committee of Natural Resources of Kemerovo Region**
Basic activity: **Clayey soil mining on the Frunzensky coal-field to construct barricade for cinders dump**

Number: **24**
Issue date: **11.13.2001**
Expiration date: **11.13.2004**
License body: **The RF Ministry of Power Industry, the State Energy Inspection**
Basic activity: **Maintaining the efficiency of electric and heat supply systems**

Number: **007**
Issue date: **10.14.1997**
Expiration date: **10.01.2008**
License body: **The Management Department of the Federal Security Service in Kemerovo Region**

License body: **The Management Department of the Federal Security Service in Kemerovo Region**
Basic activity: **Activity connected with protection of top secret information**

3.2.10. Joint activities of the issuer

The founders of the subsidiary JSC "Prokopyevskenergo":
-the JSC "Kuzbassenergo" (60.0%);
-the Limited Liability Company "Stroysnabservice" (Kemerovo) (14.12%);
-the Limited Liability Company "Bill Center of the Kuzbassenergo" (13.05%)
Kind of joint activity: providing for consumers with electric and heat energy by means of its acquisition, conversion, distribution, transmission and realization; repairing electric test and engineering equipment, electric meters; exploitation and regulation of lifting mechanisms; building and mounting activity; transporting, dispatching and other activity connected with transportation.
Joint activity has been carried out since 09.20.2000.
The founders of the subsidiary JSC "Industrial Unit "Vodocanal":
-the JSC "Kuzbassenergo" (74.5%);
- the Limited Liability Company "Clearing" (Prokopyevsk) (25.5).
Kind of joint activity: water supply and receiving sewage; exploitation, technical maintenance, running and emergency repairing waterworks; building, mounting, regulating and decorating activity.
Joint activity has been carried out since 10.28.2001.

3.3. Future plans of the issuer

The issuer's aims with regard to 2004:
The main aim is implementing undamaged activity and getting profit, increase of market value (capitalization) and growth of the stocks attractiveness in the eyes of Russian and foreign investors.
The main plans for 2004:
-maintaining continuity of service of power system especially in the autumn-winter period;
-implementing the program of repairing equipment of power stations, electric and heat supply systems;
-fulfilling the task of the Supranational JSC "United Energy Systems of the Russian Federation" on storing up power-generating fuel;

-implementing investment program.

Tasks of primary importance:

-putting in operation the turbine №4 (steam turbine-30) and replenishing deaeration unit of heat supply in the Kemerovo Thermoelectric Plant;

-reconstructing a mesh of the turbine-driven set №3 in the Kuznetsk Thermoelectric Plant with its putting in operation in 2005;

-finishing installation of the turbine №5 (T-115) in the South-Kuzbass Electric Power Station;

-reconstructing power generating boiler №7 in the Tom-Usinsk Electric Power Station in order to lessen Nox;

-installing kindling steam-line of power generating boilers I-II in the Tom-Usinsk Electric Power Station and the 3rd ,4h sections of supplying header in the Kemerovo Thermoelectric Plant;

- mounting systems of reckoning heat energy in the South-Kuzbass Electric Power Station and in the West-Siberian Thermoelectric Plant;

-reconstructing electrical wave filters of power generating boiler №11 in the Kemerovo Electric Power Station with increase its efficiency to 99.5% and rigging with new equipment systems of control and proofing electric wave filters of power generating boiler №7 in the West-Siberian Thermoelectric Plant;

-reconstructing teleautomatic systems of the Eastern Electricity Supply Systems;

-reconstructing substations with replacement of 112 switches with voltage of 10 kV to vacuum switches, 9 switches with voltage of 35-110kV to sulphur hexafluoride switches and mounting insulation in 14 sections;

-reconstructing electric power line with voltage of 35kV in the Eastern Electricity Supply Systems with its removal from inundation area;

-accumulating ash dumps to 4383000 cbm.

Tasks on improving financial condition of the issuer:

-implementing program of reducing expenses;

-fulfilling items of the Mutual agreement with creditors as important condition of reforming;

-establishing economically admissible tariffs for the issuers products;

-reducing liabilities to suppliers and contractors;

-regulating difference between account receivable and account payable;

-improving solvency and financial stability of the Company;

-ensuring stable operation and investment attractiveness of the Company.

Future plans of reforming the JSC "Kuzbassenergo":

1. *To finish preparatory measures of reorganization including:*

-to stop participating in activities not connected with operating sphere of the issuer, to return housing resources to municipal authorities;

-to detach repairing and servicing activities;

-to implement system of tenders and contract trading;

-to improve the staff, to prepare managerial staff for work in market conditions.

2. *To start implementing reforming program according to basic trends in reorganization of power industry:*

-to proceed to new organizing, producing and managing structure, to turn gradually into managing company;

-to implement new forms and methods of corporate management that comply with new status of the Company and guarantee positive results of the issuer's financial activity.

The development prospects of the JSC "Kuzbassenergo" as the enterprise of the power generating system of the country are determined by the General Energy Strategy of the Russian Federation till 2020, that is adopted by the RF Government in 08.23.2003.

According to it, the JSC "Kuzbassenergo" is to become financially stable, economically profitable and rapidly developing company. Thus the development prospects of the Company depend in many respects on successful implementing the reforming program after its ratification by shareholders.

3.4. The issuer's participation in industrial, bank and financial groups, holdings, trusts and associations

The JSC "Kuzbassenergo" does not participate in industrial, bank and financial groups, holdings, trusts and associations.
According to the Edict of the President of the Russian Federation on additional measures of managing the electric power system of the Russian Federation dd 03.03.1998, directions prescribed by the section №3 of the Temporary Regulations on holding companies established for reorganization of state enterprises into joint stock companies, confirmed by the Presidential Edict №1392 , is not obligatory for the JSC "United Energy Systems of the Russian Federation".

3.5. Subsidiaries and affiliated business divisions of the issuer

The JSC "Kuzbassenergo" has 13 subsidiaries but no dependent companies.
These companies are determined to be subsidiaries according to the Civil Code of the Russian Federation (part 1, articles 104,106) and the Federal Law on joint stock companies (article 6).
Company name: **The Limited Liability Company "Bill Center of the Kuzbassenergo"**
Location: **650099, Kemerovo Region, Kemerovo, Kuznetsky av., 30**
The issuer's share in the authorized capital of subsidiary: **100%**
The subsidiary's share in the authorized capital of the issuer: **no share**
Activity: **Export and import of industrial products and consumer goods, scientific and technological attainments and services; mediatory and commercial activity.**

Company name: **The JSC "Andreevsky"**
Location: **Kemerovo Region, Andreevsky settl.**
The issuer's share in the authorized capital of subsidiary: **100%**
The share of ordinary stocks belonging to the issuer: **100%**
The subsidiary's share in the authorized capital of the issuer: **no share**
Activity: ***Production and realization of agricultural products, plant growing and stock breeding; rigging with new equipment, reconstruction and development of industrial complex; building industrial and social institutions; establishment of manufacturing enterprises based on innovatory technologies of food industry and agriculture.***
Company name: **The Limited Liability Company "Sbytenergo"**
Location: **Kemerovo Region, Metalploshadka settl., Severnaya st., 14**
The issuer's share in the authorized capital of subsidiary: **100%**
The subsidiary's share in the authorized capital of the issuer: **no share**
Activity: **Sale of electric and heat energy; exploitation, mounting, regulating, dispatching and transporting electric and heat energy**

Company name: **The JSC "Kuzbasshydroenergostroy"**
Location: **Kemerovo Region, Krapivinsky district**
The issuer's share in the authorized capital of subsidiary: **100%**
The share of ordinary stocks belonging to the issuer: **100%**
The subsidiary's share in the authorized capital of the issuer: **no share**
Activity: ***Building, erecting, reconstructing, rigging with new equipment, also repairing industrial and social institutions; production and realization of building materials and structures controlled by the State Technical Inspection of the Russian Federation; designing activity.***

Company name: **The JSC "Investment Industrial Unit "Vodocanal"**
Location: Kemerovo region, Prokoryevsk, Kirpichnaya st., 3

The issuer's share in the authorized capital of subsidiary: **74.5%**
The share of ordinary stocks belonging to the issuer: **74.5%**
The subsidiary's share in the authorized capital of the issuer: **no share**
Activity: ***Water supply and receiving sewage; exploitation, technical maintenance, running and emergency repairing waterworks; building, mounting, regulating and decorating activity; producing industrial wares; informational service; mediatory and commercial activity; purchase and sale activity***

Company name: **The JSC "Prokopyevskenergo"**
Location: **Kemerovo Region, Prokopyevsk, Energeticheskaya st., 14**

The issuer's share in the authorized capital of subsidiary: **60%**
The share of ordinary stocks belonging to the issuer: **60%**
The subsidiary's share in the authorized capital of the issuer: **no share**
Activity: ***Providing for consumers with electric and heat energy by means of its acquisition, conversion, distribution, transmission and realization; repairing of test and electric engineering equipment, electric meters; exploitation and regulation of lifting mechanisms; building and mounting activity; transporting, dispatching and other activity connected with transportation; building and exploitation of filling stations; mediatory, commercial and foreign economic activity; assistance to research and development, designing, technological and innovatory activity***

Company name: **The JSC "Kuzbass Repairing Company"**
Location: **Kemerovo, Kuznetsky av., 30**
The issuer's share in the authorized capital of subsidiary: **100%**
The share of ordinary stocks belonging to the issuer: **100%**
The subsidiary's share in the authorized capital of the issuer: **no share**
Activity: ***Building, mounting, reconstructing, rigging with new equipment, also repairing industrial and social institutions being chief contractor and subcontractor; control over quality of building works and producing building materials including ones for independent organizations; production and realization of building materials and structures including ones controlled by the State Technical Inspection of the Russian Federation; building gas objects, gas controlling posts and gas-plants, gas-mains and gas equipment of industrial, agricultural and other enterprises using natural gas; mounting, regulating and repairing energy objects, electric and heat generating equipment and electric plants of consumers.***

Company name: **The JSC Engineering and Analytical Center "Kuzbasstechenergo"**
Location: **650099, Kemerovo, Stantsyonnaya st., 17**
The issuer's share in the authorized capital of subsidiary: **100%**
The share of ordinary stocks belonging to the issuer: **100%**
The subsidiary's share in the authorized capital of the issuer: **no share**
Activity: ***Testing and regulating, elaborating standard and energy characteristics of mechanical heat generating equipment (boilers, turbines, heating supply systems, auxiliary equipment); regulation and exploitation of environment-friendly equipment, ventilation systems, devices of measuring and control over ecological situation; current regulation of heat generating equipment of gas enterprises, regulation of automatic systems and aquatic chemical mode of operation of heat generating equipment; producing, repairing, gauging and checking measuring devices; repairing and regulating automatic devices, electronic appliances; repairing and installing electric generating equipment and systems.***

Company name: **The JSC "Kuzbasssetremont"**
Location: **654079, Kemerovo Region, Novokuznetsk, Nevsky st., 1**
The issuer's share in the authorized capital of subsidiary: **100%**
The share of ordinary stocks belonging to the issuer: **100%**
The subsidiary's share in the authorized capital of the issuer: **no share**
Activity: ***Repairing equipment, buildings and constructions of electric supply systems; repairing power transmission lines with the voltage of 0.4-20 kV; repairing buildings and constructions on the objects of electric supply systems; regulating, testing and diagnosing equipment, buildings and constructions of electric supply systems; supply and sale activity.***

Company name: **The Limited Liability Company "Supervolokno"**
Location: **650068, Kemerovo, Stroygorodok settl.**
The issuer's share in the authorized capital of subsidiary: **60%**
The subsidiary's share in the authorized capital of the issuer: **no share**
Activity: **Production of warm saving materials**

Company name: **The Public Cooperation Company "Autotransport Company "Kuzbassenergo"**
Location: **650006, Kemerovo, Stantsyonnaya st., 4**
The issuer's share in the authorized capital of subsidiary: **100%**
The share of ordinary stocks belonging to the issuer: **100%**
The subsidiary's share in the authorized capital of the issuer: **no share**
Activity: ***Transporting and dispatching attendance of legal entities and natural persons; technical maintenance and repairing transport belonging to legal entities and natural persons; capital construction of industrial, social and cultural institutions; planning activity on reconstruction of technological buildings and constructions; establishing manufacturing enterprises producing consumer goods; organizing wholesale and retail trade.***

Company name: **The Public Cooperation Company Medical Sanitary Centre "Health Centre "Energetic"**
Location: **650099, Kemerovo, Kuzbasskaya st., 37**
The issuer's share in the authorized capital of subsidiary: **100%**
The share of ordinary stocks belonging to the issuer: **100%**
The subsidiary's share in the authorized capital of the issuer: **no share**
Activity: **Qualified medical attendance including specialized care; ambulatory care; day-ward hospital; prophylactic activity, proficiency tests.**

Company name: **The Public Cooperation Company "Kuzbassenergoservice"**
Location: **650099, Kemerovo, Ostrovsky st., 12**
The issuer's share in the authorized capital of subsidiary: **100%**
The share of ordinary stocks belonging to the issuer: **100%**
The subsidiary's share in the authorized capital of the issuer: **no share**
Activity: **Carrying out activity within its industrial sphere and functioning as chief contractor and customer; financial and technical maintenance of its production and works done by independent organizations; repairing electric and generating equipment in electric and thermal power stations and transmitting systems; repairing different technological equipment, manifolds, distributing electric supply systems and constructions, weight lifting constructions and devices in other enterprises and organizations; building and rigging with new equipment enterprises of power and other industries, also public and social institutions.**

3.6. Composition, structure and cost of the issuer's fixed assets, information about its plans to acquire, replace, dispose of fixed assets, as well as all the facts of encumbrance of the issuer's fixed assets

3.6.1. Fixed assets

According to the contract between the JSC "Kuzbassenergo" and the Public Cooperation Company "ENPI Consult", the specialists of the "ENPI Consult" calculated total replacement value of a part of fixed assets being on balance of the JSC "Kuzbassenergo" with regard to 01.01.2004.
The aim of evaluation is calculating total replacement value of a part of fixed assets.
The purpose of valuation is consulting activity concerning revaluation of a part of fixed assets.
Considering limiting conditions and approximation, total replacement value of revaluating estate (with total balance value of 29749727391 rubles excluding accounting costs) is about 33815298100 roubles (thirty three billions eight hundred and fifteen millions two hundred and ninety eight thousands and one hundred) roubles with regard to 01.01.2004.
The evaluation was based on accounting data and technical characteristics of evaluated objects presented by the specialists of the JSC "Kuzbassenergo", also on interviewing leaders and specialists of the JSC "Kuzbassenergo".
The evaluation was carried out according to the Federal law №135 on evaluation practice in the Russian Federation dd 07.29.1998, evaluation standards obligatory for valuators (the Decree of the RF Government №519 dd 07.06.2001), basic principals enumerated in the International Evaluating Standards (IES1-IES4), also according to the Standards for Professional Practice and the Ethic Code of the Russian Evaluating Association.

According to technical task of revaluating fixed assets of the issuer with regard to 01.01.2004, revaluation implies revealing current (replacement) value of fixed assets, i.e. total sum of expenses that the issuer should have expanded to replace (substitute) its fixed assets with new analogous assets at market prices existing at the moment of evaluation according to the Ordinance of the RF Ministry of Treasury dd 03.30.2001.

1. **The following groups of assets are liable to obligatory revaluation independently from the amount of accounting costs:**

Group of assets	Cipher
Constructions with voltage of 220 kV and more	3009, 30119-30120
Machinery Substations with voltage of 220 kV and more; other power generating equipment and distributing devices	40000-40700 40701 40702 40705-42912
Transport means	50000-50302 50500-50709

2. **The following groups of assets, also public and social objects and objects related to other industrial spheres are not liable to revaluation:**

Group of assets	Cipher
Industrial buildings	10000-10010
Constructions	20000-30118 30121-30124
Other groups of equipment	43000-49303
Transport means (motor transport)	50400-50428
Industrial and economic appliances and tools	60000-70012
Live-stock	80000
Lasting planting	90000-90021
Public buildings	10011-10105 20362-20368 kindergarten, preventorium, hospital, dwelling house
Business related to other spheres	10011-10105 20362-20368 agricultural enterprises, shops, storehouse, enterprise producing building materials, consumer goods, technical maintenance, etc.

3. ***Revaluation of the enterprise №55 ("Kuzbassenergosvyaz") was not carried out.***
4. ***Revaluation of unfinished building objects and equipment to be installed was not carried out.***
5. ***Revaluation was carried out by independent valuators by means of indexation and direct recomputation.***

According to the Regulations on accounting and tax policy of the issuer with regard to 2004, composition and classification of fixed assets is determined on the ground of the National Classification of fixed assets (NC-013-94) confirmed by the Decree №359 of the National Committee of standardization, metrology and certification dd 12.26.1994.

Amortization of fixed assets is calculated by the linear method based on terms of exploitation of the given objects. With regard to fixed assets subjected to accounting before 01.01.2002, the repay is accrued according to the Decree №1072 of the Council of Ministers of the USSA on general standards of repay dd 10.22.1990. With regard to fixed assets subjected to accounting after 01.01.2002, the repay is accrued according to the Decree of the RF Government №1 on classification of fixed assets included in amortization groups.

Since 1999 the JSC "Kuzbassenergo" has carried out revaluation of fixed assets involving qualified experts of the Public Cooperation Company "ENPI Consult" (TIN 7737017200, Moscow, Dukhovsky by-st., 14) on the ground of license on evaluation practice №000031 given by the RF Ministry of Property Affairs in 2001. With regard to technical task, revaluating fixed assets is carried out by means of indexation and direct recomputation of total replacement value of fixed assets. All materials are presented in written form and on magnetic vehicles.

IV. INFORMATION ABOUT FINANCIAL AND ECONOMIC ACTIVITIES OF THE ISSUER

4.1. Results of financial and economic activities of the issuer

4.1.1. Receipts and expenses

Figures	Calculation method	III quarter
Commodity capital, rubles	FN№2 p010	3416259000
Gross yield, rubles	FN№2 p010- FN№2 p020	-118116000
Net yield (uncovered expenses), rubles	FN№2 p190	-256384000
Labor productivity, roubles/person	FN№2 p010/average number of employees	331740
Yield of capital investments,%	FN№2 p010/ FN№1 p120*100	14.48
Price-earning ratio of assets,%	FN№2 p190/ FN№1 p300*100	-0.77
Price-earning ratio of fixed capital, %	FN№2 p190/(FN№1 p490+ FN№1 p640+ FN№1 p650- FN№1 p450)*100	-1.00
Profitability of production (sale), %	FN№2 p050/ FN№2 p010*100	-3.46
Sum of uncovered expenses with regard to financial period, rubles	FN№1 p465+ FN№1 p475	-413408000
Ratio of uncovered expenses to currency of the balance	FN№1 p475 + FN№1 p300	-0.012

For financial period commodity capital is 3416259 roubles that is 294295 roubles less than in II quarter of 2004 (3710554roubles).
In III quarter gross yield is -118116 roubles. As a result of the issuer's financial and economic activity, for 9 months of 2004 uncovered expenses have been 413408000 rubles (for III quarter-256384000 rubles). It is resulted from fining for excess emitting harmful substances with total sum of 699217000 rubles (according to the writ of execution of the Arbitration Court of Kemerovo Region). In connection with such expenses price-earning ratio of the assets and fixed capital has diminished.

4.1.2. Factors that influence the issuer's earnings from sale of products, operations, services and receipts (expenses) from the issuer's basic activity

Factors that influence the issuer's earnings are not mentioned in connection with its insignificant change during the financial period.

4.2. Issuer's liquidity

Figures	Calculation method	With regard to the end of financial period
Circulating assets, rubles	FN№1 p490+ FN№1 p640+ FN№1 p650- FN№1 p450- FN№1 p190- FN№1 p230	-2556709000
Index number of financial independence	(FN№1 p590+ FN№1 p690- FN№1 p650- FN№1 p640)/(FN№1 p490+ FN№1 p640+ FN№1 p650- FN№1 p450)	0.30
Index number of independence of fixed assets	(FN№1 p490 + FN№1 p640+ FN№1 p650- FN№1 p450)/ FN№1 p300	0.77
Reserve of circulating assets	(FN№1 p490+ FN№1 p640+ FN№1 p650- FN№1 p450- FN№1 p190- FN№1 p230)/(FN№1 p210- FN№1 p216)	-1.88
Index number of fixed assets	(FN№1 p190+ FN№1 p230)/ (FN№1 p490+ FN№1 p640+ FN№1 p650- FN№1 p450)	1.10
Current index number of liquidity	(FN№1 p290- FN№1 p230)/(FN№1 p690- FN№1 p640- FN№1 p650)	0.95
Rapid index number of liquidity	(FN№1 p290- FN№1 p210- FN№1 p220- FN№1 p230)/(FN№1 p690- FN№1 p640- FN№1 p650)	0.55

In comparison with the previous period, in III quarter there is subsidence of the index numbers of company's liquidity. Solvency of the Company is on the normal level. The amount of circulating assets is adequate to ensure short-term liabilities of the Company.
The issuer's reserves are basically formed at the expense of loan assets. For the financial period there is insignificant regressive development in forming own circulating assets and enforcing influence of loan assets.

4.3. Amount, structure and adequacy of the issuer's capital and circulating assets

4.3.1. Amount and structure of the issuer's and circulating assets
a) authorized capital: **The authorized capital of the issuer is composed of par nominal value of stocks acquired by shareholders (placed stocks). The authorized capital of the issuer presents 606163800 (six hundred and six millions one hundred sixty three thousands and eight hundred) roubles, that complies with the Charter of the Company.**
b) total value of the issuer's stocks bought by the issuer for future reselling: **the JSC "Kuzassenergo" did not buy its stocks in III quarter of 2004.**
c) the issuer's reserves formed by means of assignments from the issuer's receipts: *The amount of reserves is determined by the Charter of the Company and can not be less than 5% of the authorized capital of the Company. Reserve fund is formed by means of obligatory yearly assignments until it reach amount established by the Charter of the company, but it can not be less than 5% of the issuer's net yield. Expanding assets of reserve fund is earmarked for a specific purpose. It serves to defray*

expenses of the Company and bond payments, also to buy own stocks **in case of shortage of other assets. The amount of reserved fund with regard to 09.30.2004 presents 16858000 roubles.**

d) surplus capital of the issuer that reflects increase of assets value revealed by revaluation: **With regard to 09.30.2004 surplus capital of the issuer presents 24508086000. For financial period amount of surplus capital is reduced at the expense of losses caused by financial and economic activity of the issuer.**

e) net yield of the issuer that is not allotted: **With regard to 09.30.2004 net yield of the issuer that is not allotted presents 0 roubles, uncovered expenses present 413408000 roubles.**

f) assets for target financing: **0**

g) total amount of the issuer's capital: **With regard to 09.30.2004 total amount of the issuer's capital presents 25330085000 roubles.**

With regard to III quarter of 2004 the issuer's capital is reduced at 259140000 roubles (from 25589225 to 25330085 roubles) resulted to expenses caused by financial and economic activity of the issuer.

Amount and structure of circulating assets (thousands rubles)

Circulating assets	With regard to 06.30.2004	With regard to 09.30.2004
Reserves	1078789	1403402
Including: Raw and other materials	989072	1260868
Fattening live-stock	0	0
Expenses of unfinished production	0	0
Finished products and commodities for reselling	2308	1913
Dispatched commodities	2955	2915
Expenses of future periods	74046	40585
Other reserves and expenses	10417	97121
Value-added tax on acquired values	752530	804488
Account receivable (with payment expected for more than 12 months after termination of financial period)	1190936	1298013
Including buyers and customers	427399	449844
Account receivable (with payment expected for 12 months after termination of financial period)	3955460	2803006
Including buyers and customers	1788216	1199697
Short-term investments	73976	121633
Cash assets	154992	73385
Other circulating assets	0	0
Altogether	7206692	6503927

The source of financing the circulating assets is fixed assets. The issuer's capital is adequate to satisfy its requirements in resources ensuring incessant production and realization, also to satisfy current liabilities.

The issuer's policy in respect of circulating assets presents ensuring sufficient amount and structure of circulating assets aimed at increase of assets liquidity. To reduce account receivable the issuer carries out some activity in respect of buyers and customers, control over bills to pay off, indemnity of expired account receivable.

4.3.2. Adequacy of the issuer's capital and circulating assets

The issuer's capital and circulating assets are adequate to satisfy operating costs.

Figures	With regard to 06.30.2004	With regard to 09.30.2004
Fixed capital, roubles	25589225000	25330085000
Circulating assets, roubles	7206692000	6503927000
Short-term liabilities	6103905000	56919333000
Average operating costs per day, roubles	65711922	63113389

4.3.3. Cash assets

Control figures of cashflow movements are quarterly adopted by the issuer's Board of Directors.

The question of adopting control figures of cashflow movements for IV quarter of 2004 was submitted for consideration at the meeting of the issuer's Board of Directors in 09.20.2004 and they arrived at a decision to postpone the consideration of this question.
Potential source of cash assets regarding IV quarter of 2004 is tariff on electric and heat energy and short-term credits.
There is no account payable registered in bank card-index.

4.3.4. The issuer's financial investments

Financial investments according to the Regulations on cash management №4/99 include:
-investments to subsidiaries;
-investments to affiliated business divisions;
-investments to other organizations;
-long-term credits (12 month and more);
-short-term credits (less than 12 month);
-own stocks sold by shareholders;
-other investments.

Figures	Amount of investments with regard to the end of financial period, roubles		
	short-term	long-term	Altogether
short-term credits (less than 12 month)	-	-	-
long-term credits (12 month and more)	-	-	-
own stocks sold by shareholders	-	-	-
investments to other organizations	-	657000	657000
investments to subsidiaries	-	412259000	412259000
investments to affiliated business divisions	-	-	-
other investments	121633000	-	1216333000

Financial investments are registered on balance 58 according to the Regulations on cash management №19/02 confirmed by the Ordinance №126 of the RF Ministry of Treasury dd 12.10.2002.

1) Bond investments

Data on other investments (to limited liability companies) are not mentioned, as it presents less than 10% of total investments of the issuer with regard to III quarter of 2004.
In 2003 the income of the "JSC Kuzbassenergo" from investing just the Limited Liability Company "Bill Center of the Kuzbassenergo" was 1.7 mln. rubles.

4.3.5. The issuer's intangible assets

The intangible assets of the issuer include exclusive rights to its trade mark.
The amortization of intangible assets is calculated by linear method concerning the following terms:
The rights to the trade mark -10 years.
In the accounts intangible assets are registered according to primary value with subtracted repay accrued while operating.

№	Group of intangible assets	Total value	Accrued repay
1.	Trade mark	3774 rub., 73 kop.	601 rub., 20 kop.
	Altogether	3774 rub., 73 kop.	601 rub., 20 kop.

Intangible assets are registered according to the Regulations on cash management №14/2000 confirmed by the Ordinance №91n of the RF Ministry of Treasury dd 10.16.2000

4.4. Information about the issuer's policy and expenditures in the sphere of scientific and technological progress, in respect of licenses and patents, new research and development

Expenditures on new research and development are registered according to the Regulations on cash management №17/02.
With regard to 10.01.2004 expenditures on new research and development are:

-implementing new research and development-3951000 rubles;
-investing new research and development-1181000 rubles.

4.5. Overview of the new trends in the sector of the issuer's core business

Power engineering is one of the leading industries in Russian economy. It presents about 10% of the Gross Domestic Product of Russia. Regarding power capacity and volume of production Russian power industry occupies the 4th place in the world. According to the EIA (Energy Information Administration), in 1999 the share of the Russian Federation was 5.7% of world energy output and 9.6% of world power capacity.

In 1999 the program of cooperation with shareholders started implementing. The growth of consumers' arrears was stopped, and the level of receipts collecting reached almost 80%. In 1999 the growth of prices of industrial products outstripped 2.5 times the growth of energy tariffs for this group of consumers. New energy policy includes reforming sale and marketing, increasing export of electric energy and implementing tariff policy. The project of reorganizing the JSC "United Energy Systems of the Russian Federation" was submitted for elaboration.

In 2000 there was increase of electric energy consumption caused by economic growth as well as electric energy generating. Also 25 new turbogenerators with summary power-carrying capacity of 665.7 MW started operating; the 1st Russian gas power generating unit with power-carrying capacity of 450 MW was set in operation in Saint-Petersburg. At the meeting held in December 2000 the RF Government considered several motions on reforming power industry introduced by the Ministry of Economic Development, the Ministry of Atomic Energy, the National Trust "Rosenergoatom"; as a result, the one introduced by the Ministry of Economic Development was adopted for further elaboration. Also the RF Government adopted the Decree №1072 "The plan of the Government's activity in respect of social policy and modernization of economy for 2000-2001" that determine basic tasks in reforming natural monopolies.

With regard to 2001 the level of cash payment for consumed energy in enterprises belonging to the JSC "United Energy Systems of the Russian Federation" increased at 20% and presented 103% with earlier covered arrears. Implementing programs of reducing expenses in subsidiaries and affiliated companies of the Holding allowed reducing expenses at 12.3 billions rubles. Generally, 25 new turbogenerators with summary power-carrying capacity of 1330.2MW and 1819.5 km of power transmission lines with voltage of 35 kV and more were set in operation. The JSC "United Energy Systems of the Russian Federation" in cooperation with a group of independent international consultants developed the program "5000MW". Its purpose is to attract foreign and Russian investors to building more promising power generating supplies. The RF Government adopted the Decree №526 on reforming power industry of the Russian Federation dd 07.11.2001. It prescribes detachment of monopoly activities and separate accounting in enterprises of power industry. In addition to this Decree the RF Government adopted another one №1040p that confirmed the plan of measures for the early stage of reforming. In August 2001 the Board of Directors of the JSC "United Energy Systems of the Russian Federation" established the Committee on reforming. It included representatives of minor shareholders, potential investors, the state and the JSC "United Energy Systems of the Russian Federation". In December 21 the RF Government adopted the Decree № 881 on referring trunk transmission lines and objects of electric supply industry to the National Power Grid. According to the Decree dd 06.11.2001, the JSC "Federal Electric Company", managing the National Power Grid, and the JSC "System Operator", controlling dispatching activity of the National Power Grid, were established.

The main activities of reforming:

- *adoption of the draft law on reforming power industry;*
- *carrying out electric energy trading in simulating condition;*
- *establishing infrastructure organizations in the operating sphere of the JSC "Federal Electric Company" and the JSC "System Operator"*
- *developing the strategy of reforming the JSC "United Energy Systems of the Russian Federation"*
- *finishing preparatory stage of reforming the JSC "United Energy Systems of the Russian Federation"*
- *development and adoption of basic version of reforming the JSC "United Energy Systems of the Russian Federation"*

- *preparation of implementing the contractor design of reforming the JSC "United Energy Systems of the Russian Federation"*
- *implementing the primary stages of reforming research and development complex of the JSC "United Energy Systems of the Russian Federation", also of repairing and maintaining activities.*

The Decree of the RF Government №226 on pricing in respect of electric and heat energy determined new standards of pricing and rules of regulation and application of energy tariffs in the Russian Federation. The JSC "United Energy Systems of the Russian Federation" adopted the Code of corporate management.

In September 2002 the ordinary partnership "Administrator of trade system" began energy trade in simulating condition. One of positive trends of 2002 is the fact that the level of cross subsidizing between groups of consumers began to reduce. The Board of Directors of the JSC "United Energy Systems of the Russian Federation" approved basic version of reforming single area power systems-its subsidiaries. The Board of Directors of the JSC "United Energy Systems of the Russian Federation" passed a decision not to participate in the FWMEP and to sell 75% shareholding of the FWMEP to the Ordinary Partnership "Administrator of trade system".

Generally outstripping growth of costs of production as compared with growth of earnings (29.4% and 23.8%) led to subsidence of gross yield of the JSC "United Energy Systems of the Russian Federation" in 2002. The gross yield of 2002 is 4.6 billions rubles less than the one of 2001, the gross yield of power stations reduced at 4.5 billions rubles.

By night of March 31-April 1, 2003 in 10 regions of Russia the dispatching control over the National Power Grid passed from regional energy generating companies to subsidiaries of the JSC "System Operator".

In April 2003 several legal acts on reforming power industry were put into practice, including the following federal laws:

- *"On power industry";*
- *"On peculiar features of operating the power industry in transitional period and on correcting and abolishing some legal acts of the Russian Federation resulted to passing the Federal Law "On power industry";*
- *"On correcting and adding the Federal Law "On official regulation of energy tariffs in the Russian Federation";*
- *"On correcting and adding the Federal Law "On natural monopolies";*
- *"On correcting and adding the part II of the Civil Code of the Russian Federation";*
- *"On correcting and adding the Federal Law "On energy reserves".*

The operating group founded by the Board of Directors of the JSC "United Energy Systems of the Russian Federation" for developing its strategy considered the draft strategy "5+5" for 2003-2004 allowing for received remarks and suggestions. In the 1st half of 2003 the Company continued the process of developing the mechanisms of competitive trade within the FWMEP. According to valid legal acts, there was monthly trading excess electric energy, the volume of this energy presented 3.1% of the volume of electric energy supplied to the FWMEP. Also the Company in cooperation with the JSC "System Operator" continued energy trading according the scheme "Energy pool", for financial period total sale volume became two times as large and presented 1.3% of the total volume of energy supplied to the FWMEP.

