Section 4. Order Routing

(a) NTX offers two routing strategies, FIND and SRCH. Each of these routing strategies will be explained in more detail below. An order may in the alternative be marked Do Not Route or "DNR". The Exchange notes that for purposes of this Rule the System will route FIND and SRCH Orders with no other contingencies. Immediate or Cancel ("IOC") Orders will be [cancelled immediately if not executed,]rejected and will not be routed. The System checks the Order Book for available contracts for potential execution against the FIND or SRCH Orders. After the System checks the Order Book for available contracts, orders are sent to other available market centers for potential execution. When checking the Order Book, the System will seek to execute at the price at which it would send the order to an away market. For purposes of this Rule, a Route Timer shall not exceed one second and shall begin at the time orders are accepted

into the System, and the System will consider whether an order can be routed at the conclusion of each Route Timer. Finally, for purposes of this Rule, "exposure" or "exposing" an order shall mean a notification sent to participants with the price, size, and side of interest that is available for execution. Exposure notifications will be sent to participants in accordance with the routing procedures described in Options 5, Section 4(a)(iii) below except if an incoming order is joining an already established BBO price when the ABBO is locked or crossed with the BBO, in which case such order will join the established BBO price and no exposure notification will be sent. An order exposure will be sent if the order size is modified. For purposes of this Rule NTX's opening process is governed by Options 3, Section 8 and includes an opening after a trading halt ("Opening Process"). Routing options may be combined with all available order types and times-in-force, with the exception of order types and times-in-force whose terms are inconsistent with the terms of a particular routing option. The order routing process shall be available to Participants from 9:30 a.m. Eastern Time until market close and shall route orders as described below. Participants can designate orders as either available for routing or not available for routing. All routing of orders shall comply with Options 5, Options Order Protection and Locked and Crossed Market Rules.