Energy generating companies continued establishing the National Power Grid; this process was carried out under control of the JSC "Federal Electric Company" having on its balance more than 45000 km of trunk transmission lines, 126 power substations and systems of technological control.

In October 31,2003 at the regular meeting the Board of Directors of the JSC "United Energy Systems of the Russian Federation" listened to the information on establishing single area energy generating companies by several cooperated energy generating companies. Such variant implies organizing large energy generating supply at the early stage of reforming. Single area energy generating company is established by several energy generating companies by means of investing its operating assets in authorized capital of newly established company. Thus it makes possible to organize large energy generating supply whose shareholders are presented by energy generating companies-founders at the early stage of reforming.

According to the Decree №643 of the RF Government on rules of wholesale market of energy (power) in transitional period dd 10.24.2003, in November 1, 2003 the independent sector of energy market begin functioning in parallel with the FWMEP, it implies trading hourly volumes of electric energy at

free prices. Moreover in this sector each supplier can offer about 15% of its power and each consumer can register purchase of about 30% of its regular consumption. This sector occupies just European part of the Russian Federation and the Ural.

Economic effect caused by operation of the independent sector is obvious. The volume of electric energy supplied by power stations with low costs of production increased while the one supplied by large energy generating companies on the contrary reduced.

Receipts of the JSC "United Energy Systems of the Russian Federation" from basic activity in 2003 were 64.5 billion rubles, that was 3.5 times as large than in 2002, resulted to the Company's policy of restraining expenses that grew slower than earnings from realization. Moreover net yield of the Company reduced at 9 billion rubles and became 27 billion rubles. It is connected with the fact that in 2003 payout of a part of income tax was postponed resulted to revaluating fixed assets.

The beginning of 2004 was marked with regressive development in power industry resulted to climatic factor, i.e. heightening temperature in January 2004 in comparison with January 2003. Thus in January 2004 general subsidence of production presented 1.6%. For all that it is mostly connected with subsidence in heat energy generating.

In January 2004 there was usual for beginning of the year growth of prices of energy products, but it was comparatively small. Though, the growth of prices in gas and oil industry was much higher. Essential rise of gas prices with much smaller growth of energy tariffs can negatively influence financial condition of enterprises of power industry in 2004.

In the beginning of 2004 the independent sector of energy market continued developing. 95 clients signed the contract on entering system of wholesale market, 25 of them do not refer to subsidiaries or affiliated companies of the JSC "United Energy Systems of the Russian Federation". Share of the independent sector in July presents 8.0% of total volume of energy consumption in the European part of Russia and the Ural, in May it was 7.4%.

In March 26, 2004 the Board of Directors of the JSC "United Energy Systems of the Russian Federation" approved principals of forming new organizational structure-executive body of the Holding. It is supposed to consist of 3 important sections: corporate body, body of control over reform and body of control over business units.

The corporate body performs the basic administrative functions of the JSC "United Energy Systems of the Russian Federation", the body of control over reform (several project groups under one control) is responsible for developing project of reforming power industry. The business units are subdivisions of the executive body of the JSC "United Energy Systems of the Russian Federation" with own budget and responsibility for this or that business activity (in this structure the JSC "Federal Electric Company" and the JSC "System Operator" are independent legal entities, other ones are not). The corporate body is to interact with shareholders, state authorities, mass media, to perform functions of strategy and control (e.g. strategic activity, financial monitoring); the body of control over reform is to develop and implement reforming; the body of control over business units is to establish new companies according to the reform, to control its activity, to distribute culture and standards of management and basic business activities.

The JSC "Kuzbassenergo" is a part of electric power system of Russia and a subsidiary of the JSC "United Energy Systems of the Russian Federation". It provides with electric and heat energy for population and industries of Kemerovo Region that is located in south-east of the Western Siberia and situated on the border of the West-Siberian Plain and mountains of the Southern Siberia. The length of Kemerovo Region from north to south is about 500 km, from west to east-300 km. The population is 2897400 persons with regard to 01.01.2004.

After large energy consumers entered into the FWMEP the JSC "Kuzbassenergo" being energy deficient turned into energy efficient company. The independent sector of energy market "5-15" in Siberia is to begin operating not earlier than in the middle of 2005. For efficient power systems there is average tariff to enter into the FWMEP that in 2004 presented 29.6 cop. for single area energy generating companies.

Regarding such approach of calculating energy price of kWh, efficient energy generating companies are considered to be too expensive, so the JSC "Federal Electric Company" did not include them in the balance of Siberian energy zone and power system of the Russian Federation for 2004. Such decision resulted in: reducing own energy generating at 2.5 billion kWh per year and temporary closing down equipment with power-carrying capacity of 400 MW. It leads to direct reduction of receipts and sources of industrial and social programs. Moreover analyzing activity of the JSC "Kuzbassenergo" according to balances approved by the JSC "Federal Electric Company" for IV

quarter (with zero-point balance brought forward of electric energy and power) revealed a number of technological problems connected with intensive loading equipment of power stations and fulfilling contracted obligations to the FWMEP in autumn-winter period.

In short time the Company prepared the report containing all excerpts and calculations where it grounded the necessity of selling during this period about 70 mln kWh of electric energy per month. After thorough examination the JSC "Federal Electric Company" accepted the proposals of Kuzbass power engineers. In November 2003 the JSC "Kuzbassenergo" supplied 34 mln kWh of electric energy to the FWMEP, with total sum of 9 mln rubles. With regard to I quarter of 2004 the JSC "Kuzbassenergo" is included in summary energy balance of electric power system of Russia as supplier with total sale volume of 160 mln kWh. Entering into the FWMEP as supplier became important economic and technological achievement of single area power system.

The issuer's activity in the sphere of power industry largely depends on common industrial trends. It faced the problem of non-payments, typical for general economic sphere, and particularly regional problems especially with the Regional Energy Committee.

In 2000 the "Scheme of developing power system till 2010"was reconsidered. The Regional Energy Committee of Kemerovo Region (decree №23 dd 06.13 2000) declared the present scheme to be necessary and opportune, aimed at maintaining energy generating companies and volumes of production.

The JSC "United Energy Systems of the Russian Federation" approved the scheme as program-minimum for maintaining efficiency of equipment. This scheme implies developing power system till 2010 and sets absolutely new tasks and approaches to its solution:

- *economic ground of building and rigging with new equipment objects of power system.*
- *implementing new technologies including achievements of national science and foreign experience.*
- *mechanization of technological process.*
- *implementing modern methods of diagnosing condition of equipment.*

In 2002 power system operated regularly and according to the balance of production confirmed by the Federal Energy Committee and plots based on operating conditions of electric power system of Siberia. Faultless activity of the company ensured continuity of service of power system to solvent consumers, and stable passing autumn-winter period.

In 2002 the index of carrying out physical activity was higher than for all recent years. Last year the Company carried out all planned repairing works; in spite of misbalance in tariffication it gradually implemented the program of rigging with new equipment.

During 2002 the Company carried out reform of financial regulation and control, introduced the system of budgeting and strict control over discharge of budget and account receivable. This activity contributed to reduce of account payable at 300mln rubles.

Alike solving financial, economic and technological problems the Company started reforming according to basic trends in reorganization of power industry.

Growing volumes of marketable energy issue for the recent 5 years caused by increasing energy consumption and energy tariffs. For recent years there is a tendency to growing percent of realization, it means that realization exceeds marketable energy issue, i.e. there is reduce of account receivable. For recent years there had been change in payment structure towards emphasizing money component.

2003 was a year of large starting objects presenting objects of great importance not only for power system but for Kuzbass. In August the Southern Electric System successfully set into operation high-voltage transmission line assisted to electrification of distant settlement Ust-Kabyrza, the biggest settlement in the district.

In December 4, 2003 the Kuznetsky Thermoelectric Plant set into operation turbine R-12-90/30 with power-carrying capacity of 12 MW and boiler №4 with steam generating capacity of 160 t p.h.

In December 19, 2003 the South-Kuzbass Electric Power Station set into operation unique turbine T-115-8.8 on vibratory buttress with power-carrying capacity of 115 MW and generator TF-110-2UZ.

For its outstanding contribution to the historical development of the Russian Federation the JSC "Kuzbassenergo"was favoured with honorable title "Prizewinner of the Premium "Russian National Olympus" in category "Power Generating System". The "Russian National Olympus" is the main national premium, reflecting great achievements in social, economic, scientific and cultural spheres of the Russian Federation.

With regard to 03.31.2004 the Board of Directors of the JSC "United Energy Systems" approved 49 projects of reforming out of 70 ones to be approved. These projects started to be implemented in 41

energy generating companies. The project group "Repairs" approved projects of separated repairing activities in 70 energy generating companies and in 32 power stations. The Board of Directors of the JSC "United Energy Systems of the Russian Federation" also approved projects of separated repairing activities in 52 energy generating companies and in 20 power stations.

In March 2004 separation of energy repairing activities was finished. It was carried out according to the project of reforming energy repairing activities of the JSC "Kuzbassenergo" approved by the project group of the Supranational JSC "United Energy Systems of the Russian Federation".

07.01.2003- establishing 3 subsidiaries of the JSC "Kuzbassenergo" with its 100% share in their authorized capital:

-the JSC "Kuzbassetremont"-competitive energy repairing company, carrying out repairing works in electric supply systems, registered in 03.04.2004.

- The JSC Engineering and Analytical Center "Kuzbasstechenergo" –competitive engineering company, registered in 03.09.2004.

- The JSC "Kuzbass Repairing Company"-competitive energy repairing company carrying permanent and planned repairs of equipment of power stations, registered in 03.01.2004.

The affiliated company "Repairing Enterprise "Kuzbassenergoremont" was abolished.

Energy tariffs determined by the Energy Committee of the Russian Federation for 2004 are 7.5% higher than the ones of the previous year. But after implementing decisions accepted by the Energy Committee of the Russian Federation the cost of water supply advanced to 25%, metal products-to 20-60%, coal-to 10-15%, transporting cost also continued to grow. Court order in favor of tax gathering bodies badly influence the budget of the JSC "Kuzbassenergo" as it had to pay out 669.2 mln rubles. These new expenditures made the leaders of the power system reduce expenses for repairs, reconstruction and development.

In September 20, 2004 the JSC "United Energy Systems, the Administration of Kemerovo Region and the JSC "Kuzbassenergo" signed agreement on cooperation for 2004-2006. According to it, the Supranational JSC "United Energy Systems of the Russian Federation" while reforming the JSC "Kuzbassenergo" is to take into account the position of the Administration of Kemerovo Region that is against separation of generating supplies of power system. Besides this agreement prescribes gradual ceasing cross subsidizing, establishing acceptable price of power in the FWMEP for the JSC "Kuzbassenergo" etc.

V. Detailed information about members of the issuer's administrative bodies, its units of control over its financial and economic activities; brief information about the issuer's personnel (employees)

The authorities of the Company are:

- *Shareholders meeting, which is the superior authority of "Kuzbassenergo"*
- *The Board of Directors*
- *Managing/executive committee*
- *General Director*

The capacity of General shareholders meeting of OJSC "Kuzbassenergo" according to its Charter:

par. 10.2. of article 10. General shareholders meeting (abstract of the Charter of OJSC "Kuzbassenergo"):

General shareholders meeting consider the following issues:

1) alteration of the Charter or ratification of a new redaction of the Charter

2) reorganization of the Company

3) liquidation of the Company, appointment of the liquidation commission and ratification of the interim and closing statements

4) fixing of the quantity, nominal value, category of declared stocks and rights that are conceded by the stocks

5) aggrandizement of the Company's chartered capital by cost increase of stock nominal value or by excess stock floatation

6) reduction of the Company's chartered capital by attrition of stock nominal value, by acquisition of a part of stocks in an effort to reduce its total number and by paying off the stocks acquired or redeemed by the Company

7) split and consolidation of the Company's stocks

8) making decisions about floatation of the bonds and other emission securities that can be converted into stocks

9) election of the members of Board of Directors and long-term cessation of their powers

10) election of members of Auditing committee of the Company and pre-term cessation of their powers

11) confirmation of the candidacy of Auditor of the Company

12) making decisions about delegation of powers of the individual executive board of the Company to a managing organization (to a manager)

13) approval of annual reports, annual bookkeeper's records, including income and losses statements; distribution of profits (including payment of dividends, except for the profit allotted as dividends after considering the results of the first three, six months, nine months of a fiscal year) and losses of the Company after considering the results of a fiscal year

13.1.) payment of dividends considering the results of the first three months, six month, nine months of a fiscal year

14) determination of General shareholders meeting conduct

15) making decisions about transactions approval in cases provided for by article 83 of Federal law "About joint-stock companies"

16) making decisions about major transactions approval in cases provided for by article 79 of Federal law "About joint-stock companies"

17) making decisions about joining holding companies, financial and industrial groups, associations and other profit organization

18) ratification of nonpublic documents that control activity of the Company's bodies

19) making decisions about payment of remunerations and/or compensation to members of Auditing committee

20) making decisions about payment of remunerations and/or compensation to members of Committee of directors

21) considering other points provided for by Federal law "About joint-stock companies"

The capacity of Board of Directors of OJSC "Kuzbassenergo" under the terms of its Charter:

par. 15.1. of article 15. Board of Directors of the Company (abstract of the Charter of OJSC "Kuzbassenergo")

Board of Directors consider the following issues:

1) determination of major activities of the Company

2) calling of annual and special Stockholders meetings, except for in cases provided for by paragraph 14.8 of this Charter and announcement of the day of a new Stockholders meeting instead of the one frustrated because there was no quorum

3) ratification of the agenda of General shareholders meeting

4) election of secretary of General shareholders meeting

5) determination of the day of listing persons that have the right to participate in General shareholders meeting, solve other questions related to preparation and holding of General shareholders meeting

6) pronouncement of the questions provided for by sub-paragraphs 2, 5, 7, 8, 12-19 of paragraph 10.2. of article 10 of this Charter to the judgement of Stockholders meeting

7) floatation of bonds and other emission securities, except for the cases fixed in Federal law "About stockholders meetings" and in this Charter

8) ratification of the decision of capital issue, offering circular of securities emission and report about the results of capital issue; ratification of quarterly reports of emission securities issuers and reports about the results of acquisition of the Company's stocks

9) determination of the price (pecuniary valuation)of the property, price of distribution and repurchase of securities in cases provided for by Federal law "About stockholders meetings" and when solving questions mentioned in sub-paragraphs 21, 39 of paragraph 15.1. of this Charter

10) acquisition of the stocks, bonds and other securities floated by the Company in cases provided for by Federal law "About stockholders meetings"

11) alienation (disposal) of the Company's stocks that became at the Company's disposal after their acquisition or redemption from stockholders of the Company

12) election of General Director of the Company and pre-term cessation of his powers

13) election of members of Managing board of the Company, pre-term cessation of their powers and fixing remunerations and compensations paid to them

14) recommendations to General shareholders meeting about the amount of remunerations and compensations paid to members of Auditing committee and determination of amount of payment of services of Auditor

15) recommendations about the stocks dividend amount and its payment procedure

16) ratification of nonpublic documents of the Company that determine forming and application of the Company's funds

17) making decisions about application of the Company's funds;, ratification of budget of draft on special-purpose funds and consideration of results of implementing the budget of draft on special-purpose funds

18) ratification of nonpublic documents of the Company, except for nonpublic documents that must be ratified by General shareholders meeting, and for other nonpublic documents that must be ratified by executive powers of the Company

19) ratification of annual (quarterly) business plan and report about the results of its execution, ratification (updating) of check indexes of cashflow (budget) of the Company and/or ratification (updating) of cashflow (budget) of the Company

20) establishment of branch offices and opening of representative offices of the Company, their winding-up

20.1) alteration in the Charter related to the establishment of branch offices, opening of representative offices of the Company (including alteration of information about names and location of branch offices and representative offices of the Company) and to their winding-up

21) making decisions about the Company's joining other organizations (including approval of constitutive documents and candidatures to authorities of new organizations), alteration of market share (stocks number, share amount), stocks and share charge and cessation of the Company's participation in other organizations

22) determination of credit policy of the Company in the field of loans issue, credit and debt contracts making, guarantees issue, assumption of bill obligation (issue of promissory note and of bill of exchange), pawning of property and making decisions about settlement of transactions stated above in the cases when decision making procedure is not determined by the Company's credit policy

23) approval of major transactions in cases provided for by chapter X of Federal law "About stockholders meetings"

24) approval of transactions provided for by chapter XI of Federal law "About stockholders meetings"

25) approval of the Company's registrator's candidature, terms of the treaty and denunciation

26) election of President of Board of Directors and pre-term cessation of his powers

27) election of Vice-president of Board of Directors and pre-term cessation of his powers

28) election of Secretary of Board of Directors and pre-term cessation of his powers

34) bringing General Director and members of Managing board of the Company to disciplinary liability and their reward in accordance with Labour legislation of the Russian Federation

35) consideration of reports of General Director about the Company's activities (including performance of functions of General Director), about accomplishment of the decisions of Board of Directors

36) ratification of procedure of the Company's interaction with organizations in which the Company is involved

37) determination of position of the Company (the Company's representatives) re the following items of agendas of general shareholders meeting and meetings of committees of directors of associated and subordinate companies, including order to vote or not to vote for items of agenda, vote for, against and abstain from voting for decision projects:

a) about determination of agenda of general shareholders meeting of associated and subordinate companies

b) about reorganization and winding-up of associated and subordinate companies

c) about determination of numerical strength of Board of Directors of associated and subordinate companies, nomination and election of its members and pre-term cessation of their powers

d) about determination of number, nominal value, category of stated stocks of associated and subordinate companies and of rights given by these stocks

e) about increase of the chartered capital of associated and subordinate companies by nominal value increase or by additional stocks floatation

f) about floatation of securities of associated and subordinate companies that can be converted into common stocks

g) about split and consolidation of stocks of associated and subordinate companies
h) about approval of major transactions made by associated and subordinate companies

i) about associated and subordinate companies joining other organizations (about joining operating enterprise or establishment of a new organization), and about acquisition, alienation and charge of stocks and shares in authorized capitals of organizations joined by associated and subordinate companies, about alteration of market share of corresponding organization

j) about settlement of transaction by associated and subordinate companies (including several interrelated transactions) related to alienation or possibility of alienation of property that forms its permanent assets, fictitious assets, objects of incompleted construction, that are exploited for the purpose of generation, transmission, supervision, distribution of heat and electric power in cases (amounts) provided for by the Company's interaction procedure with organizations in which the Company participate, confirmed by the Company's Board of Directors

k) about alteration of constituent documents of associated and subordinate companies

l) about determination of procedure of payment of fees to members of Board of Directors and Auditing committee of associated and subordinate companies

38) determination of position of the Company (the Company's representatives) re the following items of agenda of meeting of Board of Directors of associated and subordinate companies (including order to vote or not to vote for items of agenda, vote for, against and abstain from voting for decision projects):

a) about determination of position of representatives of associated and subordinate companies re items of agenda of stockholders (sharers) meeting andmeeting of committees of directors of companies that are branch establishments of associated and subordinate companies, referring to settlement of transactions (including several interrelated transactions) related to Alienation or possibility of alienation of property that forms permanent assets, fictitious asset, objects of incompleted construction, that are exploited for the purpose of generation, transmission, supervision, distribution of heat and electric power in cases (amounts) provided for by the Company's interaction procedure with organizations in which the Company participates, confirmed by the Company's Board of Directors

b) about determination of position of representatives of associated and subordinate companies re items of agenda of stockholders (sharers) meeting and meeting of committees of directors of companies that are branch establishments of associated and subordinate companies that fulfil generation, transmission, supervision, distribution of heat and electric power, about reorganization, liquidation, increase of authorized capital of these companies by increase of stocks nominal value or by excess stock floatation and distribution of securities that can be converted into common stocks

39) prior approval of decisions about the Company's settlement:

a) transactions, subject of which is non-negotiable assets of the Company in the amount of 10 to 25 per cent of book cost of these assets on the date of decision about this transaction

b) transactions (including several interrelated transactions) related to Alienation or possibility of alienation of property that forms permanent assets, fictitious asset, objects of incompleted construction, that are exploited for the purpose of generation, transmission, supervision, distribution of heat and electric power in cases (amounts) provided for by special decisions of Board of Directors of the Company

40) making decisions about conclusion contract, subject of which is assets or liabilities of the Company in the amount of 5 to 25 per cent of book cost of the Company's assets on the date of decision about this transaction

42) nomination of candidatures to the post of individual executive board, to other authorities, controlling units and to the post of Auditor of organizations in which the Company participates , that fulfill generation, transmission, supervision, distribution of heat and electric power and maintenance and service

43) determination of lines of insurance securing of the Company, including acceptance of Insurer of the Company

44) acceptance of candidature of independent valuer (valuers) for determination of value of stocks, property and other assets of the Company in cases provided for by Federal law "About stockholders meetings", this Charter and special decisions of Board of Directors of the Company

45)other questions related to Board of Directors competence by Federal law «About stockholders meetings» and this Charter

46) prior approval of collective agreement, agreements completed by the Company in the framework of regulation of social and labor relations

47) acceptance of candidature of financial consultant, that is necessary to be recruited according to Federal law "About equity market"

The capacity of individual and collective executive boards of OJSC "Kuzbassenergo" according to its Charter:

Day-to-day operation of the Company is managed by individual executive board – General Director and collective executive board – Managing board.
par 20.2. of article 20. Managing board (abstract of the Charter of OJSC "Kuzbassenergo"):

Managing board consider the following issues:

- making decisions concerning questions covered by *terms of reference of superior authority's of economical companies, 100 per cent of capital of which belongs to the Company (taking into consideration sub-paragraph 37, 38 of paragraph 15.1 of this Charter)*

- preparation and pronouncing of reports about financial and economic activity of economical companies, 100 per cent of authorized capital of which belongs to the Company, on approval of Committee of directors

- working out and provision of long-term plans of realization of mainstreams of the Company's activity on approval of Committee of directors

- preparation of annual (quarterly) business plan and report about the results of its realization, and approval (correction) of cashflow (budget) of the Company,
if cashflow (budget) of the Company is not approved by Board of Directors of the Company

- preparation of report about financial and economic activity of the Company, about realization of decisions of General shareholders meeting and Board of Directors by Managing board

- approval of plans and arrangements related to training and further training of the Company's personnel

- establishment of benefits and insurance arrangements for the Company's personnel

- making decisions about settlement of transactions, subject of which is property, labor and services, cost of which amounts 1 to 5 per cent of book cost of the Company's assets and is determined on the date of decision about conclusion contract (except for the cases stated in sub-paragraphs 39, 40 of paragraph 15.1. of this Charter)

- examination of reports of deputy Directors-general and unit managers of the Company about the results of realizations of approved plans, programs, instructions; examination of reports, documents and other information about activity of associated and subordinate companies of the Company

- solution of other questions concerning managing of day-to-day operation of the Company according to decisions of General shareholders meeting, Board of Directors of the Company, and of questions submitted to consideration of Managing board by General Director of the Company

par. 21.2. of article 21. General Director of the Company (abstract of the Charter of OJSC "Kuzbassenergo"):

General Director of the Company considers all the questions of managing of day-to-day operation of the Company, except for questions submitted to competence of General shareholders meeting, Board of Directors and Managing board of the Company:

par. 21.3. of article 21. General Director of the Company (abstract of the Charter of OJSC "Kuzbassenergo"):

General Director of the Company acts without proxy on behalf of the Company, including taking into consideration limitations stated in existing legislation, this Charter and decisions of Board of Directors of the Company

- implements plans of the Company's activity that are essential for tasks solution

- organizes accounting and book-keeping if the Company

- disposes of property of the Company, settles transactions on behalf of the Company, gives powers of attorney, sets up settlement and other accounts of the Company at banks, other lending agencies (in statutory cases - at organizations that are professional equity market participants)

- issues orders, approves of instructions, local *statutory acts and other nonpublic documents of the Company concerning questions of his competence, gives instructions that must be followed by the Company's personnel*

- approves of Regulations of branch and representative offices of the Company

- approves of general structure of executive setting of the Company

- approves of list of members of staff and official salary of the Company's personnel according to general structure of executive setting of the Company

- exercises employer's rights and responsibilities provided for by labour legislation in relation to the Company's personnel

- functions as President of Managing board of the Company

- distributes obligations between deputies General Director

- provides Board of Directors with reports about financial and economic activity of associated and subordinate companies, stocks of which belong to the Company, and with information about other organizations, in which the Company participates, except for cases provided for by sub-paragraph 2) of paragraph 20.2 of article 20 of this Charter

- provides Board of Directors with annual report, balance sheet, bill of profits and losses of the Company, distribution of profits and losses of the Company not later than for 45 (forty five) days before the date of annual Stockholders meeting

- solve other questions of day-to-day operation of the Company, except for questions submitted to competence of General shareholders meeting and Managing board of the Company.

There is no code of corporate conduct (management) in OJSC "Kuzbassenergo"; in its relations with shareholders OJSC "Kuzbassenergo" is governed by code of corporate conduct of OJSC RAO "UES of

Russia" approved by decision of Board of Directors of RAO "UES of Russia" (record of 09.11.2001 №104)

Inspectorate of Ministry of the Russian Federation of taxes and tallage in Kemerovo fixed alteration of constituent documents of OJSC "Kuzbassenergo"in common public register of legal persons the 23rd of august 2004. Changes of the Charter of OJSC "Kuzbassenergo" come with the report (Appendix №1)

The Charter of OJSC "Kuzbassenergo" can be found in the Internet on the page **www.kuzbassenenergo.ru/inf/zak.shtml**

5.1. Information about members of the issuer's management bodies
Committee of directors:

24.06.2004 annual general meeting elected Board of Directors of OJSC "Kuzbassenergo" consisting of:

Chairman of Board of Directors of OJSC "Kuzbassenergo": ***Vagner Andrey Aleksandrovich***

Year of birth: ***1957***
Education: ***higher***.
Posts of the recent 5 years:
Time period: ***1998-2000***
Organization: OJSC ***"Kuzbassenergo"***
Post: ***First deputy General Director***
Time period: ***2000 – 2004***
Organization: OJSC RAO "UES of Russia"
Post: ***Head of Department of electric power stations***
Time period: ***2004 – present time***
Organization: OJSC RAO "UES of Russia"
Post: ***Deputy managing director Business-Unit 2.***

Share in the issuer's chartered capital: 0.027%.
Share of ordinary stocks in the issuer's chartered capital: 0.027%.
Number of the issuer's stocks that a person can purchase exercising rights concerning the issuer's options that belong to the person: no such stocks.

Person functioning as individual executive board of the issuer: Mikhaylov Sergey Nikolaevich.

5.3. Information about the amount of remuneration, benefits and/or compensation of expenses of each management body of the issuer

In 2003 payments to members of the Board of Directors of OJSC "Kuzbassenergo" (without taking into account incomes of General Director) amounted 643 006 (six hundred forty three thousand and six) roubles including remuneration for participation - 643 006 roubles.

In accordance with Regulation about payment of remunerations and compensations to members of Board of Directors of OJSC "Kuzbassenergo", approved by annual stockholders meeting of OJSC "Kuzbassenergo" 02.06.2003, remuneration to members of Board of Directors is paid:

1. For participation in meeting of Board of Directors (regardless of its form) to member of the Board of Directors of the Company to the amount of five times repeated sum of minimum monthly tariff rate of first-class worker, fixed by branch tariff agreement on the date of holding of meeting of Committee of directors.

2. On making decision by stockholders meeting payment of common stocks dividend of the Company considering the results of fiscal year (or the results of the first three/six/nine months) remuneration is paid, amount of which is calculated in consideration of amount of common stocks dividends declared by the Company and number of meetings in which member of The Board of Directors participated.

Amount of remunerations paid to Chairman of board of directors increase by 50%.

Moreover, traveling expenses of member of The Board of Directors are covered.
From the beginning of 2004 remuneration to the amount of 1 100 755 roubles (without taking into account payments to General Director of the Company) has been paid to members of Committee of directors.

In 2003 9 469 553 (nine million four hundred sixty nine thousand five hundred and fifty three) roubles (without taking into account incomes of General Director) were paid to members of Mananging board, including:

Wages - 8 673 081 roubles.

Remuneration for participation - 337 626 roubles.

Property provisions - 458 846 roubles.

Managing board members' incomes in 2004 are formed of their incomes as of staff members of OJSC "Kuzbassenergo" and of remuneration fixed according to labour contract, made with member of Managing board of OJSC "Kuzbassenergo". According to "Regulations of Managing board of Kuzbass open joint-stock company of power engineering and electrification", approved by annual stockholders meeting of OJSC "Kuzbassenergo" 21.06.2002, labour contract is signed by Chairman of board of directors of the Company or person, authorized by The Board of Directors of the Company, on behalf of the Company.

Terms of the contract are determined by The Board of Directors of the Company or person, authorized by The Board of Directors of the Company to sign labour contract.
Managing board member is paid monthly remuneration to the amount of 10% of their official salary.

Remuneration amount increases by actual increase of consumer price index according to branch tariff agreement.

Managing board member can be stimulated more in the course and on terms, fixed by The Board of Directors of the Company.

Considering the results of 9 months of 2004 Managing board members are paid 10 397 350 roubles in all, including:

- *wage - 5 069 341 roubles*
- *premium - 3 678 917 roubles*
- *remuneration - 607 295 roubles*
- *compensatory expenses - 1 041 797 roubles.*

8.7. Information about legislative acts regulating the issues of capital import and export which can affect payout of dividends, interest and other payments to non-residents

The basic legislative act regulating the issues of capital import and export is Law of the Russian Federation of the 10 December 2003 №173-FZ "About currency regulation and currency control" (edit. Of 29.06.2004)

Tax code of the Russian Federation (part one of the 31 of July 1998 №146-FZ and part two of the5 of August 2000 №117-FZ).

Instruction of Central Bank of the Russian Federation of the 28 of December №96-I (edit. Of the 13.08.2003) "About special accounts of non-residents of the type "C". This instruction regulates the order of realization of operations by non-residents with special accounts of the type "C" in the currency of the Russian Federation and by special accounts of the type "C", on which securities are considered.

"Instruction of approval of Ministry of Trade of Russia of expediency of investments abroad by legal and physical person of the Russian Federation", approved by Order of Ministry of Trade of the Russian Federation of the 9 of July 1999 №318.

Moreover, a group of Federal laws ratify Agreements about avoidance of double taxation between the Russian Federation and foreign countries. At present time regime of avoidance of double taxation functions concerning more than 50 countries. For instance:

1.Federal law of the 17 of July 1999 №167-FZ "About ratification of the Agreement between the Government of the Russian Federation and the Government of Cyprus about avoidance of double taxation as regards taxes on revenues and capital"

2.Federal law of the 8 of February 1998 №18-FZ "About ratification of the Convention between the Government of the Russian Federation and the Government of France about avoidance of double taxation and prevention of avoidance of taxes and violation of tax law as regards taxes on revenues and property".

3.Federal law of the 19 of March 1997 №65-FZ "About ratification of the Convention between the Government of the Russian Federation and the Government of the United Kingdom of Great Britain and Northern Ireland about avoidance of double taxation as regards taxes on revenues and increment of property value and the Agreement between ***the Government of the Russian Federation and the Government of the United Kingdom of Great Britain and***

Northern Ireland of the 15 of February 1994, completed in the form of exchange of notes, about application of particular regulations of the Convention".

4.Federal law of the 26 of February 1997 № 42-FZ "About ratification of the Agreement between the Government of the Russian Federation and the Government of Canada about avoidance of double taxation and prevention of avoidance of taxes as regards taxes on revenues and property".

5.Federal law of the 18 of December 1996 № 158-FZ "About ratification of the Agreement between the Russian Federation and the Federal Republic of Germany about avoidance of double taxation as regards taxes on revenues and property".

6.The Agreement between the Russian Federation and the United States of America about avoidance of double taxation and prevention of avoidance of taxes as regards taxes on revenues and capital (Washington, 17 of June 1992).

7.The Convention between the Government of the USSR and the Government of Japan about avoidance of double taxation as regards taxes on revenues (Tokyo, 18 of January 1986).

8.Federal law of 14.06.2002 № 69-FZ "About ratification of the Agreement between the Government of the Russian Federation and the Government of Republic of *Tadjikistan about* avoidance of double taxation and prevention of avoidance of taxes on revenues and capital".

9.Federal law of 28.05.2001 № 60-FZ "About ratification of the Agreement between the Government of the Russian Federation and the Government of Republic of Moldova about incentive and mutual protection of capital investments.

8.8. Description of the order of taxation of revenues from the issuer's issued securities placed and in floatation

The order of taxation of revenues from the issuer's securities is regulated by the Tax code of the Russian Federation.

***Table 1. Taxation of legal entities' revenues from the* securities placed and in floatation in the form of dividends according to the Legislation existing in 2004.**

№№	Categories of securities' holders	
	Legal entities – tax residents of the Russian Federation	Foreign legal entities -(non-residents), collecting revenues from the sources on the territory of the Russian Federation
1.Name of the revenue from the securities on floatation	Dividends	
2.Name of the tax on the revenue from securities	Profits tax	
3. Tax rate	6 %	15 %

4. The order and terms of discharge of the tax	Taxes on revenues in the form of dividends are collected from the source of payout of the revenues and transferred into the federal budget by Fiscal Agent within 10 days from the date of payout of the revenue (art. 287 Chapter 25 of the Tax code of the Russian Federation (part two).	The amount of tax withheld from the revenues of foreign companies is transferred into the federal budget by Fiscal Agent at the time of payout of the revenue, either in the currency of payout of the revenue or in the currency of the Russian Federation according to the official rate of Central Bank of the Russian Federation on the date of transfer of the tax. (art. 310 Chapter 25 of the Tax code of the Russian Federation (part two).
5. Particularities of the order of taxation for the category of securities' holders	The total sum of the tax from the sum of dividends is determined as a product of the tax rate and the difference between the sum of dividends to be distributed among shareholders (participants) in the current tax period, reduced by the sums of dividends to be paid by Fiscal Agent in the current tax period, and the sum of dividends collected by the Fiscal Agent in the current (tax) period of report, in case these sums did not participate in calculation when determining the taxable revenue in the form of dividends before. In case the difference obtained is negative, there is no obligation of discharge of tax and no compensation from the budget.	<u>Elimination of double taxation.</u> In order to release from double taxation or to apply for preferred treatment of taxation, a taxpayer (foreign company) must present Fiscal Agent a confirmation that he is a resident of the state with which the Russian federation has the international treaty (agreement) regulating issues of taxation, before the date of payout of the revenue. This confirmation must be certified by competent authority of the corresponding foreign country. In case the confirmation was not given before the date of payout of the revenue Fiscal Agent must withhold the tax on revenues of the foreign company. According to par. 2 of art. 312 of the Tax code of the Russian Federation, a foreign recipient of the revenue have a right to return the tax on the revenue withheld before, paid to him before, within 3 years from the date of termination of the tax period, during which the revenue was paid out, provided the revenue is rendered to rating authority according to the place of registration of fiscal Agent of corresponding documents (the list is given in art. 312 of the Tax code of the Russian federation). The tax withheld and paid before is returned within a month from the date of putting in the application and the documents mentioned.
6. Legislative and statutory acts regulating the order of taxation of the revenues stated.	Chapter 25 "Prifits tax of companies" of the Tax code of the Russian Federation (part two).	

Table 2. Taxation of the revenues of physical persons from the securities placed and in floatation in the form of dividends according to the Legislation existing in 2004.

№№	Categories of securities' holders	
	Physical persons - tax residents of the Russian Federation	Physical persons (non-residents of the Russian federation) collecting revenues from the sources on the territory of the Russian Federation.
1. Name of the revenue from the securities on floatation	Dividends	
2. Name of the tax on the revenue from securities	Personal income tax	
3. Tax rate	6 %	30 %
4. The order and terms of discharge of the tax	The sum of the tax must be withheld from the revenues of a taxpayer and paid to the budget by the Russian organization that is a source of the revenue of the taxpayer in the form of dividends (Fiscal Agent). The charged sum of the tax is withheld directly from the revenues of the taxpayer on their actual payout. Fiscal Agents must transfer the sums of the calculated and withheld taxes not later than the date of actual cash in the bank for payout of the revenue and the date of the transfer of the revenue from the accounts of Fiscal Agents in the bank on the accounts of the taxpayer or on the accounts of third persons on behalf of the taxpayer (art. 226 Chapter 23 "Personal income tax" of the Tax code of the Russian Federation (part two).	
5. Particularities of the order of taxation for the category of securities' holders	The total sum of the tax from the sum of dividends is determined as a product of the tax rate and the difference between the sum of dividends to be distributed among shareholders (participants) in the current tax period, reduced by the sums of dividends to be paid by Fiscal Agent in the current tax period, and the sum of dividends collected by the Fiscal Agent in the current (tax) period of report, in case these sums did not participate in calculation when determining the taxable revenue in the form of dividends before. In case the difference obtained is negative, there is no obligation of discharge of	<u>Elimination of double taxation.</u> In order to release from double taxation, obtain tax deduction or other tax benefits, a taxpayer must present Ministry of Taxation of the Russuan Federation with an official confirmation that he is a resident of the state with which the Russian federation has the international treaty (agreement) existing during the corresponding tax period (or it part) about avoidance of double taxation. This confirmation can be presented either before the discharge of the tax or within one year after termination of the tax period considering results of which the taxpayer pretends to be released from taxation, tax deductions or benefits. (art. 232 Chapter 23 of the Tax code of the Russian Federation (part two).

	tax and no compensation from the budget. (art. 275 of the Tax code of the Russian Federation (part two).	
6. Legislative and statutory acts regulating the order of taxation of the revenues stated.	Chapter 23 "Personal income tax" of the Tax code of the Russian Federation (part two), art.275 of the Tax code of the Russian Federation.	

Table 3. Taxation of the revenues of legal entities from the realization of the securities placed and on floatation and of interest of the issuer's bonds according to the Legislation existing in 2004.

№№	Categories of securities' holders	
	Legal entities – tax residents of the Russian Federation	Foreign legal entities -(non-residents), collecting revenues from the sources on the territory of the Russian Federation
1. Name of the revenue from the securities on floatation	Revenues from the realization of securities and interest of the issuer's bonds	Revenues from the realization of stocks of Russian companies, more than 50% assets of which consists of real estate on the territory of the Russian Federation, and interest of the issuer's bonds.
2. Name of the tax on the revenue from securities	Profits tax	
3. Tax rate	24%, from which 5% are entered into the Federal budget; 17% - budgets of the Russian federation's subjects; 2% - local budgets. Legislative bodies of the Russian Federation's subjects have a right to reduce tax rate for particular categories of taxpayers in the part of tax sums, entered into the budget of the Russian Federation to 13%.	20 %
4. The order and terms of discharge of the tax	The tax to be paid within the tax period must be paid not later than the date of applying of tax returns for the corresponding tax period. The date is stated by article 289 of the Tax code of the Russian Federation. Advance payments considering the	Russian or foreign organization working in the Russian Federation with the help of permanent representation (Fiscal Agents), paying revenue to a foreign organization, withhold tax sum from the revenues of this organization on every payout (transfer) to it of cash means or on other acquisition of revenue by a foreign organization.

	results of the period of report are paid not later than the date stated for applying tax returns for the corresponding period of report. Monthly advance payments are paid not later than on the 28 day of each month of the period of report. Taxpayers, calculating monthly advance payments considering actually acquired revenue, pay advance payments not later than the 28 day of the month that follows the month considering the results of which the tax is calculated. Considering the results of the period of report (tax period) sums of monthly advance payments paid during the period of report (tax period) are accounted when paying advance payments considering the results of the period of report. Advance payments considering the results of the period of report are accounted towards discharge of tax considering the results of the tax period.	Fiscal Agent must transfer the corresponding tax sum within 3 days after the date of payout (transfer) of cash means to the foreign organization or of other acquisition of revenue by the foreign organization.
5. Particularities of the order of taxation for the category of securities' holders		In case a foreign organization before the date of payout of revenue presents Fiscal Agent with confirmation that the foreign organization has permanent location in the state with which the Russian Federation has an international treaty regulating taxation issues, there is release from tax deduction from the source of payout or tax deduction at lower interest, as regards the revenue for which the international treaty provides preferred treatment of taxation.
6 Legislative and statutory acts regulating the order of taxation of the revenues stated.	Chapter 25 of the Tax code of the Russian Federation "Organizations income tax"	

Table 4. Taxation of revenues of physical persons from realization of the stocks in floatation and interest of the issuer's bonds according to the Legislation existing in 2004.

№№	Categories of securities' holders	
	Physical persons - tax residents of the Russian Federation	Physical persons (non-residents of the Russian federation) collecting revenues from the sources on the territory of the Russian Federation.
1. Name of the revenue from the securities on floatation	Revenues from the sources situated on the territory of the Russian federation are: - interest drawn from a Russian organization and interest drawn from Russian individual entrepreneurs and (or) foreign organization in connection with its permanent representation's activities in the Russian Federation - revenues from realization of stocks and other securities and market shares in organization's chartered capital in the Russian Federation.	
2. Name of the tax on the revenue from securities	Налог на доходы физических лиц Personal income tax	
3. Tax rate	13 %	30 %
4. The order and terms of discharge of the tax	Calculation and discharge of tax sum are done by Fiscal Agent on termination of the tax period (official year) or on payment by Fiscal Agent of cash means of a taxpayer before a regular tax period ends. On payment of cash means before a regular tax period ends the tax is paid from the interest in revenue that corresponds to the actual sum of the cash means to be paid.	
5 Particularities of the order of taxation for the category of securities' holders	In case there is no documentary confirmation of expenses from 01.01.2002 a physical person have a right to use a property tax deduction in the amount obtained from the sale of securities (but not more than 125 000 roubles). On sale of securities that have belonged to a taxpayer 3 years and more, property tax deduction is given in the amount obtained by the taxpayer from the sale of securities. On sale of the property that is in common share ownership or common joint ownership, a corresponding amount of property tax deduction is distributed among joint owners of the property proportionally to their share	<u>Elimination of double taxation.</u> In order to release from double taxation, obtain tax deduction or other tax benefits, a taxpayer must present Ministry of the Russian Federation of taxes and tallage with an official confirmation that he is a resident of the state with which the Russian federation has the international treaty (agreement) existing during the corresponding tax period (or it part) about avoidance of double taxation. This confirmation can be presented either before the discharge of the tax or within one year after termination of the tax period considering results of which the taxpayer pretends to be released from taxation, tax deductions or benefits.

	or under the agreement between them.	
6. Legislative and statutory acts regulating the order of taxation of the revenues stated.	Ch. 23 of the Tax code of the Russian Federation "Personal income tax"	

8.9. Information about the announced (accrued) and paid dividends on the issuer's shares, and income from the issuer's bonds

Within 5 last completed financial years OJSC "Kuzbassenergo" have paid dividends on ordinary stocks considering only the results of the year 2000. It was decided to pay the dividends at the annual General shareholders meeting on the 8 of June 2001 (record №8 of 08.06.2001). Information on the license of the auditor:
License number: E 000547 to render audit services
Date of issue: 25.06.2002
Duration till 24.06.2007

Issuing body: ***Ministry of Finance of Russian Federation***

The CC "BDO Unikon" conducted audit of the consolidated accounting of the JSC "Kuzbassenergo" for the year of 2003. The audit was conducted in accordance with the FL form 07.08.2001 #119-FL "On Auditing Activity" and federal rules (standards) of auditing activity approved by the Regulations of the Government of RF from 23.09.2002 #696 (with the following changes and amendments), and other statutory acts, regulating the auditing activity, as well as the standards and methods of audit within the Company.

The procedure of choosing of the auditor of the Issuer.

In accordance with the Articles of the Company, the General meeting of the shareholders approves the auditor every year to check and approve the annual financial accounting of the Company.

Federal Law "On Joint Stock Companies" does not determine terms and procedure of nomination of a candidate for auditor to inscribe him in the lists for voting over the issue on the Company 's auditor approval , also this law does not grant to the shareholders the right to nominate of candidate for auditor. Thus the candidate for auditor subject to approval at the annual general meeting of shareholders of the Company by the results of the year of 2003 was determined by the Board of Directors while solving the issues of the preparation and holding of the annual General meeting of the shareholders of the Company.

There are no special interests between the auditor (officials of the auditor) and the Issuer (officials of the Issuer).

The auditor has no share in the fixed assets of the Issuer.

The Issuer did not give the auditor any borrowed current assets.

There is no close business links and family relations.

The officials of the Issuer are not the officials of the auditor.

Amount of payment for the auditor services is determined by the Board of Directors of the Company. There are no deferred or delinquent payment for rendered auditor services.

Auditor of the Company controls financial and economic activity of the Company in accordance with terms of legislation of Russian Federation and in accordance with concluded contract.

As a result of the checking of the financial and economic activity of the Company the auditor of the Company draws the conclusion which contains:

- approval of the data verification of the reports and financial documentation of the Company ;

- information about the facts of violations of the procedure of the accounting and financial accounting set by the statutory acts of RF as well as the statutory acts of RF during the performance of the financial qnd economic activity of the Company.

Financial consultants and other consultants at the securities market were not attracted by the issuer to the sock emission.

1.6. Information on the other persons signed this present quarterly report

Chief accountant – **Riumova Alevtina Nickolaevna**
Telephone: *(384-2)29-33-58*
Fax*: (384-2)29-37-77.*

II. General information on the financial and economic situation of the issuer

2.1. Indexes of financial and economic activity of the issuer

Index	Calculation method	By the end of the fiscal period/ for the 2d quarter
Value of the net assets of the Issuer	The procedure established by the Ministry of Finance of RF and Federal Committee for the JSC	25 746 826 000
The ratio of the debt assets to the capital and reserves, %	(F.№1 p.590 + F.№1 p. 690 - F.№1 p. 650 - F.№1 p. 640)/(F.№1 p.490 + F.№1 p.650 + F №1 p. 640)*100	32,19
The ratio of the sum of short-term liabilities to the capital and reserves, %	(F.№1 p. 690 - F.№1 p. 650 - F.№1 p. 640)/(F.№1 p.490 + F.№1 p.650 + F.№1 p. 640)*100	23,10
The cover of payments for debt services, RUR.	(F.№2 p. 190 + depreciation - dividends) / (Ф.№1 p. 620 + F.№1 p. 610 + F. №2 p.070)	-0,03
Rate of delayed account payable, %	delayed account payable / (F.№1 p.590 + F.№1 p. 690 - F.№1 p. 650)*100	1,56
Turnover of net wealth, times	F. №2 p. 010 / Net wealth	0,14
Turnover of account payable, times	F. №2 p. 020 / (F. №1 p. 520 + F. №1 p. 620 + F. №1 p. 510 + F. №1 p. 610)	0,45
Turnover of accounts receivable, times.	F. №2 p. 010 / (F. №1 p. 230 + F. №1 p. 240 - F. №1 p. 244)	0,80
Share of profit tax in the profit before taxation, %	F. №2 p. 151 / F. №2 p. 140 * 100	39,34

For the fiscal period the value of net wealth of the JSC "Kuzbassenergo" decreased by 531 579 thousand rubles. This change was caused mainly by the increase of account payable (fines and penalty tax for the discharge of pollutants). The amount of net wealth on 30.06.2004 is 42,5 times higher than the amount of the Fixed capital of the Company. This is the principal index of the prosperity of the Company.

As a result of the increase of account payable, the reason for it was mentioned above, a growth of rates reflecting the financial dependence of the Company on the borrowed funds was observed during the reviewed period. The decrease of the turnover of account payable shows that the credit consumption of the products, works and services has increased. It also should be mentioned that there is a low rate of delayed account payable and a possibility for the Company to liquidate the liabilities with no delays.

The decrease of the turnover of accounts receivable in the 2d quarter speaks for the increase of the volumes of tradable credit, given by the Company both to consumers of energy and suppliers and contractors.

2.2. Market capitalization of the issuer

Equities of the JSC "Kuzbassenergo" are sold in the stock exchange of RTS.

Market capitalization by the results of 1999 is calculated by the 10 biggest transactions, made through

RTS during 3 last months of 1999, and makes USD 52 002 792

Market capitalization by the results of 2000 is calculated by the 10 biggest transactions, made through RTS in December of 2000, and makes USD 49 438 720

Market capitalization by the results of 2001 is calculated by the 10 biggest transactions, made through RTS during 3 last months of 2001, and makes USD 72 460 821

In 2002 129 transactions were made through RTS, 3 transactions were made in December, for 3 last months – 6 transactions. The calculation of market capitalization of the Issuer for 2992 is made on the purchasing cost of the share in the stock of exchange of RTS on 31.12.2002 ($0,19 x 606163800= $ 115 171 122.

From 01.10.2003 to 31.12.2003 in stock of exchange of RTS a transaction of 5000 ps. volume or USD 2500 was registered.

3 transactions of 23400 ps. volume or $ 11712,56 was registered in stock of exchange "St.Petersburg".

As the equities of the JSC "Kuzbassenergo" made less than 10 transactions during the fiscal period, the calculation of market capitalization of the Issuer is carried out on the purchase price of the share in RTS stock of exchange on 31.12.2003. As the result, market capitalization for 2003 makes $0,48 x 606163800 = $290 958 624 .

3 transactions were made through RTS in the 1st quarter of 2004, market capitalization is calculated in the same way as in 2003 and makes $0,674 x 606163800 = $408 554 401.

10 transactions of 455 300 ps. volume or $ 301 333were made through RTS in the 2d quarter of 2004, 1 transaction was made in June. Market capitalization for the 2d quarter is calculated at the purchase price on June 30th : $0,6000 x 606163800 = $363698280

CREDITOR	Location	Sum of debt, RUR.	Past-due debt	Fines, penalties	affiliated person or not	Market share in fixed capital of the JSC "Kuzbassenergo"
RAO "UES of Russia"	Moscow	1 290 372 000	0	0	affiliated person	49%

Account payable (credits and loans) of the JSC "Kuzbassenergo" in the 2d quarter of 2004 increased by 941 643 ***thousand rubles as compared to the previous year, it increased to suppliers and contractors by*** 545 698 thousand rubles, on papers released by the ***JSC "Kuzbassenergo" and given to suppliers and contractors on account of offset of debt by*** 290 468 thousand rubles. ***The decrease of account payable in the 2d quarter took place:***

- ***in the sector of payments to budget and non-budget by*** 182 126 thousand rubles;
- ***remuneration of labor by*** 25 068 thousand rubles;
- ***To subsidiaries and dependent companies by*** 13 312 thousand rubles.

The changes took place in the structure of account payable as well. The rate of borrowed funds increased for the fiscal period, as well as debt to suppliers and contractors. The rate of debt to budget and non-budget funds decreased by 4,4%. In the 2d quarter the rate of past-due account payable decreased from 2,2 to 1,7%, the decrease in its absolute value made 16 662 thousand rubles.

2.3.2. Credit history of the issuer

index	On 30.06.2004.
Value of net wealth on the end of the fiscal period, RUR	25 746 826 000
Borrowed funds, total, RUR	2 209 167 000
Share of borrowed funds in net wealth value, %	8,58

The credit policy of the JSC "Kuzbassenergo" on the 1st six months of 2004 is approved by the decisions of the Board of Directors:
From 25.12.2003 (minutes #7/9/) – on the 1st quarter of 2004;
From 10.03.2004 (minutes #10/9) on the 2d quarter of 2004 with the changes on the 1st quarter of 2004.

The Company attracted credits for the fiscal period:

In the 1st quarter in sum of 1539,0 million rubles (approved 1539,0 million rubles);
In 2d quarter in sum of 1254,0 million rubles (approved 1309,0 million rubles).
The set off liabilities:
In 1st quarter – in sum of 1689, 0 million rubles (approved 1689, 0 million rubles);
In 2d quarter – in sum of 1174, 0 million rubles (approved 1209,0 million rubles).

The credit profile of the Company in accordance with the approved remains by the credit limit made:
On 01.01.2004 – 1550,0 million rubles;
On 01.04.2004 – 1400,0 million rubles;
On 01.07.2004 – 1480,0 million rubles.

During the fiscal period the Company led the work to attract credit resources on the most beneficial terms of crediting, aimed at the decrease of the interest rate for using of crediting resources. Borrowed funds were attracted at the rate which was 11-43% lower than the refinancing rate established by the CB of RF. The average interest rate for use of crediting resources by the Company made:
On 01.01.2004 – 11,85%,
On 01.07.2004 – 10,77%.

Fruitful cooperation between the Company and crediting bodies allowed the economy on the interests for use of bank funds for 6 months of 2004 and made 14,8 million rubles (83,4 million rubles were paid vs 98,2 million rubles which were included in the list of expenditures of the Company).

The change in the structure of credit portfolio took place within the approved limit of crediting only if the banks structures offered more profitable terms of crediting. For example, in the 1st quarter of 2004 the Company attracted 145,4 million rubles in AKB "Moskovsky Delovoy Mir" at the rate 9,1% instead of 180,0 million rubles in "Vneshtorgbank" (offered interest rate – 13,25%), and 34,5 million rubles in the JSC "Alfa-Bank" (Novosibirsk) at the rate of 12,0%.

All credit funds, attracted by the Company in the first 6 months of 2004, were used in accordance with the end use: the completion of circulating assets and performance of the usual economic activity (settlement with suppliers of fuel and TMC, contracting agencies, budget and non-budget funds, for the services of the JSC RAO "UES of Russia").

2.5. Risks related with acquisition of the distributing (distributed) issuing securities

2.5.1. Branch risks

Branch risks which can affect the activity of the Issuer are connected with the reforms of the power industry. Moreover, the following factors can affect the activity of the Issuer:

- the possibility of principle consumers of energy to get the entry to the Federal Wholesale Market of Energy and Power. There are two segments of energy market today: the Federal Wholesale Market of Energy and Power (FWMEP) divided into three isolated cost zones: European, Siberian and Far Eastern, and the sector of free trade "5-15" of the wholesale energy market. The activity of the first one is strictly limited and regulated by the Federal Energy Committee of Russia (FEC), the second segment was launched on the 1st of November 2003 as the transition period from the regulated market to the competitive one.

Unlike the FWMEP, this is an absolutely new sector of energy trade, functioning on the principles of competitiveness and open pricing. The only participants are the subjects located in the Western part of Russia. The Siberian region can join it not earlier than in the 3d quarter of 2004.

The JSC "Kuzbassenergo" starting from 2000, takes part in trading (purchasing) of extra energy in the FWMEP. The reason for it is the expediency: participating in trading allows to optimize the balance between energy and power and decrease the cost price for the output of owned energy. For the year 2003 with the account of owned output of 24,9 billion kwt per hour the balance cross flow from FWMEP made 5 billion 130 million kwt/h up to 70% than the volumes established by the Federal Energy Committee. The energy system managed to decrease the cost price by 170 million rubles due to extra purchasing.

The entry of the main consumers to FWMEP (the JSC "Novokuznetsk aluminum plant" and "Metalenergofinance", ltd.) caused troubles to the Company. The NAP alone maintained about 17% of the energy release. As a result of the entry of these enterprises, the Company got the lost profits which made 700-800 million rubles last year. The possible compensation of these lost profits is under the review at the level of the Ministry of Economic Development of RF. It is not known if it is accepted by the new Government of RF.

- Change of structure of energy consumption on groups of consumers from the planned at the expense of production volume reduction of a range of industrial enterprises, may lead to reduction of energy output volume in money terms.

-Bankruptcy of enterprises may lead to the impossibility to recover a debt for consummated energy.

- Decreasing of living standard of some groups of population of Kemerovo region will led inevitably to reduction of payment's level of this type of population.

- undue and partial compensation of the sums which are not benefits in accordance with the Regulations of the Government.

-risks connected with the changes of charging policy concerning heat and electric energy, which can affect the financial and economic condition of the Issuer. According to the Legislation, the changes can take place once a year, the level of inflation may be higher than usual, reflected in charges. This can lead to fallen profits.

2.5.2. Country and regional risks

The main political and economic risks include imperfection of legislation regulating economic relations, not sufficient effectiveness of judiciary system, tax law which is constantly in change, etc.

Ecological factors inseparably linked with general activity of the issuer as a production process, transfer and distribution of heat and electric power demands large quantity of natural sources that call environmental pollution.. As significant capital investments are necessary to purchase nature-conservative equipment to remove ecological factors of risk , and payments for natural sources consumption.

In 2003 the pollutant emissions in the atmosphere were reduced by the JSC "Kuzbassenergo" thanks to dumping of the power stations and the increase of burned gas in the fuel balance up to 8,46% (3,08% in 2002). To reduce the discharge of polluted sewage and reduce the pollutant emissions in the atmosphere the JSC "Kuzbassenergo" performed the following actions in 2003:

- Revamp of the fly-ash collectors with the mounting of modernized Venturi pipes and aeroacoustic intensification in the boiler of station #16 of Novokemerovskaya heat station.

- Revamp of furnace and burner set of boiler BKZ 210-140F of station #6 of Zapadno-Sibirskaya heat station to reduce nitric oxides.

- Mounting of secondary filters for water treatment in the sprayers of Venturi pipes in the casing of station #5 "A" of Belovskaya GRES.

- Revamp of drainage of pump unit and drainage canal in Tom-Usinskaya GRES and other actions.

There are regional risks related with reforming of JSC "Kuzbassenergo". The management of JSC "Kuzbassenergo" spend active consultations with the government of regional and city Administration over the questions of the Company's reforming to reduce such risks.
Such need is due to existence of the Provisions of Kemerovo regional Administration №54 dd. 26.04.2002 "On reforming of JSC "Kuzbassenergo" and №49 dd. 28.03.2003 "On the project of reforming of JSC "Kuzbassenergo" and social protection of employees of energy system in Kemerovo region" where regional authorities raised the range of demands to the management of the Company under the project coordination.

Risks connected with the geographical position of the region:
-Risk of emergency: floods, earthquakes on the territory of Kemerovo region.

2.5.3. Financial risks

Variation of interest rates may affect financial and economic activity of the issuer as the enterprise uses borrowed current assets in its activity but today there is a tendency of reduction of interest rates, it has a good effect on the Issuer as a borrower. For example, average rate for credit resources made 10,77% on 01.07.2004, down the established since 15.01.2004 rate of refinancing of the CB 14% (13% since 15.06.2004)

In the tariff forming there is a risk for the JSC "Kuzbassenergo" that the Kemerovo Regional Energy Committee will fix the tariff rate not covering industrial costs and drop-out income because of reducing of profit volume. At the same time, the maintenance of established regime of backlog with the account of technical restrictions can lead to the depreciation of the equipment, overdraft of fuel, the decrease of the work stability of generating capacity.

Risks of current financial and economic activity include risks connected with possible changes in costs for feedstock, fuel, services, which are able to affect the cost price of the products and services of the Company.
The Company has no exchange rate risks.

There are financial risks connected with the future reforming of the Issuer (reorganization by division method):
-cost increase connected with the payment for registration, reregistration and other charges connected with reorganization;
- risk that the creditors of JSC "Kuzbassenergo" having received the notification on adopted decision on reorganization , will demand the advanced repayment of account payable, execution of corresponding liabilities and payment of damages sustained under the Company's reorganization in form of segregation. Creditors having restructured debts for long-time period may act as initiators: JSC RAO " UES of Russia", Tax Ministry, Out budget Funds. Approximate amount of commercial restructured debts subject to demand amounts RUR 3014,4 millions;

- risk that shareholders voted against reorganization or who did not take part in the voting process, can demand the redemption of all or part of the stocks of the Issuer belonging to them.

2.5.4. Legal risks

There are legal risks related to the change of exchange regulation, modification of tax legislation, change of regulations of the customs supervision and fees, modification of requirements on licensing, court practice that may affect negatively on the activity's results of the issuer also results of the current legal trials subject of participation of the issuer.

- Modification of tax legislation in part of increasing of tax rates or change in the order and terms of tax calculation and payment may led to decreasing of net income of the issuer that may led to reducing of amount of the dividends subject to payment.

- Change in requirements on licensing of main activity of the issuer may led to increasing of a period for document preparation obligatory to extend a term of duration of the license, also necessity of accordance of the issuer with the produced requirements. However as a whole this risk should be deemed as insufficient except the cases when to extend the duration of the license or to exercise an activity subject to licensing some requirements will be provided that the issuer will not may correspond with or when the corresponding with these requirements will be caused with excess costs that may led to the issuer's activity termination.

- There were no any modification of the court practice related with the issuer's activity that might affect negatively on the results of his activity during the reporting period.

The Issuer has risks connected with changes in state regulation of the tariffs for energy. Since 2002 the Government if RF by its decisions sets the ceiling of tariffs for each region the Federal Energy Committee calculates and sets tariffs separately. In 2002 the tariff ceiling made 35%, the actual growth was 27% according to the data of the State Committee of Russia and 24% according to the FEC. On 2003 the tariff ceiling was 14% (including tariffs in the Federal Wholesale Market of Energy and Power – 19%). According to the preliminary calculations of the FEC, in 2004 the growth of an average tariff under influence of federal and regional factors should have made 11,1%. However, after open hearings were held where regional energy committees took part and the Company the foreseen growth of ceiling tariff for electricity in Russia was changed to 13,1%.

2.5.5.Risks related with the issuer's activity.

On the fiscal period the Issuer was not advanced any claims which can lead to the liquidation of the Issuer.

There are a number of cases which are in the reviewing process in different instances. These cases are connected with debt collection to the budget and non-budget funds, however the Company does not admit them to be essential. Their admission by the Issuer or collection juridically, can not lead to the liquidation of the Company, its bankruptcy, or have any other negative consequences for the Company.

Three subsidiaries are admitted to be insolvent. "Supervolokno", ltd., the JSC "Andreevskoe" opened the competitive production, the JSC "Kuzbassgidroenergostroy" introduced the outward management for 12 months.

III. Detailed information about the Issuer

3.1. Information about the issuer's establishment and development.

3.1.1. Information about the issuer's firm name

full firm name and abbreviation:

Kuzbass Joint stock Company of energy and electrification
(JSC «Kuzbassenergo»).

Before the privatization – Kuzbass industrial institution of energy and electrification ("IIEE "Kuzbassenergo")
Kuzbass Open Joint Stock Company of energy and electrification (OJSC "Kuzbassenergo")
Introduced: 10.11.1993
Kuzbass joint stock company of energy and electrification (JSC "Kuzbassenergo")
Introduced: 15.05.1996

3.1.2. Information about state registration of the issuer

Date of state registration of the issuer: 30.12.1993
Number of state registration's certificate (other document ratified the state registration of the issuer): 1901
Name of registration authority: *Administration of the city of Kemerovo*
In accordance with Federal Law "On State registration of legal entities" the corresponding record under the state registration number 1024200678260 was made in the Uniform State Register of Legal Entities the 23rd of July 2002 (certificate: series 42 №001926135 issued by Administration of the Russian Ministry of Taxation in Kemerovo, Kemerovo region).

3.1.3. Information about the establishment and development of the Issuer

Kuzbass Joint Stock Company of energy and electrification (JSC "Kuzbassenergo") was established in accordance with the Orders of the President of Russian Federation dd. 14.08.1992 #992 "On the peculiarities of turning state enterprises, unions, associations of fuel-energy complex into stock companies", dd.15.08.1992 #923 "On organization of management system of the electric-power complex of Russian Federation during privatization", dd. 05.11.1992 #1334 "On About realization in the electric-power industry of the Decree issued by the President of Russian Federation dd. August, 14, 1992, № 922 "On peculiarities of turning of the state enterprises, unions, associations of fuel and energy complex into joint-stock companies". The Company is the assignee of Kuzbass industrial institution of energy and electrification (IIEE "Kuzbassenergo").

The main purpose of the JSC "Kuzbassenergo" activity is the profit earning.
The common purpose of the privatized companies was increasing of the efficiency of energy system of the country and transfer from the planned economic to the market relations

JSC "Kuzbassenergo" is one of the largest energy systems in the body of the Holding company JSC RAO "UES of Russia". Energy complex of the company is the sixth in the installed capacity and the fifth in the volume of energy output to the consumers. Quantity of power output by electric plants of JSC "Kuzbassenergo" exceeded 30% in the balance of UES of Siberia

The energy system includes eight heat power stations. Their total electric capacity is 4667 MWt, heat power is 6700,5 Gcal/h. The annual output of electricity is 26-28 billion kWt/h. Annual output of heat energy is 15-20 million Gcal.

Within the energy system four plants of electric nets are in the operation. They perform reception, transfer and distribution of electricity. Substation 4601 with total capacity of 12984 thousand kWt is in operation as well. The length of electric nets is 31117 km.

Seven heat net districts and water-heating boiler plant supplying the consumers with heat energy are under control of the Department of heat networks. The length of heat networks with 1200 mm in diameter makes 485 km. Since 1994 the Department of heat networks uses the measuring complex, first in Russia, which allows to take telemeasures, telesignals, telecontrol and commercial accounting of the release of heat to the consumers.

The affiliated company "Energosbyt" distributes energy. The company has more than 5000 contracts on energy supply to the consumers.

The energy system possesses the developed system of repair and service companies, which render repair, construction, transport services, communications, supply with material and technical resources necessary for the needs of energy complex.

The JSC "Kuzbassenergo" was among the first in Siberia to construct the fiber-optics line of communication (FOLC), its length is more than 400 km. FOLC connected enterprises and subsidiaries into unified network of data transfer.

Mission of the company is the regular and reliable supply our consumers with heat and electric power providing production efficiency and investment appeal of the company.

3.1.4. Contact information:

Issuer's location: **№ 30, Kuznetsky prospect, GSP-2, Kemerovo, Russia**

Telephone: *(384-2)29-33-59*
Fax: *(384-2)29-37-77*

E-mail **adm@kuzbe.elektra.ru**:
Website: *www.kuzbassenergo.ru*

Organizational structure of the executive body of JSC "Kuzbassenergo" was approved by the Order of JSC "Kuzbassenergo" №709 dd. 31.12.2003. Department on corporate management including department on corporate policy which duties include work with shareholders and investors was established on the ground of this Order. The Department works since 01.01.2004. Chief of the Department – is Cherpinsky Pavel Valerievich, date of birth 1974., education – higher.

Location: **№ 30, Kuznetsky prospect, GSP-2, Kemerovo, Russia**

Telephone: *(384-2) 77-70-51*
Fax: *(384-2)77-70-51*
e-mail: *cherpinskypv@kuzbe.elektra.ru*

3.2. Principal economic activities of the issuer

3.2.1. Industrial affiliation of the issuer

OKVED (All-Russia classifier of types of economic activity) codes :

40.10.11 –Production of electric power at heat plants
40.10.2 – Energy transmission
40.30.2 – Steam and hot water transmission (heat energy)
51.56.4 – Wholesales of electric and heat power (without its transmission and distribution)
74.60 –Investigations and protection
74.14 – Consulting over the questions on commerce and management.

3.2.2. Principal economic activities of the issuer

The principal activities of the JSC "Kuzbassenergo" are • production, transfer and distribution of electric and heat energy.

JSC "Kuzbassenergo" is a subject of natural monopoly working in the sphere of services on transmission of electric and heat energy on the territory of Kemerovo region

Revenue share from the principle activity in total revenue volume of the JSC "Kuzbassenergo"

Period	31.03.2004	30.06.2004
Total revenue, thous. RUR	5260102	9176618
Revenue from principle activities, thous.RUR.		

	4768739	8336720
Revenue from the principle activity in total revenue volume, %	90,66	90,85

Total revenue of the Issuer is the sum of gain from sales, operational and non-realized revenues, according to form #2 "Report on profits and losses".

Total revenue in the 2d quarter 2004 decreased dramatically as compared to the 1st quarter (from 5260102 thousand RUR to 3916516 thousand RUR, i.e. by 25,5 %).

Revenue from the principle economic activities of the Issuer in the 2d quarter 2004 decreased as well as compared to the 1st quarter 2004 from 4768739 thousand RUR to 3567981 thousand RUR.

Revenue decrease of the JSC "Kuzbassenergo" in the 2d quarter as compared to the 1st quarter was caused by the decrease of output of electricity and heat energy. It is connected with the leave of a large consumer the JSC "NKAZ", Novokuznetsk.

Revenue share of the JSC "Kuzbassenergo" from principle types of products

Type of product	Revenue share, %	
	1 quarter 2004 r.	2 quarter 2004 r.
Electricity	69,52	84,64
Heat energy	30,48	15,36
Total:	100,00	100,00

The production of heat energy has a seasonal nature

3.2.3. Principal types of products (operations, services)

Principal types of products of the JSC "Kuzbassenergo» " are of electric and heat energy.

Index	2 quarter 2004 r.
Volume of the production, -net output of electric energy, million. kWt/h - net output of heat energy, thousand. Gcal	 5305,160 2074,954
Tariff on average output, -electric energy, RUR./thousand kWt/h - heat energy, RUR/Gcal	 572,46 266,591
Gain from sales of products (works, services), RUR -electric energy - heat energy	 3019834000 548147000
Total gain, % -electric energy - heat energy	 81,38 14,78
Price rate for products of power industry, % (to the previous period)*	100,5

** price rate of the producers industrial production is given in accordance with the State Committee of Statistics of Russia*

System of production distribution:

Name of product (work, services)	Scheme of sales of products(works, services)	2 quarter 2004 г.
Electric energy	direct sales, %	100
	Owned trading net, %	-
	Controlled trading net, %	-
	other, %	-
Heat energy	direct sales, %	100
	Owned trading net, %	-
	Controlled trading net, %	-
	other, %	-

Structure of production and sale costs:

Costs	1 quarter 2004	2 quarter 2004
Feedstock and material, %	1,1	1,6
Purchased utilities, semi-products, %	1,6	-
Industrial works and services rendered by third parties, %	1,2	1,2
Fuel, %	44,9	40,1
Energy, %	1,6	4,1
remuneration of labor costs, %	6,8	7,2
Interest on credits, %	-	-
Rent, %	-	-
assessment to social needs, %	2,4	2,4
Depreciation of fixed assets, %	11,7	12,2
Tax included in the cost price of products, %	3,1	3,4
Other costs, %	22,1	26,5
- user charge for use of the net of RAO "UES of Russia"	13,8	
Depreciation on intangible assets, %	-	
Remuneration for rationalization proposals, %	-	
Compulsory insurance fees, %	0,7	1
Representative costs, %	-	-
Other, %	2,8	0,3
Total: production and sale costs (works and services) (cost price), %	100	100
Gain from sale of products (works, services), %	93,42	94,74

Accounting of the cost price is carried out in accordance with the Account policy of the JSC "Kuzbassenergo" which does not provide separate accounting on types of production (works, services).

3.2.4. The suppliers of the issuer whose share is 10% and more of all the supplies of inventory

holdings, with their share indicated in the total volume of supplies

Main suppliers of coal are the following companies: "Torgovy Dom "Siberian Coal" (Kemerovo), ltd., the JSC "Siberian Energy Company" (Moscow), CJSC "Chernigovets" (Beryozovsky, Kemerovo region), FPG "Rusincor" (Moscow).

The supply of gas is conducted by the JSC "Siberian-Ural oil-and-gas Company".

Suppliers	2 quarter 2004
"TD "Siberian Coal", ltd.	45,3 %
The JSC "SUEK"	26,4 %

3.2.5. Markets for products (work, services) of the issuer

Kemerovo region is the principal market where the JSC "Kuzbassenergo" carries out his activity.
Kemerovo region is located in the south-east of the West Siberia at the joint of the West-Siberian plain and the mountains of the South Siberia. It is located at almost equal distance from western and eastern borders of the Russian Federation. It is in the 6th time zone.

Output of electric power to the consumers is according to the contracted "Agreements on output and using of electric power".

Industry is the principle consumer of electric power and heat energy.

Structure of distribution of electric- and heat energy for 2d quarter 2004:

	electricity		Heat energy	
	Output to the consumers, thousand, kwt/h	Specific weight, %	Output to the consumers, Gcal	Specific weight, %
Total in energy system	**5305160**	**100,0**	**2074954**	**100,0**
1. Industry	3809271	71,9	737918	35,6
1.1. Fual	1337536	25,2	7944	0,4
1.2. Ferrous metallurgy	1887618	35,6	132585	6,4
1.3. Non-ferrous metallurgy	8361	0,2	39376	1,9
1.4. Chemistry and petrochemistry	345456	6,5	485378	23,4
1.5. Mechanical engineering and metallurgy	63776	1,2	2275	1,1
1.6. woodworking industry and pulp-and-paper industry	1176	0,0	1108	0,0
1.7. Building materials	105590	2,0	16195	0,8
1.8. Light industry	8118	0,2	3873	0,2
1.9. Food industry	27051	0,5	3264	0,2
1.10. Other	24589	0,5	25920	1,2
2. Agriculture	51343	1,0	26313	1,3
3. Forestry	420	0,0	67	0,0
4. Transport and telecommunications	341847	6,4	18102	0,9
5. Construction	12754	0,2	7113	0,3
6. Housing and communal services	96223	1,8	1183213	57,0
7. Population	37717	0,7	2252	0,1
8. Other industries	955585	18,0	99976	4,8

Principle consumers of the products of the JSC "Kuzbassenergo", turnover makes not less than 10% of total gain from realization of the products for the 2d quarter 2004:

Consumer	Location	Share in total distribution volume, %
Electricity consumers: "Metallenergofinance", ltd.	Novokuznetsk, Kemerovo region	21,9
Heat energy consumers: Administration of the city of Novokuznetsk	Novokuznetsk, Kemerovo region	19,5
KJSC "Azot"	Kemerovo	26,8
Administration of the city of Kemerovo	Kemerovo	25,6

Factors which may adversely affect the distribution of the Issuer's products (operations, services) and possible measures of the Issuer to reduce such impact:

- exit of the enterprises to the Federal Whole-sale Market of Energy and Power (FWME). Among them are: West-Siberian railway – the branch of Russian Railways, "IK Sokolovskaya", ltd., DHK KRU JSC "Belovskoe Energy Department", the JSC "Energy Department Leninskugol", the JSC "Electric networks" Kiselevsk, the JSC "Prokopyevskenergo", KJSC "AZOT", "Topkizement", ltd., "Metallenergofinance", ltd., the JSC "PO Khimprom", PO JSC "Khimvolokno Amtel-Kuzbass", Krasnoyarskaya Railway. Revenue to be lost makes 6,5 billion RUR per year. At the moment no transit contracts are signed to keep the consumers, moreover, the question of cross financing is not solved yet.

- One more factor of decrease in consumption of heat energy is high temperature during the heating season. Moreover, due to saving technologies and launching of own boiler plants the consumption of heat energy is reduced. The JSC "Kuzbassenergo" can not influence the impact of these factors.

- Insufficiency of limits and delay in financing of charges on payment of heat and electric energy for budget consumers can also affect distribution. To prevent delay in financing of budget consumers JSC "Kuzbassenergo" signs every month Agreements on payment s for consummated energy with Kemerovo regional Administration, General Financial Department of region, Heads of the cities and districts. Kemerovo regional Administration holds meetings with obligatory presence of the city and district Administration in the person of their Heads, also Managers of the territorial financial authorities, managers of enterprises of housing and communal services and city electric networks.

3.2.6. Activity of the issuer pertaining to the circulating capital and resources

The policy of the Company pertaining to the circulating capital consists of maintenance of the volume and structure of circulating assets in order to increase the liquidity of assets. To reduce accounts receivable the work with consumers, control over accounts to be paid, work on collection of past-due accounts receivable are under way.

To use circulating assets effectively and improve the control over resources, to ensure the non-stop production process at the minimum amount of financing, the JSC "Kuzbassenergo" uses the method of rate fixing of circulating assets. The standard of circulating assets is defined by the Company on the basis of accounting, drawn up by the subsidiaries, for several years and reviewed when there are any changes in production terms.

To control the amount of feedstock, duration of the turnover and circulation at drawing up the reports the following rates are calculated:

- *rate of circulation of feedstock (K);*
- *turnover duration (TD).*

The rate of feedstock circulation reflects the speed of feedstock distribution.
It is calculated by the formula = cost price of distributed product/average amount of feedstock (K=form #2 p.020/form #1 (p.210 on the beginning of the fiscal period +p.210 on the end of the fiscal period) x 0,5).
The duration of the period is defined as a quotient of 365 days to the rate of feedstock circulation.
For the 2d quarter 2004 : K=3,4 of turnover, Add.=26 days.

3.2.7. Raw material

Principal raw material used by the JSC "Kuzbassenergo" is a fuel. Kuznetsky coal and its cleaning rejects are used as the principal fuel at the power plants of JSC "Kuzbassenergo".
Fuel oil is used as starting fuel and meant for maintenance of burning during low quality coal firing, and as the principal type of fuel at the Zaiskitimskaya water-heating boiler plant.

Analysis of the change in fuel price

Fuel	Unit	Supplier	1 quarter 2004.		2 quarter 2004.	
			Net purchasing volume	Purchasing price with VAT and quality	Net purchasing volume	Purchasing price with VAT and quality
Black oil	Thousand tons	"Anteria", ltd.	5,7	2730,0	7,0	2958,56
Gas	Million m3	Sibur	26,009	1153,35	71377,58	1161,94

		AIK "Sokolovskoe"	26,9	347,9	-	-
		Other	351,4	328,9	244,3	333,0

3.2.8. Main competitors

The JSC "Kuzbassenergo" is a subject of natural monopoly performing its activity in non-manufacturing business on transfer of electric and heat energy on the territory of Kemerovo region.

The competitors of the Company are the suppliers of electricity, subjects of the FWMEP, and newly established independent energy networks and distribution companies, which transfer energy to the end consumers independently.

By the end of 2003 there were 29 companies of whole-sale consumers – resellers of electric power on the territory of Kuzbass. The share of these companies in total volume of energy sales of the JSC "Kuzbassenergo" is sufficient enough, in 2003 it made 15,9% of energy. For example, in December 2003 the JSC "Kuzbass energy network company" was established, it united 12 companies of city energy networks. The principle activity is transfer and distribution of energy on communal networks.

"North Kuzbass energy company", ltd. was established in Kemerovo. It leased municipal communal energy networks in Kemerovo and Berezovsky. The company plans to rent communal heat networks of these two cities in 2004.
The process of establishing of independent energy distributing companies on the base of resellers, which have the network infrastructure to monopoly access to the consumers, has negative consequences for the

JSC "Kuzbassenergo" in the sphere of tariffs setting. Minimum tariffs are fixed for the wholesale resellers to buy energy from the JSC "Kuzbassenergo", they do not cover the expenses of the Company for generation, as a result of it there is the redistribution of financial resources for benefit of these companies.

In Novokuznetsk, "Metallenergofinance", ltd. affiliated with "Evrazholding", ltd. and Novokuzntsky and Western-Siberian metallurgical works controlled by them signed contracts on energy supply. Consequently, "Metallenergofinance", ltd. was included in the list of energy suppling companies and registered as the principle consumer-reseller for energy supply to metallurgical works. Since the 4th quarter 2003 "Metallenergofinance", ltd. is registered in the Federal Energy Committee and got the status of the subject of the FWMEP.

Since 1.10.2003 the JSC "Novokuznetsky aluminum plant" (NAP), the largest consumer of the JSC "Kuzbassenergo", entered the FWMEP. After that the JSC "Kuzbassenergo turned from deficit energy company into surplus one.

Name	*Volume of sold products in the 2d quarter 2004, thousand kWt/h*	*Share in the market, %*
JSC "Kuzbassenergo", the Issuer	5305160	83,8 %
FWMEP	883870	14,0 %

3.2.9. Information about the Issuer's licenses

Number: *3668*

3.2.10. Joint activities of the Issuer

Founders of the subsidiary the JSC "Prokopievskenergo":

- *JSC "Kuzbassenergo" (60,0%)*
- *"Stroysnabservice", ltd. (Kemerovo) (14,1%)*
- *"Bill Center Kuzbassenergo", ltd. (13%).*

The type of joint activity: distribution of heat and electricity.
The Joint activity is performed since 20.09.2000

Founders of the subsidiary the JSC "IPA Vodokanal":

- *JSC "Kuzbassenergo" (74,5%)*
- *"A/E Clearing", ltd. (Novokuznetsk) (25,5%)*

The type of joint activity: treatment works.
The Joint activity is performed since 28.10.2001

Founders of the subsidiary "Supervolokno", ltd.:

- *JSC "Kuzbassenergo" (60,0%)*
- *UN-1612/29 (25,0%)*
- *CJSC "Bagran" (15,0%).*

The type of joint activity: production of heaters.
The Joint activity is performed since 01.04.1994

3.4. Future plans of the issuer

Purposes of the JSC "Kuzbassenergo" for the year 2004.
The main purpose of the Company in 2004 is the maintenance of break-even activity and profit earning, increase of market value (capitalization) and increase of attractive shares for Russian and foreign investors.

Principal production purposes of the company for the year 2004 will be the following:

- *reliable and regular electric and heat energy supply to the consumers of the region especially in autumn and winter periods with proper maximum load;*
- *implementation of the program on repair of the equipment of power stations, electric and heat networks;,*
- *Implementation of the task of JSC RAO "UES of Russia" on creation of fuel reserve in the warehouses;*
- *Implementation of the investment program on capital investment. .*

The following tasks are the priorities:

- *putting into operation of a turbine of st.#4 of PTR-30 LMZ type and feeding-deaeretic unit of heat network at Kemerovskaya TETS;*
- *the start of revamp of the part of turboset of st.#3 of Kuznetskaya TETS and putting into operation of turboset R-12-3,4/0,1 in 2005;*
- *the finishing of the mounting of the turbine of st.#5 T-115 type at Yuzhno-Kuzbasskaya GRES, putting into operation of ACS TP;*
- *revamp of the boiler of st.#7 of Tom-Usinskaya GRES of TP-10 type to reduce Nox;*
- *the mounting of the lightning steam line of boilers I-II of the line of KTTS-100 of of Tom-Usinskaya GRES and 3,4 sections of feeding collector of Kemerovskaya TETS;*

- *mounting of systems of commercial control of heat energy (SCCHE) at Yuzhno-Kuzbasskaya GRES and Western-Siberian TETS;*
- *revampof electric filters of the boiler of st.#11 of Kemerovskaya GRES with coefficient of efficient of 99,5% and technical reequipment of electric filters control and protection scheme at the boiler of st.#7 of the second line of Western-Siberian TETS;*

- *Continuation of revamp of tele mechanization of Eastern electric networks;*
- *Continuation of revamp of ASDU PES of Northern electric networks;*
- *Revamp of substations of PES, replacement of 1 112 breaks of 10 kw for vacuum ones; of 9 breakers 35-110 kw for SF6 circuit-breakers, mounting of arc protection in 14 sections;*
- *Revamp of VL-35 kw Tambar-Polutornik at Eastern electric networks, ejection from flood zone;*
- *Growing of ash dump to 438,3 thousand m^3*

In part of financial activity the following activities will be priority for the company in 2004:

- Consequent implementation of the expenses reduction program;

- Consequent implementation of the Amicable agreement's terms with the Company's creditors as a guarantee of successful reforming;

- determination of economic based tariffs for the Company;

- reduction of liabilities to the suppliers and contractors;

- decreasing of a distance between the accounts receivable and account payable;

- paying capacity improvement and increasing of financial stability of the Company,

- maintenance of sustainable functioning and investment appeal of the Company.

To implement the program on reforming in 2004, the JSC "Kuzbassenergo" has the following tasks:

1. To complete the actions on preliminary steps of reforms, including:

- separation from and stop taking part in non-profile types of activity, including the transfer of housing to the municipal property;

- separation of repair and services;

- implementation of the system of contract billing and tenders;

- improvement of the staff, training of the managing personnel for work in accordance with the terms of energy market.

2. Implementation of the project on reforming of the Company in accordance with the main trends of reconstruction of energy industry:

- transition to a new management, production and control structure, gradual obtaining by the JSC "Kuzbassenergo" a status of managing company;

- implementation of new forms and methods of corporate governance corresponding to a new status of the Company and ensuring good final results of the activity of the Holding.

The prospects of the development of the JSC "Kuzbassenergo" as one of the companies of fuel and energy complex of the country are defined by the Energy Strategy of Russia until 2020.

According to this Strategy, the JSC "Kuzbassenergo" must be formed as a new, financially stable, economically efficient and dynamically developing company. Thus, the prospects of development of the Company will depend on successful implementation of the Project on reforming after it is approved by shareholders.

As one of the principle priorities of energy strategy of Russia until 2020, the Government defined the rigging with modern technologies. In accordance with it, the JSC "Kuzbassenergo" defined its prospective program on technical development.

3.5. The Issuer's participation in industrial, bank and financial groups, holdings, trusts and associations

Company*: JSC Russian Joint Stock Company of energy and electrification "UES of Russia"*
Place and functions of the Issuer in the Company: *JSC "Kuzbassenergo" is a subsidiary of Holding company RAO "UES of Russia"*

3.6. Subsidiaries and affiliated companies of the issuer
JSC "Kuzbassenergo" has 10 subsidiaries, there are no dependent companies.

3.7. Composition, structure and cost of the issuer's fixed assets, information about its plans to acquire, replace, dispose of fixed assets, as well as all the facts of encumbrance of the issuer's fixed assets

3.7.1. Fixed assets

In accordance with the contract between the JSC "Kuzbassenergo" and CJSC "ENPI CONSULT", the specialists of CJSC "ENPI CONSULT" fixed the overall replacement value of the part of fixed assets which are in the balance of the JSC "Kuzbassenergo" on 01.01.2004.

The aim of the revaluation is the fixing of overall replacement value of the part of fixed assets.
The function of the revaluation is rendering of consulting services concerning the issues of revaluation of the part of fixed assets of the Company.

With all the restrictions and assumptions the overall replacement value of revaluated property (according to the Technical Task, presented by the consumer, overall book cost with no deprecation account makes 29 749 727 391 RUR) on 01.01.2004, approximately makes 33 815 298 100 RUR (thirty three billion eight hundred fifteen million two hundred ninety eight thousand one hundred).

The valuation was conducted on the basis of the accounting data, technical parameters of the objects under valuation, presented by the specialists of the JSC "Kuzbassenergo", interview with management and leading specialists of the departments and divisions of the JSC "Kuzbassenergo".
The valuation was conducted in accordance with Federal Law # 135-FL dd. 29.07.1998 "On Valuation activity in Russian Federation", Valuation Standards, which are compulsory to use by the subjects of valuation activity (Regulations of the Government of RF # 519 dd. 06.07.2001), main principles made in the International Valuation Standards IVS1-IVS4, Standards of professional practice and Ethics Code of the Russian Valuator's Society.

In accordance with the Technical Task for revaluation of fixed assets of the JSC "Kuzbassenergo" on 01.01.2004, revaluation assumes the definition of current replacement value of fixed assets, i.e. total sum of expenditures which the owner should have paid to recover (replace) them with similar new fixed assets at market values active on the date of revaluation in accordance with the Order of the Ministry of Finance of RF dd. 30.03.2001 # 26 N.

1. The following groups of fixed assets are subject to compulsory revaluation regardless of the level of accounting deterioration:

Name of fixed assets (FA)	ENAO codes
HVL Constructions 220kv and more	30009, 30119-30120
Machines and equipment Substations 220 kv and more; other power electric and technical equipment and distribution devices.	40000-40700 40701 40702 40705-42912
Transport.	50000-50302 50500-50709

2. the following groups of fixed assets are not subject to revaluation, as well as the objects of social destination purposes referring to non-profile business:

Name of fixed assets (FA)	ENAO codes
production buildings	10000-10010
Constructions	20000-30118 (with restriction on par.1) 30121-30124
Other equipment groups	43000-49303
Transport (mobile automobile transport)	50400-50428
Productive and household equipment, tools	60000-70012
workstock	80000
perennial plants	90000-90021
Non-production buildings	10011-10105, 20362-20368 By name: kindergarten, preventoriums, hospital, dwellings, etc.
Non-profile business	10011-10105, 20362-20368 By name: agricultural company, store, warehouse, company that produces building materials, production of consumer goods, maintenance works, etc.

3. The revaluation of Company # 55 (Kuzbassenergosvyaz) was not conducted.

4. The revaluation of the objects of incompleted construction and equipment to be installed was not conducted.

5. The revaluation was conducted by independent valuators by indexation and direct recalculation.

In accordance with the Regulations on account and tax policy of the JSC "Kuzbassenergo" for 2004 to define the staff and groups of fixed assets the All-Russian Classifier of fixed assets (AC-013-94) is taken as foundation , it was approved by the Regulations of the State Committee of RF on Standards, Metrology and Certification dd. 26.12.1994, #359.

The depreciation of the objects of fixed assets is accrued with linier method, reasoning from the usage of these objects. The depreciation of the objects of fixed assets taken to the accounting before 01.01.2002 is accrued in accordance with the Resolution of Sovmin of USSR dd. 22 of October 1990 № 1072 "On the unique norms for depreciation deductions to complete reconstruction of fixed assets of USSR national economy". Over the objects of fixed assets subject to accounting since 01.01.2002 the depreciation is accrued in accordance with the Resolution adopted by the RF Government dd.01.01.2002 №1 "On classification of fixed assets included in the depreciation groups". Since 1999 the JSC "Kuzbassenergo" conducts the revaluation of fixed assets with the help of experts of the closed joint stock company "ENPI Consult (CJSC "ENPI CCONSULT") (113191, 14, Dukhovsky pereulok, Moscow, Russia, INN 7737017200) according to license №000031 for valuator's activity issued 06.08.2001 by the Ministry for Property of Russia.

According to the technical task the revaluation of fixed assets is carried out by way of indexation of a direct re- appraisal of overall replacement value of fixed assets. All materials should be presented in written report form, and on magnetic mediums.

IV. Information about financial and economic activities of the issuer

4.1. Results of financial and economic activities of the issuer

4.1.1. Profits and Losses

Index	Method of calculation	2 qurter
Gain, RUR.	F. №2 p. 010	3 710 554 000
Gross profit, RUR	F. №2 p. 010 - F. №2 p. 020	247 062 000
Net profit (non-distributed profit (outstanding loss), RUR.	F. №2 p. 190	-599 851 000
Working efficiency, RUR/person.	F. №2 p. 010 / An average number of workers	346 037
Capital productivity, %	F. №2 p. 010 / F. №1 p.120 * 100	15,44
Return of assets, %	F. №2 p. 190 / F. №1 p.300 * 100	-1,76
Return on own equity, %	F №2 p. 190 / (F. №1 p. 490 + F. №1 p. 640 + F. №1 p. 650 - F. №1 p. 450) * 100	-2,33
Economic efficiency of products (sales) %	F. №2 p. 050 / F. №2 p. 010 * 100	6,66

Sun of outstanding loss on the fiscal date, RUR	F. №1 p. 465 + F. №1 p. 475	0
Ratio of outstanding loss on the fiscal date and balance currency	F. №1 p. 475 / F. №1 p. 300	0,000

For the fiscal period the gain from distribution of the products made 3 710 554 thous. RUR, down 1 203 261 thous. RUR than in the 1st quarter 2004. The gross profit was gained in less volume in the 2d quarter. As a result of financial and economic activity of the JSC "Kuzbassenergo" for first six months of 2004 the net losses made 157 024 thous.RUR (in recalculation on the 2d quarter the losses made 599 821 thous. RUR). The losses were caused by fines and penalties for extra pollutant emissions, they made 699 822 thous. RUR.

Because of losses the return of own equity and assets of the Company dropped.

4.1.2. Factors influenced the amount of gain from sale products, goods, works, services and profit (losses) of the Issuer form the main activity.

Factors influenced the amount of gain are not given because of its small change during the fiscal quarter.

4.2. Liquidity of the Issuer

Index	Method of calculation	End of fiscal period
Own circulating assets, RUR	F. №1 p. 490 + F. №1 p. 640 + F. №1 p. 650 - F. №1 p. 450 - F. №1 p. 190 - F. №1 p. 230	-2 272 420 000
Rate of financial dependence	(F.№1 p.590 + F.№1 p. 690 - F.№1 p. 650 – F №1 p. 640) / (F. №1 p. 490 + F. №1 p. 640 + F. №1 p. 650 - F. №1 p. 450)	0,32
Rate of autonomy of own assets	(F. №1 p. 490 + F. №1 p. 640 + F. №1 p. 650 - F. №1 p. 450) / F. №1 p. 300	0,76
Maintenance of resources with own circulating assets	(F. №1 p. 490 + F. №1 p. 640 + F. №1 p. 650 -F №1 p. 450 - F. №1 p. 190 - F. №1 p. 230) / (F. №1 p. 210 - F. №1 p. 216)	-2,26
Index of fixed assets	(F. №1 p. 190 + F. №1 p. 230) / (F. №1 p. 490 + F. №1 p. 640 + F. №1 p. 650 - F. №1 p. 450)	1,09
Current rate of liquidity	(F. №1 p. 290 - F. №1 p. 230) / (F. №1 p. 690 - F. №1 p. 640 - F. №1 p. 650)	1,01
Ready rate of liquidity	(F. №1 p. 290 - F. №1 p. 210 - F. №1 p. 220 - F. №1 p. 230) / (F. №1 p. 690 - F. №1 p. 640 - F. №1 p. 650)	0,70

As compared to the previous period, an insignificant decrease of the rates of liquidity of the Company took place in the 2d quarter. The paying capacity of the Company is within the norms. The level of circulating assets is sufficient enough to maintain short-term liabilities of the Company.

The stores of the Company are formed completely due to borrowed funds. For the fiscal period a slight negative dynamics in forming of own sources of circulating assets and growth of borrowed resources are observed.

4.3. Amount, structure and adequacy of the capital and circulating assets of the Issuer.

4.3.1. Amount and structure of the capital and circulating assets of the Issuer.

a) Amount of the authorized capital: ***The authorized capital consists of the nominal value of the shares of the Company acquired by the shareholders (floated shares). The authorized capital of the Company makes 606 163 800 RUR (six hundred six million one hundred sixty three thousand eight hundred), which corresponds the Articles of the Company.***

b) overall value of the shares of the Issuer, bought out by the Issuer for the resale (transmission): ***the JSC "Kuzbassenergo" did not buy out any shares.***

c) the amount of reserve capital of the Issuer formed due to the assessment from the profit of the Issuer: ***the amount of the reserve fund is defined by the Articles of the Company and can not be less than 5 (five)% of the authorized capital of the Company. The reserve fund is formed by annual assessment until it reaches the amount defined by the Articles of the Company. The amount of annual assessment is provided with the Articles of the Company, and can not be less than 5 (five) percent of net profit of the Company. The reserve fund can be used only for a definite purpose. The reserve fund of the Company is aimed at paying losses of the Company, retirement of bonds and redemption of stock of the Company if other funds are not available. The amount of the reserve capital on 30.06.2004 made 16858, 0 thous. RUR (by the decision of the annual General meeting of shareholders 40,0 thous. RUR were transferred to the reserve fund).***

d) the amount of surplus capital of the Issuer reflecting the increment of value of assets, revealed in the result of revaluation: ***the amount of the surplus capital makes 24 538 444 000 RUR on the 30.06.2004***

e) the amount of non-distributed net profit of the Issuer: ***the amount of non-distributed profit makes 157 024 000 RUR on 30.06.2004***

f) the amount of assets of purpose financing of the Issuer: 0

g) total sum of the capital of the Issuer: ***total sum of the capital made 25 589 225 000 RUR on 30.06.2004***

The owned capital of the Company decreased by 599 333 thous. RUR during the 2d quarter 2004 (from 26 188 558 thous. RUR to 25 589 225 thous. RUR). It was caused by losses arisen by the results of financial and economic activity.

Structure and amount of circulating assets (thous.RUR)

CIRCULATING ASSETS	31.03.2004	30.06.2004
Store	900923	12078798
Including: Raw material, material and other similar valuable	813615	989072
Cattle for growing and fattening	0	0
Costs in incompleted production	865	0
integrated products and products to be resoled	2523	2308
Products shipped	2958	2955
Expenditures of future periods	81262	74046
Other store and costs	0	10417
Value added tax on purchased valuable	676381	752530
Accounts receivable (payments to be paid in more than 12 months after the fiscal date)	1230749	1190936
Including buyers and consumers	470280	427399
Accounts receivable (payments to be paid in12 months after the fiscal date)	3687943	3955460
Including buyers and consumers	2140608	1788216
Short-term financial investment	34543	73976
Monetary funds	113889	154992
Other circulating assets	0	0
TOTAL	6644428	7206692

The source of financing of circulating assets is own funds of the Company. Own capital of the Company is sufficient enough to meet the principle need of the Company in resources ensuring the non-stop production and distribution of the products as well as cover the current liabilities.

The policy of the Company concerning circulating capital consists of maintenance of the appropriate volume and structure of circulating assets of the Company to increase the liquidity of assets. To reduce

accounts receivable the work with buyers and consumers is carried out, control over their accounts to be paid is conducted, collection of past-due accounts receivable is performed.

4.3.2. Adequacy of the capital and circulating assets of the Issuer

The Company owns adequate capital and circulating assets to cover current operational costs.

Rate	Ha 31.03.2004	Ha 30.06.2004
Own capital at the end of the period , RUR	26188558000	25589225000
Circulating assets at the end of the period, RUR	6644428000	7206692000
Shirt-term liabilities at the end of the fiscal period	5040246000	6103905000
Average daily operational costs, RUR	72975689	65711922

4.3.3. Cash assets

The bench marks of the Circulation of cash assets (CCA) of the Company are approved by the Board of Directors of the Company quarterly, at 3 quarter 2004 the rates of CCA were reviewed and approved by the Board of Directors at the meeting on 20.07.2004 in sum of 945 957 thous. RUR

At fixing CCA at 3 quarter 2004 factual deficit of cash assets made 654,5 million RUR. To settle the deficit the following actions were performed:

1. Expense items were reduced:

1.1. Costs on investment activity – 35 million RUR;

1.2. Costs on fuel – 313 million RUR;

1.3. Charity costs – 16 million RUR;

1.4. Payments to energy saving fund – 51 million RUR.

2. The following payments are transferred to 4 quarter 2004:

2.1. Land rent – 78,7 million RUR

2.2. Moratorium debt for 2003 under the articles "Services to ensure functioning and development of UES of Russia" - 116,1 million RUR and "Fulfillment of liabilities under contracts at FWMEP and accounts-demands" - 44,7 million RUR.

The potential source of cash assets at 3 quarter 2004 can be the tariff on electricity and heat energy and shirt-term credits.

There is no account payable filed in the bank.

4.3.4.Financial investment of the Issuer

Financial investment in accordance with PBU 4/99 "Accounting of the Company" is:

- *investment in subsidiaries;*
- *investment in dependent companies;*

- *investment in other companies;*
- *loans given for the period of more than 12 months;*
- *loans given for the period of less than 12 months*
- *own shares bought out from shareholders;*
- *other financial investment.*

Index	Amount of investment at the end of the fiscal quarter, RUR		
	Shirt-term (to 1 year)	Long-term (more than 1 year)	Total
Loans given to the companies for less than 12 months	-	-	-
Loans given to the companies for more than 12 months	-	-	-
Own shares bought out from shareholders	-	-	-
investment in other companies	-	2363000	2363000
investment in subsidiaries	-	265247000	265247000
investment in dependent companies	-	-	-
other financial investment	73976000	-	73976000

Financial investment are accounted by the Company on c/acc 58 in accordance with PBU # 19/02 "Accounting of financial investment" approved by the Order of the Ministry of Finance of RF dd.10.12.2002 # 126n.

1. investment in securities:

Type of securities	Full and abbreviated name of the company	Date and number of registration of share issue	Amount of securities owned by the Issuer	Overall nominal value of share holding owned by the Issuer, thous. RUR	Current condition of the Company	Prospective losses in the current year, thous. RUR
Equities	Joint Stock Company "Kuzbasshydroenergostroy ", JSC "KHES" Location: 37, Kuzbasskaya St., Kemerovo, Russia.	1-01-10487-F	118619000	118619,0	Bankruptcy-external management	118619,0

Equities	Joint Stock Company "Kuzbassetremont", JSC "Kuzbassetremont" Location: 654079, 1, Nevskogo St., Novokuznetsk, Kemerovo region, Russia.	Not registered	11751	11751,0	Stable	0
Equities	Joint Stock Company "Investment production association "Vodokanal", JSC IPA "Vodokanal" Location: 3, Kirpichnaya St., Prokopievsk, Kemerovo region, Russia.	1-01-11253-F 12.10.2001	626	31300,0	Stable	0

Information on financial investment (investment in authorized capital of limited liability companies) is not presented as they make less than 10 percent of all financial investment of the JSC "Kuzbassenergo" at the end of 2d quarter 2004.

As a result of 2003 the JSC "Kuzbassenergo" earned profit from participating in other companies, it makes 1,7 million RUR only from "Bill Center of "Kuzbassenergo", ltd.

4.3.4. Intangible assets of the Issuer

Intangible assets include the sole right of the Company to the trade mark.

Depreciation of intangible assets is accrued by the linear method, reasoning from the following terms of use:

Rights to the trade mark – 10 years.

Intangible assets are shown in the accounting at the original cost with the deduction of depreciation accumulated during the usage.

№№	Group of intangible assets	Overall value	Amount of accrued depreciation
1.	Trade mark	3774, 73.	601, 20.
	Total, RUR	3774, 73	601, 20.

The accounting of intangible assets is conducted in accordance with PBU 14/2000 "Accounting of intangible assets", approved by the Order of the Ministry of Finance #91n dd.16.10.2000

4.4. Information about the issuer's policy and expenditures in the sphere of scientific and technological progress, in respect of licenses and patents, new research and development

Account of NIOKR (Research, developmental and technological works) in the JSC "Kuzbassenergo" is carried out according to the Accounting Regulations "Account of charges on research, developmental and technological works " (PBU 17/02).

There were no new inventions, models and industrial samples in 2003.
There were no sold or purchased patents, licenses and know-how in 2003.

Research engineering was conducted according to the plan dd.30.01.2003 at the rate of 12200 thous. RUR. Actual costs on research engineering made 10097 thous. RUR, including costs on capital investment NIOKR – 263 5 thous. RUR. Financing was conducted due to profit on urgent works. The contract with non-budget fund NIOKR RAO "UES of Russia" was not made and there was no financing.

4.5. Overview of the new trends in the sector of the issuer's core business

Power industry is one of the largest industries of Russian economy. Energy makes about 10% of GDP of the country. Russian energy takes the fourth place in the world over the productive capacities and production volumes. According to the data of EIA (Energy Information Administration), Russia made 5,7% of world energy output and 9,6% of all productive capacities in 1999.

An open cooperation policy with shareholders was introduced in 1999. the growth of debts was stopped, and the gain made almost 80%. The price advance for the products of industrial enterprises was 2,5 times higher than the tariffs advance on electricity for this consumer group in 1999. the new energy policy provides distribution and marketing reform, increase of energy export, build-up of tariff policy. The working out of the Concept of Restructuring of RAO "UES of Russia" was under way.

The year 2000 marked the growth of energy consumption caused by economical upturn, as well as growth of electricity output. The same year 25 new turbosets with total capacity of 665,8 MWt were put into operation; the first in Russia steam and gas power unit of North-Western TETS with capacity of 450 MWt was put into operation in St.Petersburg. at the meeting of the Government of Russian Federation in

December 2000, the proposals on power industry reforming of Ministry of Economy and Development of Russia, Ministry of Nuclear Power of Russia, State Concern "Rosenergoatom" were reviewed and the project main trends of state policy on power industry reforming was taken as a foundation for further working out, this project was proposed by the Ministry of Economy and Development of Russia. The Regulation of the Government of Russian Federation # 1072 "Actions of the Government of RF in the sphere of social policy and economy modernization for 2000-2001" was adopted. This regulation defines the foreground tasks in reforming of natural monopolies.

By the results of the year 2001 the enterprises of RAO "UES of Russia" Holding increased the level of cash payment for consumed electricity and heat energy by 20% and it made 103% with account of setoff of accumulated debt. The implementation of the programs on cost reduction in subsidiaries and dependent companies of the Holding allowed to reduce expenses by 12,3 billion RUR. Overall, 25 turbosets with total capacity of 1330,2 MWt and 1819,5 km of transmission facilities of 35 kvt were put into operation. The program "5000 MWt" was worked out by RAO "UES of Russia" and the group of independent foreign advisers. Its purpose is to attract foreign and Russian investors to the construction of the most prospective generating capacities. The Government approved the Regulation dd.11.07.2001 # 526 "On Reforming of the power industry of Russian Federation".

It says about the separation the monopolistic types of activity from other activities, introduction of separate accounting at the enterprises of power industry. Further, the Regulation of the Government of RF #1040-r was adopted, it approved the Action Plan for the first stage of reforming. In August, 2001 the Committee on reforming was established at Board of directors of RAO " UES of Russia ". Its composition included representatives of minority shareholders, potential investors, the State and RAO " UES of Russia ". On December, 21 the Government of Russian Federation approved Decision № 881 " On the criteria of transfer of the main transmission lines and objects of the power network economy to the Unified (all-Russian) power network ". According to the Regulation of the Government of RF dd.11.07.2001, the JSC "FNC of UES" (Federal network company managing the unified (all-Russian) power network) and the JSC "SO-CDD of UES" (System operator, performing the dispatch control over the unified power networks of Russia) were established.

Principal facts of the year 2002 in the sphere of reforming were the following:

- adoption by the State Duma of RF in its first regarding a pack of the bills devoted to energy power reforming;

- spending of auctions of electric power in the imitation mode by the NP "ATS" together with JSC "SO-CDD of UES" ;

- creation of infrastructural institutions in the branch, i.e. the Federal Network Company and the Sysop;

- preparation of a strategy for reforming of RAO "UES of Russia";

- termination of a preparatory stage of reforming of RAO "UES of Russia";

- development and adoption of the basic variant of reforming of JS-energo;

- preparation to implementation of the pilot projects of reforming of JS-energo;

- spending of the first stages of reforming of the scientific and designing complex of RAO "UES of Russia" , also of energy repairing and service activities.

By the Resolution of the Government of Russian federation №226 dd. 2 of April 2002 "On the pricing regarding to electric and heat power" the new "Pricing principles" and "Regulations of the State regulation and application of the tariffs on electric and heat power in Russian Federation" were introduced. The Corporate Policy Code was approved by RAO "UES of Russia"..

In September 2002 the non commercial partnership "Administrator of trade system"(NP "ATS" began auctions of electric power in imitation mode. One of the positive tendencies of the year 2002 was approaching of the tariffs to the economic valid, otherwise the level of the cross financing between the groups of consumers reduced.

The Board of Directors of RAO "UES of Russia" approved the base variant for reforming of regional

energy systems, i.e. the RAO "UES of Russia" subsidiaries, also the exit of enterprises belonging to the Holding Company RAO "UES of Russia" from the non profile assets aimed to the expenses minimization relate to the ownership. The Board of Directors of RAO "UES of Russia" approved the decision on termination of participation of RAO "UES pf Russia" in CJSC "CDR FOREM" by way of selling of 75% holding of stock belonging to CJSC "CDR FOREM" to the Non commercial partnership "ATS".

The outgoing growth of costs on production as compared to growth of gain (29,4% and 23,8%) over DZO RAO "UES of Russia" led to reduction of gross profit in 2002 as compared to 2001. The gross profit of JSC-energo in 2002 is less than the profit gained in 2001 by 4,6 billion RUR, over JSC-energo the gross profit fell by 4,5 billion RUR.

On the night of April, 1, 2003 in ten regions of Russia the function of operative - dispatching administration of the Unified Energy System of Russia were transferred from regional dispatching administrations (RDA) of JS –energo to the regional dispatching administrations (RDA) to the subsidiaries of JSC " System operator – CDA UES"

In April 2003 the pack of legislative acts on electric power reforming came into the force including such federal laws as:

- "On electric power" ;

- "On the features of electric power functioning during the transition period and on the modifications in some legal acts of Russian Federation, and on recognition as invalid some legal acts of Russian Federation due to adoption of Federal Law "On electric power";

- "On modifications and amendments to the Federal Law "On the Sate regulation of tariffs on electric and heat power in Russian Federation";

- "On modifications and amendments to the Federal Law "On the Natural monopoly";

- «On modifications and amendments to the second part of the Civil Code of Russian Federation";

- "On modifications of the Federal Law "On energy power saving".

Working group on modification of the Strategy of JSC RAO" UES of Russia " for the years 2003 - 2008 "5+5" created at Board of Directors of RAO " UES of Russia " examined the Program on the Concept of the Strategy of RAO " UES of Russia " for the years 2003 - 2008" 5+5 taking into account the remarks and offers. During first six months of 2003 the process on enhancement and development of the mechanisms for competitive trade within the regulated wholesale market of electric power (capacity) proceeds. According to the existing normative legal documents monthly auctions of the above-planned electric power were spent, the volume of electric power subjects to selling at the auctions amounted 3,1% of the volume of supply to the home market.

Together with JSC"SO-CDA UES of Russia" (System operator – Central Dispatching Administration of Unified Energy System) during first six months of 2003 the trade of electric power over the scheme "Energopul" proceeds, the share of sale for the reporting period increased twice and amounted 1,3% of the total volume of the supply to the FOREM (home market).

The establishment of Unified National Power Network takes place on the base of the Legislation of Russian Federation and under the control of Federal Network Company that received more than 45 thous. km of main-line electrical supply networks, 126 substations and the technological control system.

31.10. 2003 the Board of Directors of RAO "UES of Russia" at the ordinary meeting heard information on the possibility of creation of the territorial generating companies (TGC) by way of co-incorporation by several JS-energo.

Option of creation of TGC by way of co-incorporation implicates its creation as a large operational company at the first stage of JS-Energo reforming. TGC shall be co-incorporated by several JS-energo by way of entering of their generating assets to the authorized capital of the newly created company. Thus it is a possibility at the early stage to create a large operational company whose shareholders will be

incorporated it JS-energo .

According to the Resolution of the Government of RF №643 dd. 24.10.2003 "On the rules of the electric power (capacity) market during the transition period", since November, 1, 2003 at the same time with the regulated sector of the wholesale electric power market (existing Federal wholesale electric power (capacity) market) the competitive sector supposing the trade in hourly volumes of the electric power on free prices is started. Thus in the free sector each manufacturer may offer up to 15 % from the fixed capacity, and each consumer can declare purchase up to 30 % from own scheduled consumption. This sector is available only for the European part of RF and the Urals.

Economic benefit of the free sector of the wholesale electric power market launching is obvious. Densities of electric power supply by heat power plants with rather low industrial expenses has increased, while the supply by "expensive" generating capacities, on the contrary reduced.

Profit of RAO UES from its core business in 2003 made 64,5 billion RUR, up 3,5 times than in 2002. It can be explained by the policy of cost containment, which growth was less than gain from distribution. At the same time the net profit of RAO UES decreased by 9 billion RUR and reached 27 billion RUR. The reduction was due to the fact that in 2003 the payment of some profit tax parts was delayed because of large-scale revaluation of fixed assets.

Early 2004 brought power industry of Russia unlike many other industries negative dynamics that was caused by weather conditions, namely higher temperatures in January of 2004 than in January of 2003. As a result, a decrease of production made 1,6% in January 2004. It is mostly connected with the decrease of heat energy production.

In January 2004 a planned rise in prices for products of power industry took place, however, it was relatively slight. At least the rise in gas and oil industry was much higher. The sizable rise in gas prices at lower tariffs for electricity, can affect the financial condition of the enterprises of the power industry in 2004.

In the beginning of 2004 the competitive energy market developed. 95 consumers signed contracts on joining the trading wholesale market system, 25 of them are not subsidiaries or dependent companies of RAO "UES of Russia".
Share of free market sector in June makes 8,0% of overall value of energy consumption on the territory of the European part of Russia and the Urals, in May this rate was 7,4%.

On 26.03.2004 the Board of Directors of RAO "UES of Russia" approved the principles of establishment of a new organizational structure of the executive body of the Holding RAO "UES of Russia". The new organizational structure of RAO "UES of Russia" assumes three main blocks: Corporative Center (CC), Reforming Control Center (RCC) and Business Units (BU). The Corporative center will have central administrative functions RAO "UES of Russia", the Reforming Control Center (a number of project teams under unified control) is responsible for the work on power industry reforming. The Business Units are the divisions of the executive body of RAO with its own budget and responsibilities for this or that business (the Federal Network System and System Operator in this structure are separate legal entities). The Corporate Center will deal with the cooperation with shareholders, authorities, mass media, strategy and control (for example, strategic course, monitoring over financial results), the Reforming Control Center will deal with the strategy and reform implementation, Business Units – establishment of new companies according to the reform, control over their activity, spreading of the culture, management standards and principle business processes.

The JSC "Kuzbassenergo" is part of unified power system of Russia and the subsidiary joint stock company of JSC RAO "UES of Russia". The power system provides with electricity and heat energy the population and industriesof Kemerovo region. It is situated in South-East of Western Siberia and located on the border between the Western-Siberian Plain and mountains of Southern Siberia. Kemerovo region

spreads from North to South for almost 500 km, from West to East for 300 km. The population on 1.01.2004 was 2897, 4 thous. people.

After large energy consumers of the JSC "Kuzbassenergo" entered FWMEP, the power system became energy surplus company. The competitive market sector "5-15" will be launched in Siberia not earlier than middle 2005. The average tariff for surplus power systems at entry to FWMEP is under review, this tariff in 2004 was 29,6 RUR for the regional energy company.

At such pricing per kilowatt/hour, surplus capacities of Kuzbass power system turned out to be too expensive, that is why FEC did not include them in the balance of energy zone of Siberia and UES of Russia for 2004. The results of such a decision are: the reduction of own energy output at 2,5 billion kWt/h per year and conservation of the equipment about 400MWt. This leads to direct reduction of profit, future decrease of sources over production and social programs. Moreover, the analysis of the work of the JSC "Kuzbassenergo" in October 2003 on the approved by FEC balance for IV quarter ("0" balance cross-flow of energy and power) pointed out a number of technological problems, connected with optimization of operation of the equipment of power stations and observance of contract liabilities in FWMEP in Autumn-Winter period.

Within short period of time "Ground for technological energy output in FWMEP" was prepared, where it was explained the necessity of sale by the Company up to 70 million kWt/h of energy per month. After all co-ordinations the proposals of Kuzbass powermen were taken into account by FEC. In November 2003 the power system supplied FWMEP with 34 million kWt/h at the rate of 9 million RUR. At the 1st quarter 2004 the JSC "Kuzbassenergo" is included in summary electricity balance of USE of Russia as the Supplier with sales volume of 160 million kWt/h. The entry to FWMEP as the Supplier became a great economic and technological success for the regional power system.

The activity of the Issuer in power industry is due to industry-wide trends. The power system had to face with problems of not payment intrinsical to the economic environment at macro level, as well as regional problems only, mainly concerning the relations with the Regional Energy Committee.
In 2000 "the Concept of power system development until 2010" was reviewed. The Regional Energy Committee of Kemerovo region admitted the present Concept (Decision #23 dd.13.06.2000) as necessary and up-to-date, aimed at maintenance and conservation of the present generating capacities reached by the production volumes.

RAO "UES of Russia" approved the Concept as the minimum program on keeping the equipment in working condition. This Concept provides the development of the power system until 2010 and defines new tasks and approaches to solve them:

Economic ground for the necessity of the construction and technical reequipment of the objects of the power system.

Introduction of new technologies including achievements of Russian science and foreign experience.

Maximum energy output using own equipment to cover all possible loads of the regional consumers.

Computerization of technological processes.

Introduction of modern methods of testing the equipment.

In 2002 the power system worked promptly and in accordance with the production balance approved by the Federal Energy Committee and schemes defined by the modes of work of UES of Siberia. Excellent work of the Company provided solvent consumers with reliable, non-stop supplies of energy, heat energy and electricity, and stable passing of autumn-winter period.
In 2002 the rate of performed values was higher in the Company than for all previous years. Last year all planned repair works were rendered regardless non-balanced tariffs in the region, the program on technical reequipment was implemented.

During the year 2002 the Program on Reforming of the Financial Management and Control System was introduced, as well as the Budgeting System and tough control over the budget and accounts receivable. The performed work led to the reduction of account payable over the power system by 300 million RUR.

Along with solving of financial, economic, and production and technical tasks, the Company started modernization in current year, according with main trends of power industry reforming.
Commodity energy output for last 5 years increases due to the increase of electricity consumption and stable rise in energy tariffs. The distribution rate for these years has trend to increase and for last 3 years the rate of distribution is much higher than the rate of commodity output. It means that there is a decrease of accounts receivable over the power system.
The structure of payments for energy changed recently, money component increased.

The year 2003 was the time for large starting devices, which are important not only for the power system but for all Kuzbass. In August the high-voltage transmission line VL-35 was put into operation in Southern power networks, it allowed to electrify the remote village of Ust-Kabyrza in Gornaya Shriya, one of the largest in the district.

On 04.12.2003 turbine R-12-90/30M with capacity of 12 MWt was put into operation at Kuznetskaya TETS as well as boiler #4 with steam capacity of 160 tons/h with boiling set.
0n 19.12.2003 the unique for Siberia turbine with vibratory bearings T-115-8,8 with capacity of 115 MWt with generator TF-110-2UZ was put into operation at Southern-Kuzbass GRES. The JSC "Kuzbassenergo" was awarded the title "Russian National Olympus Prize Laureate" in nomination "Fuel and Energy Complex" for the outstanding contribution to the historic development of Russian Federation by the results of the year. "Russian National Olympus Prize" is the main Russian prize, reflecting the great achievements in social and economic, scientific and cultural spheres of Russia.

On 31.03.2004, the Board of Directors of RAO "UES of Russia" approved 49 out of 70 reforming projects for JSC-energo, which were the subject to approval by the authorities of JSC RAO "UES of Russia". In 41 JSC-energo the reforming projects are being implemented. The design group "Repair works" approved the projects on separation of repair works of 70 JSC-energo and 32 JSC-stations. The repair works at 11 JSC-stations will not be conducted. The Board of Directors of RAO "UES of Russia" also approved the projects on separation of repair works of 50 JSC-energo and 20 JSC-stations.

In March 2004 allocation of repairing activity was finished according to the Program on energy repairing activity of JSC "Kuzbassenergo" approved by the Design Group on reforming of energy repairing activities and creation of technological services market of JSC RAO "UES of Russia" dd. 01.07.2003. three subsidiaries were established with 100% participation of the JSC "Kuzbassenergo":

- *JSC "Kuzbassetremont"- competitive energy repairing company, performing repair works in power networks. Registered on 04.03.04*
- *JSC "Engineering and Analytical Center "Kuzbasstekhenergo" – competitive engineering company. Registered on 09.03.04.*
- *JSC "Kuzbass energy repairing company"- competitive energy repairing company, rendering the current and capital repair works of the equipment of the power stations. Registered on 01.03.04.*

The affiliated company Repair Company "Kuzbassenergoremont" was liquidated.
In accordance with the Regulation of the Government of RF, the maximum rise in energy tariffs for 2004 was 13%, it is by 17% lower than the rate necessary for coverage of all production costs, including rise in prices for fuel, user fee, contractors' services, etc. That is why "tough economic regime" was introduced for the energy company, it provides essential reduction of costs, including decrease of costs on repair works, technical reequipment, social sphere. The Company wants to save from 0,5 to 1 billion RUR in 2004.

V. Detailed information about members of the issuer's administrative bodies, its units of control over its financial and economic activities; brief information about the issuer's personnel (employees)

5.1. Information about the structure and competence of the issuer's regulatory bodies

The Company's regulatory bodies are represented by:

- General Meeting of the Company's shareholders is the supreme regulatory body of the JSC "Kuzbassenergo"

- Board of Directors

- Management Board

- Director General

The competence of the General meeting of shareholders of the JSC "Kuzbassenergo" in accordance with the Articles:

Par.10.2 of article 10. The General meeting of the shareholders of the Company (extract from the Articles of the JSC "Kuzbassenergo")

The competence of the General meeting of the Company includes the following issues:

1) putting changes and amendment to the Company's Articles or adoption of the Company's Articles in a new edition;

2) reorganization of the Company;

3) liquidation of the Company, appointment of a liquidation committee and adoption of the intermediate and final liquidation balance sheets;

4) determination of number, nominal value, category (type) of the declared stocks and rights granted by these shares;

5) increase of the authorized capital of the Company through an increase of the nominal value of shares or through an additional floatation of shares;

6) decrease in the authorized capital through a decrease in the nominal value of shares, through an acquisition by the Company of a part of the shares in an effort to decrease their total amount, and also through redemption of these shares acquired and bought out by the Company;

7) splitting and consolidation of the company's shares;

8) adoption of a decision on floatation by the Company of bonds subject to convert into shares and others issuing securities subject to convert into shares;

9) election of members of the Board of Directors and early termination of their powers;

10) election of members of the revision committee of the Company and early termination of their powers;

11) approval of the Auditor of the Company:

12) adoption of a decision on powers transfer of the Corporate executive body to the management company (manager);

13) approval of annual reports, annual accounting statements including the Company's profit and loss accounts, as well as distribution of profits (including payment (announcement) of dividends except for profit distributed as dividends based on the results of the first quarter, six months, nine months of the fiscal year) and losses of the Company in the fiscal year;

13.1.) payment (announcement) of dividends based on the results of the first quarter, six months, nine months of the fiscal year;

14) determination of the procedure of holding of the General Meeting of Shareholders;

15) making decisions about approval of transactions in the cases provided by art. 83 of the Federal law "On joint stock companies";

8.7. Information about legislative acts regulating the issues of capital import and export which can affect payout of dividends, interest and other payments to non-residents

Federal law dd. 09.10.1992 No. 3615-1 "On currency regulation and currency control" (ed. 29.12.1998 , 05.07.1999, 31.05.2001, 08.08.2001, 30.12.2001, 31.12.2003, 27.02.2003,07.07.2003) is the principal legislative document regulating the issues on the capital import and export .

Furthermore the group of Federal laws ratifies agreements on avoiding a double taxation between Russian Federation and foreign countries.
Nowadays a regime on avoiding a double taxation is in force with more then 50 countries. For example:

1.Federal Law # 167-FL " dd. 17.07.1999 " on ratification of Agreement between the Government of Russian Federation and the Government of Cyprus republic on avoiding a double taxation concerned profit tax and capital tax".
2.Federal Law #18-FL dd. 08.02.1998 "On ratification of a Convention between the Government of Russian Federation and the Government of French republic on avoiding a double taxation and prevention a tax bilk and violation of legislation concerned profit tax and property tax"
3.Federal Law #65-FL dd. 19.03.1997 "On ratification of Convention between the Government of Russian Federation and the Government of United Kingdom of Great Britain and North Ireland on avoiding a double taxation and prevention tax bilk concerned profit tax and property price appreciation" and Agreement between the Government of Russian Federation and the Government of United Kingdom of Great Britain and North Ireland on some Convention's provisions application concluded in form of the notes exchange dd. 15.02.1994.
4.Federal Law #38-FL dd. 26.02. 1997 "On ratification of Agreement between Russian Federation and Switzerland subject to avoid a double taxation and prevent a tax bilk concerned profit tax and capital tax"
5.Federal Law #42-FL dd. 26.02. 1997 "on ratification of Agreement between Government of Russian Federation and the Government of Canada on avoiding a double taxation concerned profit tax and property tax."
6.Federal Law #158-FL dd.18.12.1996 "on ratification of Agreement between the Russian Federation

and Federal Republic of Germany on avoiding a double taxation concerned profit tax and property tax".

7.Contract concluded between the Russian Federation and United States of America subject to avoid a double taxation and prevent a tax bilk concerned profit tax and capital tax (Washington, 17.06.1992).

8.Convention concluded between the USSR Government and the Government of Japan subject to avoid a double taxation and prevent a tax bilk concerned profit tax (Tokyo, 18.01.1986).

8.8. Description of the procedure of taxation of revenues from the issuer's issued securities placed and in floatation

Procedure of taxation of revenues from the issuer's issued securities is regulated by the Tax Code of RF.

Table 1: Taxation of legal entities profit tax on the floated securities (subject to floatation) in form of dividends in accordance with legislation in force as for a date 2004:

№№	Category of securities owners	
	Legal entities – tax residents of RF	Foreign legal entities – (non-residents), getting profits from the sources located in RF
1 1.Profit's name on the floated securities	**Dividends**	
2. Security tax	Profit tax	
3. Tax rate	6 %	15 %
4.Procedure and terms of tax payment	Profit tax in form of dividends shall be collected from the source of such tax payment and shall be transferred to the budget by tax agent exercised this payment within 10 days form the date of tax payment	Amount of the tax withheld from the foreign organizations shall be paid to the budget by tax agent at the same time with profit payment in a currency of this profit payment or in a currency of RF at the official rate of Central Bank as for a date of payments.
5. Features of taxation procedure for this category of securities owners	The total sum of the tax from the sum of dividends is defined as product of tax rate and a difference between the sum of the dividends subject to distribution between shareholders (participants) in the current tax period, reduced on the sums of dividends subject to payment by the tax agent in the current tax period, and the sum of the dividends received by the tax agent in the current accounting (tax) period and the previous accounting (tax) period if the given sums did not participate in calculation under definition of the taxable income as dividends earlier. In case the received difference is negative, the duty on tax payment does not arise also compensation from the budget is not made	Elimination of double taxation. For exemption of taxation or application of a preferential taxation regime the tax payer (foreign organization) should confirm to the tax agent paying the profit before date of the profit payment that he is a resident of the state, with which Russian Federation has the international contract (agreement) adjusting taxation issues. Such confirmation should be certified by the authorized body of the corresponding foreign state. In a case non confirmation before the date of profit payment the tax agent is to obliged to withhold the profit tax of foreign organization. In accordance with par. 2 of art. 312 of Tax Code of RF (part 2) foreign profit recipient has right to reimburse the early withheld profit tax paid by him earlier within 3 years from the date of tax period termination when the profit tax was paid off under condition of granting by the foreign addressee of the income in the tax body according the place of registration of the tax agent of corresponding documents (list is in art. 312 of the Tax Code of RF (part 2). Repayment of early withheld and paid tax shall be fulfilled within the month from the date of application and aforementioned documents.
6. Legislative and standard acts regulating the procedure of taxation of the aforementioned profits.	Chapter 25 "Profit tax of organizations" of the Tax code of RF , art. 275 of the TC of RF .	

Table 2. Taxation of profits of natural persons on the floated securities in form of dividends in accordance with legislation in force as for a date 2004.

№№	Category of securities owners	
	Natural persons – tax residents of RF	Foreign natural persons– (non-residents), getting profits from the sources located in RF

1. . Profit's name on the floated securities	**Dividends**	
2. Profits' name on securities	Tax on the natural person's profits	
3 Tax rate	6 %	30 %
4.Procedure and terms of tax payment.	Liability to withhold from the tax payer's income an amount of the tax and to pay it to the corresponding budget shall be entrusted to Russian organization as the source of income of tax payer in form of dividends (tax agent). Charged amount of tax shall be withheld directly from the tax payer's income under its actual payment. Tax agents shall to pay amounts of the accrued and withheld tax not later the date of actual money receipt to tax payment in bank, also the date of income transfer from the accounts of tax agents to accounts of tax payer or on his behalf to the third party's bank accounts.	
5. Features of taxation procedure for this category of securities owners	Total sum of tax on the dividend amount shall be defined as of as product of the rate of the tax and a difference between the sum of the dividends subject to distribution between shareholders (participants) in the current tax period, reduced on the sums of dividends subject to payment by the tax agent in the current tax period, and the sum of the dividends received by the tax agent in the current accounting (tax) period and the previous accounting (tax) period if the given sums did not participate in calculation at definition of the taxable income as dividends earlier. In case the received difference is negative, the duty on tax payment does not arise also compensation from the budget is not made.	Elimination of double taxation. For exemption of taxation, reception of tax charge-off and other tax preferences the tax payer is to submit to the fiscal bodies official approval of his being the resident of the country concluded with the Russian Federation an agreement in force during the corresponding tax period (or its part) on avoiding a double taxation, and also a document on the received income and its payment abroad of Russian Federation approved by the tax body of the corresponding foreign country. Approval may be submitted as before the tax payment, also within one year after the date of termination of tax period under which results the tax payer pretends to elimination of tax payment, set-off, tax deductions and preferences.
6. Legislative and standard acts regulating the procedure of taxation of the aforementioned profits.	Часть 2 Гл. 23 Налогового Кодекса РФ "Налог на доходы физических лиц" (с изменениями и дополнениями), ст. 275 НК РФ. 1. General provision

This explanatory note is drawn up according the accounting report of the Group. The JSC "Kuzbassenergo" owns shares of the following subsidiaries:

№	Subsidiary	Share in the authorized capital
1	JSC "Prokopievskenergo"	60 %
2	JSC "IPC "Vodokanal"	74,5 %
3	JSC "Kuzbasshydroenergostroi"	100 %
4	"Bill Center Kuzbassenergo", ltd.	100 %
5	"Sbytenergo", ltd.	100 %
6	JSC "Andreevskoe"	100 %
7	"Supervolokno", ltd.	60 %

The following companies are excluded from the consolidated accounting report of the group for 2003 due to the removal of the JSC "Kuzbassenergo" form taking decisions on these companies (due to the introduction of the procedure of bankruptcy):

Subsidiary	Share in the authorized capital
JSC "Kuzbasshydroenergostroi"	100 %
JSC "Andreevskoe"	100 %
"Supervolokno", ltd.	60 %

Kuzbass joint stock company of energy and electrification (JSC "Kuzbassenergo") deals with:

- production of electric and heat energy;
- transmission of electric and heat energy;
- delivery (sale) electric and heat energy according to fixed tariffs and dispatching schemes electric and heat output load

renders services:

- realization of energy to energy supplying companies;
- means of communication, including electrical communication;
- transmission of passengers, loads by motor vehicle;
- medical care, including facilities in sanatoria and health resorts

performs:

- capital repair;
- technical reequipment;
- reconstruction and development of regional power system;
- mounting, repair of the energy objects, electric and heat energy equipment;
- maintenance of good performance of electric and heat networks;
- exploitation, mounting, repair of boilers buckets under pressure, steam and water pipelines;
- exploitation of energy equipment in accordance with current standard requirements;
- timely and proper repair of energy equipment;
- technical reequipment and reconstruction of energy objects;
- maintenance of good performance of electric and heat networks;
- activity on exploitation of electric and heat networks;
- storage of oil and its treated products.

JSC "Kuzbassenergo" consists of 7 subsidiaries, it has no dependent companies.

JSC "Kuzbassenergo" was established by the decision of the Committee on state property control of Kemerovo region dd.21.09.93 # 330 and Regulations of Kemerovo dd.30.12.93 # 345 on turning the state enterprise POEE "Kuzbassenergo" into Kuzbass joint stock company energy and electrification.

JSC "Kuzbassenergo" was registered on 30.12.93, address: 650099, 30, Kuznetsky prospect, Kemerovo.

JSC "Kuzbassenergo" has the representative office in Moscow, it is not a legal entity and acts under the Regulations approved by the Board of Directors of the Company.

It has affiliated companies:

- Tom-Usinskaya GRES;
- Belovskaya GRES;

2. **Account policy**

2.1. The basis of the drawing up

Account keeping and drawing up of the accountability of the Company is carried out in accordance with the norms set by the Federal Law from 21.11.1996 (ed. 30.06.2000) #129-FL "On accounting reports" , Regulations on accounting reports "Account policy of the Company" PBU 1/98, approved by the order of The Ministry of Finance of Russian Federation dd. 09.12.1998 # 60 n, Regulation on accounting keeping in Russian Federation, approved by the order of the Ministry of Finance of Russian Federation dd. 20.07.1998 (ed. 24.03.2000) # 34n, by the order of the JSC "Kuzbassenergo" dd.31.12.2002 # 469 "On organization of accounting reports and adoption of the account policy in the JSC "Kuzbassenergo" for 2003"

Assets and liabilities of the Company are evaluated in the accounting report as actual expenses on their procurement.

2.2 Asset and liabilities in foreign currencies

On accounting of the economic transactions in foreign currency, the official ruble rate on the day of the conducting of a transaction was used. Assets and liabilities, which cost is in foreign currency, are reflected in the accounting in sums calculated on the basis of the ruble rate on 31.12.2003 that made RUR 29,45 for USD 1.

The differences in rates of exchange arisen during the year as a result of the transactions with assets and liabilities, as well as during the recalculation on 31.12.2003, are referred to the financial result with its reflection in non-realization receipts and expenditures.

2.3. Short-term and long-term assets and liabilities

Assets and liabilities are referred to the short-term ones in the balance sheet, if the time period of their circulation lasts no longer than 12 months since the reporting date. Any other assets and liabilities are presented in the accounting as long-term ones.

2.4. Intangible assets

Intangible assets reflect exclusive rights of the Company to the trade mark and organizational costs.

Depreciation of intangible assets is accrued with the linear method reasoning from the following terms of usage:

- Rights to the trade mark – 10 years

Intangible assets are shown in the balance sheet at original cost with the deduction of depreciation accumulated during the time of exploitation.

In 2003 organizational costs of "Television Center of Kemerovo "Tom", ltd. which is part of the subsidiary "Bill Center", ltd. , in sum of RUR 103 thousand are connected with the participation in the competition for the license to open the channel in Moscow. Organizational costs are fixed by the contract with Scientific Center "Telecommunication", ltd. on drawing up of the business plan and the concept of broadcast for participation in the competition in MP TR RF.

2.5. Fixed assets

Fixed assets include lands, buildings, machines, equipment, vehicle and other objects which time period of exploitation is more than 12 months.

The objects of fixed assets are accepted to accounting on actual expenses on procurement (construction).

On 01.01.2003 the Company revalued fixed assets reasoning from the market value having attracted an independent valuer and defined their total replacement cost.

The sum of increase (decrease) of cost of the objects and accumulated depreciation are referred to increase (decrease) of surplus capital and increase (decrease) of non-distributed profit (uncovered loss).

The depreciation of fixed assets is accrued by the linear method:

- The depreciation of the objects of fixed assets, taken on accounting before 01.01.2002, is accrued in accordance with the norms approved by the Government of the USSR Council of Ministers from 22.10.1990 № 1072;
- The depreciation of the objects of fixed assets, taken on accounting since 01.01.2002, is accrued in accordance with the Regulation of the Government of RF from 01.01.2002 № 1 "About the classification of fixed assets included in depreciation groups".

The origin (replacement) cost of fixed assets on 01.01.2003 for the JSC "Kuzbassenergo" made RUR 64 222 564 thousand.

The origin (replacement) cost of fixed assets increased by 2,6% and made RUR 65 935 731 thousand during the year:

a) Increased by RUR 2 324 475 thousand due to:

- Introduction of the objects of fixed assets (extra equipment, reconstruction, technical reequipment without mounting) RUR 2 243 055 thousand
- gratuitously accepted fixed funds, from lease buy out of lands RUR 62 832 thousand
- introduction of the objects of fixed assets at the cost of RUR 10000 thousand RUR 18 588 thousand

b) decreased by RUR 611 308 thousand due to:

- liquidation RUR 396 274 thousand
- realization, gratuitous transfer, other disposal (shortage at the stock-taking) of fixed funds RUR 193 931 thousand
- writing-off of fixed assets at cost of up to RUR 10000 (including technical literature) to the production RUR 21 103 thousand

Depreciation over housing facilities was not accrued.

Receipts and expenditures form the retirement of fixed assets (sale, the write-off in case of obsolescence and depreciation) are reflected in the "Report on Receipts and Expenditures" as operational receipts and expenditures

Expenditures from the retirement of fixed assets in case of gratuitous assignment (an underdepreciated part) are reflected in the "Report on Receipts and Expenditures" as non-realization receipts and expenditures.

2.6. Investment in shares

Investment in shares of subsidiaries in sum of RUR 155 056 thousand and other companies in sum RUR 25 779 thousand are given over actual costs on the procurement. The reserve for devaluation of securities was not established.

Receipts and expenditures from the retirement of investment in shares are reflected in the "Report on Receipts and Expenditures" as operational receipts and expenditures.

Investment in outside companies

RUR, thousand

№	Name of the company	Contribution to the authorized capital on 01.01.2003.	Contribution to the authorized capital on 01.01.2004.
1.	JSC "Primula"	10	10
2.	JSCB "Kuzbassugolbank"	589	589

3.	JSC "Moscow DTE "Tushino"	1 000	-
4.	JSC "South-West"	4	4
5.	CJSC "Bagran"	4	4
6.	JSC "IPC Vodokanal"	10150	7150
7.	JSC "Prominvest"	18026	18026
8.	Magazine "FEC and resources of Kuzbass"	50	50
	Total:	**29833**	**25833**

2.7. Debt liabilities

Bills of third parties to the sum of RUR 2 252 053 thousand were bought during the year. Bills are shown at the cost of their procurement. The difference between procurement cost and nominal value of securities is included in other receipts and expenditures together with the receipts accrued during the term of their circulation.

2.8. Inventory

Inventory to the sum of RUR 1 394 655 thousand is valued at the actual expenses on procurement. Valuation of inventory at putting it into production and other retirement was conducted in 2003, as well as in 2002, at the average cost price.

2.9. Incompleted production

Expenses on incompleted production to the sum RUR 10 446 thousand are valued at the actual cost price. These expenses were formed in repair production at the producing of parts and joints.

2.10. Expenditures of future periods

Expenditures made by the Company in the fiscal year but referring to the following fiscal periods as well, are reflected as the expenditures of future periods. Such expenditures include:

- *Rental payment, transferred in accordance with the contract for sequential periods;*
- *The expenditures on subscription publications which were paid a year or six months ahead, are regarded as the expenditures of every fiscal month at the rate of 1/6, 1/12 of total sum;*
- *The costs on the procurement of software according to the sale contracts;*
- *The expenditures connected with the education fee according to the contracts with educational institutions for the training of the personnel;*
- *Voluntary insurance payments;*
- *The sums of future payment for vacation periods of the workers are included piece by piece in the cost price of each fiscal month of a calendar year.*
- *Profit tax at the base of the transit period to be paid in the following years after the year 2003.*

2.11. Debt of buyers and customers

Debt of buyers and customers is defined reasoning from the prices and tariffs set by the contracts between the Company and buyers with the account of all the discounts given (extra charges)

2.12. The reserves of forthcoming expenditures

For a current fiscal year the reserve for repair work is created at the rate established by the estimate of expenditure of the annual standard of repair cost, including it into production costs monthly at the rate of 1/12 of annual estimate. The reserve is created to include expenses for all types of repair work of fixed assets of production destination into production costs.

In 2003 the reserve for repair works in the Company made RUR 1 703 368 thousand.

At the end of the year the adjustment of the repair reserve is performed:

- extra reserved money for the repair of fixed assets (as a result of inventory) is reversed an entry.
- in case of stress of money in reserve for repair extra charge takes place under debit of accounts of the records of production costs and under account credit 96 "The reserves of forthcoming expenditures", control account "Reserve for repair of fixed assets (including leasehold assets) of production destination".

In 2003 the reserve on doubtful debt was created. The amount of the reserve is defined separately for each doubtful debt dependent on financial condition of a debtor and the possibility of total or partial discharge of the debt. Accrued reserve is aimed at coverage of the losses from bad debts.

Reserve of doubtful debts which was not used in the fiscal year was included in receipts of the fiscal year to account credit 91 "Other receipts and expenditures" to other non-realization receipts in correspondence with account 63 "Reserves for doubtful debts"

2.13. The acknowledgement of receipt

Gain from sales of production and rendering of services, considered for accounting purposes as far as the production is shipped by the buyers and payment documents are submitted, is reflected in the "Report on Receipts and Expenditures" excluding the value added tax, sales tax, export duty, discounts given to the buyers and other similar compulsory payments.

Gain from sales of production and rendering of services was admitted for the purposes of accrual concept taxation.

The receipts of the Company from usual types of activity include:

- *Gain from sale of electric and heat energy;*
- *Gain from high payment charge for compensation of reactive power;*
- *Gain received for non-returned condensate;*
- *Gain from sales of makeup water and chemically treated water;*
- *Services on transmission of energy;*
- *Gain from sales of goods;*
- *Gain from performed works (services) abroad;*
- *Gain from sales of products of subsidiary economy;*
- *Gain from sale of tickets for a group tour;*
- *Gain from sale of medical services abroad;*
- *Gain from sale of the services of catering;*
- *Gain from sales of other non-industrial goods, production, services (rent, kindergarten fee, payment for vacations in preventoriums, tourist centers, and recreation centers);*
- *Receipts from property leasing.*

The profit from usual types of activity was defined as a difference between the gain from realization of products at current costs and approved by the Regional Energy Commission of the charges with no value added tax and expenditures on its production.

Operational gains of the Company are:

- *Gains in the sums in accordance with the contracts of interests for usage of cash assets by the lending agency which are on the account of the agency, are reflected according to the article "Interest to be received"(p.060,f#2) and make overall sum of RUR 779 thousand;.*
- *gains from the retirement of fixed assets (sale, , the write-off in case of obsolescence and depreciation) and other assets'–securities, inventory holdings);*
- *Other operational gains according to par.7 PBU 9/99. .*

Non-realization gains of the Company are:

-the following types of fines, penalty taxes, forfeits for violation of the terms of the contracts:

- *for extra usage of electric power limit;*
- *for exceeding contractual rate of power consumption;*
- *for under usage of the contractual rate of power consumption;*
- *assets received without return and on the gift contract;*
- *profit of past years, revealed in the fiscal year;*
- *the sum of account payable and depositor's debt which term of limitation of action was expired;*
- *capital differences and other non-realization revenue according to par.8 PBU 9/99..*

Gross gains are:

- earnings arisen as a result of force-majeur of economic activity;
- insurance compensation;
- cost of wealth collect which are left from the writing-off of the assets which are not suitable for further usage;
- Other gross gains according to par.9 PBU 9/99.

The minority interest made RUR 3 379 thousand in the report on receipts and expenditures on shipped products:

- profit at JSC "Prokopievskenergo"	RUR 2 992 thousand
- loss at IPC "Vodokanal"	RUR (3 928) thousand
- loss at "Bill Center", ltd.	RUR (2 843) thousand

2.14. Surplus capital

Surplus capital was formed due to the extra costs of fixed assets, defined at revaluation.

2.15. Changes in the account policy

There were changes made in the account policy of the Company on the year of 2003 in comparison with the year 2002.

- Composition and procedure of the accounting of social instrument, special devices, equipment and working clothes was defined. Special equipment and working clothes are accounted on account 10 "Materials" on open control accounts "Special equipment and working clothes at storage" and "Special equipment in exploitation" (with applying to the Methodological instructions to reduce the cost of these items).
- The procedure of accounting of expenses on research engineering, experimental development and technological works was defined. Expenses on NIOKR accumulated in advance on account 08 "Investment in non-circulating assets". Expenses on NIOKR which did not bring any results and drawn

up in according with the established procedure (patents, certificates, other documents) are accounted as intangible assets. Expenses on NIOKR which brought results but were not drawn up as right-given documents are written off from account 08 "Non-circulating assets" to expenses on current types of activity by the linear method within the fixed term. Expenses on NIOKR which did not bring results are written off to non-realization expenses of the fiscal year.

- Two new articles were introduced connected with PBU 18/02 "Accounting of the calculations on profit tax". Assets include the article "Deferred tax assets", liabilities – article "Deferred tax liabilities". On the first article the remains on debit of account 09 "Deferred tax assets" are shown, on the second – on account credit 77 "Deferred tax liabilities" (accounts 09 and 77 are introduced by the order of the Ministry of Finance of RF dd. 07.05.2003 # 38n "On putting additions and changes into the Plan on the accounting of financial-economic activity of the Companies and the Instruction on its implementation).

The recalculation of the annual accounting report for 2002 was conducted on 01.01.2003 in accordance with the requirements of the regulations of PBU 18/02 with the change in entrance remains of the balance on deferred assets of account 09 "Deferred tax asset" to the sum of RUR 315 836 thousand and deferred liabilities account 77 "Deferred tax liabilities" to the sum of RUR 166 660 thousand, and "Non-distributed profit of past years" to the sum of RUR 149 176 thousand.

2.16. Comparative data

Comparative data in the accounting for 2003 are drawn up by the way of adjustment of the data of the final accounting for 2002 in order to bring them in correspondence with the changes in forms of accountability for 2004.

The introductive balance of 2003 reflects the results of revaluation of fixed assets, deferred tax assets and liabilities on 01.01.2003. The currency of the balance changed by RUR 4 083 490 thousand.

The changes took place due to:	
- revaluation of fixed assets	RUR 3 892 218 thousand
- deferred tax assets and liabilities	RUR 315 836 thousand
- taking to the balance of the subsidiary "Bill Center", ltd. and excluding from the balance of Subsidiaries JSC "Kuzbasshydroenergostroi", JSC "Andreevskoe", "Supervolokno", ltd.	RUR 124 564 thousand

In 2003 the affiliated company RDD of JSC "Kuzbassenergo" separated from the JSC "Kuzbassenergo" to become Kuzbass RDD – affiliated company "CO-CDD UES"

***

The indexes of the following subsidiaries are not included in form #2 "Report on profits and losses" for the year 2003:

- **JSC "Kuzbasshydroenergostroi",**
- **JSC "Andreevskoe",**
- **"Supervolokno", ltd**

The loss sum made RUR 22 417 thousand. The indexes are reflected in the table below:

3.Disclosure of essential indexes of the accounting
Evaluation of the balance structure

For the year 2003 the currency of the balance of JSC "Kuzbassenergo" increased by RUR 1 132 801 thousand to RUR 32 895 479 thousand.

Total volume of non-circulating assets increased by RUR 290 781 thousand and made at the end of the fiscal period RUR 26 109 591 thousand. Changes in the structure of non-circulating assets are caused by:

- reduction of the volumes of incompleted construction by 14,9% or RUR 266 260 thousand;
- increase of depreciated cost of fixed assets by 2% or RUR 475 813 thousand;
- growth of deferred tax assets reflected in the balance by 33,9% or RUR 107 112 thousand.

The amount of circulating assets on 31.12.03 made RUR 6 785 888 thousand as regards to the beginning of the year RUR 842 020 thousand or 14,2%, it is caused by the growth of store by RUR 191 909 thousand or 16 %, VAT on procured valuable – by RUR 247 586 thousand or 33%, short-term accounts receivable – by RUR 622 740 thousand or 26,8%.

For the fiscal period there was a decrease of surplus capital of the JSC "Kuzbassenergo" by RUR 68 579 thousand or 0,3%, mainly, due to the writing-off of pre-evaluation of fixed assets at their retirement. Moreover, for the year there was a decrease of the minority interest by RUR 3 779 thousand or 8,2%. As a result, for the fiscal period own resources of assets forming of the JSC "Kuzbassenergo" decreased by RUR 8 165 thousand.

Long-term borrowed funds of the JSC "Kuzbassenergo" at the end of the fiscal period are presented as bill loans to the sum of RUR 3 000 thousand and other long-term liabilities – RUR 2 265 762 thousand, which are to be paid in more than 12 months (debt of suppliers and contractors under the Amicable agreement – RUR 1 343 020 thousand, restructured debt to the budget and non-budget funds – RUR 562411 thousand and deferred tax liabilities RUR 360 331 thousand).

Short-term liabilities of the JSC "Kuzbassenergo" for the fiscal period increased by RUR 1 556 138 thousand and made RUR 5 881 468 thousand. The short-term account payable increased by RUR 1 423 527 thousand, credits and loans – by RUR 140 539 thousand. The credit portfolio of the JSC "Kuzbassenergo" on 31.12.03. made RUR 1 550 000 thousand. Short-term credits were attracted to enlarge fixed assets for covering the current liabilities of the Company.

Evaluation of financial index by the results of economic activity

The indexes of the activity of the JSC "Kuzbassenergo" and their evaluation are presented in the table.

Indexes of financial activity of the JSC "Kuzbassenergo"

Index	01.01.03.	31.12.03.	Change	Standard
Ratio of current liquidity	**1,05**	**0,93**	**-0,12**	***1,0-2,0***
It characterizes paying capacity of the company at tatal mobilization of circulating assets (sale of all the stores, settlement with debtors – term of payment is less than a year). *The analysis of liquidity ratio shows that paying capacity of the JSC "Kuzbassenergo" is at the low level and got worse as compared to the beginning of the year.* *Current liquidity ratio by the end of 2003 made 0,93, i.e. the JSC "Kuzbassenergo" can pay off 93% of all its short liabilities having mobilized all its circulating assets.*				
Investment ratio	**1,05**	**1,03**	**-0,02**	***>1***
Investment ratio shows the share of own assets, aimed at forming of the fixed assets (capital). *If the value of the ratio is more than 1,it means that fixed assets are completely formed due to own resources.*				
Financing ratio	**3,53**	**3,04**	**-0,49**	***>1***
This ratio characterizes financial autonomy of the Company and shows the amount of own assets for RUR 1 in the assets of borrowed funds. *The value of the ratio by the end of 2003 – 3,04 – shows that per RUR 1 of borrowed funds RUR 3,04 were own assets*				
Debt ratio	**0,3**	**0,3**	**0,0**	***<1***
This ratio characterizes financial autonomy of the Company and shows the amount of borrowed funds per RUR 1 of own assets, i.e. per RUR 1 of own assets 30 kopek was attracted on 31.12.2003				
Property (autonomy) ratio	**0,78**	**0,75**	**-0,03**	***>0,6***
This ratio defines the share of property, formed at the expense of own resources (authorized, surplus capital, non-distributed profit, etc.). If this ratio is more than 50%, the risk of creditors is led to minimum, i.e. the Company can pay off all its debt liabilities, having sold the half of the property, formed due to the own assets, even if the second half is devaluated. *By the end of the fiscal period the value of this ratio was 75%*				
Borrowed funds ratio	**0,22**	**0,25**	**0,03**	***<0,4***
This ratio shows the share of the property, formed due to borrowed funds (credits, loans, account payable, etc.) *For the fiscal period the value of this ratio increased to 0,25 and it means that 25% of property of the Company was formed due to borrowed funds.*				
Ratio of maintenance with own circulating assets	**-0,18**	**-0,20**	**-0,02**	***>0,1***
This ratio shows the degree of maintenance of the Company with own circulating assets. *Negative value of this ratio speaks for the absence of own circulating assets.*				

On the basis of the given results of the analysis of the structure and liquidity of the balance of financial stability of the Company for 2003 the following conclusions are made:

- Ratios of financial stability have negative dynamics, however, they are still at a normal level.
- Own resources still prevail in the structure of the resources of property.
- The paying capacity of the Company is at low level. The decrease of the paying capacity, growth of debt ratio are the result of insufficient financing of the power system with the tariff base. The cash assets

shortage is compensated with borrowed funds: increase of credit portfolio, growth of account payable.

On 01.01.03. the ratios of financial stability are integrated to S index defining the following type of stability:

Nominal stability ensuring the paying capacity of the JSC "Kuzbassenergo".

On 31.12.03 the indexes of financial stability are integrated to S index defining the following type of stability:

Non-stable financial condition – violation of paying capacity of the JSC "Kuzbassenergo" (the balance can be restored due to the enlargement of sources of own circulating assets, speed-up of circulation of stores and reduction of account payable).

3.1. Fixed assets (article 120 of the sheet balance)

The fixed assets of the JSC "Kuzbassenergo" are characterized with ratios given in the table "Flow of fixed assets of the JSC "Kuzbassenergo" (with subsidiaries) for 2003.

The data given in the table show that for 2003 the share of the active part of fixed assets increased 1,04 times and made 47% at the end of the year.

Fixed assets are depreciated and need renewal.

Flow of fixed assets of the JSC "Kuzbassenergo" for 2003

Index	Remains on 01.01.2003.	Entered (introduced)	Retired	Remains on 31.12.2003.	Total, %
Original cost of fixed assets, RUR thousand	64 222 564	2 324 475	611 308	65 935 731	102,7
Including:					
Active part, RUR thousand .	30 183 019	1 555 747	327 821	31 410 945	104,0
Depreciated cost of fixed assets, RUR thousand	23 468 704			23 944 517	102,0
Share of the active part of fixed assets, %	47,0			47,6	
Availability ratio %	36,5			36,3	
Depreciation ratio, %	63,5			63,7	
Renewal ratio, %				3,5	
Retirement ratio, %				0,9	

On 01.01.2003 the amount of fixed assets at the overall replacement cost of RUR 64 222 564 thousand was accounted at the balance of the JSC "Kuzbassenergo", including fixed production funds of the principle type of activity – RUR 62 442 690 thousand.

In 2003 the fixed asses to the sum of RUR 2 324 475 thousand were introduced, and new fixed funds were introduced to the sum of RUR 1 924 667 thousand and RUR 12 387 thousand was received from other companies gratuitously.

RUR 2 178 670 thousand of production funds was received, including:

- Buildings RUR 155 505 thousand
- Constructions RUR 536 425 thousand.
- Machines and equipment RUR 1 455 850 thousand .
- Vehicle RUR 18 716 thousand
- Other RUR 12 174 thousand

The main part of fixed assets was introduced by completed capital construction and technical reequipment, that made RUR 2 136,6 mln.

For the fiscal year RUR 611 308 thousand of fixed assets was retired, the objects not good for exploitation were liquidated to the sum of RUR 418 555 thousand, RUR 99 254 thousand was realized, RUR 93 197 thousand was given gratuitously to the authorities and other companies (objects of social sphere, housing).

The remains of fixed assets of the JSC "Kuzbassenergo" on 31.12.2003 made RUR 23 944 517 thousand, including production assets from principle type of activity – RUR 22 497 680 thousand. Including:

- Buildings RUR 5 125 541 thousand
- Constructions RUR 8 321 975 thousand.
- Machines and equipment RUR 8 940 627 thousand.
- Vehicle RUR 66 040 thousand
- Other RUR 43 497 thousand

3.2. Incompleted construction (article 130 of the balance sheet)

The Company performs the construction and revamp of the objects of the JSC "Kuzbassenergo". At the beginning of the year 2003 the expenses on incompleted construction made RUR 1 781 297 thousand. At the end of 2003 the expenses on incompleted construction made RUR 1 515 037 thousand.

Decoding of the essential objects of incompleted construction:

- coal receiving device with installation of 2 wagon tipplers at Tom-Usinskaya GRES – RUR 125 668 thousand;
- starting complex of the boiler of station # 16 IX of the enlargement tern of Kemerovskaya GRES – RUR 204 689 thousand"
- starting complex of the turbine of station # 15 of Novo-Kemerovskaya TETS – RUR 110 098 thousand;
- revamp of ash dump of Belovskaya GRES – RUR 26 283 thousand;
- cooling pond of Western-Siberian TETS – RUR 119 011 thousand.

3.3. Long-term financial investment (article 140 of the balance sheet)

Long-term financial investment on 31.12.2003 makes RUR 226, 9 thousand.
Principle changes:

- On 31.12.2002 the financial investment made RUR 89,5 mln, on 01.01.2003 "Bill Center", ltd. was included in the consolidated accounting report of the JSC "Kuzbassenergo" (100%) due to the change in share of JSC "Kuzbassenergo" in the authorized capital of "Bill Center", ltd.
- JSC "Kuzbasshydroenergostroi" (100%) was excluded from the consolidated accounting report. The Arbitrage of Kemerovo region introduced the procedure of bankruptcy of the JSC "Kuzbasshydroenergostroi", thus the JSC "Kuzbassenergo" can not make any management decision concerning the activity of JSC "Kuzbasshydroenergostroi". Moreover, in accordance with par.1,6 of the order of the Ministry of Finance of RF dd.30.12.1996 #112, the accounting report of the subsidiary of the Company can be excluded from the consolidated accounting of the parent company, if the accounting report of the subsidiary of the Company contradicts the rational requirement. The independent auditor "BDO Yunikon RFD" approved the ground of exclusion.
- The subsidiaries of the JSC "Kuzbassenergo": JSC "Andreevskoe" (100%), "Supervolokno", ltd. (60%) which are at the stage of competitive production, were not included in the consolidated accounting report due to the similar reasons.

It should be noticed that:

1. in October 2003 under contract # CB-04/2003 the shares of JSC "MDTE Tushino" were realized by the executive body to the sum of RUR 1000 thousand.
2. "Bill Center", ltd. realized long-term bills of the companies to the sum of RUR 121 794 thousand, including:
   - JSC "Prominvest" – RUR 53 802 thousand;
   - "Intel-Service", ltd. – RUR 2 800 thousand;
   - JSC "Mine #12" – RUR 650thousand;
   - JSC "Atomenergomash" – RUR 44 494 thousand;
   - JSC "Masis" – RUR -20 048 thousand.

Equities of the JSC "Kuzbassenergo" to the sum of RUR 7 694 thousand were realized under contract # 210-203/1 dd.21.02.03 ("Enrich", ltd., Novosibirsk).

3. IPA "Vodokanal" realized shares of JSC "PA Vodokanal" to the sum of RUR 3 000 thousand: JSC "Clearing" Kiselevsk, JSC "Network system" Kiselevsk.
4. "Bill Center", ltd. acquired long-term bills of the companies to the sum of RUR 107 535 thousand. Including:
   - - JSC "Prominvest" – RUR 5 500 thousand;
   - JSC "Mine #12" – RUR 650 thousand;
   - JSC "Atomenergomash" – RUR 90 338 thousand;
   - JSC "Masis" – RUR - 11 047 thousand.

The equities of the JSC "Kuzbassenergo" to the sum of RUR 7 694 thousand were realized according to contract # 210-203/1 dd.21.02.03 ("Enrich", ltd., Novosibirsk).

The structure of long-term investment of the JSC "Kuzbassenergo" is presented in the table.

The inventory is evaluated in the sums of actual costs on procurement. The amount at the end of the fiscal period makes RUR 1 394 655 thousand or 20,6% of circulating assets or 4,2% of all assets of the Company.

There was an increase of the inventory by RUR 191 909 thousand or 16,0% for the fiscal year. The main reason for it was the increase of raw material by RUR 194 152 thousand to the level of RUR 1 217 278 thousand.

The growth of raw material was caused by the parts of remains of fuel (by RUR 232 523 thousand) due to the increase in price for its procurement (for 2003 the growth made 30%). The stores of the auxiliary materials for the fiscal period reduced by RUR 34 199 thousand or 7,5%.

For the fiscal period there were slight changes in the inventory structure of JSC "Kuzbassenergo".– the increase of specific weight of raw materials at the decrease of expenditures of future periods.

3.5. Debt of buyers and customers (art.230 and 240 of the balance sheet)

The principle type of activity of the Company is the production and transmission of electric and heat energy, price (tariff) is defined by the REC of Kemerovo region.

The debt impossible to pay off to the sum of RUR 37 918 thousand was written-off to losses.

Accounts receivable increased by RUR 532 003 thousand overall in JSC "Kuzbassenergo" as compared to the beginning of the year.

The debt of energy consumers increased by RUR 22 281 thousand (1,1%), debt of other debtors – by RUR 509 722 thousand (32,2%).

Long-term accounts receivable reduced by RUR 90 737 thousand and made RUR 1 277 822 thousand at the end of the fiscal period.

Short-term accounts receivable increased from RUR 2 326 167 thousand to RUR 2 948 907 thousand. The biggest growth was in the settlement with the regional and local budget – by RUR 347 558 thousand or 5,6 times (extra charge was due to advance payments for profit tax, property tax, etc.).

For the fiscal period the debt of suppliers and contractors reduced to the JSC "Kuzbassenergo" on the equipment supplying, raw materials, rendering services and works by RUR 137 392 thousand or 28,4%.

The debt of the companies financed from the federal budget which are among the main consumers of the JSC "Kuzbassenergo" increased by RUR 3 971 thousand or 25,7%, the debt of the companies financed from the local budgets – by RUR 5 525 thousand or 2,0%.

On 31.12.2003 the reserve on doubtful debts was created to the sum of RUR 146 300 thousand.

In 2003 the debt on taxes was renewed, transferred to the budget through "problematic" banks. The reflected debt of the mentioned banks to the JSC "Kuzbassenergo" will be written-off to the sum of RUR 244 265 thousand.

3.6. Other long-term liabilities (art.520 of the balance sheet)

The debt of the JSC "Kuzbassenergo" which will be covered in more than 12 months after the fiscal date is referred to other long-term liabilities:

- debt to the sum of RUR 1 343 020 thousand which was under moratorium in the period of external control (from 17.09.98 to 23.03.2000). On the basis of the amicable agreement made with creditors, this debt is subject to discharge in accordance with the schedule from 01.01.2005 to 30.06.2008;
- Debt to the budget and non-budget funds to the sum of RUR 562 411 thousand according to the agreements on debt reconstruction made by the Company.

	- territorial	19 725	0	-19 725	0,0
	- local	2 721	0	-2 721	0,0

Long-term account payable decreased by RUR 606 302 thousand or 24,1% as compared to the last year, including:

- suppliers and contractors – by RUR 563 382thousand;
- non-budget funds – by RUR 45 792 thousand.

3.7.Short-term account payable (art.620 of the balance sheet)

Short-term account payable increased by RUR 1 423 527 thousand as compared to the last year, the debt to suppliers and contractors increased by RUR 494 069 thousand or 68,5%.

The main reason for increase of short-term liabilities was the growth of account payable:

- user's fee to JSC RAO "UES of Russia" by RUR 255 493 thousand (3,2 times), debt to the budget by RUR 274 348 thousand (72,3%), energy suppliers through FWMEP by RUR 46 074 thousand (39,4%). The growth is connected with the transfer of the part of reconstructed debt from long-term to short-term under the amicable agreement which is subject to discharge in 2004;
- To fuel suppliers by RUR 99 079 thousand (91,2%), to contract companies – by RUR 90 487 thousand (51,8%), to given bills – RUR 623 520 thousand (86,9%). On 31.12.03 the remains of the given bills, which will be paid off within 12 months after the fiscal date, made RUR 1 341 168 thousand. The issue of own bills in 2003 was performed according to the decision of the Board of Directors of the JSC "Kuzbassenergo". During the year there was a payment for the bills and issue of new ones to reconstruct account payable to suppliers and contractors for supplied raw materials, rendered services and performed works.

By the end of the year the debt on short-term credits and loans increased by RUR 140 539 thousand to RUR 1 672 161 thousand.

The credit portfolio of the JSC "Kuzbassenergo" on 31.12.03 made RUR 1 550 000 thousand. Short-term credits were attracted to enlarge circulating assets and perform usual economic activity in accordance with the Articles of the Company.

3.8. Surplus capital (art.420 of the balance sheet)

Surplus capital was formed due to the growth of fixed assets cost, defined at the revaluation.

For the fiscal year the surplus capital increased by RUR 3 024 299 thousand, including due to the growth of the property cost from the revaluation by RUR 3 892 218 thousand, and decreased by RUR 68 579 thousand, including:

- by RUR 15 357 thousand – replacement of the Federal property;
- due to the writing-off of the library fund to the sum of RUR 4 thousand;
- due to the writing-off of the sums of pre-evaluation of fixed assets at the retirement to the sum of RUR 53 218 thousand.

For the fiscal year the reserve capital, created by the Company to cover losses, increased by RUR 27 thousand. The reserve capital is created due to the net profit of the subsidiary "Bill Center", ltd.

3.9. Shares of the Company

On 31.12.2003 the authorized capital of the JSC "Kuzbassenergo" makes RUR 606 163 800 (six hundred and six million one hundred sixty three thousand eight hundred), consists of 606 163 800 equities at the cost of RUR 1 for 1 share.

From the overall amount of shares the employees of the JSC "Kuzbassenergo" own 13,7 mln shares (2002 – 16,2 mln shares), legal entities – 578,8 mln (2002 – 566,9 mln), direction of the Company owns no shares, subsidiaries own no shares of the Company.

3.10. National assistance

There was no national assistance to the JSC "Kuzbassenergo" in the fiscal year.

3.11. Principal subsidiaries and dependent companies

The Company possesses the equities of the following subsidiaries:

№	Name of the company	Share in the authorized capital	Location	Type of activity
1	JSC "Prokopievskenergo"	60%	653000, 14, Energeticheskaya St., Prokopievsk	Energy realization
2	JSC "IPA "Vodokanal"	74,5%	653000, 3, Kirpichnaya St., Prokopievsk	treatment plants
3	JSC "Kuzbasshydroenergostroi"	100%	650099., 17, Kuznetsky prospect, Kemerovo	Capital construction
4	"Bill Center Kuzbassenergo", ltd.	100%	650099, 12, Ostrovskogo St., Kemerovo	Bill calculations, wholesale and retail trade
5	"Sbytenergo", ltd.	100%	652417. , 14 Severnaya St., pos. Metallploshchadka, Kemerovo district, Kemerovo	Energy realization, financial transactions, wholesale and retail trade
6	JSC "Andreevskoe"	100%	652421, Andreevka village, Kemerovo district, Kemerovo region	subsidiary economy
7	"Supervolokno", ltd.	60%	650068, UN-1612/29, Stroigorodok, Kemerovo	Production of heat insulation

On 01.01.2003 the share of the JSC "Kuzbassenergo" in the authorized capital of "Bill Center Kuzbassenergo", ltd. made RUR 80 thousand (19,95%). The JSC "Kuzbassenergo" – the sole member of "Bill Center Kuzbassenergo", ltd. bought out from the Company non-distributed shares in the authorized capital as the members of "Bill Center Kuzbassenergo", ltd retired under the applications, on the basis of articles 24,39 of FL "On Joint Stock Companies", par.24 of section IX of the Articles of "Bill Center Kuzbassenergo", ltd., articles 15, 20-21of the Articles of the JSC "Kuzbassenergo".
The share of the JSC "Kuzbassenergo" in the authorized capital of "Bill Center Kuzbassenergo", ltd. made RUR 401 000 (100%) on 01.04.2003.

From 01.01.2003 to 31.12.2003 the Company did not possess the shares of the subsidiaries.

3.12. Bargaining transaction (barter)

In 2003 the part of products sales of the Company was conducted on the terms of the barter, the values given in the table below show this.

Bargaining transaction (barter)

Index	Fiscal period	Similar period of last year
Total number of the companies conducting bargaining transactions	42	89
Gain from these transactions – total, RUR thousand, including:	19 560	57 216
"Kuzbassugolsnab", ltd.	-	*3 259*
"Sibenergougolsnab", ltd.	*3 266*	*40 315*
"Barel", ltd.	*6 319*	*2 630*
JSC "KEM"	*6 006*	*1 067*
Other	*3 969*	*9 945*
Gain from bargaining transactions – total, % to overall gain for the fiscal period	0,1	0,4

The table shows that the gain from bargaining transactions in overall gain is not sufficient and makes only 0,1%. For the fiscal period there was a decrease of total number of the companies conducting bargaining transactions by 47 companies.

3.13. Receipts and expenditures over current types of activity

Receipts and expenditures for the fiscal year are reflected in the report on receipts and expenditures separately for current types of activity, for operational and non-realization receipts and expenditures with the decoding of types and values and comparison with the previous year.

Analysis of profit (losses) from sales

income tax	14 711	2	242 712	8,2	241 189	8		16 234	2,3
Other taxes and payments	104 333	14,1	946 916	31,6	881 767	29,1	3 612	165 870	24,3

The debt to the federal budget makes RUR 833 559 thousand form overall debt sum. This debt was reconstructed in 2001 in accordance with Regulation # 1002 dd.03.09.99. The reconstructed debt on profit tax and accrued penalties and fines in accordance with the directives of JSC RAO "UES of Russia" on 31.12.2003 is transferred to deferred tax liabilities.

Extra charge to the budgets of the subjects of RF and local budgets on 31.12.2003 makes RUR 155 927 thousand due to the advance payments in December 2003.

The charge of the current period on terms of payment in 2004 made RUR 230 115 thousand.

The tax debt of RUR 244 265 thousand was renewed in 2003, it was transferred to the budget through "problematic" banks:

- VAT – RUR 222 833 thousand (reconstructed debt is reflected in F1, p.520);
- Profit tax – RUR 21 432 thousand (reflected in F1, p.515 "Deferred tax liabilities").

Information about settlement with non-budget social funds for the year 2003

RUR thousand .

Payments to the non-budget funds	Balance on 01.01.2003.		Accrued		Paid		Balance on 31.12.2003.	
	Total	Unit weight, %	Total	Unit weight, %	Total	Unit weight, %	Total	Unit weight, %

Employment fund	0	0	7	0,01	7	0,01	0	0
Penalties, fines	82 190	29,9	6 459	1,1	13 712	2,3	74 937	31,4

The debt on insurance fees to the Pension fund of RUR 119 684 thousand was reconstructed in 2001 in accordance with the Regulation of the Government of RF # 699 dd.01.10.2001.

Accounts receivable on payments to the social insurance fund of RUR 2 860 thousand arose as a result of the enhanced use of the money of the fund over the charged sums.

3.17. Result of force-majeur circumstances

RUR thousand.

Index	Profit		Loss		Financial result	
	Fiscal period	Similar period of the last year	Fiscal period	Similar period of the last year	Fiscal period	Similar period of the last year
Profit and loss from force-majeur circumstances – total	4 871	9 602	3 768	6 568	1 103	3 034
including:					0	0
- insurance compensation	4 852	9 586	X	X	X	X
- cost of tangible property	19	16	88	753	-69	-737
- losses from writing-off	X	X	3 680	5 815	X	X

Losses of the JSC "Kuzbassenergo" from force-majeur circumstances made RUR 3 768 thousand for the year 2003, down 43% than in 2002.

The main reason for force-majeur circumstances is stealing of power lines. The main part of the receipts from force-majeur circumstances is getting the insurance compensation.

In the fiscal period the part of insurance compensation was received on the insurance cases which took place in the previous period, it explains the positive financial result from force-majeur circumstances. With the account of received insurance compensation, the sum of receipts in 2003 exceeded the sum of damages by RUR 1 103 thousand.

3.18. The determinate activity

On the basis of the decision of the Board of Directors of JSC "Kuzbassenergo" dd.01.07.2003 (minutes 1/9) the subsidiary of the JSC "Kuzbassenergo" – "Regional Dispatching Department" was liquidated. The functions of operating-dispatching department were given to the JSC "CO-CDD UES" – "Kuzbass RDD", the property was given to lease.

Depreciated assessments on intangible assets for the fiscal year	133	0	0	**133**
on 31.12.2003				
Assets of the segment	31 098 949	1 262 107	225 700	**32 586 756**
Assets non-distributed to the segments	x	x	x	**308 723**
Assets – total	x	x	x	**32 895 479**
Liabilities of the segment	6 119 178	248 338	44 410	**6 411 926**
Liabilities non-distributed to the segments	x	x	x	**1 675 161**
Liabilities – total	x	x	x	**8 087 087**
On 31.12. 2002				
Assets of the segment	26 019 402	1 239 994	268 122	**27 527 518**
Assets non-distributed to the segments	x	x	x	**151 670**
Assets – total	x	x	x	**27 679 188**
Liabilities of the segment	4 963 431	236 540	51 147	**5 251 117**
Liabilities non-distributed to the segments	x	x	x	**1 531 056**
Liabilities – total	x	x	x	**6 782 173**

Gain (profit) of the segments is formed as a result of the transactions with external buyers. The transactions with other segments are not carried out. Balanced financial result over the segments differs from profit from sales of the Company, shown in the line "Total" in the line "Profit (loss)" per value of

non-distributed administrative and other expenses referring to the activity of the Company in general. Expenses on profit tax and other similar obligatory payments, interest receivable and payable, profit from shares in other companies, as well as force-majeur receipts and expenditures are not included in the calculation of profit (loss) of the segment.

The distribution of other operational receipts and expenditures as well as non-realization receipts and expenditures among the segments was not performed due to groundless and absence of the necessity. The assets of the segments include: fixed assets, intangible assets, inventory holdings, incompleted production, accounts receivable, cash assets and other circulating assets. Financial investment is not included in the assets of the segments. Liabilities of the segments include: short-term and long-term liabilities, except for the liabilities to the budget on profit tax and liabilities on credits and loans received to finance the activity of the Company in general. Capital investment of the segments includes capital investment in fixed assets and intangible assets.

The overall gain from the realization of the JSC "Kuzbassenergo" for the year 2003 made RUR 17 344 779 thousand, including the gain from energy production – RUR 16 552 872 thousand or 95,4%. As a result of the activity of the Company the gross profit made RUR 1 712 632 thousand, including the segment "Production of electric and heat energy" – RUR 1 565 362 thousand.

The table shows that the main operational segment of the JSC "Kuzbassenergo" is "Production of electric and heat energy". The assets of this segment make 94,5% of all the assets of the JSC "Kuzbassenergo" or RUR 31 098 949 thousand. This segment has 75,7% of all the liabilities of the Company. It should be mentioned that RUR 1 675 161 thousand is not distributed as this sum includes liabilities on credits and loans received to finance the activity of the Company in general.

Geographic segments

There is no division of the activity of the JSC "Kuzbassenergo" on geographic segments as the production and realization of the products takes place in one geographic place – Kemerovo region.

3.22. The events after the fiscal date

The event after the fiscal date is the fact of the economic activity which made or could make an impact on the financial condition, cash flow or the results of the activity of the company and which took place in the period between the fiscal date and the date of signing of the accounting report fro the fiscal year.

Dividends

By the results of the year 2003 the accrual of the dividends and their payment is not planned. In 2003 the dividends were not accrued and paid by the results of the year 2002.

3.23. Contingent liabilities

The developing market still prevails in the economy of Russian Federation, rough branches of industry working for export still prevail in the GDP.

However, the rapid economic growth shown in 2003 (the real growth of GDP made 7,3% according to the latest data of the State Committee) is due to the work of hundreds of middle-sized companies and not due to the work of a few big companies. This new economy grows rapidly thanks to the home market, including the supplies of energy.

For 2 last years there was a "revolution in macroeconomics" in Russia, connected with the introduction of a rapidly growing sector of competitive middle-sized companies, serving for the home market.

The prospective of economic stability in power industry depends on the efficiency of the economic measures taken by the Government of RF in the sphere of power industry reformation.

Contingent liabilities of the economic activity include:

- outage of coal to the suppliers claims to the sum of RUR 1 885 thousand
- advanced claims to the JSC "Kuzbassenergo" by the counteragents and state authorities to the sum of RUR 1 562 401,12 thousand
- claims advanced in the law machinery to the natural persons to the sum of RUR 4 984,58 thousand
- The Company is a respondent to the claims of natural persons. The sum of assumed loss can make RUR 1 362,34 thousand.

Off-balance fines and penalties

At the beginning of the fiscal year the penalties and fines to the budget and non-budget funds made RUR 1 959 935 thousand, penalties made RUR 1 956 000 thousand, fines – RUR 3 935 thousand. RUR 1 245 953 thousand of overall sum was reconstructed.

	Debt on 01.01.2003., RUR thousand.					
	Penalties	Reconstructed	**Fines**	Reconstructed	**Total**	Reconstructed
Budget	1 057 494	930 316	3 633	2 050	1 061 127	932 366
Road fund	584 226	0	0	0	584 226	0
Non-budget social funds	314 280	313 288	302	299	314 582	313 587
Total:	**1 956 000**	**1 243 604**	**3 935**	**2 349**	**1 959 935**	**1 245 953**

In 2003 non-reconstructed debt on fines and penalty paid off to the sum of RUR 78 356 thousand, debt on penalty to the Road fund is written-off by the decision of the Arbitrage of Kemerovo region as unlawfully accrued.

	Debt on 31.12.2003., RUR thousand.					
	Penalties	Reconstructed	**Fines**	Reconstructed	**Total**	Reconstructed

Budget	978 254	930 315	4 565	2 048	982 819	932 363
Road fund	51	0	4	0	55	0
Non-budget social funds	309 083	309 087	388	384	309 471	309 471
Total:	**1 287 337**	**1 239 402**	**4 953**	**2 432**	**1 292 290**	**1 241 834**

At the end of the fiscal year the penalties and fines to the budget and non-budget funds made RUR 1 292 290 thousand, penalties made RUR 1 287 337 thousand, fines – RUR 4 953 thousand. RUR 1 241 834 thousand of overall sum was reconstructed, including penalties – RUR 1 239 402 thousand, fines – RUR 2 432 thousand. The indicated sums are included in the Program on Reconstruction of tax payments according to the Decision of The Department of the RF Ministry of Taxation of Kemerovo region #1 dd. 31.08.2001 and the Tax inspectorate of RF in Kemerovo #22 dd. 03.12.2001. The sums are formed according to the data of the accounting of rating authorities. The JSC "Kuzbassenergo" did not agree with the amount of reconstructed penalty because the rating authorities could not prove with the papers the grounds for accrual of the penalty.

At the same time the JSC "Kuzbassenergo" had to sign the agreement on reconstruction of tax payments to improve the financial condition of the Company.

At the advanced repayment of the debt on tax payments, the sums of penalties and fines are subject to writing-off.

The schedule of repayment of reconstructed debt of tax payments was observed by the Company in 2002-2003.

To liquidate the penalties and fines in the balance, the JSC "Kuzbassenergo" introduces an advanced schedule of repayment of reconstructed debt since the year 2004.

The Company has all the chances to appeal to the Tax inspectorate of RF in Kemerovo to write-off a part of penalties and fines in the balance. The Company plans to do this in 2004.

The developing market keeps prevailing in the Russian economy. The prospects of economic stability depend on the efficiency of economic measures taken by the Government and the development of legal and political systems.

1.We conducted the audit of the enclosed accounting report for 2003:

- balance sheet (form #1);
- profit-and-loss report (form #2);
- report on capital changes (form #3);
- report on cash flow (form #4);
- appendix to the balance sheet (form #5);
- explanatory note. .

The consolidated accounting report of the Group combines the accounting report of the following legal entities:

- The Parent Company – JSC "Kuzbassenergo";
- subsidiaries: "Bill Center "Kuzbassenergo", ltd., "Sbytenergo", ltd., JSC "Prokopievskenergo"; JSC "Investment-Production Association "Vodokanal".

The accounting report of the subsidiaries "Bill Center "Kuzbassenergo", ltd. and "Sbytenergo", ltd. is united in the consolidated accounting report on the ground of 100% share of the Parent Company in their authorized capitals.

The consolidated accounting report of the Group includes the consolidated accounting report of "Bill Center "Kuzbassenergo", ltd on the group of dependent and affiliated companies:

- JSC "Aniline-dye plant";

- "Television center "Tom", ltd., Kemerovo;
- "Kuzbass-energo-trans", ltd.
- CJSC "Transport company Kuzbassenergo";
- CJSC "Health center Energetic";
- JSC "Novokuznetsk heating system company";
- CJSC "Kuzbassenergosvyaz";
- CJSC "Kuzbassenergoservice".

The accounting report of the subsidiaries JSC "Prokopievskenergo" and JSC "Investment-Production Association "Vodokanal" is united in the consolidated accounting report on the ground of the prevailing share of the Parent Company in their authorized capital. The Company accounted the share of "Bill Center "Kuzbassenergo", ltd. in the authorized capital (voting shares) of the JSC "Prokopievskenergo" – 13% at including the accounting report of JSC "Prokopievskenergo" in the consolidated accounting report.

The accounting reports of JSC "Kuzbasshydroenergostroi", JSC "Andreevskoe", "Supervolokno", ltd. is not included in the consolidated accounting report of the Group due to the bankruptcy procedure and external control in these subsidiaries of the Company (JSC "Kuzbasshydroenergostroi") and competitive production (JSC "Andreevskoe", "Supervolokno", ltd.), i.e. the Parent Company lost the possibility of influencing the decisions taken by the subsidiaries of the Company.

The group of the interdependent companies is united under the one name – JSC "Kuzbassenergo". Types of activity of the Companies of the Group:

- production, transmission, distribution and realization of electric and heat energy;
- Other types of activity, connected with the functioning of the power system and the objects of infrastructure.

This consolidated accounting report is prepared by the management of the Parent Company in accordance with the standards set by Federal Law dd. 21.11.96 # 129-FL "On the accounting report" (in edition of further changes and additions), Regulations on accounting, the Order of the Ministry of Finance of RF dd.22.07.2003 #67n "On the forms of the accounting reports of the companies", Methodological recommendations on drawing up and presentation of the accounting reports approved by the Order of the Ministry of Finance of RF dd. 30.12.96 # 112 (in edition of further changes and additions), and other statutory acts of RF regulating the procedure of accounting keeping and drawing up of the accounting reports.

Mr. Mikhailov S.N., the Director General of the Parent Company, bears the responsibility for the Company, observance of the legislation of RF at conducting of the economic transactions. Rumova A.N., Chief accountant of the Parent Company, bears the responsibility for the drawing up of the account policy, book keeping, presentation of the complete and comprehensive consolidated accounting report.

JSC BDO Unikon conducted the audit and approved the accounting report of the Parent Company which makes 98% of the consolidated currency of the balance sheet at the moment of the audit conduction of the accounting report of the Group for the year 2003.

The duty of the auditor is to air the opinion about the authenticity of the given accounting report in every way and confirmation of the procedure of book keeping to the legislation of RF. The aim of the work did not include the expression of the opinion about complete conformity of the activity of the Group to the legislation of RF, evaluation of the efficiency of the management and observance of the interests of the shareholders.

Our opinion can not be considered as the expression of confidence in non-stop activity of the Companies of the Group in the future.

2. The audit was conducted in accordance with FL #119-FL dd.07.08.2001 "On audit activity" and federal rules (standards) of the audit activity approved by the Regulation of the Government of RF #696

dd.23.09.2202 (in edition of further changes and additions), other statutory acts regulating the audit activity, as well as the audit standards and methods within the Company.

We were governed by the inner standards of the accredited professional audit association IPAR at the conducting the audit.

The audit was planned and conducted so that to get the reasonable confidence in the absence of essential failures in the accounting report.

The audit included the checking documents proving the figures and notes of the accounting report. Our work was to evaluate the right usage of the principles and methods of the accounting keeping and standards of preparation of the consolidated accounting report. We viewed the approaches to the definition of the principle values and tolerances made by the executive body of the Parent Company at the preparation of the consolidated accounting report.

We assume that the conducted audit gives grounds for expression of our opinion about the authenticity of this accounting report in every way to the legislation of RF.

3. To our mind, the consolidated accounting report of the Group reflects authentically the finance condition of the Company on 31.12.2003 and the results of the financial and economic activity from 01.01.2003 to 21.12.2003.

4. without changing the opinion about the authenticity of the consolidated accounting report, we would like to stress the information given in the explanatory note to the annual consolidated accounting report, namely we would like to emphasize that the accrued sanctions and penalties to the budget and non-bydget funds were not reflected in the balance sheet of the Parent Company.

12.03.2004

First Deputy Director General M.A. Grishakin

1.6. Information on the other subscribers of this present quarterly report

Chief accountant – **Riumova Alevtina Nickolaevna**
Telephone: *(384-2)29-33-58*
Fax*: (384-2)29-37-77.*

II. General information on the financial and economic situation of the issuer

2.1. Figures of financial and economic activity of the issuer

Figure name	Year 1999	Year 2000	Year 2001	Year 2002	Year 2003	1 quarter 2004
Cost of issuer's net wealth, rub.	13387329000	16681078000	16666809000	20847542000	24851878000	26278405000
Proportion of sum assets invested to the capital and working balances, %	61,05	45,29	39,77	30,47	32,42	27,49
Proportion of sum short-term obligations to capital and working balances, %	61,05	27,35	22,16	18,39	23,29	18,74
Covering of payments of indebtedness servicing, rub.	0,18	0,32	0,27	0,28	0,28	Is not calculated, no amortization
Indebtedness overdue level, %	70,65	69,34	10,70	4,26	1,88	0,00
Net wealth circulating, times	0,50	0,65	0,76	0,71	0,68	0,19
Credit indebtedness circulating, times	0,90	1,47	1,73	2,03	1,99	0,57
Debit indebtedness circulating, times	1,16	1,84	2,38	4,52	3,58	1,00
Share of income tax in profit before taxation, %	15,97	23,17	92,49	-112,47	73,37	31,49

2.2. Market capitalization of the issuer

Common shares of JSC «Kuzbassenergo» are on sale on the "Stock Exchange "RTS".

Market capitalization by the results of 1999 is calculated by the 10 most big deals, made via RTS in last 3 months of 1999 and is equal to 52 002 792 USD.

Market capitalization by the results of 2000 is calculated by the 10 most big deals, made via RTS in December of 2000 and is equal to 49 438 720 USD.

market capitalization by the results of 2001 is calculated by the 10 most big deals, made via RTS in last 3 months of 2001 г. and is equal to 72 460 821 USD.

In 2002 via RTS 129 deals were made including those in December – 3 deals, in last 3 months – 6 deals, thus calculation of the Issuer's market capitalization for 2002 is being made by the price of purchasing shares on "Stock Exchange "RTS" 31.12.2002. (0,19 $ x 606163800= 115 171 122 $.

By the period from 01.10.2003.to 31.12.2003. at "Stock Exchange "RTS" was registered one deal, sales amounting 5000 pieces or 2500 USD.

At Stock Exchange «Saint Petersburg» were registered 3 deals amounting 23400 pieces or 11712,56 $.

In connection with the fact that for the reporting period at stock exchanges were made less than 10 deals with common shares of JSC «Kuzbassenergo», calculation of the Issuer's market capitalization is being made by the price of purchasing shares on "Stock Exchange "RTS" 31.12.2003. thus the issuer's market capitalization for the year 2003is equal to 0,48 $ x 606163800 = 290 958 624 $.

In the 1quarter 2004 via RTS was made 3 deals, market capitalization calculated by analogy with the year 2003 and is equal to 0,674 $ x 606163800 = 408 554 401 $.

2.3. The issuer's liabilities

2.3.1. Credit debts
for 1999-2000:

2.5. Risks related with acquisition of the distributing (distributed) issuing securities

2.5.1. Branch risks

The Company has no any risks related to the possible change of a cost of raw material, goods subject to using in production and that may affect negatively its activity.

The Issuer doesn't have risks connected with possible change of product cost and as well as services able to influence negatively on its activity.

Branch tendencies: Today in this country there are two segments ofelectric energy market: Federal wholesale market of electric energy and power (FWMEP), devided in to three isolated price zones: European, Siberian and Far-Eastern – and free trade sector «5-15» of wholesale market of electric energy. The activity of the first is strictly reglamented and is regulated by the Federal Comission of Energy of Russia (FCER), the second started on the 1 November of 2003 as a transitional stage from regulated market to a competitive. Unlike FCER it is absolutely new sector of electic energy trade which functions on the principles of competition and free price formation. For the present only subjects situated in the Western part of Russia can participate in it. Siberian region will be able to join it no earlier than 3-rd quarter 2004.

Since 2000 JSC «Kuzbassenergo» participates in auction (purchasing) over and above the plan electrical energy at the FCER constantly. The only reason is economical expediency: participation in auction lets

optimize the balance between electrical energy and power, reducing prime cost of producing own electrical energy. For the year 2003 taking into account own producing 24,9 млrd. KW/h balance-cross-flow fromFCER was 5 млrd. 130 млn. KW/h that is 70% more than volumes determined by the Federal commission of Energy. At the expense of over and above the plan purchasing the energy system managed to reduce prime cost on 170 мкn. roubles.

Escape of big consumers to the FREC (JSC «Novokuznetsky aluminium plant» and LTD «Metalenergofinance») made some troubles for the Company. Only NKAZ provided about 17% of useful emission of electrical energy to the energy system. As a result of escape these enterprises appeared out-of-order incomes, that only last year were 200 млn.roubles. According to the prognosis on 2004 incomes will amount 700-800 млn. roubles. Possible scheme of compensation out-of-order incomes at the moment are being examined at the level of Ministry of economical development of RF and wether it will be accepted or not by the new RF Government is not known yet.

Power system became superfluous. It seems to be easy to sell surpluses at the market. But it's not so easy. As it was mentioned above the competitive sector of market «5-15» has not came to Siberia yet but the FREC dictates its own rough rules which are not in favour of power systems.

Priority right of seeling ekectric energy and power at the FREC is presented to federal condensation electric stations: Berezovskaya HRES, Krasnoyarskaya HRES-2 and hydrostations that have minimal prime cost of producing electrical energy. JSC «Kuzbassenergo» having selling tariff 21,7 копеks for 1 KW/h exceeds in price only Berezovskaya HRES. The other have it higher. But it is average weighted tariff that is being examined for surplus energy systems. For 2004 it is 29,6 кор. for a regional energetical company.

Using such approach of calculation of the price on KW/h even surplus powers of Kuzbass energy system appeared to be too much expensive. That's why FCE didn't include them to the balance of energy zone of Siberia and EES of Russia on 2004. The result of such decision is: reducing of own output of electrical energy in a volume of 2,5 млrd. KW/h per year and conversion of equipment about 400 MW. This is direct reducing of income further lowering sources concerning producing and social programmes.

Managers of JSC «Kuzbassenergo» prepared for FCE «The substantiation of technical output of electrical energy at FREC» in which it was demonstratively substantiated the need to sell 70 млn. KW/h. in a month. This is a technical minimum which provides all necessary regimes in a system. After all concordances the proposals of JSC «Kuzbassenergo» were taken in to consideration and the energy system was included in to the summary balance of electrical energy for EES of Russia as a Supplier with a volume of sale 160 млn. KW/h. in the 1 quarter 2004.

2.5.2. Country and regional risks

We can relate following to basical factors of appearing political and economical risks: imperfection of legislative basis, regulating economical relations, as well as insufficient effectiveness of law system, permanently changing tax legislation e.t.c.

Ecological factors inseparably linked with general activity of the issuer as a production process, transfer and distribution of heat and electric power demands large quantity of natural sources that call environmental pollution. As significant capital investments are necessary to purchase nature-conservative equipment to remove ecological factors of risk, and payments for natural sources consumption.

In 2003 the emission of polluting substances to the air was reduced by JSC «Kuzbassenergo» by means of unloading electric stations and increasing the share of gas burnt in a fuel balance 8,46 % (in 2002 – 3,08 %). In 2003 JSC «Kuzbassenergo» realized the following big arrangements for reducing water pollution and reducing of emission of polluting substances to the air:

- *Reconstruction of fly-ash collectors with assembling of perfected tubes Ventury and air-acustic*

intencification on the copper (Station № 16 of Novokemerovskaya TPS).

- *Reconstruction of the furnace -burner devices of the copper BKZ 210-140F St. № 6 Zapadno-Sibirskoy TPS aiming reduction of nitric oxide forming.*
- *Assembling of repeated filters of the water being input to the injectors of tubes Ventury at the body of St.. № 5 «A» Belovskaya HRES .*
- *Reconstruction of the drain pumping station and the drain channel at Том-Usinskaya HRES and other arrangements.*

-

Regional risks are absent

2.5.3. Financial risks

The issuer is exposed to the risks connected with the changing persent rates regarding to the cost ofattracted bank credits where today we can observe a tendence to lowering percent rates that is kindly for the issuer. For example average weighted rate on bank credits for the 1 quarter 2004 is 10,72 % that is lower than fixed refinance rate of Central Bank 14 % since 15.01.2004.

As for the inflation the situation is the same. Its level for the first 3 months of 2004 came to 3,5 %. Only a year ago quarter inflation in tital was in 1,5 times higher – 5,2 %.

The Company gain is directly dependent on energy tariffs fixed by the Regional commission of energy (RCE) of Kemerovo region. The principle of tariff forming – expences plus. But RCE not always takes into consideration the issuer's expences growth.

The Issuer doesn't have currency risks.

2.5.4. Legal risks

There are no legal risks related to the change of exchange regulation, modification of tax legislation, change of regulations of the customs supervision and fees, modification of requirements on licensing, court practice that may affect negatively on the activity's results of the issuer also results of the current legal trials subject of participation of the issuer.

The issuer is related to the risks connected wiyh transformation of state regulating of the energy tariffs. Since 2002 the RF government establishes by its decisions the limit for tariffs. As for the regions – Federal commission of energy calculates and fixes tariffs for them individually. Besides, there is analysis of financial and economic activity of organizations for electric energy to estimate economic validity of the tariffs fixed by regional commissions of energy. In 2002 the limit level of the tariffs was 35 % and actual increase 27 % - according to the information of State committee for statistics of RF and 24 % - according to the information of FCE. By the year 2003 maximum levels of tariff increasing fixed at 14 % (including tariffs at Federal stock market of energy and power – 19 %). By preliminary calculation of FCE in 2004 increase of average tariff by influence of federal and regional factors should be 11,1 %, but after open hearings with regional commissions of energy and JSC- energy prognozes for 2004 increase of average limit tariff in RF was corrected for 13,1 %.

2.5.5. Risks related with the issuer's activity.

A number of cases of paying off one's debts is in the process in different instances to budjet and off-budget funds.

Three filial companies were declared bankrupt. Bankruptcy proceedings started in LTD «Supervolokno», JSC «Andreievskoie». External control for 12 months was set in JSC «Kuzbasshydroenergostroy».

III. Detailed information about the issuer

3.1. Information about the issuer's establishment and development.

3.1.1. Information about the issuer's company name.

Full company name and abbreviation:

Kuzbass Joint stock Company of energy and electrification

(JSC «Kuzbassenergo»).

Before the privatization – Kuzbass industrial institution of energy and electrification ("IIEE "Kuzbassenergo")

Kuzbass Open Joint Stock Company of energy and electrification (OJSC "Kuzbassenergo")

Introduced: 30.12.1993

Kuzbass open joint stock company of energy and electrification (JSC "Kuzbassenergo")

Introduced: 15.05.1996

3.1.2. Information about state registration of the issuer

Date of state registration of the issuer: 30.12.1993

Number of state registration's certificate (other document ratified the state registration of the issuer): 1901

Name of registration authority: Kemerovo Administration

In accordance with Federal Law "On State registration of legal entities" the corresponding record under the state registration number 1024200678260 was made in the Uniform State Register of Legal Entities the 23rd of July 2002 (certificate: series 43 №001926135 issued by Administration of the Russian Ministry of Taxation in Kemerovo, Kemerovo region).

3.1.3. Information about the issuer's establishment and development.

In pursuance of the Decrees issued by the President of the Russian Federation, i.e. № 923 dd. August, 15, 1992 « About the organization of management system of the electric-power complex of the Russian Federation during privatization », № 1334 dd. November, 3, 1992 « About realization in the electric-power industry of the Decree issued by the President of the Russian Federation dd. August, 14, 1992, № 922 « About features of transfer of the state enterprises, institutions, organizations of fuel and energy complex into the joint-stock companies », № 721 dd. July, 1, 1992 « About organizational measures in the transfer of the state enterprises, voluntary associations of the state enterprises into the joint-stock companies », the Committee on administration of the state property of Kemerovo region has made the Decision № 330 « On privatization and transfer of IIEE "Kuzbassenergo" into the Kuzbass open joint-stock company of energy and electrification » dd. 21.09.1993.

The Order № 345 « About registration of open joint-stock company "Kuzbassenergo" was approved by Kemerovo Administration the 30th. 12.1993.

The issuer was established in accordance with a privatization schedule of the Kuzbass industrial institution of energy and electrification (IIEE "Kuzbassenergo").

The main purpose of the JSC "Kuzbassenergo" activity is the profit earning.

The common purpose of the privatized companies was increasing of the efficiency of energy system of the country and transfer from the planned economic to the market relations.

JSC "Kuzbassenergo" is one of the largest energy systems in the body of the Holding company JSC RAO "UES of Russia". Energy complex of the company is the sixth in the installed capacity and the fifth in the volume of energy output to the consumers. Quantity of power output by electric plants of JSC "Kuzbassenergo" exceeded 30% in the balance of UES of Siberia.

In the energy system there are eight heat electrical stations. Their summary fixed electrical power – 4667 MV, heat power – 6700,5 Gcal/h. Annual electrical energy output – 26-28 млrd. KW-h. Annual heat energy delivery – 15-20 млn. Gcal.

There are four electrical network companies realizing receiving, transition and distribution of electrical energy. On their balance there are 4601 substations with a summary power 12984 tousand KW. Extension of electrical network by chains – 31117 km.

Mission of the company:

Mission of the company is the regular and reliable supply our consumers with heat and electric power providing production efficiency and investment appeal of the company.

Corporative values and business principles:	
Corporative values:	**Business principles:**
Motto: We are the team of professionals, open for business cooperation and constantly striving for perfection	1. Legality.
1. Catering for the client.	2. contractual obligations observance
2. Reputation of a reliable partner.	3. Work for the sake of shareholders.
3. Constant development of systems and technologies, which provide for high-quality production and service.	4. Optimal usage of resources and expenses
4. Profit maximization and optimization of resources usage.	5. Government relations.
5. Staff professionalism development.	6. Information transparency
6. Openness for new decisions and ideas.	7. Sharing Corporative code between the staff.
	8. Willingness for changes.

Strategic aims:

1. To increase reliability of heat and electricity provision to the consumers.
2. To provide planned profitability of assets: year 2004 – no less than 3 %.
3. To increase financial steadiness of the company to the coefficients: year 2004 – V3, year – V2.
4. To increase sales volume, including via FREC.
5. To form positive image of the Company.
6. To achieve internal unity in understanding of the mission, aims and tasks of the Company activity.

3.1.4. Contact information:

Issuer's location: **№ 30, Kuznetsky prospect, GSP-2, Kemerovo, Russia**

Telephone: *(384-2)29-33-59*
Fax: *(384-2)29-37-77*

e-mail: *adm@kuzbe.elektra.ru*

Internet webpage with access to information about the issuer and securities issued by him: *www.kuzbassenergo.ru*

Organizational structure of the executive body of JSC "Kuzbassenergo" was approved by the Order of JSC "Kuzbassenergo" №709 dd. 31.12.2003. Department on corporate management including department on corporate policy which duties include work with shareholders and investors was established on the ground of this Order. The Department functions from 01.01.2004. Chief of the Department – is Mr. Pavel Valerievich Cherpinskiy, date of birth 1974, education – higher.

Location: **№ 30, Kuznetsky prospect, GSP-2, Kemerovo, Russia**

3.2. Principal economic activities of the issuer

3.2.1. Industrial affiliation of the issuer

All-Russian classifier of types of economic activities (ARCTEA):

40.10.11 – Electric power production by heat electric-power stations
40.10.2 – Electric power delivery
40.30.2 – Delivery of steam and hot water (heat energy)
51.56.4 – Wholesale of electric and heat power (without delivery and distribution)
74.60 – Investigation and safety securing
74.14 – Commerce and management consulting

3.2.2. Principal economic activity of the issuer

JSC «Kuzbassenergo» main activity is electric and heat energy.

Name of unit	Year 1999	Year 2000	Year 2001	Year 2002	Year 2003	1 quarter 2004
Electric energy output, mln. KW/h	26938,9	26599,8	26438,0	27185,0	24867,0	7005,0
Supplied heat to consumers, thousands of Gcal		17745,7	16320,0	14403,	14654,0	5853,0

Heat-energy producing is seasonal.

3.2.5. Principal types of products (operations, services)

Name of unit	Year 1999	Year 2000	Year 2001	Year 2002	Year 2003	1 quarter 2004
Product producing volume - Useful delivery of el. energy, mln.kw/h - Useful delivery of heat energy, thousand Gcal	25572,263 17526,767	26622,448 16901,366	27224,616 15425,989	26618,052 13523,948	25804,994 13688,506	6028,483 5549,754
Average annual price of product, - Electric energy, kop./kw/h - Heat energy, rub./Gcal	18,178 78,480	25,793 104,725	35,943 137,965	44,422 180,451	51,904 235,013	55,370 264,312

Gain volume from product sales (works, services), thousand rub.	6022092	8636784	11913608	14264605	16592978	4804865
Share in total volume of gain, %	87,40	80,06	94,26	96,32	97,64	97,78
Correspondent price index, %	101,2	101,0	101,2	100,5	100,0	103,4

Marketing system:

Name of product (works, services)	Product sales scheme (works, services)	1999	2000	2001	2002	2003	1 кв-л 2004
	Direct sales, %	100	100	100	100	100	100
	Own marketing net, %	-	-	-	-	-	-
	Marketing net under control, %	-	-	-	-	-	-
	Other (to mark), %	-	-	-	-	-	-

Production and marketing inputs structure:

Input article name	Year 2003	1 quarter 2004
Raw materials, %	1,0	1,1
Obtained componentry, semi-finished products, %	1,8	1,6
Producing works and services, fulfilled by exterior organizations, %	1,4	1,2
Fuel, %	35,7	44,9
Energy, %	8,4	1,6
Remuneration of labour, %	6,9	6,8
Credit percent, %	-	-
Rent, %	-	-
Social needs assessments, %	2,2	2,4
Fixed assets amortization, %	11,0	11,7
Taxes, included to product prime cost, %	3,0	3,1
Other expenses, %	24,6	22,1
- service cost for using net of JSC RAO " UES of Russia"	14,6	13,8
Aamortization for non-material assets, %	-	-
Rewards for rationalizatory ideas, %	-	-
Obligatory insurance payments, %		
Representative expenses, %	1,4	0,7
Other, %	-	-
	2,6	2,8
Total: product producing and marketing expenses (works, services) (prime cost), %	100	100
Gain from product sales (works, services), %	97,64	97,78

3.2.4. Issuer's suppliers with 10 and more percent part of all supplies of inventory including indication of their parts in total volume of supplies

Main coal suppliers are LTD «Trading House Siberian Coal»), JSC «SCEC», JSC «CC Yugkuzbassugol».

Natural gas supply in 1, 2 quarters of 2003 was realizing by Ltd «Megregiongaz», and from May to December of 2003 together with JSC «SIBUR».

Supplier's name	Year 2003	1 quarter 2004
Ltd. «TH Siberian Coal»	38,0 %	38,0 %
JSC «SCEC»	18,0 %	18,0%
JSC CC «YuzhKuzbassUgol»	13,0 %	13,0 %

3.2.5. Seller's markets of products (operations, services) of the issuer

The main market on which JSC «Kuzbassenergo» realizes its activities is Kemerovo region. Geographically Kemerovo region is situated on the south-east of Western Siberia also situated at the interfaces between Western-Siberian plain and South Siberia mountains. It is practically equidistant from western and eastern boundaries of Russian Federation. It belongs to the 6th time zone.

Electric power delivery to consumers is being realized according to signed «Contracts for electric power delivery and usage». The main consumer of electric and heat energy is industry,for example:

Изменение структуры потребления за 2003 г.

Electricity	Year 2002	Year 2003
Total in energy system, thousand kw/h	**26618051**	**25770806**
	100,0 %	**100,0 %**
1. Industry	72,7 %	73,2 %
1.1. Fuel	20,5 %	21,4 %
1.2. Ferrous metallurgy	25,2 %	28,4 %
1.3. Non-ferrous metallurgy	18,2 %	14,3 %
1.4. Chemistry and petrochemistry	5,2 %	5, 4 %
2. Agriculture	1,0 %	1, 0 %

3.2.6. Activity practice on issuer's working capital and stock

In accordance with The Accounting Policy Community on 2004 materially-productive resources while registered are being valuated with the whole methods:

- ***When purchased – in sum of actual expenses for their acquisition excluding VAT and other taxes compensated from the budget;***

- ***When producing by own forces – going from actual expenses, connected with producing of given supplies;***

- ***paid in towards deposit to authorized capital – going from the monetary valuation co-ordinated with the founders(participants),if there is no other way, foreseen by RF legislation, taking into account actual expenses for supply of materially-productive stocks and conditioning them as to be fit for usage;***

- ***got gratis or by a gift contract, as well as remaining from fixed assets and other property, posting materially-productive stocks, discovered as excess according to the results of inventory – going from the current market-value on the posting day, taking into account actual expenses for supply of materially-productive stocks and conditioning them as to be fit for usage;***

- ***cost of inventories, received by barter contracts where the contract value is fixed.***

Evaluation of inventories while letting them to production and other retire realizes by average prime cost of each type of stocks.

For the control of amount of stocks, duration of circulation while consisting accounts the following coefficients are calculated:
- turnover coefficient (C) for the reporting period;
- duration of turn (D)
For the year 1999: K= 7,9 circulation, Add = 11 days.
For the year 200: K= 13 circulation, Add = 28 days.
For the year 200: K=9,3 circulation, Add= 39 days.

For the year 2002: K= 12,8 circulation, Add= 28 days.
For the year 2003 год: K= 13,7 circulation, Add= 26 days.
For the year 1st quarter 2004: K=4,8 circulation, Add= 19 days.

3.2.7. Raw materials

In the year 2003 main type of fuel at electric stations of JSC «Kuzbassenergo» were Kuznetskiy coal and the tailings of their ore-dressing. Secondary tailings by JSC "ZSMK", JSC "KOKS": blast-furnace gas and coke oven gas were used in large amounts.
Fuel oil is used as starting fuel and for keeping burning within incineration of poor quality coal. At Zaiskitimskaya water-heating boiler-house it is the main type of fuel.

Analysis of fuel cost changes as compare with the year 2002.

Fuel type	Unit	Year 2002	Year 2003	2003/2002 increase in %

Expiry date: *31.12.2006*
License authority: **Committee of natural resources on the territory of Kemerovo region**
Type of activity: **Plastic clay extraction at the Frunzensky field to ash-dump dam construction.**

Number: *24*
Date of issue: *13.11.2001*
Expire date: *13.11.2004*
License authority: *Ministry of Energy of RF, State Energy Inspectors*
Type of activity: **Electric and Heat power network**

Number: *077*
Date of issue: *14.10.1997*
Expire date: *1.10.2008*
License authority: **Department of Federal Security Service of RD over the Kemerovo region.**
Type of activity: Works with the State Secret information

Number: *0107*
Date of issue: *12.03.1998*
Expire date: *1.10.2008*
License authority: **Department of Federal Security Service of RD over the Kemerovo region**
Type of activity: **Services on the State Secret protection.**

3.2.10. Joint activities of the Issuer

Founders of filial JSC «Prokopievskenergo»:
- *JSC "Kuzbassenergo" (60,0 %)*
- *OOO «Stroisnabservice» (Kemerovo)(14,1 %)*
- *OOO «Bill Centre Kuzbassenergo» (13,0 %).*

Joint activity type: Heat and electricity salling
Joint activity from: 20.09.2000

Founders of filial JSC «Vodokanal»:
- *JSC "Kuzbassenergo" (74,5 %)*
- *Ltd. «A/E Clearing»(Novokuznetsk) (25,5 %).*

Joint activity type: Clearing constructions.
Joint activity from: 28.10.2001

Founders of the filial Ltd. «Supervolokno»:
- *JSC "Kuzbassenergo" (60,0 %)*

- *UN-1612/29 (25,0 %)*
- *JSC «Bagran» (15,0 %).*

Joint activity type: Lagging production.

Joint activity from: 01.04.1994 г.

3.4. Issuer's future activity projects

Tasks and prospects of the Company in the year 2004

1.Reformation of the Company

The major purpose of the JSC "Kuzbassenergo" in the year 2004 will be providing profit earning, increasing of the company's capitalization and increasing of its shares attractivness for the Russian and foreign investors.

This task is to be realized within the limits of Restructuring programme of JSC RAO «UES of Russia», approved by the RF government regulations dd. 11.07.2001 № 526 «About reforming of electrical energy of Russian Federation», by the RF Government order dd. 03.08.2001 № 1040-r «About the plan of arrangements of fisrt stage of reforming of electrical energy of Russian Federation.

The main purpose of reforming is to form on the base of JSC «Kuzbassenergo» profitable and financially stable branch companies able to compete at the electrical energy and service markets,to provide reliable and uninterrupted supply consumers with electrical and heat energy, and to be able to attract investments for own development.

The project of reforming the Company is to provide observation rights and interests of shaholders, investors, partners and emploees of the Company.

The project of reforming JSC «Kuzbassenergo» is prepared taking into consideration the following principles:

- division of competitive and monopolistic types of activity;
- demonopolization and development of competition in the sphere of production, sale and servicing (repair, setting up,projecting etc.);
- providing equal access to market infrastructure for all producers and consumers;
- providing rights of investors, creditors and shareholders while keeping structural transformations;
- using the very optimal methods of creation new economic communities and giving assets to them;
- creating commercially effective companies as a result of reformation of JSC «Kuzbassenergo;
- increasing investment attractiveness and attracting investments in the Company;
- stopping cross financing of different consumer groups for electrical and heat energy;
- providing an opportunity of option the energy supplier for the consumers;
- providing reliable and uninterrupted energy supply of the consumers;
- increasing of financial clearness of the Company's activity, formed as a result of reforming;
- preparation to work with consumers in competitive conditions.

The speed of profile activity reformation in the Company will be coordinated with the speed and scale all-russian reformation the Energetical industry, inculcating market relations and competition at the energy production and sale as well as enforcement of regulating in naturally- monopolistic activity (electrical energy transfer), preparing of the market infrastructure and legislative base of the electrical energy market.

To provide reliability of the work of stations and timely replacement of exhausted technological equipment is necessary:

- ***to finish building and to provide putting the copper T-120-12,8 into operation at Novokemerovskaya TPS in 2005;***
- ***To continue build-up of the existing dams for gold and to start building new ones, where the reserve stocks capacity ZSHO are limited by potential filling.***

At the nearest 2-3 years due to technical reequipment it is necessary to make the following works that influence on the system reliability:

- *Putting into operation turbine St. № 4 of type PTR –30 LMZ at Кемerovo TPS (220 мln. rub.);*
- *Putting into operation the system of commercial accounting heat energy at Southern-Kuzbass HRES, Western-Siberian TPS and Administration of heat nets (15 мln.rub.);*
- *Turbine replacement St. № 9 of type P-35-130 to turbine T-120-12,8 at Кемerovo HRES (600 мln. rub.);*
- *Turbine replacement St. № 8of type ТП-50-130 to PTR-80-130 at Novokemerovskaya TPS (500 мln. rub.);*
- *Turbogenerator cell reconstruction St. № 3 and replacement T-25-90 to R-12-3,4/0,1 and turbine № 12 R-12-90 at Kuznetskaya TPS (100 мln.rub.);*
- *Copper reconstruction St. № 7 of type TP-10 to reduce Nox at Том-Usinskaya HRES (4 мln. rub.);*
- *Purchasing and assembling of mill SH-50 at Том-Usinskaya HRES and Belovskaya HRES (50 мln. rub.);*
- *Main steam pipe sections replacement at Kemerovo HRES, fuel-starting at Том-Usinskaya HRES and feeding collector at Кемerovskaya TPS (10 мln. rub.);*
- *reconstruction of electric filters of coppers st.. № 11,12 reaching efficiency factor to 99,5 % at Кемerovo HRES and monitoring circuit and a protector at a copper St. № 7 to prevent damage at Western-Siberian TPS (30 мln. rub.) and other works.*

3.5. The Issuer's participation in industrial, bank and financial groups, holdings, trusts and associations

Company: *JSC Russian Joint Stock Company of energy and electricity RAO "UES of Russia"*
Issuer's place and functions in the Company: *JSC "Kuzbassenergo" is a subsidiary of Holding company RAO "UES of Russia"*

3.6. Subsidiaries and affiliated business divisions of the issuer

JSC "Kuzbassenergo" has 10 subsidiaries, no dependent unions.

3.7. Composition, structure and cost of the issuer's fixed assets, information about its plans to acquire, replace, dispose of fixed assets, as well as all the facts of encumbrance of the issuer's fixed assets

3.7.1. Fixed assets

In the structure of the fixed assets the lands, buildings, machines, equipment, transport and others corresponding objects with a life time no more than 12 months are shown.
The objects of the fixed assets were taken to account over the actual expenses for purchase and construction.

Depreciation of the fixed assets was added by a linear way from the terms of actual using of these objects. Over the objects of the fixed assets subject to accounting by 01.01.2002, depreciation was added in accordance with the Regulations adopted by the Sovmin of USSR dd. 22 of October 1990 № 1072 "On the unique norms for depreciation deductions to complete reconstruction of the fixed assets of USSR national economy".

Over the objects of the fixed assets subject to accounting since 01.01.2002 the depreciation was added in accordance with the Resolution adopted by the RF Government dd.01.01.2002 №1 "on classification of the fixed assets included in the depreciation groups".

Since 1999 the JSC "Kuzbassenergo" spend a revaluation of the fixed assets with the aid of experts of the closed joint stock company "ENPI Consult (ZAO "ENPI CCONSULT") (№14, Dukhovsky pereulok, Moscow, 113191, Russia, INN 7737017200 according to the license №000031 for valuator's activity issued 06.08.2001 by the Ministry for Property of Russia.

According to the technical task the revaluation of the fixed assets is carried out by way of indexation of a direct re- appraisal of overall replacement value of the fixed assets. All materials should be in written report form, and on magnetic mediums.

1.Revaluation is obligatory for the following groupes of fixed assets, no matter what is amount of bookkeeper wear:

Name of group FA	Ciphers ENAO
Constructions VL 220 KW and more	30009, 30119-30120
Machines and equipment Substations 220 KW and more; other power electrotechnical equipment and distribution devices;	40000-40700 40701 40702 40705-42912
Vehicles	50000-50302 50500-50709

2. The following groupes of fixed assets do not subject to revaluation as well as the objects of social and common purposes, objects of nonspecialized business:

Name of group FA	Ciphers ENAO
Industrial buildings	10000-10010
Constructions	20000-30118 (with a restriction on p.1) 30121-30124
Other groups of equipment	43000-49303
Vehicles (rolling-stock of automobile transport)	50400-50428
Industrial and household equipment, instrument	60000-70012
Plough cattle	80000
Perennial plantations	90000-90021

Nonproductive buildings	10011-10105, 20362-20368 By name: A kindergarten, a preventorium, a hospital, a dwelling house etc.
Nonspecialized business	10011-10105, 20362-20368 By name: An agricultural enterprise, a shop, a storehouse, a building materials enterprise, consumer goods producing, autoservice etc.

3. Revaluation of the enterprise № 55 (Kuzbassenergosvyaz)was not fulfilled.

4. Revaluation of unfinished building objects and equipment was not fulfilled.

5. Revaluation fulfilled by independent valuators by the way of indexation and direct recalculation.

Information about other investments (deposits to authorized capitals of limited liability companies) is not given because they are less than 10 % of total investments of JSC "Kuzbassenergo"by the end of the 1 quarter 2004. Resulting 2003 JSC "Kuzbassenergo" got a profit from other companies participation in amount of 1,7 mln. rub. by Ltd. «Bill centre Kuzbassenergo» only.

4.3.5. The issuer's intangible assets

In the contents of intangible assets the exclusive rights to the Company's trade mark were reflected. Amortization of intangible assets has been imposed by linear method, going from the following terms of useful usage: Rights to trade mark - 10 years.
The intangible assets are shown in the accounts according to the first cost exept amortization for the time of using.

№№	Name of non-material assets group	Overall cost	Size of amortization calculated
1.	Trade mark	3774 rub. 73 kop.	601 rub. 20 kop.
	Total, rub.	3774 rub. 73 kop.	601 rub. 20 kop.

Intangible assets accounting was made in accordance with PBU 14/2000 " Intangible assets accounting", approved by the order of Ministry of Finence № 91n by 16.10.2000.

4.4. Information about the issuer's policy and expenditures in the sphere of scientific and technological progress, in respect of licenses and patents, new research and development

Account of NIOKR (Research, developmental and technological works) in the Company is carried out according to the Accounting Regulations "Account of charges on research, developmental and technological works " (PBU 17/02).

There were not newly created inventions, models and industrial samples in 2003.

There were not sold or purchased patents, licenses and "now-how"in 2003.

Scientific researches were carried out according to the fixed plan dd. 30.01.2003amounting 12200 thousand roubles. Actual expences on scientific researches were 10097thousand roubles including capital investments due to NIOKR fund amounting 2635 thousand roubles. Financing of very necessary works was realized at the expence of the profit. The contract with off-budget fund NIOKR RAO «UES of Russia»was not signed and there was no financing.

4.5. Overview of the new trends in the sector of the issuer's core business

Policy of interaction with shareholders at the principles of openess was started in 1999. Increasing of the consumers' indebtness was stopped while the volume of gain reached on average 80%. During 1999the increase of prices on the products of industrial enterprisespassed ahead the increase of tariffs for electric energy in 2,5times for this group of consumers. A new policy for enery provides reforming of sale and marketing, increasing export of electricity, tariff policy forming. The conception of restructurization of RAO UES of Russia has begun.

Structural reorganization of power branch through liberalization and decontrol of potentially competitive sectors were the main tendencies for the last ten years of world power industry development.

Due to these principles, the Concept of Strategy of reforming of the Joint Stock Company "RAO UES of Russia " "5+5" was developed and created. Nowadays this Concept is realized successfully by the management body "RAO UES of Russia " also by management of regional power companies.

On July, 11, 2001 the Decision № 526 « On reforming of power industry of Russian Federation » was approved by the Government. It directs to:

1. Divide business into monopolistic and competitive components. Generation and supply should be allocated as competitive business. Thus the Federal networks (FSK), Distributive network companies (DNC), and dispatching activity (System operator) will be under supervision of the State.

2. Create a competitive energy market implied a transition of existing sales process at the directive price (FOREM - Federal Wholesale Electric Power Market) to the market pricing mechanism (creation of AMT Administrator of market trade).

Decree of the Government of RF №1040-p approved the Schedule of activities for the primary stage of reforming was adopted as development of this present Decision.

In August, 2001 the Committee on reforming has been established at Board of directors of RAO " UES of Russia ". Its composition included representatives of minority shareholders, potential investors, the State and RAO " UES of Russia ". On December, 21 the Government of Russian Federation has approved the Decision № 881 " On the criteria of transfer of the main transmission lines and objects of the power network economy to the Unique (all-Russian) power network ".

Principal facts of the year 2002 in the sphere of reforming were the following:

- adoption by the State Duma of RF in its first regarding a pack of the bills devoted to energy power reforming;

- spending of auctions of electric power in the imitation mode by the NP "ATS" together with JSC "SO-TsDU UES" ;

- creation of infrastructural institutions in the branch, i.e. the Federal Network Company and the Sysop;

- preparation of a strategy for reforming of RAO "UES of Russia";

- termination of a preparatory stage of reforming of RAO "UES of Russia";
- development and adoption of the basic variant of reforming of JS-energo;
- preparation to implementation of the pilot projects of reforming of JS-energo;
- spending of the first stages of reforming of the scientific and designing complex of RAO "UES of Russia" , also of energyreparing and service activities.

By the Resolution of the Government of Russian federation №226 dd. 2 of April 2002 "On the pricing regarding to electric and heat power" the new "Pricing principles" and "Regulations of the State regulation and application of the tariffs on electric and heat power in Russian Federation" were implemented. The Corporate Policy Code was approved by RAO "UES of Russia".

In September 2002 the non commercial partnership "Administrator of trade system"(NP "ATS" began auctions of electric power in imitation mode. One of the positive tendencies of the year 2002 was approaching of the tariffs to the economic valid, otherwise the level of the cross financing between the groups of consumers reduced.

The Board of Directors of RAO "UES of Russia" approved the base variant for reforming of regional energy systems, i.e. the RAO "UES of Russia" subsidiaries, also the exit of enterprises belonging to the Holding Company RAO "UES of Russia" from the non profile assets aimed to the expenses minimization relate to the ownership. The Board of Directors of RAO "UES of Russia" has approved the decision on termination of participation of RAO "UES pf Russia" in ZAO "TsDR FOREM" by way of selling of 75% holding of stock belonging to ZAO "TsDR FOREM" to the Non commercial partnership "ATS".

On the night of April, 1, 2003 the function of operative - dispatching administration of the Unified Energy System of Russia were transferred from regional dispatching administrations (RDA) of JS – energo to the regional dispatching administrations (RDA) , i.e. to the subsidiaries of JSC " System operator – Central Dispatching Administration of Unified Energy System (CDA UES").

In April 2003 the pack of legislative acts on electric power reforming came into the force including such federal laws as:
- "On electric power" ;
- "On the features of electric power functioning during the transition period and on the modifications in some legal acts of Russian Federation, and on recognition as invalid some legal acts of Russian Federation due to adoption of Federal Law "On electric power";
- "On modifications and amendments to the Federal Law "On the Sate regulation of tariffs on electric and heat power in Russian Federation";
- "On modifications and amendments to the Federal Law "On the Natural monopoly";
- «On modifications and amendments to the second part of the Civil Code of Russian Federation";
- "On modifications of the Federal Law "On energy power saving".
Working group on modification of the Strategy of JSC RAO" UES of Russia " for the years 2003 - 2008 "5+5" created at Board of Directors of RAO " UES of Russia " has examined the Program of the Concept of the Strategy of RAO " UES of Russia " for the years 2003 - 2008" 5+5 taking into account the remarks and offers.

In the 1 half-year 2003 the process on enhancement and development of the mechanisms for competitive trade within the regulated wholesale market of electric power (capacity) proceeds. According to the existing normative legal documents monthly auctions of the above-planned electric power were spent, the volume of electric power subjects to selling at the auctions amounted 3,1% of the volume of supply to the home market.Together with JSC"SO-CDU UES of Russia" (System operator – Central Dispatching Administration of Unified Energy System) in the I six months 2003 the trade of electric power over the scheme "Energopul" proceeds, the share of sale for the reporting period increased twice and amounted 1,3% of the total volume of the supply to the FOREM (home market).

The 31st of October 2003 the Board of Directors of RAO "UES of Russia" at the ordinary meeting heard information on the possibility of creation of the territorial generating companies (TGC) by way of co-incorporation by several JS-energo.

Variant of creation of TGC by way of co-incorporation is implicate its creation as a large operational company at the first stage of JS-Energo reforming. TGC shall be co-incorporated by several JS-energo by way of entering of their generating assets to the chartered capital of the newly created company. Thus it's a possibility at the early stage to create a large operational company whose shareholders will be incorporated it JS-energo.

According to the Resolution of the Government of RF №643 dd. 24.10.this present year "On the rules of the electric power (capacity) market during the transition period", since November, 1, 2003 at the same time with the regulated sector of the wholesale electric power market (existing Federal wholesale electric power (capacity) market) the competitive sector supposing the trade in hourly volumes of the electric power on free prices is started.

Thus in the free sector each manufacturer may offer up to 15 % from the fixed capacity, and each consumer can declare purchase up to 30 % from own scheduled consumption. Now the sector spreads only to the European part of RF and Siberia.

Economic benefit of the free sector of the wholesale electric power market launching is obvious. Densities of electric power supply by heat power plants with rather low industrial expenses has increased, while the supply by "expensive" generating capacities, on the contrary reduced.

In March 2004 allocation of repairing activity was finished according to the Program on energyreparing activity of JSC "Kuzbassenergo" approved by the Design Group on reforming of energyreparing activities and creation of technological services market of JSC RAO "UES of Russia" dd. 01.07.2003.

Subsidiary named "Maghistralnye electric networks" (Main-line electric networks) was created within the activity on reforming of electric network complex on the ground of the property complex on trunk transmission lines related to the Unique national electric network.

8.7. Information about legislative acts regulating the issues of capital import and export which can affect payout of dividends, interest and other payments to non-residents

Federal law of 09 October 2002 No. 3615-1 "On currency regulation and currency control (with changes and additions on 29.12.1998, 05.07.1999, 31.05.2001, 08.08.2001, 30.12.2001, 31.12.2003, 27.02.2003, 07.07.2003.) is the principal legislative document regulating the issues on the capital import and export.

Furthermore the group of Federal laws ratifies agreements on avoiding a double taxation between Russian Federation and foreign countries.
Nowadays a regime on avoiding a double taxation is in force with more then 50 countries. For example:

1. ***Federal Law # 167-FL " dd. 17.07.1999 " on ratification of Agreement between the Government of Russian Federation and the Government of Cyprus republic on avoiding a double taxation concerned profit tax and capital tax".***
2. ***Federal Law #18-FL dd. 08.02.1998 "On ratification of a Convention between the Government of***

Russian Federation and the Government of French republic on avoiding a double taxation and prevention a tax bilk and violation of legislation concerned profit tax and property tax"

3. *Federal Law #65-FL dd. 19.03.1997 "On ratification of Convention between the Government of Russian Federation and the Government of United Kingdom of Great Britain and North Ireland on avoiding a double taxation and prevention tax bilk concerned profit tax and property price appreciation" and Agreement between the Government of Russian Federation and the Government of United Kingdom of Great Britain and North Ireland on some Convention's provisions application concluded in form of the notes exchange dd. 15.02.1994.*
4. *Federal Law #42-FL dd. 26.02. 1997 "on ratification of Agreement between Government of Russian Federation and the Government of Canada on avoiding a double taxation concerned profit tax and property tax."*
5. *Federal Law #158-FL dd.18.12.1996 "on ratification of Agreement between the Russian Federation and Federal Republic of Germany on avoiding a double taxation concerned profit tax and property tax".*
6. *Contract concluded between the Russian Federation and United States of America subject to avoid a double taxation and prevent a tax bilk concerned profit tax and capital tax (Washington, 17.06.1992).*
7. *Convention concluded between the USSR Government and the Government of Japan subject to avoid a double taxation and prevent a tax bilk concerned profit tax (Tokyo, 18.01.1986).*

8.8. Description of the order of taxation of revenues from the issuer's issued securities placed and in floatation

Order of taxation of revenues from the issuer's issued securities (dividends- on shares, interests – on bonds) shall be adjusted by the Tax Code of Russian Federation.

Table 1: Taxation of legal entities profit tax on the floated securities (subject to floatation) in form of dividends in accordance with legislation if force as for a date 2004:

№№	Category of securities owners	
	Legal entities – tax residents of RF	Foreign legal entities – (non-residents), getting profits from the sources located in RF
1.Profit's name on the floated securities	**Dividends**	
2. Security tax	Profit tax	
3. Tax rate	9 %	15 %
4.Order and terms of tax payment	Profit tax in form of dividends shall be collected from the source of such tax payment and shall be transferred to the budget by tax agent exercised this payment within 10 days form the date of tax payment.	Amount of the tax withheld from the foreign organizations shall be paid to the budget by tax agent at the same time with profit payment in a currency of this profit payment or in a currency of RF at the official rate of Central Bank as for a date of payments.
5. Features of taxation order for this category of securities owners	The total sum of the tax from the sum of dividends is defined as product of tax rate and a difference between the sum of the dividends subject to distribution between shareholders (participants) in the current tax period, reduced on the sums of dividends subject to payment by the tax agent in the current tax period, and the sum of the dividends received by the tax agent in the current accounting (tax) period and the previous accounting (tax) period if the given sums did not participate in calculation under definition of the taxable income as dividends earlier. In case the received difference is negative, the duty on tax payment does not arise also compensation from the budget is not made	Elimination of double taxation. For exemption of taxation or application of a preferential taxation regime the tax payer (foreign organization) should confirm to the tax agent paying the profit before date of the profit payment that he is a resident of the state, with which Russian Federation has the international contract (agreement) adjusting taxation issues. Such confirmation should be certified by the authorized body of the corresponding foreign state. In a case non confirmation before the date of profit payment the tax agent is to obliged to withhold the profit tax of foreign organization. In accordance with par. 2 of art. 312 of Tax Code of RF (part 2) foreign profit recipient has right to reimburse the early withheld profit tax paid by him earlier within 3 years from the date of tax period termination when the profit tax was paid off under condition of granting by the foreign addressee of the income in the tax body according the place of registration of the tax agent of corresponding documents (list is in art. 312 of the Tax Code of RF (part 2). Repayment of early withheld and paid tax shall be fulfilled within the month from the date of application and aforementioned documents.

Insurance indebtness to the Pension Fund amounting of 119 684 thousand roubles was restructured in 2001 in accordance with the Government resolution № 699 dd. 01.10.2001.

Accounts receivable for the payments to the Social insurance fund amounting 2 639 thousand roubles was formed because of increase of using fund assets over the charged sums.

3.17. Result of extraordinary surcomstances

thousand roubles

Index	Income		Expences		Financial result	
	Reporting period	Similar period of the last year	Reporting period	Similar period of the last year	Reporting period	Similar period of the last year
Income and expences from extraordinary surcomstances – total	4 856	9 595	3 753	6 568	1 103	3 027
Including:						
- insurance money	4 837	9 579	X	X	X	X
- cost of tangible assets	19	16	73	753	-54	-737
- writing off losses	X	X	3 680	5 815	X	X

For the year 2003 the expences of the JSC "Kuzbassenergo" by force majeure were 3 753 thousand roubles., that is 42,9 % less,than in 2002.

The main reason of force majeure – power lines theft. Tha main component of force majeure income – insurance payments.

It should be mentioned that in the reporting period the part of insurance money was received by insurance cases that took place in the previest period that explains positive financial result by force majeure. The amount of income exceeded the amount of loss on 1 103 thousand rub. if taking in to consideration the insurance money.

3.18. Activity to finish

According to the decision of the Booard of the directors of JSC «Kuzbassenergo» dd. 01.07.03. (Minutes 1/9) filial JSC «Kuzbassenergo» «Regional dispatcher administration» was liquidated. Its functions were given to JSC «SO-TSDU UES» – «Kuzbass RDU», the property leased.

Geographical segments

Laying out the JSC "Kuzbassenergo" activity according to the geographical segments is not made because whole production and product saling takes place in one geographical region – Кемерово region.

3.22. Events after the reporting date

The events after the reporting date is the fact of economical activity, that influenced or can influence on the financial state,cash flow or the results of the organization activity that took place in the period between the reporting date and the date of signature the balance sheet of the reportig year.

Dividends

By the 2003 totals charging dividends and their payrollis not being planned. In 2003 dividends by the results of 2002 года were not charged and payrolled.

3.23. Conditional obligations

In the RF economics the pattern of developing market continue to prevail. Specifically still rough branches of industry workling for export prevails in gross domestic product (GDP).

But rapid economical growth shown in 2003 (according to the last information by State committee for statistics real GDP growth amounted 7,3 %)comes not at the expence of small amount of big companies but first of all at the expence of many hundred average companies. This new economics growths rapidly first of all at the expence of servicing internal market including the energy supply.

State of fines, penalties out of the Balance

As on the beginning of the reporting year the penalties and fines out of the balance to the budget and off-budget funds amounted 1 959 935 thousand rub. including penalties – 1 956 000 thousand rub., sanctions – 3 935 thousand rub. 1 245 953 thousand rub. was restructured from the total sum.

	Indebtness by 01.01.2003., thousand roubles					
	Fines	Restructured	Fine sanctions	Restructured	Total	Restructured
Budget	1 057 494	930 316	3 633	2 050	1 061 127	932 366
Road fund	584 226	0	0	0	584 226	0
Off-budget social funds	314 280	313 288	302	299	314 582	313 587
Total:	1 956 000	1 243 604	3 935	2 349	1 959 935	1 245 953

In 2003 not restructured indebtness by fines to the budget amounting 78 356 thousand roubles was payed off. Indebtness by fine for the Road fund was written off by decision of Kemerovo region arbitrage.

	Indebtness by 31.12.2003., thousand roubles					
	Fines	Restructured	Fine sanctions	Restructured	Total	Restructured
Budget	978 254	930 315	4 565	2 048	982 819	932 363
Road fund	51	0	4	0	55	0
Off-budget social funds	309 083	309 087	388	384	309 471	309 471
Total:	1 287 337	1 239 402	4 953	2 432	1 292 290	1 241 834

As on the end of the reporting year out of the Balance ther were penalties and fines to the budget amounting 1 292 290 thousand roubles., including penalties – 1 287 337 thousand roubles., sanctons – 4 953 thousand roubles. Restructured - 1 241 834 thousand roubles., including penalties 1 239 402 thousand roubles., sanctions 2 432 thousand roubles. Above mentioned sums were included in to the programme of restructurazation of tax payments according ti the Decision of UMNS RF for Kemerovo region № 1 dd. 31.08.2001.and the decision of IMNS RF for Kemerovo № 22 dd. 03.12.2001. The sums were formed according to the information of the rating authority accounts.

At the same time JSC «Kuzbassenergo» was to sign thre agreement abourt restructurazation of tax payments to set the financial position of thr Company right.

Thus the Company has all necessary to address IMNS RF for Kemerovo to write the part of penalties and sanctions off. The Company is going to do this in 2004.

In the RF economics the pattern of developing market continue to prevail. Prospects of economic stability depend much on the efficiency of economical measuress that the Government takes and also development of legislative and political systems.

General director ***S.H. Michailov***

Chief accountant ***A.N. Ryumova***

Deputy general director for economics and finance ***A.M. Lavrov***
